2.2	Improvement of information and telecommunication systems and other information resources of the State Tax Service on the provision of the possibility of registration of individuals within the limits of the family-based taxation and control them by the State Tax Service over the declaration and payment of personal income tax	January 2027	
VI. RENT PAYMENT			
6.1. The need for simplification of rent payment administration and the development of equal conditions of taxation for all the mobile communication operators			
Goal 1 (II): Lifting all the step-up and step-down ratios applied to the rent payment rates for using radio frequency resources for cellular communication with the simultaneous revision of rates			
Stage II: January 2023 – December 2025			

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
1.1	Development and adoption of legislative changes concerning the rejection of all increase and decrease factors applied to the rates of the rent payments for the use of radio frequency resources for cellular communication, with the simultaneous review of the size of such rates	December 2022	WG “Infrastructure Restoration”, WG “Economic Recovery and Development”
VII. ENVIRONMENT TAX			
7.1. The need for transformation of the national system of environmental taxation`s structure according to the EU classification standards			
Goal 1 (II): To introduce an environmental taxation mechanism change regarding carbon dioxide emissions (CO^2) **Goal 2 (II):** To reconsider the environment tax rates for waste disposal using the “polluter pays more” principle **Goal 3 (III):** To carry out analytical work necessary for the approximation of the current system of national environmental taxation to the EU tax system **Goal 4 (III):** To harmonize the current system of national environmental taxation in Ukraine with the EU tax system			
Stage I: June 2022 – December 2022			
1.1	Development and adoption of legislative changes necessary for the implementation of the “polluter pays more” principle	December 2022	
Stage II: January 2023 – December 2025			
2.1	Continue analytical work on the transition model from taxation of CO^2 emission to taxation of fossil fuels (oil, gas, coal, etc.), depending on the carbon content, at the production and/or import stage	June 2023	WG “Environmental Safety"
2.2	Development and adoption of legislative changes necessary for the introduction of changes in the mechanism of environmental taxation of carbon dioxide emissions	December 2023	
3.1	Carrying out analytical work on the systematization of taxes and duties following the Eurostat standards of environmental taxation, development of a “road map” for harmonization	December 2023	WG “Environmental Safety"
Stage III: January 2026 – December 2032			
4.1	Development and adoption of legislative changes necessary to harmonize the existing system of national environmental taxation in Ukraine with the EU tax system	December 2026	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
4.2.	Development and amendment of secondary legislation	Within six months after completing the task 4.1	
VIII. LOCAL TAXES			
8.1. The need to strengthen the managerial functions of the local self-government bodies; improvement of local taxes administration; strengthening the financial capability and development of local authorities			
Goal 1 (II): Grant additional powers to local self-government bodies in the part of local taxes and duties administration **Goal 2 (II):** Preparation of regulatory support for the introduction of real estate objects` estimated value for the aim of determining the tax base for imposing a tax on real estate other than a land plot **Goal 3 (II):** Development of IT decisions for the system of real estate objects for taxation aims **Goal 4 (III):** Works on filling the registries regarding real estate objects` estimated value and verifying the authenticity of data possessed by control bodies **Goal 5 (III):** Introduction of requirements for applying the tax on real estate, other than a land plot, based on the estimated value of the real estate object			
Stage II: January 2023 – December 2025			
1.1	Development and adoption of legislative changes necessary to provide additional powers to local self-governments in the administration of local taxes and duties (assistance in collection of local budgets and improving administration)	December 2023	
2.1	Development and adoption of legislative changes necessary for the introduction of the European experience of local taxation in the national tax system	December 2024	
2.2	Development and amendment of secondary legislation	Within six months after completing the task 2.1	
2.3	Development and adoption of methods and procedures for valuation of real estate for tax purposes (transition from the tax base depending on the area to the base depending on the value)	December 2025	
3.1	Development of IT solutions for real estate appraisal system for tax purposes	December 2025	
3.2.	Improvement of information and telecommunication systems and other information resources of the State Tax Service on the introduction of the appraised value of a real estate to determine the tax base for tax on real estate, other than land plot	December 2025	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
Stage III: January 2026 – December 2032			
4.1	Auditing the accuracy of tax authorities' databases in terms of data on taxpayers and objects of the real estate tax to include data in the system of valuation of real estate for tax purposes and eliminate the inaccuracy or incompleteness of the data as a result of the audit	June 2026	
4.2	Filling of registers and testing of the assessment system of real estate objects for the taxation	December 2026	
5.1	Transition to a new model of taxation of the real estate tax, other than land plot, by establishing a tax base depending on the value of a real estate	January 2027	
IX. UNIFIED SOCIAL CONTRIBUTION			
9.1. Insurers' public request on finding opportunities for lowering the burden on the wage fund with a simultaneous maintaining of financial system stability and ensuring adherence to state guarantees to the insured according to the current types of compulsory state social insurance (social guarantees in case of unemployment, accidents or professional injuries, retirement security and other payments)			
Goal 1 (II): Carry out the analytical work on determining the optimal model of accrual and payment of insurance contributions **Goal 2 (II):** Introduction of legislative amendments based on the chosen model			
Stage II: January 2023 – December 2025			
1.1	Carrying out a comprehensive analysis of the advantages and disadvantages of the current model of accrual and payment of the unified social contribution, taking into account the challenges of martial law and the economic situation in Ukraine and the world in the postwar period. Assessment of the current and optimal burden on the payroll	February 2023	
1.2	Development of possible concepts of the model. Calculating the possible implications for budgets and the economy as a result of the implementation of each concept	March 2023	
1.3	Discussion of model concepts with state and local authorities, international partners	June 2023	
2.1	Development and adoption of legislative changes necessary for the implementation of the agreed model	September 2023	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
2.2	Development and adoption of secondary legislation	December 2023	
X. ADMINISTRATION OF TAXES			
10.1. The need for the application of up-to-date approaches to tax audits. Introduction of electronic documentary audits (“E-audit”) for large taxpayers			
Goal 1 (I): Introduction of IT decisions for data processing of standard audit file (SAF-T UA) used for the aims of E-audit **Goal 2 (II):** Preparation and adoption of legislative amendments necessary for subsequent introduction of E-audit for large taxpayers			
Stage I: June 2022 – December 2022			
1.1	Purchase SAF-T UA data processing software	December 2022	
1.2	Development of tests for data analysis of the SAF-T UA file	December 2022	
Stage II: January 2023 – December 2025			
1.3	Training of tax officers to work with SAF-T UA file data processing software	June 2023	
2.1	Preparation and adoption of legislative changes necessary for further implementation of e-audit under the approved Concept of the Ministry of Finance of Ukraine	December 2023	
10.2. The need for ensuring online – communication between control bodies and taxpayers aimed at achieving accessibility and transparency			
Goal 1 (II): Preparation and adoption of legislative amendments necessary for providing the control bodies and taxpayers with the right of online communication during the conduction of the tax audits and consideration of taxpayers` objections, complaints, and other appeals **Goal 2 (II):** Introduction of IT solutions for online communication between control authorities and taxpayers			
Stage II: January 2023 – December 2025			
1.1	Development and adoption of the Law of Ukraine “On Amendments to the Tax Code of Ukraine" in regards to online communications	January 2023	
1.2.	Development and amendment of secondary legislation	Within six months after completing task 1.2	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
2.1	Development or acquisition of IT solutions for online communication between tax authorities and taxpayers	December 2023.	WG “Digitalization"
10.3. Presence of problems with collection, storage, and analysis of data of payment transactions` registers and ensuring control over the execution of fiscal functions of the Register on payment transactions			
Goal 1 (I, II): Audit of the use of information technologies at the Tax Service of Ukraine in part of the functioning of the data accounting system of payment transaction registers and elimination of identified shortcomings **Goal 2 (II):** Preparation of legislative amendments aimed at improving technologies for information transmitting from payment transaction registers to the Tax Service of Ukraine without the engagement of information acquirers and establishing requirements for payment transaction registers and the procedure for verification of the compliance with them **Goal 3 (II):** The development (renewal) and introduction of IT solutions according to the introduced amendments			
Stage I: June 2022 – December 2022			
1.1	Conducting an audit of the information technology (IT audit) in the State Tax Service in terms of the work of SOD RRO and elimination of identified shortcomings	December 2022	
Stage II: January 2023 – December 2025			
2.1	Preparation and adoption of amendments to the Law of Ukraine “On the use of register on payment transactions in the field of trade, catering, and services”, necessary for: - improving the technology of information transfer from registers on payment transactions to the tax authority without involving information acquirers; - establishing requirements for program registers on payment transactions and the procedure for verifying their compliance	December 2023 - December 2025	
3.1	Update of IT solutions (systems) used by the State Tax Service	In terms defined by changes	
10.4. The existence of illicit trade. The existence of unequal competitive conditions due to the necessity of adhering to the requirements of goods accounting for conscientious taxpayers			
Goal 1 (II): Introduction of compulsory goods accounting for all taxpayers in any taxation system			
Stage II: January 2023 – December 2025			

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
1.1	Preparation and adoption of legislative changes necessary to introduce a requirement for documentary proof of origin of goods for all taxpayers in any taxation system	December 2023	
10.5. Presence of a great volume of tax privileges that influence the level of tax revenues; the absence of a unified approach to introducing tax privileges			
Goal 1 (II): Lowering the amount and scope of tax privileges and developing a unified approach for the State to their introduction and control			
Stage II: January 2023 – December 2025			
1.1	Analysis of current tax privileges, cancelation of ineffective tax benefits	June 2023	
1.2	Preparation and adoption of legislative changes necessary to improve public policy in the field of granting and using tax benefits	December 2023	
10.6. A necessity for Ukraine to join the effective international system of automatic information exchange that will facilitate the fulfillment of the OECD recommendations and the need to improve the practice of international tax information exchange upon request and increase of transparency and reliability of Ukraine as a state-partner in information exchange			
Goal 1 (I): Implementation of OECD international standards on transparency and information exchange for the aims of taxation **Goal 2 (II):** Development of IT solutions for the introduction of automatic information exchange for tax purposes, as well as effective use of information			
Stage I: June 2022 – December 2022			
1.1	Preparation and adoption of legislative changes necessary for the implementation of the international standard for automatic exchange of information on financial accounts	December 2022	International experts
1.2.	Development and amendment of secondary legislation	Within six months after completing task 1.2	
Stage II: January 2023 – December 2025			
2.1	Development or acquisition of IT solutions for the introduction of automatic information exchange for tax purposes, as well as effective use of information	December 2023	WG “Digitalization”
2.2	Improvement of information and telecommunication systems and other information resources of the State Tax Service regarding the usage of tax information obtained in the framework of automatic information exchange	June 2024	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
10.7. The need for the introduction of individual models aimed at restructuring the tax debt for private persons and small and medium businesses			
Goal 1 (I): Improvement of tax debt management and repayment system aimed at reducing the bureaucracy of the procedure and administrative costs for its repayment, ensuring the maximum automatization of the tax debt repayment processes **Goal 2 (II):** Development and introduction of IT solutions for advanced tax debt management and repayment system			
Stage I: June 2022 – December 2022			
1.1	Preparation and adoption of legislative changes necessary to improve the management and repayment of tax debt	December 2022	WG “Justice”
1.2.	Development and amendment of secondary legislation	Within six months after completing task 1.2	
Stage II: January 2023 – December 2025			
2.1	Development and implementation of IT solutions for an improved system of tax debt management and repayment	December 2023	
XI. TAXATION OF CERTAIN SECTORS AND ACTIVITIES ACCORDING TO THE MEASURES OF THE RESTORATION PLAN			
11.1. Inconsistency of separate provisions of the Tax Code of Ukraine with the terminology of basic legislation on capital markets and organized commodity markets, and absence of harmonization of the taxation system in the abovementioned sphere with the tax incentives of investing			
Goal 1 (I): Regulatory improvement of the taxation procedure of capital markets and organized commodity markets **Goal 2 (II):** Development of IT solutions for ensuring effective reporting by capital markets and commodity market actors			
Stage I: June 2022 – December 2022			
1.1	Development and adoption of legislative changes necessary to improve the taxation of capital markets and organized commodity markets	October 2022	WG “Functioning of the financial system, its reform” / RPG “Capital market”, RPG “Banking system and the market of non-banking services”.

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
1.2.	Development and amendment of secondary legislation	Within six months after completing task 1.2	
Stage II: January 2023 – December 2025			
2.1	Development of IT solutions to ensure effective reporting by capital and commodity market participants	October 2023	
11.2. Lifting of tax barriers that cause unequal investment conditions at the insurance market and market of financial leasing either for consumers of non-banking financial services or for financial institutions			
Goal 1 (II): Improvement of the procedure of the insurance market and market of financial leasing taxation			
Stage II: January 2023 – December 2025			
1.1	Development and adoption of legislative changes necessary to regulate the taxation of the insurance market and the financial leasing market	December 2023	
1.2.	Development and amendment of secondary legislation	Within six months after completing task 1.2	
11.3. Resolving issues of taxation of virtual asset transactions for the objectives of Law of Ukraine “On virtual assets”			
Goal 1 (III): Improvement of institutional requirements for the functioning of the virtual assets market **Goal 2 (III):** Development of IT solutions for ensuring effective reporting by virtual assets market participants			
Stage III: January 2026 – December 2032			
1.1	Development and adoption of legislative changes necessary to regulate the requirements of tax legislation and improve the institutional requirements for the functioning of the virtual assets market	January 2026	WG “Functioning of the financial system, its reform” / RPG “Banking system and the market of non-banking services" / RPG “Capital markets”
1.2.	Development and amendment of secondary legislation	Within six months after completing task 1.2	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
2.1	Development of IT solutions to ensure effective reporting by virtual asset market participants	January 2027	
11.4. The negative influence of the unresolved issues of patronage dividends taxation on the agricultural cooperation development			
Goal 1 (II): Identification of the peculiarities of patronage dividends taxation at agricultural cooperatives			
Stage I: June 2022 – December 2022			
1.1	Preparation and adoption of legislative changes necessary for the implementation of the model of taxation of patronage dividends	December 2022	WG “New Agrarian Policy”
1.2.	Development and amendment of secondary legislation	Within six months after completing task 1.2	
11.5. Absence of full-fledged operation of accumulative mandatory pension insurance system in Ukraine and imperfection of non-governmental pension insurance system			
Goal 1 (II): Introduction of full-fledged operation of accumulative mandatory pension insurance system in Ukraine and improvement of non-governmental pension insurance			
Stage I: June 2022 – December 2022			
1.1	Preparation and adoption of legislative changes necessary to regulate the tax aspects of the functioning of private pension provision	September 2023	WG “Functioning of the financial system, its reform" / RPG “Banking system and the market of non-banking services” / RPG “Capital markets”
1.2	Development and adoption of secondary legislation	December 2023	

3. List of national projects corresponding with tasks under Section 2.3 (for the relevant task)

Project description to the task under Section 2.3	Project justification	Qualitative indicators of project implementation	Economic effect (impact on GDP, budget, employment, etc.)	Responsible authority	Required financing (million UAH)	Proposed sources of financing	Regulatory support	Related area of EU regulation (in general)
Development of an agreed concept for the transformation of the tax system of Ukraine in the postwar period **(solving problem 1.4)**	As part of the post-war recovery, Ukraine will face the issue of a significant tax system transformation, which will be associated not only with the need to take into account the peculiarities and trends of economic development in the period but to review the vectors of expenditures within public funding**. Such a discussion will require the involvement not only of national experts and representatives of the business association but**	Approval of an agreed **concept** transformation of Ukraine's tax system in the post-war period, which takes into account the requirements for Ukraine's integration into the EU and the world economy as a reliable tax jurisdiction, provides taxpayers with opportunities to fulfill their obligations and the state the opportunity to finance its obligations	Assessment is required	Verkhovna Rada Committee on Finance, Tax, and Customs Policy Ministry of Finance of Ukraine State Tax Service of Ukraine	Assessment is required	International technical assistance, IMF technical missions, OECD, Global Forum on Transparency and Exchange of Information for Tax Purposes	The Tax Code of Ukraine and other legislation, compliance with which is entrusted to the supervisory authorities.	The need should be considered. implementation in the legislation of Ukraine of the provisions of the EU Directives on the calculation and payment of taxes and tax administration (see section 7 “The main EU legislation in the field of taxation”)

Project description to the task under Section 2.3	Project justification	Qualitative indicators of project implementation	Economic effect (impact on GDP, budget, employment, etc.)	Responsible authority	Required financing (million UAH)	Proposed sources of financing	Regulatory support	Related area of EU regulation (in general)
	also taking into account the position of international Experts – OECD, Global Forum on Transparency and Exchange of Information for Tax Purposes, IMF, EU.							
Formation of a recommendation on the sequence of elaboration of the provisions of the EU Directives, which require implementation in the legislation of Ukraine on accrual and payment of taxes, tax administration	Inconsistency of Ukrainian legislation with EU tax legislation, the need for harmonization in connection with the granting of EU candidate status for Ukraine. A large amount of EU legislation needs to be implemented in case of limited resources and lack of knowledge of EU law	Development of a “road map" for harmonization of Ukrainian legislation with EU tax legislation with a justification of the most acceptable ways and sequence of adaptation	Assessment is required	Ministry of Finance of Ukraine State Tax Service of Ukraine	Assessment is required	International technical assistance, IMF technical missions, OECD, Global Forum on Transparency and Exchange of Information	The Tax Code of Ukraine and other legislation, compliance with which is entrusted to the supervisory authorities. 	Ukraine and other laws of Ukraine"	Providing regulation of urgent issues related to the military aggression of the russian federation (aggressor-state) against Ukraine and circumstances of martial law arising from taxpayers regarding the application of current requirements of the Tax Code of Ukraine and legislation, control of compliance with which is supervised by the control authorities (presented by experts involved by the National Council in the area "Finance system operation, its transformation and development"/"Tax policy")	Ukraine on finances, tax, and customs policy (development) Ministry of Finance of Ukraine (support), State Tax Service of Ukraine (support)	termination of the martial law	year following the change
1.3. The inconsistency of Ukrainian legislation with the tax legislation of the European Union, the need for approximation due to granting Ukraine the EU candidate status					
Goal 1 (II): Development of recommendations on the order of processing of the EU Directives` provisions on accrual and payment of taxes and administration of taxes that are required to be implemented in the Ukrainian legislation.					
3.1	The Law of Ukraine "On amendments to the Tax Code of Ukraine and other laws of Ukraine"	The propose of changes: Implementing requirements of the EU directives on taxation and payment of taxes, tax administration in the legislation of Ukraine	Ministry of Finance of Ukraine (development, support), State Tax Service of Ukraine (support)	Within three months after the termination of the martial law	From the first day of the year following the change
1.4. A request of taxpayers to determine and implement comprehensive qualitative transformations of the tax system in the postwar period.					
Goal 3 (II): Preparation and adoption of legislative changes provided by the Concept of Transformation of the Tax System of Ukraine.					
3.1	The Law of Ukraine "On amendments to the Tax Code of Ukraine and other laws of Ukraine".	The propose of changes: Inplementing changes in the legislation of Ukraine envisaged by the developed Concept of transformation of the tax system of Ukraine in the post-war period	Ministry of Finance of Ukraine (development, support), State Tax Service of Ukraine (support)	Six months after the termination of the martial law	According to the terms set out in the Concept

No	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
II. VALUE-ADDED TAX PAYMENT					
2.1. The inconsistency of legislation of Ukraine on value-added tax (VAT) with some of the provisions of Directive 2006/112/EU dated 28 November 2006 "On the common system of value-added tax"					
Goal 2 (II): Development of provisions and proposals for the introduction of amendments to the Tax Code of Ukraine (other legislation of Ukraine if necessary) following the results of the previous stage					
2.3	The Law of Ukraine "On amendments to the Tax Code of Ukraine and other laws of Ukraine"	The propose of changes: Bringing the provisions of the Tax Code of Ukraine to conform with the provisions of the EU tax legislation	Ministry of Finance of Ukraine (development, support), State Tax Service of Ukraine (support)	April 2026	December 2026
2.3	The Law of Ukraine "On amendments to the Customs Code of Ukraine"	The propose of changes: Bringing the provisions of the Customs Code of Ukraine to conform with the provisions of the EU tax legislation (regulation issues related to the movement goods across borders)	Ministry of Finance of Ukraine (development, support), State Customs Service of Ukraine (support)	April 2026	December 2026
III. EXCISE DUTY					
3.1. The need to perform the obligations under the Association Agreement between Ukraine and the EU (in the part of excise duty on fuel). A shortfall in revenues to the state budget. The necessity to ensure financing of special State Road Fund					
Goal 1 (I): Removal of tax privileges (duty rate "0") for excise duty on fuel					
1.2	The Law of Ukraine "On amendments to the Tax Code of Ukraine and other laws of Ukraine concerning the administration of excise tax"	The propose of changes: Increasing excise duty rates on fuel to their pre-war levels, and after that – to the minimal EU rates	Ministry of Finance of Ukraine, (development), State Tax Service of Ukraine (support)	December 2022	January 2023

No	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
3.2. The necessity of implementing an Association Agreement between Ukraine and the EU (in the part of monitoring the movement of excise goods). Improvement of administration of the excise duty on fuel and ethyl alcohol					
Goal 2 (II): Preparation and negotiation with the Tax Service of Ukraine and business entities, the legislative amendments on reflection at the SEAFEAT the data on the owners of fuel for further identification of fake operation (currently, the records are made using the places of storage and shipment).					
2.2	The Law of Ukraine “On amendments to the Tax Code of Ukraine and other laws of Ukraine concerning the improvement of the system of electronic administration of realization of fuel and ethanol spirit”	The propose of changes: Providing regulations on proper reflection in SEAFEAT **[**in Ukrainian – "СЕАРПС"**]** owners of fuel for detecting fictitious operations	Ministry of Finance of Ukraine (development, support), State Tax Service of Ukraine (support)	January 2023	July 2023
3.3. Pressure on business entities storing fuel for their purposes and removing the obstacles to exercise of their legal business activities					
Goal 1 (I): Removing pressure on business entities storing fuel for their purposes and any obstacles to exercise of their legal business activities.					
1.1	The Law of Ukraine “On amendments to the Tax Code of Ukraine’’ and to the Law of Ukraine “On state regulation of production and circulation of alcohol ethyl, cognac, and fruit, alcoholic beverages tobacco products, liquids, used in electronic cigarettes and fuel" regarding improvement of the storage of fuel for the needs of own consumption or industrial processing””.	The propose of changes: Providing regulation of licensing requirements for fuel storage sites for the subjects who use it for their consumption (reduction of responsibility for violations, accepted for the first time)	Ministry of Finance of Ukraine, (development, support), State Tax Service of Ukraine (support)	July 2022	December 2022
3.4. The need for approximation of Ukrainian legislation to the provisions of EU legislation on control over the tobaccos turnover					

No	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
Goal 1 (I, II): Regulatory control on introducing an electronic system of control over the tobaccos circulation.					
1.2	The Law of Ukraine "On amendments to the Tax Code of Ukraine and other laws on introducing the automated system of control over the circulation of tobacco products based on a unique identification, which is applied to the package of tobacco products".	The propose of changes: Providing clarification of the definition of the term "tobacco products" Improving regulation of tobacco production and circulation, reduction of illegal production, and prevention or minimization of excise tax payments Implementing provisions required for an automated control system for tobacco product circulation	Ministry of Finance of Ukraine, (development, support), State Tax Service of Ukraine (support)	June 2023	January 2024
3.5. The need for improvement of licensure for facilitating doing business and simplification of administration					
Goal 1 (II): Lifting the paper-based licenses. Application of general requirements to the procedure of licenses` issuance and cancellation on all types of activities with excise goods.					
1.2	The Law of Ukraine "On amendments to the Law of Ukraine "On state regulation of production and circulation of alcohol ethyl, cognac, and fruit, alcohol beverages, tobacco products, liquids, used in electronic cigarettes and fuel"".	The propose of changes: Imposing the application of general requirements to the procedure of issuing and annulling licenses for all types of activity with excisable goods, including the submission of applications in electronic form Implementing provisions on lifting the paper-based licenses	Ministry of Finance of Ukraine, (development, support), State Tax Service of Ukraine (support)	June 2023	December 2023
3.6. The need for regulation of consumption level of harmful to health food products in the way of excise duty introduction on them [tax on sugar-sweetened beverages]					
Goal 1 (II): Introduction of excise duty on sugar-sweetened beverages for decreasing consumption of sugar-sweetened beverages					
1.2	The Law of Ukraine "On amendments to the Tax Code of Ukraine and other laws concerning the introduction of	The propose of changes: Determining mandatory tax elements:	Committee of the Parliament of Ukraine on finances, tax, and customs		

No	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
	taxes on the consumption of health-damaging food products"	- taxpayers are producers and importers of the respective categories of goods; - types and technical characteristics of goods, such as tax object (for example, sweet drinks with the addition of monosaccharides, disaccharides, or food products containing these substances, as well as sweeteners, etc.); - the list of goods exempted from taxation – goods that place sugar and its analogs at the minimum and below the minimum level, 100% fruit juices (i.e., without sugar); products in which milk or dairy products are mentioned first in the list of ingredients, etc. Establishing the procedure of tax administration Imposing amendments to other laws on identifying and labeling sugar-containing products and their substitutes (if necessary)	policy (development), Ministry of Health (support), Ministry of Economy of Ukraine (support), Ministry of Finance of Ukraine (support), State Tax Service of Ukraine (support)		
IV. CORPORATE PROFIT TAX					
4.1. The need to implement provisions of OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations 2022 and BEPS Actions 7, 8-10 and 13 that have not been fully implemented					
Goal 1 (I): Improvement of transfer pricing rules considering the OECD Recommendations and international taxation experience					
1.1	The Law of Ukraine "On amendments to the Tax Code of Ukraine concerning the further improvement of transfer pricing rules and procedures for mutual agreement on international taxation issues"	<u>The propose of changes:</u> Reconsidering the cost criteria for recognition of transactions with related non-residents and non-residents from low-tax jurisdictions and separate organizational and legal forms controlled; Improving the mechanism of formation of the list of states (territories) and the list of organizational and	Ministry of Finance of Ukraine, (development, support), State Tax Service of Ukraine (support)	December 2022	January 2023

No	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
		legal forms of non-residents for purposes of transfer pricing; Introducing simplified documentation on transfer pricing in specific cases; Clarifying the rules of transfer pricing adjustments, as provided in Article 140, paragraph 140.5 of the Tax Code of Ukraine			
4.2. The need for developing incentives for reinvestment in capital expenditures for corporate profit tax taxpayers					
Goal 1 (I): The development of incentives for replacing outdated, worn-out, lost, and damaged manufacturing equipment through reinvestment					
1.1	The Law of Ukraine "On amendments to the Tax Code of Ukraine on the creation of incentives for reinvestment in capital expenditures"	<u>The propose of changes:</u> Introduction of the tax exemption for corporate profit tax on the amount of the tax charged to the payment of the corporate profit tax, which is spent for the purchase of new production fixed assets (equipment) for replacement of worn and/or obsolete, lost and/or damaged due to the warfare [*Such legislative changes may provide for a reduction in the amount of corporate profit tax accrued for the respective tax (reporting) period for the amount of expenses, incurred in such periods, which are associated with the implementation of measures to replace (renew) taxpayer's fixed assets]*	Ministry of Finance of Ukraine, (development, support), State Tax Service of Ukraine (support)	December 2022	January 2023
V. PERSONAL INCOME TAX					
5.1. The existence of an imbalance in revenues of personal income tax (PIT) between local budgets					
Goal 1 (II): Change PIT`s allocation mechanism according to the European rules based on information on where the taxpayers reside and vote					
1.1	The Law of Ukraine "On the deduction of a part of the	<u>The propose of changes:</u>	Committee of the Parliament of	December 2023	January 2024

No	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
	proceeds from personal income tax to the budgets of local communities" (№ 4029 dated 2 September 2020, № 4062 dated 7 September 2020, № 4115 dated 17 September 2020, № 4369 dated 12 November 2020, № 5244 dated 15. March 2021 № 5244-1 dated 30 March 2021, № 5244-2 dated 30 March 2021, №5244-3 dated 30 March 2021, № 5281 dated 19 March 2021, № 5282 dated 19 March 2021, № 5364-1 dated 21 Arpil 2021)	Establishing a mechanism for the transfer of a part of the PIF to local budgets at the place of residence of the taxpayer	Ukraine on finances, tax, and customs policy (development), Ministry of Finance of Ukraine (support), State Tax Service of Ukraine (support)		
5.2. The need to introduce incentive models for the taxation of individuals					
Goal 1 (III): The development of a legal base for the introduction of family-based taxation (household taxation)					
1.1	The Law of Ukraine "On amendments to the Tax Code of Ukraine concerning family-based taxation".	<u>The propose of changes:</u> Determining the procedure of declaring tax obligations by natural persons within the framework of common tax reporting (family-based taxation) Increasing the volume of the tax credit by means of providing possibilities for tax deductions for expenses on dependent persons Establishing the procedure for payment of PIT and repayment of the tax debt in case of persons choosing the possibility of submitting joint tax reports	Committee of the Parliament of Ukraine on finances, tax, and customs policy (development), Ministry of Finance of Ukraine (support), State Tax Service of Ukraine (support)		

No	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
		Determining the procedure of application of the tax credit.			
VI. RENT PAYMENT					
6.1. The need for simplification of rent payment administration and the development of equal conditions of taxation for all the mobile communication operators.					
Goal 1 (II): Lifting all the step-up and step-down ratios applied to the rent payment rates for using radio frequency resources for cellular communication with the simultaneous revision of rates.					
1.1	Law of Ukraine "On amendments to the Tax Code of Ukraine concerning the regulation of charges and payment of rent for the use of radio frequency spectrum in Ukraine"	<u>The propose of changes:</u> Determining in the Tax Code of Ukraine the method of rent calculation for the use of radio frequency spectrum and procedure of its calculation and payment following the principles stipulated in the Law of Ukraine "on Electronic Communications"	Ministry of Finance of Ukraine (development, support), State Tax Service of Ukraine (support)	December 2022	January 2023
VII. ECOLOGICAL TAX					
7.1. The need for transformation of the national system of environmental taxation`s structure according to the EU classification standards					
Goal 1 (II): To introduce an environmental taxation mechanism change regarding carbon dioxide emissions (CO^2) **Goal 2 (II):** To reconsider the environment tax rates for waste disposal using the "polluter pays more" principle **Goal 4 (III):** To harmonize the current system of national environmental taxation in Ukraine with the EU tax system					
1.1	Law of Ukraine "On amendments to the Tax Code of Ukraine concerning the collection of the ecological tax in waste management" (№ 6345 dated 24 November 2021)	<u>The propose of changes:</u> Increasing tax rates for the placement of extremely hazardous waste equipment and devices containing mercury, elements with ionizing radiation to 2,596.41 UAH per unit, fluorescent lamps to 166.18 UAH per unit; an increase of tax rates for waste disposal, which are set depending on the hazard class and level of hazard of waste	Ministry of Finance of Ukraine (development, support), State Tax Service of Ukraine (support)	December 2022	January 2023

No	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
		Imposing gradual increase of tax rates for disposal of certain types of waste (within nine years) increase of tax rate for disposal of household waste, taking into account that due to the implementation of EU Directives in Ukraine, it is planned to introduce financial support for waste disposal and works after the closure of waste sites. [Relevant costs will be taken into account in the waste disposal tariff]			
2.2	Law of Ukraine "On amendments to the Tax Code of Ukraine on reforming the ecological tax for carbon dioxide emissions into the atmospheric air"	The propose of changes: Impementing provisions on the transition from taxation of CO^2 emissions to taxation of fossil fuels (oil, gas, coal, etc.), depending on the carbon content, at the production and/or import stage	Ministry of Finance of Ukraine (development, support), State Tax Service of Ukraine (support)	December 2023	January 2024
4.1	Law of Ukraine "On amendments to the Tax Code of Ukraine"	The propose of changes: Implementing provisions on the harmonization of the environmental taxation system in Ukraine with the EU tax system	Ministry of Finance of Ukraine (development, support), State Tax Service of Ukraine (support)	December 2026	January 2027
VIII. LOCAL TAXES					
8.1. The need to strengthen the managerial functions of the local self-government bodies; improvement of local taxes administration; strengthening the financial capability and development of local authorities					
Goal 1 (II): Grant additional powers to local self-government bodies in the part of local taxes and duties administration **Goal 2 (II):** Preparation of regulatory support for the introduction of real estate objects` estimated value for the aim of determining the tax base for imposing a tax on real estate other than a land plot					
1.2	Law of Ukraine "On amendments to the Tax Code of	The propose of changes:	Ministry of Finance of Ukraine	December 2023	January 2024

No	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
	Ukraine and the Law of Ukraine "On local self-government" to grant additional powers to local self-government bodies in the administration of local taxes and duties"	Granting additional powers to local self-government in terms of administration of local taxes and duties.	(development, support), State Tax Service of Ukraine (support)		
2.1	Law of Ukraine "On amendments to the Tax Code of Ukraine on the reform of local taxes and duties in part of the tax on real estate other than the land"	The propose of changes: Introducing the appraised value of a real estate to determine the tax base for real estate other than land Resolving the issue of eliminating legal discrimination regarding joint ownership [*Currently, the Tax Code of Ukraine provides an incentive to owners in the form of a minimum tax-free area. At the same time, the Register of property rights consists of data only on the title owner for joint ownership*]	Verkhovna Rada Committee on Finance, Tax and Customs Policy (development), Ministry of Finance of Ukraine (support), State Tax Service of Ukraine (support)	December 2024	January 2027
IX. UNIFIED SOCIAL CONTRIBUTION					
9.1. Insurers' public request on finding opportunities for lowering the burden on the wage fund with a simultaneous maintaining of financial system stability and ensuring adherence to state guarantees to the insured according to the current types of compulsory state social insurance (social guarantees in case of unemployment, accidents or professional injuries, retirement security and other payments).					
Goal 2 (II): Introduction of legislative amendments based on the chosen model.					
2.2	Law of Ukraine "On amendments to the Tax Code of Ukraine and other legislative acts to reduce the burden on the payroll". Law of Ukraine "On amendments to the Budget	The propose of changes: Implementing an agreed model accrual and payment by insurers and (possibly) insured persons of insurance contributions to the system of compulsory state social insurance	Verkhovna Rada Committee on Finance, Tax and Customs Policy (development), Ministry of Finance of Ukraine (support),	December 2023	January 2024

No	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
	Code of Ukraine in connection with the adoption of the law on reducing the tax burden on the payroll" (possible)		State Tax Service of Ukraine (support)		
X. ADMINISTRATION OF TAXES					
10.1. The need for the application of up-to-date approaches to tax audits. Introduction of electronic documentary audits ("E-audit") for large taxpayers.					
Goal 2 (II): Preparation and adoption of legislative amendments necessary for subsequent introduction of E-audit for large taxpayers.					
2.1	Law of Ukraine "On amendments to the Tax Code of Ukraine concerning the implementation of electronic audits (e-Audit)" (№ 6255 dated 2 November 2021) and the Law of Ukraine "On amendments to article 9 of the Law of Ukraine "On accounting and financial reporting in Ukraine" (№ 6256 dated 2 November 2021)	<u>The propose of changes:</u> Imposing obligatory submission of SAF-T file by taxpayers to the tax authorities within 60 calendar days following the last calendar day of the reporting (tax) year [*This obligation arises for large taxpayers from 1 January 2025 and for VAT payers from 1 January 2027*]	Ministry of Finance of Ukraine (support), State Tax Service of Ukraine (support)	June 2023	January 2025 (January 2027)
10.2. The need for ensuring online – communication between control bodies and taxpayers aimed at achieving accessibility and transparency.					
Goal 1 (II): Preparation and adoption of legislative amendments necessary for providing the control bodies and taxpayers with the right of online communication during the conduction of the tax audits and consideration of taxpayers` objections, complaints, and other appeals. **Goal 2 (II):** Introduction of IT solutions for online communication between control authorities and taxpayers.					
1.1.	Law of Ukraine "On amendments to the Tax Code of Ukraine on online communications"	<u>The propose of changes:</u> Granting a right for taxpayers to consider their objections and complaints and other applications through online communication	Verkhovna Rada Committee on Finance, Tax and Customs Policy (development), Ministry of Finance	January 2023	January 2024

No	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
		Providing the tax authorities with the opportunity to conduct an online survey of taxpayers on issues arising during tax control measures and provide them with explanations in the process of conducting documentary audits (including remote)	of Ukraine (support), State Tax Service of Ukraine (support)		
10.3. Presence of problems with collection, storage, and analysis of data of payment transactions` registers and ensuring control over the execution of fiscal functions of the Register on payment transactions					
Goal 2 (II): Preparation of legislative amendments aimed at improving technologies for information transmitting from payment transaction registers to the Tax Service of Ukraine without the engagement of information acquirers and establishing requirements for payment transaction registers and the procedure for verification of the compliance with them.					
2.1	Law of Ukraine “On amendments to the Law of Ukraine “On the use of registers on payment transactions in the field of trade, catering and services”	<u>The propose of changes:</u> Improving the technology of information transfer from Registers on payment transactions/Program Registers on payment transactions to the State Tax Service without the involvement of information acquirers Establishing requirements for program Registers on payment transactions and the procedure for verifying their compliance	Ministry of Finance of Ukraine (development, support), State Tax Service of Ukraine (support)	December 2023 - December 2025	1st January of the year following the year in which the changes were adopted
10.4. The existence of illicit trade. The existence of unequal competitive conditions due to the necessity of adhering to the requirements of goods accounting for conscientious taxpayers					
Goal 1 (II): Introduction of compulsory goods accounting for all taxpayers in any taxation system.					
1.1	Law of Ukraine “On amendments to the Tax Code of Ukraine" and the Law of Ukraine “On amendments to the law of Ukraine “On accounting and financial reporting in Ukraine”	<u>The propose of changes:</u> Introducing an obligatory requirement for all taxpayers in any taxation system to be able to provide a documentary proof of origin of goods	Ministry of Finance of Ukraine (development, support), State Tax Service of Ukraine (support),	December 2023	January 2024

No	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
10.5. Presence of a great volume of tax privileges that influence the level of tax revenues; the absence of a unified approach to introducing tax privileges.					
Goal 1 (II): Lowering the amount and scope of tax privileges and developing a unified approach for the State to their introduction and control.					
1.2	Law of Ukraine "On amendments to the Tax Code of Ukraine and other Laws of Ukraine on state policy in the sphere of granting and using of tax privileges"	<u>The propose of changes:</u> Establishing a uniform requirements to the state policy in the field of granting and usage of tax incentives (benefits) Implementing the result of review of tax benefits.	Ministry of Finance of Ukraine (development, support), State Tax Service of Ukraine (support)	June 2023	January 2024
10.6. A necessity for Ukraine to join the effective international system of automatic information exchange that will facilitate the fulfillment of the OECD recommendations and the need to improve the practice of international tax information exchange upon request and increase of transparency and reliability of Ukraine as a state-partner in information exchange					
Goal 1 (I): Implementation of OECD international standards on transparency and information exchange for the aims of taxation					
1.1	Law of Ukraine "On amendments to the Tax Code of Ukraine and other Laws of Ukraine concerning the implementation of the international standard for the automatic exchange of information on financial accounts"	<u>The propose of changes:</u> Defining the functions and rights of tax authorities to ensure the receipt of information necessary for the exchange of information Establishing an obligation for financial institutions to apply the rules of the CRS Standard in carrying out a proper comprehensive audit of financial accounts. Clarifying the definition of specific terms to bring them in line with the requirements of the CRS Standard ("financial account", "account", "financial agent", "non-resident", "partnership") Imposing the requirements for the minimum retention period of documents Settling the issue of obtaining tax information by the tax authority following the CRS Standard and upon	Ministry of Finance of Ukraine (development, support), State Tax Service of Ukraine (support)	November 2022	January 2023

No	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
		request from the competent authority of a foreign state based on an international agreement Imposing provisions required for creation of an effective system of control over the observance by financial institutions of the requirements for establishing accountable accounts and submitting reports			
10.7. The need for the introduction of individual models aimed at restructuring the tax debt for private persons and small and medium businesses					
Goal 1 (I): Improvement of tax debt management and repayment system aimed at reducing the bureaucracy of the procedure and administrative costs for its repayment, ensuring the maximum automatization of the tax debt repayment processes.					
1.1	Law of Ukraine "On amendments to the Tax Code of Ukraine to simplify the procedure for deferral of tax payments"	<u>The propose of changes:</u> Simplifying the procedure for deferral of tax payments Introducing an electronic application procedure Imposing regulations for taxpayers on receiving deferrals for small amounts of tax debts automatically Imposing regulations on reduction and differentiation of interest rates for different categories of payers Revising the criteria for granting deferral to facilitate access to the procedure	Verkhovna Rada Committee on Finance, Tax and Customs Policy (development), Ministry of Finance of Ukraine (support), State Tax Service of Ukraine (support)		
XI. TAXATION OF CERTAIN SECTORS AND ACTIVITIES ACCORDING TO THE MEASURES OF THE RESTORATION PLAN					
11.1. Inconsistency of separate provisions of the Tax Code of Ukraine with the terminology of basic legislation on capital markets and organized commodity markets, and absence of harmonization of the taxation system in the abovementioned sphere with the tax incentives of investing.					

No	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
Goal 1 (II): Regulatory improvement of the taxation procedure of capital markets and organized commodity markets.					
1.1	Law of Ukraine “On amendments to the Tax Code of Ukraine to improve taxation in the sphere of capital markets and organized commodity markets”	<u>The propose of changes:</u> Bringing the norms of the Tax Code of Ukraine in line with the provisions of the basic legislation in the field of capital markets and organized commodity markets, including the norms on derivative financial instruments. Introducing mechanisms of tax incentives for investors to invest in financial instruments, including long-term investments, in particular through the introduction of special investment accounts. Settlement of issues related to the taxation of trade in commodity derivatives and other assets admitted to trading on organized markets, with the transition to taxation of Central counterparty transactions and transactions carried out on organized markets on a net basis (after netting/clearing). Improving the activities of tax agents during the taxation of transactions with financial instruments and other issues, stimulating investment of individuals in financial instruments. Settlement of certain issues of taxation of contributions to non-state pension funds.	Verkhovna Rada Committee on Finance, Tax and Customs Policy (development), National Securities and Stock Market Commission of Ukraine (development), Ministry of Finance of Ukraine (support), State Tax Service of Ukraine (support).	October 2022	January 2023
11.2. Lifting of tax barriers that cause unequal investment conditions at the insurance market and market of financial leasing either for consumers of non-banking financial services or for financial institutions.					
Goal 1 (II): Improvement of the procedure of the insurance market and market of financial leasing taxation					

No	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
1.1	Law of Ukraine “On amendments to the Tax Code of Ukraine to improve the taxation of insurance and financial leasing”	<u>The propose of changes:</u> Performing technical harmonization of the norms of the Tax Code of Ukraine with the relevant laws. Imposing a tax on internal incoming reinsurance operations for insurers aimed at leveling “non-classical" insurance and tax evasion. Adjusting the procedure for taxation of transactions with non-residents under insurance contracts for departing persons. Enlarging the volume of benefits for the payment of insurance premiums under long-term life insurance contracts for relatives of the 2nd degree. Imposing expansion of preferential conditions of personal income tax for accumulative life insurance and private pension provision provided that the employer pays insurance premiums under long-term life insurance and pension insurance contracts for its employees. Clarifying the procedure for taxation of a one-time insurance payment paid by insurers in the event of an insured event of the insured person's lifetime before the expiration of the contract or the insured person reaches the age specified in the contract or payment of redemption amount upon early termination of a life insurance contract. Streamlining the taxation of regular consecutive (annuity) payments that in a similar manner as to the taxation of pensions.	Verkhovna Rada Committee on Finance, Tax and Customs Policy (support), National Bank of Ukraine (development), Ministry of Finance of Ukraine (support), State Tax Service of Ukraine (support)		
11.3. Resolving issues of taxation of virtual asset transactions for the objectives of Law of Ukraine “On virtual assets”					

No	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
Goal 1 (II): Improvement of institutional requirements for the functioning of the virtual assets market					
1.1	Law of Ukraine "On amendments to the Tax Code of Ukraine on the peculiarities of taxation of transactions with virtual assets"	<u>The propose of changes:</u> Providing regulations on issues of taxation of transactions with virtual assets for the Law of Ukraine "On Virtual Assets" *[This Law shall enter into force only from the date of entry into force of the Law of Ukraine on Amendments to the Tax Code of Ukraine on peculiarities of taxation of transactions with virtual assets]* Improving the institutional requirements for the functioning of the virtual assets market in line with EU requirements	Verkhovna Rada Committee on Finance, Tax and Customs Policy (development), National Securities and Stock Market Commission of Ukraine (development), NBU (support), Ministry of Finance of Ukraine (support), State Tax Service of Ukraine (support)	December 2025	January 2026
11.4. The negative influence of the unresolved issues of patronage dividends taxation on the agricultural cooperation development					
Goal 1 (II): Identification of the peculiarities of patronage dividends taxation at agricultural cooperatives.					
1.1	Law of Ukraine "On amendments to the Tax Code of Ukraine on agricultural cooperatives"	<u>The propose of changes:</u> Imposing the provisions regarding transfer of taxation to the side of the recipient of patronage dividends	Verkhovna Rada Committee on Finance, Tax and Customs Policy (development), Ministry of Finance of Ukraine (support), State Tax Service of Ukraine (support)	July 2022	December 2022
11.5. Absence of full-fledged operation of accumulative mandatory pension insurance system in Ukraine and imperfection of non-governmental pension insurance system.					

No	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
Goal 1 (II): Introduction of full-fledged operation of accumulative mandatory pension insurance system in Ukraine and improvement of non-governmental pension insurance					
1.1	Law of Ukraine “On amendments to the Tax Code and other Laws of Ukraine on non-state pension provision"	<u>The propose of changes:</u> Providing regulations on the status non-profit of non-state pension funds as taxpayers, issues related to the taxation of services of non-state pension funds. Providing regulations on issues of taxation of pension payments from non-state pension funds and tax consequences of the payment of contributions to non-state pension funds for individuals, including natural persons – entrepreneurs.	Verkhovna Rada Committee on Finance, Tax and Customs Policy (development), Ministry of Finance of Ukraine (support), State Tax Service of Ukraine (support)	September 2023	January 2024

5. The necessity to improve existing and create new technical systems

Scope of application	Type of software product	Assigning an IT solution (problems to be solved)	Form of development
Administration of taxes	Electronic cabinet of taxpayers	<u>Problems:</u> The existing interface of the taxpayer's cabinet does not meet modern requirements for adaptive software design. Upgrade to expand the user functions provided by the TCU, in particular the provision of information about the taxpayer with his consent to third parties - banks, financial companies, electronic platforms, etc. <u>The content of amendments:</u> User interface development (UI / UX), Providing adaptive pages, including for the visually impaired Mobile software design.	Upgrade of existing software (According to public statements of the State Tax Service, these changes have to be

Scope of application	Type of software product	Assigning an IT solution (problems to be solved)	Form of development
		Creating an effective model of customer support. Implementation of consent to the transfer of data from the open part of the taxpayer's cabinet by submitting a client's application from Internet banking or a mobile application signed by the CEP. Determining the obligation of the State Tax Service to provide banks through the API with information on the codes and accounts of the State Tax Service to which the relevant tax must be paid (by analogy with how it is implemented in the mobile application DIIA) Expanding the list of parameters that should be available to banks and financial institutions through the State Tax Service API <u>New features:</u> Obtaining the maximum number of certificates and services in electronic form (including residency). Providing the ability to pay taxes through the cabinet (integration with payment services). Ability to provide individuals with periodic payments by subscription. System of pre-filling of tax reporting according to the data of the State Tax Service	implemented through integration with "DIIA")
Administration of taxes. Consideration of complaints	Creating a platform for online communication with taxpayers	Consideration of objections and complaints of taxpayers online Providing the opportunity for online surveys of taxpayers and providing explanations in the process of conducting documentary audits (including remote)	New system
Administration of taxes. VAT	Creating an accounting system of a single universal document for financial and tax accounting for the supply of goods/services.		New system

Scope of application	Type of software product	Assigning an IT solution (problems to be solved)	Form of development
Administration of taxes. VAT	Automated monitoring system for compliance of VAT invoices with risk assessment criteria (SMKOR)		Modification according to the improvement of the risk-oriented system
Excise duty	System of electronic administration of sales of fuel and ethyl alcohol (SEASFEA)	Display in SEASFEA of owners of fuel for detection of fictitious operations, Improving the accounting of fuel and alcohol storage facilities and their technical accounting for own consumption and/or processing	Modification
Excise duty	Electronic control system for tobacco products		New system
Excise duty	Electronic control system for alcohol circulation		New system
Excise duty	Licensing of activities related to excisable goods	Applying the “paperless” principle to all types of licenses for activities with excisable goods Expand the list of parameters that should be available to third parties about the issued licenses through the API STS	Modification
Administration of taxes. Tax debt	AIS. “Tax debt" Electronic taxpayer’s cabinet	Improving the technical and tax accounting within a single integrated system. Develop an ERM tax debt management system Ability to notify individuals of an existing debt by electronic means of communication (notification via the mobile application “Diia” or via SMS or messengers) IT solutions for an analytical model of estimating the probability of non-payment of tax liabilities, segmentation of taxpayers, and determining the appropriate methods of tax debt collection according to the individual approach to the taxpayer IT solutions for automatic generation of tax claims, as well as the formation of procedural documents, including application to the courts	Modification New development

Scope of application	Type of software product	Assigning an IT solution (problems to be solved)	Form of development
		IT solutions for automatic issuance and execution of collection as a single electronic file Providing, with the consent of the person, information on tax debt in electronic form for banks and financial institutions, e-commerce sites, etc. (introduce standardized API for sharing data between institutions and tax authority) Reduce the costs of banking institutions for processing collection orders, the costs of the State budget for the preparation, approval, and sending of collection orders, and increase revenues to the State and local budgets through instant receipt and processing of collection orders by banks	
Administration of taxes. Tax control	IT solution for data processing of a standard audit file (SAF-T UA)	Fully automated analysis of the received file (SAF-T UA) by specialized software according to the established risk criteria will help identify possible errors in the calculation of tax liabilities at the pre-audit stage E-audit creates an opportunity for prompt self-control of taxpayers on the calculated tax liabilities with the possibility of correcting errors identified in the e-audit, with the application of a reduced penalty	New system
Administration of taxes. Tax control	The reporting system for financial institutions in the course of automatic exchange of information	According to the CRS, countries which joined this initiative, through their financial institutions (including banks, depositories, insurance companies, brokers, and investment funds) will be required to exchange certain data on the accounts of customers of these financial institutions automatically on an annual basis, guided to some extent by the unified rules of such exchange Creation of a technical system for reporting by financial institutions on reporting accounts Introduction of a standardized API for data exchange between institutions and the State Tax Service System of analysis of tax information obtained in the course of automatic exchange of information for tax control purposes	New system
Administration of taxes. Registers on payment transactions / Program Registers	“SOD RRO”	Conducting an audit of the information technology (IT audit) in the State Tax Service in respect of SOD RRO and elimination of identified shortcomings in the work of SOD RRO based on the results of the IT audit	Modification

Scope of application	Type of software product	Assigning an IT solution (problems to be solved)	Form of development
on payment transactions			
PIT	Electronic cabinet	Household's accounting system, reporting	New system
VAT	Electronic platform for non-residents	Improving the interface in terms (UI/UX) Creating a dispatch support system	Update existing software
Administration of taxes	Single account	Improving the single account interface in terms (UI/UX) Integration with ISO 20022	Modification Upgrade of existing software
PIT. Enrollment of taxes	Single account for PIT payment	Creation of an integrated system for the State Treasury Service on the distribution of PIT between budgets of different levels and depending on the areas of enrollment (at the place of registration of the person/separate unit)	New system
Administration of taxes. Registers on payment transactions / Program Registers on payment transactions	Data accounting system of registers on payment transactions	Improvement of protocols for information transfer from registers on payment transactions, Program Registers on payment transactions by wired or wireless communication channels to the State Tax Service of Ukraine Improving the interface of Registers on payment transactions, Program Registers on payment transactions	Modification Upgrade of existing software
Administration of taxes. Implementation of EU Directives into Ukraine legislation	IT solutions in the course of the implementation of EU Directives	Relevant IT solutions: Connection to CCN / CSI (DAC and other information). Interconnection: VIES, E-Commerce, MOSS, OSS, EMCS, VAT refund, etc.	New system
Regulation of activities in certain sectors (areas). Capital markets	Electronic cabinet	IT solutions to ensure effective reporting by capital and commodity market participants Introduction of a standardized API for data exchange between investment banking programs and the electronic office of the taxpayer	New system, Modification

Scope of application	Type of software product	Assigning an IT solution (problems to be solved)	Form of development
Regulation of activities in certain industries (areas). Virtual assets	Electronic cabinet	IT solutions to ensure effective reporting by virtual asset participants. Introduction of a standardized API for data exchange between electronic platforms of the virtual assets market and the electronic office of the taxpayer	New system, New system.

6. The main legislative acts in the field of taxation and their implementation in the legislation of Ukraine

Subject	№	Title of the act of EU legislation and stages of its implementation	Title (English / Ukrainian / Text of the EU legislation at https://eur-lex.europa.eu/)	Implementation of EU legislation under the Association Agreement	Status of implementation
VAT. General		1. Ukrainian legislative/administrative framework in the field of taxation and tax administration for accession to the European Union created			
VAT. General		1.1. Ukrainian legislative/administrative framework in the field of indirect taxation for accession to the European Union established			
VAT. General	1	1.1.1. Ukrainian legislation and administrative framework are approximated with the EU Directive on the common system of value-added tax (after that – EU VAT Directive)	Council Directive 2006/112/EC of 28 November 2006 on the common system of value-added tax: https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=celex%3A32006L0112	Yes, with the exception of Articles 5-8, 20, 33, 40-42, 79, 100-101, 123-130, 140-142, 145, 146 (1 ("B"), 147, 155, 164-166, 170-171, 175, 203, 205, 209, 210, 212, 219, 238-240, 245, 254, 258, 274-280, 293-294, 370-395, 396-400, 402-410, 411- 413	Prepared, involving a comparative table of compliance of tax legislation of Ukraine in terms of VAT to the provisions of Directive 112, which was agreed upon with an international expert involved in the EU4PFM Program An opinion was received from the European Commission on the implementation of the

Subject	№	Title of the act of EU legislation and stages of its implementation	Title (English / Ukrainian / Text of the EU legislation at https://eur-lex.europa.eu/)	Implementation of EU legislation under the Association Agreement	Status of implementation
				(provisions applicable to EU Member States), Articles 281-294, 295-305, 306-325, 326-332, 333-343, 348-349, 358-369 (concerning special tax regimes)	approximation of the Tax Code of Ukraine to Directive 112 (letter dated 25 January 2021 Ref Ares (2021) 592349), confirming that Ukrainian VAT tax legislation is generally in line with EU legislation. The European Commission has stated that several articles of the Tax Code of Ukraine need attention or future action on possible harmonization with EU legislation. These actions are not urgent and need to be implemented in the future
VAT. General		1.1.1.1. Recommendations on/assistance in preparing draft legislation aligning Ukrainian legal acts with EU VAT Directive and/or Commission implementing legal acts provided			The European Commission assisted under the EU4PFM program.
VAT. General		1.1.1.2. STS capacity building in implementation of the EU VAT Directive/Commission implementing legal acts enhanced			As Ukrainian legislation is broadly in line with EU law, there was no need to implement the Commission's legislation into Directive 112
VAT. General		1.1.1.2.1. Analysis of STS administrative framework conducted and recommendations on key operational/IT solutions to be implemented provided			Due to the lack of need, the STS did not provide recommendations for the implementation of key operational IT solutions

Subject	№	Title of the act of EU legislation and stages of its implementation	Title (English / Ukrainian / Text of the EU legislation at https://eur-lex.europa.eu/)	Implementation of EU legislation under the Association Agreement	Status of implementation
VAT. Exemption	**2**	1.1.2. Ukrainian legislation and administrative framework are approximated with EU directives on VAT exemptions for travelers and VAT exemptions for finally imported goods (after that – EU VAT exemptions directives)	Council Directive 2007/74/EC of 20 December 2007 on the exemption from value-added tax and excise duty of goods imported by persons traveling from third countries: https://eur-lex.europa.eu/legal-content/en/TXT/?uri=CELEX:32007L0074	Yes (section 3 on quantitative restrictions).	The Council Directive 2007/74/EC provisions have been implemented in the Tax Code of Ukraine (Articles 191, 196) and the Customs Code of Ukraine (Articles 369, 374).
VAT. Exemption		1.1.2.1. Comparative analysis of Ukrainian legislation compliance with EU VAT exemptions directives conducted			
VAT. Exemption		1.1.2.2. Recommendations on/assistance in preparing draft legislation aligning Ukrainian legal acts with EU VAT exemptions directives and/or Commission implementing legal acts provided			
VAT. Exemption		1.1.2.3. STS/SCS capacity building in implementation of the EU VAT exemptions directives /Commission implementing legal acts enhanced			
VAT. Exemption		1.1.2.3.1. Analysis of STS/SCS administrative framework conducted and			

Subject	№	Title of the act of EU legislation and stages of its implementation	Title (English / Ukrainian / Text of the EU legislation at https://eur-lex.europa.eu/)	Implementation of EU legislation under the Association Agreement	Status of implementation
		recommendations on key operational/IT solutions to be implemented provided			
VAT. Refund	**3**	1.1.3. Ukrainian legislation and administrative framework are approximated with EU directives on VAT refund for non-EEC taxable persons and VAT refunds for a taxable person established in another EU country (after that – EU VAT refund directives)	a) Thirteenth Council Directive 86/560/EEC of 17 November 1986 on the harmonization of the laws of the Member States relating to turnover taxes - arrangements for the refund of value-added tax to taxable persons not established in Community territory: https://eur-lex.europa.eu/legal-content/EN/ALL/?uri=celex%3A31986L0560	a) Thus, from the date of entry into force of the Association Agreement, the Association Council shall determine the timetable for Ukraine's implementation of this Directive	a) On 26 October 2021 by the letter of the Ministry of Finance № 44040-08-10/33081, the draft decision of the EU-Ukraine Association Council on the implementation of 13 Directives was sent to the EU Delegation to Ukraine and the Government Office for Coordination of European and Euro-Atlantic Integration. b) No (irrelevant as the Directive applies to the EU Member States within the EU)
VAT. Refund			b) Council Directive 2008/9/EC of 12 February 2008 laying down detailed rules for the refund of value-added tax, provided for in Directive 2006/112/EC, to taxable persons not established in the Member State of refund but established in another Member State:	b) No	b) No (irrelevant), the Directive applies to the EU Member States within the EU. Ukraine has borders with the EU, so VAT refunds are made only within the country with its mechanism

SUBGROUP 2: CUSTOMS POLICY

1. The main issues that need to be resolved as a part of the Recovery Plan in the field of "Finance system operation, its transformation, and development"

Impact of the war on the defined sphere of analysis:	
Key challenges (summarized for a defined scope: **Customs policy**)	1. Lack of a unified approach to customs clearance of goods in different customs authorities of Ukraine 2. Unfavourable and unpredictable conditions for foreign economic activity (FEA) and the national producer, significant time of customs clearance and low throughout capacity of border crossing points 3. Inconsistency of transit procedures in Ukraine with the rules of the Convention on a common transit procedure, which makes impossible accession to the Convention and NCTS application at the international level 4. Ukraine's customs legislation isn`t harmonized with EU legislation, slowing down European integration and EU accession 5. IT solutions/IT infrastructure that don`t comply with e-Customs and MASP-C; excessive bureaucracy of processes 6. Increase of the volume of illegally imported goods, movement of commercial goods under the cover of humanitarian aid; significant volume of counterfeit goods that repulse the interest of investors 7. Corruption at customs and insufficient professional level
Key opportunities (summarized for a defined scope: **Customs policy**)	1. Unprecedented support from the key world leaders. Possibility of Ukraine's integration into the single customs space of the EU, provided that the criteria for the candidate country for joining the EU are met (including the implementation of EU customs legislation) 2. Implementing new IT solutions, which are compatible with EU IT solutions, create new tools for developing a risk analysis system, ensuring a balance of control measures (border security) and simplification, as well as ensuring compliance with the criteria for the EU candidate country in terms of IT customs 3. Introduction of a balance of border security (customs procedures) and partnership with companies, which apply compliance, have a positive customs history, reliable internal processes, etc. Reduction of smuggling, illegally imported goods, circulation of counterfeit goods 4. Using the system of customs duties as a stimulating tool for long-term economic development and export increase; creation of clear and predictable rules for conducting foreign economic activity

Impact of the war on the defined sphere of analysis:	
	1. Development of logistics, customs, and other infrastructure necessary for the development of foreign economic activity 2. Enhancement movement of goods across the customs border and their subsequent customs clearance without losing the security function of customs at the border and in the international supply chain 3. Achieving a high level of trust of business to customs authorities, providing qualified and competent personnel of customs authorities
Key constraints (summarized for a defined scope: **Customs policy**)	1. Unpredictability of the end of the war on the territory of Ukraine and the state of infrastructure: - constant risks of increasing the destruction of logistics, customs and other infrastructure, the difficulty of planning its reconstruction - the need to consider business limitations on the restoration and development of foreign economic activity and export (lost or destroyed means of production, logistics, etc. - difficulty in retaining labour resources; unpredictability in planning the maintenance, development, and extension of business; reduction of volumes and limitation of geography of markets - dependence from currency restrictions, currency fluctuations and unpredictability of trends in the financial market during the war) 2. Uneven workload at crossings points through the customs border and the need for more flexible tools for redistribution of customs staff 3. Financing of necessary expenses in the conditions of sharp income decrease to the state budget and GDP of Ukraine due to the war 4. Customs border security challenges will slow down accession to the EU's single customs market 5. Insufficient level of investment and trade attractiveness of Ukraine, due to military activities on the territory of the state. Restrictions on business and government during the war

2. Goals, objectives, and stages of the Recovery Plan in the defined scope

2.1. Specific goals

	Stage I: June 2022 – end of 2022	**Stage II: January 2023 – December 2025**	**Stage III: January 2026 – December 2032**
1. Ensuring a unified approach to customs clearance of goods by the customs authorities of Ukraine.			
Each stage's goal to be achieved to solve the problem	1.1. Prompt informing of traders and feedback on the practical application of customs legislation	1.2. Establishment and operation of customs competence units. Performing concrete or all customs formalities by other customs authorities 1.3. Improvement of the IT service for the publication of information on the goods classification 1.4. Approval of the Guidelines for the control over correct goods classification	
Deadline within the stage	1.1. June 2022 – December 2022 (for work with two directions of customs related issues)	1.1. January 2023 – December 2025 (for work with all directions of customs-related issues) 1.2. January 2023 – December 2025 1.3. – 1.4. January 2023 – December 2023	
Risks for achieving the goal	Delayed development (procurement) of an appropriate IT solution, lack of sufficient qualified personnel to operate a	Lack of IT support for updating, setting up the system, lack of qualified personnel on focused customs issues.	

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
	Helpdesk and a structural unit for support (coordination), informing, and consulting		
Measurable indicator of goal achievement	1.1. The Helpdesk is established to work within 2 areas of customs issues. It processes 500 requests per month Relevant software has been developed (procured) and deployed The user's feedback satisfaction level of the Helpdesk operation is more than 70%. The structural unit for support (coordination), informing and consulting has been set up One comprehensive (video tutorial, in-dept explanatory and presentation materials) and 6 short information materials are prepared per month. Improvement (solution) of at least 1 complicated problem issue per 3 months and 3 simple problem issues per month was organized and developed. After solving the problem issue, the Helpdesk has not received any request on this issue for at least 6 months The user's feedback satisfaction level of the structural unit for	1.1. The Helpdesk operation is extended to work with all areas of customs issues. It processes 2000 requests per month. The user's feedback satisfaction level of the Helpdesk operation is more than 70% Tree comprehensive (video tutorials, in-dept explanatory and presentation materials) and 20 short information materials are prepared per month. Improvement (solution) of at least 10 complicated problematic issues and 30 simple problematic issues per year was organized and developed. After solving the problem issue, the Helpdesk receives 1% of the previous number of requests on these issues for at least 6 months. The user's feedback satisfaction level of the structural unit for support (coordination), informing and consulting (average feedback from Helpdesk, customs	

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
	support (coordination), informing and consulting (average feedback from Helpdesk, customs authorities, users) is more than 70%	authorities, users) is more than 70%. 1.2. The customs competencies units are set up and operating. Customs competencies units carry out customs clearance of 20% of customs declarations in the customs regime of import and 50% - in the customs regime of export. Final decisions not in favour of customs authorities are taken in no more than 10% of cases, in the case of administrative or judicial appeals against decisions made by customs competence units 1.3. The IT service for publishing information on the goods classification has been improved 1.4. The Guidelines on the correct goods classification control were approved by the State Customs Service	
The total amount of financial resources required to achieve the goal	To be identified	To be identified	
Connection with other areas	Anti-corruption policy	Anti-corruption policy	
2. Favourable conditions for foreign economic activity and national producer, decrease of customs clearance time, increase of throughput capacity at the border crossing points.			

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
Each stage's goal to be achieved to solve the problem	2.1. Implementation of the system of customs tax-payments as a stimulating tool for long-term economic development and increase of exports 2.2. Increase of the efficiency of the automated risk management system (ASUR) 2.3. Implementation of the technique on average time measurement for release of goods following the WCO technique 2.4. Increase of the flow of goods through automobile border crossing points. 2.5. Implementation of the “right to be heard” instrument during taking customs decisions and update of the administrative appeal procedure. 2.6. Implementation of the on-line data exchange of the preliminary data with the EU member countries. 2.7. Mutual exchange of the results of customs control with the customs authorities of other states and recognition of the results of such control during customs procedures	2.8. Granting customs simplifications to compliant companies according to Ukrainian legislation (including for companies with and without AEO status, as well as companies acting in the NCTS) 2.9. Setting of state intermodal logistic centres with customs clearance options 2.10. Arrangement of priority border crossing points, suspension of customs clearance at the western border due to Ukraine`s accession to the EU	2.11. Implementation of other simplifications (customs and tax), in line with the EU countries.

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
Deadline within the stage	2.1. - 2.5. June 2022 – December 2022	2.3. January 2023 – June 2023 (regarding automatization and IT solution) 2.6. June 2022 – December 2025 2.7 June 2022 – June 2025 2.8 January 2023 – May 2023 2.9. - 2.10. January 2023 – December 2025	2.9. January 2026 – December 2032 2.10. January 2026 – December 2027 2.11. January 2026 – December 2028
Risks for achieving the goal	Administrative or organisational risk of implementation of the tasks (inconsistency of positions, lack of understanding between public authorities). Martial law related risks (destruction of the infrastructure, destruction of the communications, etc.) Risk of the absence of financing for strengthening the roads. Developed and introduced risk profiles don`t match the tasks	Delayed development of the electronic system for granting of authorisations, insufficient understanding from traders of the benefits and AEO simplifications Unfavourable investment climate (risk of military actions to be continued, absence of progress in reforming of other areas, such as judicial and economic)	Unfavourable investment climate (risk of military actions to be continued, absence of progress in reforming of other areas, such as judicial and economic). Challenges in introduction of the single criteria for customs, tax and other simplifications, their mutual recognition and development of the relevant IT instrument
Measurable indicator of goal achievement	2.1. The customs tax-payment system as a stimulating approach for long-term development stage of the economics is implemented 2.2. 5 risk profiles are created. 8 risk profiles are updated.	2.3. Developed (procured) IT solutions for automation of measuring the average time of release of goods, which corresponds to the WCO methodology	2.9. 22 state intermodal logistics centres are established. 2.10. Suspension of customs control at the western border

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
	The portion of customs declarations determined by ASUR (automated risk management system) for conduction of additional customs formalities makes 10% from the whole number of customs declarations subject to similar procedures. The effectiveness of customs inspections (actual detection of discrepancies) conducted at the initiative of a customs official is 10%, and to ensure the proper balance between the acceleration of customs clearance and control measures by the customs, the initiation of such inspections should not be less than 1% of the total submitted for customs clearance customs declarations. 2.3. The order of the State Customs Service of Ukraine is adopted, which approves the method of measuring the average time for release of goods, which corresponds to the method approved by the WCO 2.4. Ensuring the possibility of passing trucks with a capacity of more than 7.5 tons at the border crossing points "Uhryniv",	2.6. Preliminary customs information is exchanged with all neighbouring EU countries. 2.7. Decisions on mutual exchange of results of the customs control activities with the customs authorities of other states are approved (adoption of legal acts). 2.8. Developed (procured) and implemented software for the decision-making system of the customs authorities to provide simplifications and authorisations. Amendments to the order of the Ministry of Finance of Ukraine, which expands the possibility of application of simplifications for traders without the AEO status are developed and adopted *(this also relates to the adoption of amendments to the Law in accordance with the deliverable 3.2.).* Number of traders which received simplifications: - 20 – AEO simplifications;	2.11. Criteria for determination of the VAT taxpayers who have the right to charge import VAT in the monthly VAT return instead of paying VAT during customs clearance are developed and implemented (Article 211 of the EU Council Directive № 2006/112/EC of 28.11.2006). Software for mutual assessment and mutual recognition of identical criteria for customs and tax purposes is developed (procured) and implemented.

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
	"Hrushiv", "Dyakivtsi", "Krasnoilsk", "Mohyliv-Podilskyi". Ensuring the possibility of passing only passengers at the border crossing points "Bronnitsa" Construction and equipping of "Krasnoilsk" and "Dyakivtsi" border crossing points completed Unloading the main priority border crossing points and increasing their capacity at the border with the EU 2.5. Amendments to the Customs Code of Ukraine adopted, which introduce the "right to be heard" during decision-making by the customs authorities and improve the procedure for administrative appeals 2.6. The decision to conduct a pilot project for the exchange of preliminary customs information with the EU countries is approved (adoption of a legal act) 2.7. The list of results of the customs control which are liable for transfer is agreed (the decision shall be based on results of consultations)	- 60 – simplifications without AEO status; - 80 – transit (NCTS) simplifications 2.9. 4 state intermodal logistics centres are established 2.10. Construction of 6 border crossing points. Modernisation and technical re-equipment of 12 customs border crossing points	

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
The total amount of financial resources required to achieve the goal	To be identified	To be identified	To be identified
Connection with other areas	Anti-corruption policy	Infrastructure area Requests for international technical assistance	Infrastructure area Requests for international technical assistance
3. Compliance of transit procedures in Ukraine with the rules of the Convention on a Common Transit Procedure that will ensure its accession and application of NCTS at the international level.			
Each stage's goal to be achieved to solve the problem	3.1. Completion of the final stage of international compliance testing of the operating national electronic transit system NCTS (Phase 4), Conformance testing, Mode 3. 3.2. Amendments to the Customs Code of Ukraine to ensure the international application of the NCTS. 3.3. Preparation, organization and conduct of the Monitoring Mission by the countries-parties of the Convention on a Common Transit Procedure and the Convention on the Simplification of Formalities in Trade in Goods. 3.4. Receiving an official invitation and Ukraine's accession to the Convention on a Common Transit Procedure and the Convention on the	3.6. Transition to NCTS (Phase 5) and subsequent phases according to the updated MASP-C plan.	

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
	Simplification of Formalities in Trade in Goods. 3.5. International application of NCTS (Phase 4) and provisions of the Conventions on the territory of Ukraine		
Deadline within the stage	3.1. June 2022 – July 2022 3.2. June 2022 – December 2022 3.3. July 2022 – September 2022 3.4. October 2022 - December 2022 3.5. December 2022	3.6. March 2023 - December 2023 (for NCTS Phase 5); Timeline for the subsequent phases to be clarified according to the updated MASP-C plan	
Risks for achieving the goal	Inconsistency of positions and lack of agreement on adopting relevant legislative changes. There is no possibility to organize a Monitoring Mission due to danger and / or due to military actions on the territory of Ukraine. Failure of Ukraine to fulfil the conditions provided for the participating country to the Conventions (inconsistency of the implemented measures).	Delayed transition to the application of the electronic transit system NCTS (Phase 5).	
Measurable indicator of goal achievement	3.1. The national electronic transit system conformance testing has been completed successfully. 3.2. A draft law amending the Customs Code of Ukraine was	3.5. Ukraine applies NCTS (Phase 4) at the international level. 3.6. Ukraine has transited to the application of NCTS (Phase 5) at the international

Connection with other areas	Public administration Anti-corruption policy	Necessity of the involvement of the qualified professionals and international experts Anti-corruption policy	Anti-corruption policy

2.2. The current stage of implementation of program documents:

Item of the plan	Name of the program document	Current status
1.	Program of activities of the Cabinet of Ministers of Ukraine: 6.3. Customs reform - Reforming and developing the system of authorities implementing state customs policy. - Minimization of human impact and automation of processes. - Implementation of the program of the authorized economic operator. - Development of institutional capacity of customs authorities in terms of application of technical means of customs control. - Application of systematic and comprehensive customs control procedures towards risk operations based on the results of risk analysis. - Ukraine's accession to the EU / EFTA Transit Procedure and the establishment of a transit system that supports effective customs control, uses modern technologies in controlling the delivery of goods. - Creation of a system to promote the protection of intellectual property rights. - Implementation of the provisions of the EU customs legislation in the Customs Code of Ukraine in accordance with the Association Agreement. - Signing of new agreements and intensification of information exchange under existing agreements with neighbouring countries and Ukraine's largest trading partners on the exchange of preliminary customs information. - Cooperation at the managerial and operational level between customs administrations and neighbouring countries.	Under implementation
2.	National Economic Strategy 2030. Stream "International Economic Policy and Trade": - Update of the customs information system and digitalization of the customs infrastructure. - Modernize border infrastructure and ensure effective customs regulation.	Under implementation

3.	Strategy for Reforming the Public Financial Management System for 2022-2025 Section "Customs system"	Under implementation
4.	Integrated Border Management Strategy until 2025 Section "International Cooperation" (measures on establishment of the exchange of information with foreign customs authorities; approximation of customs legislation to EU standards)	Under implementation
5.	Strategy for Digital Development, Digital Transformation and Digitalization of the Public Finance Management System until 2025	Under implementation

2.3. Determining tasks for achieving goals from subsection 2.1 (for every goal):

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
1.1. Prompt informing of traders and feedback on the practical application of customs legislation			
Stage I: June 2022 – December 2022			
1.1.1	Expansion of the NCTS Helpdesk personnel, optimization of technological resources and tools to ensure the operating of the NCTS Helpdesk to perform advisory and methodological functions (in particular, submission of electronic applications for various customs matters by traders)	June 2022 – July 2022	Change in the number of customs authorities, using human resources of suspended customs authorities or customs authorities located in the territory with reduced trade activity and goods flow
1.1.2	Establishing of a competent structural unit (assignment of a function to an existing unit), responsible (from two issues within the Helpdesk competence) for:	June 2022 – July 2022	Change in the number of customs authorities, using human resources of suspended customs authorities or customs authorities located in the

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	- capturing problematic issues and feedback from the Helpdesk, managing their solution, and preparation of proposals for legislative settlement of such matters; - coordination of customs authorities on issues related to the Helpdesk; - preparation of explanatory and other materials for the Helpdesk.		territory with reduced trade activity and goods flow
1.1.3	Amending organizational and administrative documents to ensure the interaction between the competent structural unit (task 1.1.2), the Helpdesk, and other State Customs Service units	June 2022 – July 2022	
1.1.4	Preparation of comprehensive information materials (video tutorials, in-dept explanatory and presentation materials) based on previous experience	June 2022 – August 2022	Funding for video tutorials
1.1.5	Training for new employees of the Helpdesk and the competent structural unit	July 2022	
1.1.6	Preparing technical requirements, designing, and implementing the Helpdesk IT system to provide advisory and methodological functions	June 2022 – December 2022	Resources for IT development
1.1.7	Managing and capturing feedback (from the Helpdesk, customs authorities, and users) on the operation of Helpdesk and the relevant structural unit	December 2022	Anti-corruption policy
Stage II: January 2023 – December 2025			
1.1.8	Determining the need and human resources expansion of the Helpdesk and of the competent structural unit to gradually provide support for users, Helpdesk and customs authorities on all customs matters.	October 2022 October 2023 October 2024	Change in the number of customs authorities by optimizing processes on other issues

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
1.1.9	Training for new employees of the Helpdesk and the competent structural unit	January 2023 January 2024 January 2025	
1.1.10	Modernization of the Helpdesk IT solution for the phased implementation of the necessary functionality on additional customs matters	July 2022 – December 2025 following the schedule of connection of new IT solutions for customs clearance and control	Resources for IT development
1.1.11	Managing and capturing feedback (from the Helpdesk, customs authorities, and users) on the operation of Helpdesk and the relevant structural unit	Once a year	Anti-corruption policy
1.1.12	Preparation of comprehensive information materials (video tutorials, in-dept explanatory and presentation materials) based on previous experience	At least once a quarter	Funding for video tutorials and e-learnings
1.2. Establishment and operation of customs competence units. Performing concrete or all customs formalities by other customs authorities.			
Stage II: January 2023 – December 2025			
1.2.1	Introduction of processes where some or all customs formalities are performed by officials of a customs authority other than the customs authority to which the goods are presented (customs formalities, including those that require extra knowledge, are performed by the customs competence units of other customs authorities). Determining the procedure for the operating of customs competence units and the procedure for redistribution of functions for the implementation of customs formalities by customs officials of another customs authority to ensure: - maximum savings of traders' financial/time resources while performing customs formalities,	January 2023 – June 2023	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	- efficient customs control of goods by the customs authorities ' existing human resources rational use, - corruption counteraction.		
1.2.2	Human resources expansion of customs competence units	June 2023– December 2023	Change in the number of customs authorities, using human resources of suspended customs authorities or customs authorities located in the territory with reduced trade activity and goods flow
1.2.3	Providing IT support for the operating of customs competence units	January 2023 – December 2025	International technical assistance
1.2.4	Re-establishment in a frame of a pilot project of competence centres operations in some customs authorities for performing particular customs formalities for defined types of goods	January 2023 – December 2023	
1.2.5	Providing technical capability and expanding the list of customs formalities to be performed by customs competence units	January 2023 – December 2025	International technical assistance
1.2.6	Providing technical capability and expanding the scope of the centres of competence	January 2023 – December 2025	International technical assistance
1.2.7	Providing technical capability and expanding the functions of the centres of competence	January 2023 – December 2025	International technical assistance
1.3. Improvement of the IT service for the publication of information on the goods classification.			
Stage II: January 2023 – December 2025			
1.3.1	Improvement of the IT service on the goods classification information disclosure, particularly on the goods classification decisions search, including previous decisions, as well as	January 2023 – December 2023	International technical assistance

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	generalization of courts' cases of the goods classification, and the results of relevant documentary control, performed by customs authorities		Anti-corruption policy
1.4. Approval of the Guidelines for the control over correct goods classification.			
Stage II: January 2023 – December 2025			
1.4.1	Approval of the Guidelines for the control over correct goods classification (including consideration of judicial practice on the goods classification by the customs authorities) by the State Customs Service order	January 2023 – December 2023	
2.1. Implementation of the system of customs tax-payments as a stimulating tool for long-term economic development and increase of exports.			
Stage I: June 2022 - December 2022			
2.1.1	Consideration by the Verkhovna Rada of Ukraine of the draft Law of Ukraine №7418 on "Amendments to the Customs and Tax Codes of Ukraine on restoration of customs payments"	June 2022 - September 2022	Similar activity - WG on "Infrastructure Restoration and Development"
2.1.2	Development of the draft Law "On amendments to the Customs Tariff of Ukraine, including the introduction of duty exemption and the possibility of applying a reduced rate of duty to goods placed under the end-use procedure" (up to 0%, End use) and its approval with international experts and the European Commission (if possible)	June 2022 - October 2022	Similar measures regarding the introduction of reduced duty rates (up to 0%): WG on "Reconstruction and Development", WG on "Economic Recovery and Development", WG on "New Agricultural Policy", WG on "Culture and Information Policy"
2.1.3	Consideration by the Verkhovna Rada of Ukraine of the draft Law "On Amendments to the Customs Tariff of Ukraine, including the introduction of duty exemption and the possibility of applying a	November 2022 - December 2022	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	reduced rate of duty to goods placed under the end-use procedure (End use)"		
2.2. Increase of the efficiency of the automated risk management system (ASUR)			
Stage I: June 2022 - December 2022			
2.2.1	Creation of new and updating of existing risk profiles, ensuring common approaches to the practical implementation of risk management measures by customs, prevention of cases of unjustified and ineffective customs inspections, sampling and sampling of goods, initiated by a customs official	June 2022 - December 2022	Anti-corruption policy
2.2.2	Carrying out analysis and risk assessment according to the information specified in the Entry Summary Declaration, both with the use of the automated risk analysis system (ASUR) as well as customs officers of the customs authority, to which the Entry Summary Declaration is submitted, using non-automated risk criteria	June 2022 - December 2022	Anti-corruption policy
2.3. Implementation of the technique on average time measurement for release of goods following the WCO technique			
Stage I: June 2022 - December 2022			
2.3.1	Adoption of the order of the State Customs Service of Ukraine on the introduction of the technique for the average time measurement of release of goods, following the WCO technique	June 2022 - December 2022	
Stage II: January 2023 - December 2025			
2.3.2	Development of technical requirements, design and implementation of IT system for the introduction of the technique for the average time measurement of release of goods	January 2023 - June 2023	
2.4. Increase of the flow of goods through automobile border crossing points			
Stage I: June 2022 - December 2022			

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
2.4.1	Negotiations with related parties: 1) Poland: regarding the change of classification (possibility of passing trucks with a carrying capacity of more than 7,5 tons) of “Uhryniv” and “Hrushiv” border crossing points and equipping them with stationary scanning systems for trucks from Poland; 2) Romania: regarding the change of classification (possibility of passing trucks with a carrying capacity of more than 7,5 tons) at the "Dyakivtsi" and "Krasnoilsk" border crossing points. Negotiations with related parties; 3) Moldova: on changing the classification of the border crossing points: - “Mohyliv-Podilskyi” (possibility of passing trucks with a carrying capacity of more than 7,5 tons, conversion to exclusively freight traffic); - - “Bronnytsia” (re-profiling exclusively for passenger service).	June 2022 - July 2022	State Customs Service of Ukraine Ministry of Foreign Affairs
2.4.2	Preparation of draft amendments to the Government decrees on opening border crossing points mentioned in paragraph 2.5.1 in terms of changing their classification, preparation, approval and amendment of the relevant agreements on border crossing points in the form of exchange of notes between Ukraine and neighbouring countries	October 2022 - December 2022	State Customs Service of Ukraine Ministry of Foreign Affairs Ministry of Finance of Ukraine
2.4.3	Determining the need to provide such border crossing points with technical means of customs control, ways to finance their procurement and installation	June 2022 - July 2022	State Customs Service of Ukraine Ministry of Finance of Ukraine
2.4.4	Completion of the overhaul of the highway T-26-08 “Storozhynets –border crossing point "Krasnoilsk", and T-26-04 "Chernivtsi - Hertz - Dyakivtsi", as well as their further exploitation	June 2022 - September 2022	Ministry of Infrastructure of Ukraine Ministry of Finance of

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
			Ukraine
2.4.5	Completion of construction and equipping of “Krasnoilsk” and “Dyakivtsi” border crossing points	October 2022 - December 2022	State Customs Service of Ukraine Local State Administrations State Border Service of Ukraine Ministry of Finance of Ukraine
2.5. Implementation of the “right to be heard” instrument during taking customs decisions and update of the administrative appeal procedure			
Stage I: June 2022 - December 2022			
2.5.1.	Review and adoption of the draft Law of Ukraine № 7420 “On amendments to the Customs Code of Ukraine” by the Verkhovna Rada of Ukraine	June 2022 - December 2022	Anti-corruption policy
2.6. Implementation of the on-line data exchange of the preliminary data with the EU member countries			
Stage I: June 2022 - December 2022			
2.6.1.	Finalisation of consultations with the Directorate General of the EU "Taxation and Customs" (DG TAXUD) on the coordination of exchange procedures, data sets intended for transmission, functionality and requirements for the exchange of data sets, data protection	June - December 2022	Anti-corruption policy
2.6.2.	Testing the technical conditions of the organisation of information exchange	June - December 2022	Anti-corruption policy

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
2.6.3.	Formalisation of the decision to conduct a pilot project on the exchange of preliminary customs information with EU countries (adoption of a legal act)	December 2022	Pilot project supported by the EU countries Anti-corruption policy
Stage II: January 2023 - December 2025			
2.6.4.	Adoption of the Guidelines by the SCS on the use of preliminary information during customs control in order to implement the formalised decision on the pilot project for the exchange of preliminary customs information with the EU countries	January 2023 - March 2023	Anti-corruption policy
2.6.5.	Introduction of the pilot project for the exchange of preliminary customs information with the determined/several EU countries	March 2023 - December 2024	Anti-corruption policy
2.6.6.	Full-scale implementation of the decision (based on the results of the pilot project, related parties take the necessary measures to optimise information exchange in order to organise the exchange on regular basis)	January 2025 - December 2025	Anti-corruption policy
2.7. Mutual exchange of the results of customs control with the customs authorities of other states and recognition of the results of such control during customs procedures			
Stage I: June 2022 - December 2022			
2.7.1.	Consultations with the customs authorities of neighbouring countries to agree on the possibility of exchanging the results of customs control	June 2022 - November 2022	Support of the neighbouring countries Anti-corruption policy

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
2.7.2.	Approval of the list of results of customs control to be transferred (scanning, weighing, sampling (samples), etc.) under the support of the customs authorities of neighbouring countries	December 2022	Anti-corruption policy
Stage II: January 2023 - December 2025			
2.7.3.	Analysis and elaboration of the possibility of concluding additional agreements on information interaction and development of specifications - protocols for automated information exchange	January 2023 - December 2023	Anti-corruption policy
2.7.4.	Formalisation of decisions on mutual exchange of results of customs control with customs authorities of other states	December 2023	Anti-corruption policy
2.7.5.	Adoption by the State Customs Service of Ukraine of the Guidelines on the exchange of results of customs control with the customs authorities of other states and recognition of the results of such control during customs procedures in order to implement the formalized decisions	January 2024 - March 2024	Anti-corruption policy
2.7.6.	Consultations with the customs authorities of neighbouring countries, with which there is a formalized decision on mutual exchange of results of customs control, to agree on the possibility of recognizing the results of such control during customs procedures to avoid their double application	April 2024 - December 2024	Support of the neighbouring countries Anti-corruption policy
2.7.7.	Subject to support, formalisation of decisions on mutual recognition of the results of customs control during customs procedures	January 2025 - June 2025	Anti-corruption policy

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
2.8. Granting customs simplifications to compliant companies according to Ukrainian legislation (including for companies with and without AEO status, as well as companies acting in the NCTS).			
Stage II: January 2023 - December 2025			
2.8.1	Developed (procured) and implemented software for customs decision-making system for granting simplifications and authorizations	January 2023 - December 2023	
2.8.2	The Resolution of the Cabinet of Ministers of Ukraine adopted to expand the possibility of obtaining simplifications for traders without the AEO status and to introduce gradation of criteria of financial standing indicators/coefficients depending on the share of coverage of the base amount of the general financial guarantee by the guarantor	January 2023 - March 2023	
2.8.3	Development and adoption of amendments to the order of the Ministry of Finance of Ukraine, which expands the possibility of applying simplifications for traders without the AEO status (related to the adoption of amendments to the by-law in accordance with the goal, mentioned in the deliverable 3.2.)	January 2023 - May 2023	
2.9. Setting of state intermodal logistic centres with customs clearance options.			
Stage II: January 2023 - December 2025			
2.9.1	Development of the concept and principles of creating state intermodal logistics centres	2023	Review and adoption of new by-law acts
2.9.2	Development of projects for the creation of state intermodal logistics centres	2023	Infrastructure area
2.9.3	Construction and equipping of 4 state intermodal logistics centres, including those equipped with intelligent video surveillance systems, automatic reading and recognition of vehicle numbers, weighing systems, automatic barriers, traffic lights.	January 2023 - December 2025	Infrastructure area

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
Stage III: January 2026 - December 2032			
2.9.4	Construction and equipping of 22 state intermodal logistics centres, including those equipped with intelligent video surveillance systems, automatic reading and recognition of vehicle numbers, weighing systems, automatic barriers, traffic lights	January 2026 – December 2032	Infrastructure area
2.10. Arrangement of priority border crossing points, suspension of customs clearance at the western border due to Ukraine`s accession to the EU			
Stage II: January 2023 - December 2025			
2.10.1	Analysis and list development of priority border crossing points for construction/reconstruction, as well as modernisation/technical re-equipment	January 2023	
2.10.2	Creation of a plan of complex development / modernization, arrangement of existing, creation of new border crossing points on the customs border of Ukraine	January 2023	
2.10.3	Development of projects for construction/reconstruction/ modernisation/technical re-equipment of priority border crossing points	February 2023 – October 2023	Infrastructure area
2.10.4	Construction/reconstruction/modernisation/technical re-equipment, including equipping border crossing points with intelligent video surveillance systems, systems of automatic reading and recognition of vehicle numbers, automatic weighing systems, automatic barriers, traffic lights	January 2024 – December 2024	
Stage III: January 2026 - December 2032			
2.10.5	Analysis of the needs for the availability and operation of border crossing points on the western border of Ukraine	January 2026 - May 2026	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
2.10.6	Formation of the list of priority border crossing points on the northern and eastern border of Ukraine for arrangement, construction/reconstruction/modernisation/technical re-equipment	January 2026 - May 2026	
2.10.7	Development of projects for construction /reconstruction/modernisation/technical re-equipment of priority border crossing points	June 2026 - December 2026	
2.10.8	Construction/reconstruction/modernisation/technical re-equipment, including equipping border crossing points with intelligent video surveillance systems, systems of automatic reading and recognition of vehicle numbers, automatic weighing systems, automatic barriers, traffic lights	January 2027 - December 2027	
2.10.9	Suspension of customs control at border crossing points on the western border	After joining the EU	
2.11. Implementation of other simplifications (customs and tax), in line with the EU countries.			
Stage III: January 2026 - December 2032			
2.11.1	Extending the software of the customs decision-making system to all customs simplifications provided for by the Union Customs Code	January 2026 - December 2027	International technical assistance
2.11.2	Development and coordination with the European Commission, adoption of a by-law which will amend the Tax Code of Ukraine to introduce criteria for determining taxpayers who have the right to accrue import VAT in the monthly VAT return, instead of paying this tax during customs clearance (Article 211 of the Council Directive EU № 2006/112/EU of 28.11.2006)	January 2026 - March 2027	Tax policy
2.11.3	Development of technical requirements, design and implementation of the IT system for mutual assessment and mutual recognition of identical criteria for customs and tax purposes	April 2027 - December 2028	Tax policy

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
3.1. Completion of the final stage of international compliance testing of the operating national electronic transit system NCTS (Phase 4), Conformance testing, Mode 3.			
Stage I: June 2022 – December 2022			
3.1.1	Completion of the final stage of the international Conformance testing, Mode 3 of the operating national electronic transit system of Ukraine with the systems of the five countries party to the Convention on a Common Transit Procedure, which began in May 2022	June 2022	International technical assistance Anti-corruption policy
3.1.2	Obtaining an opinion from DG TAXUD on the results of the final stage of the international Conformance testing Mode 3 of the operating national electronic transit system	June 2022 – July 2022	Anti-corruption policy
3.2. Amendments to the Customs Code of Ukraine to ensure the international application of the NCTS.			
Stage I: June 2022 – December 2022

SUBGROUP 3: BUDGET AND DEBT POLICY

1. The main issues that need to be resolved as a part of the Recovery Plan in the field of "Finance system operation, its transformation, and development":

Impact of the war on the defined sphere of analysis:	
Key challenges (summarized for a defined scope: **Budget and debt policy**)	1. Responding to the extensive challenges facing Ukraine in a time of the full-scale invasion by the aggressor country requires additional resources and more rational, efficient, and effective public finance management. At the same time, attracting additional resources through government borrowing leads to an increase in the state budget deficit and public debt and, as a consequence, to a significant burden on the state budget in terms of servicing and repaying debt 2. During the war, the economic activity of business entities decreased significantly, and in some cities of Ukraine, the economic potential was virtually destroyed, which led to economic decline and, accordingly, significantly reduced the tax incomes and fees to state and local budgets 3. The war forced a significant number of people to move and many businesses to relocate. This situation dramatically changed the "map" of both the needs of local authorities and their financial capabilities. It has also made the existing basic/reverse subsidies distribution system at least temporarily inoperable while increasing the need for additional resources in many communities 4. Under conditions of the full-scale invasion by the aggressor country and the legal regime of martial law, some special taxation was introduced for the period of martial law and a certain period after its abolition or termination. As a result of the implementation of such tax changes, the structure of state and local budget revenues has changed 5. As a result of the military actions, the differentiation of revenues of local budgets of regions has significantly increased
Key opportunities (summarized for a defined scope: **Budget and debt policy**)	1. Under conditions of the legal regime of martial law, the medium-term budget planning at the state and local levels is suspended. But after the end of the war, it must be resumed as soon as possible by adopting a three-year budget declaration and local budget forecasts and drafting state budgets and local budgets in accordance with the goals of state policy for the reconstruction of Ukraine, ensuring approximation to European standards of functioning of certain spheres of public life and sectors of the economy In addition, there will be a need to create a proper system of strategic and program documents, improve the quality of financial and economic justification of government decisions, as well as develop and update relevant instructions for strategic, program and budget documents, and create opportunities for continuous improvement of knowledge and skills on budget issues

Impact of the war on the defined sphere of analysis:	
	2. Continue to conduct reviews of state budget expenditures, ensuring their regularity and full integration into the budget process, which will improve the efficiency and quality of public services, as well as identify opportunities for redistribution of financial resources following public policy priorities 3. In the mid-term, communities with relatively low incomes and relatively high needs for public services will receive more basic subsidies due to the large number of IDPs 4. In the long run, a broader and fairer system of equalization will be established that better reflects both the real financial capacity of the community and its needs for public services
Key constraints (summarized for a defined scope: **Budget and debt policy**)	1. Unpredictability of the situation and the resulting suspension of medium-term budget planning 2. Lack of internal financial resources 3. Unbearable costs of defence and further reconstruction of the country

2. Goals, objectives, and stages of the Recovery Plan in the defined scope

2.1. Specific goals

	Stage I: June 2022 – end of 2022	**Stage II: January 2023 – December 2025**	**Stage III: January 2026 – December 2032**
1. Under conditions of the full-scale invasion by the aggressor country, medium-term budget planning was suspended.			
Each stage's goal to be achieved to solve the problem		Restoring the predictability and balance of fiscal policy in the medium term and strengthening the strategic approach to budget planning	Establishment of the Budget Office as an independent advisory body to the Verkhovna Rada of Ukraine to strengthen its institutional capacity and improve efficiency
Deadline within the stage		2025	

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
Risks for achieving the goal		1) long continuation of the full-scale invasion by the aggressor country and the impossibility of long-term forecasting and planning 2) limited financial resources 3) lack of an effective system of state strategic planning	1) political risks when making changes to legislation; 2) limited financial resources
Measurable indicator of goal achievement		Deviation of budget indicators for the planned year, provided by the Budget Declaration, from the corresponding indicators approved by the Budget Declaration for the previous year, no more than 10 per cent	Conduction of an independent expert assessment of the financial system. Analysis of the implementation of the adopted financial and budgetary legislation and the effectiveness of public policy.
The total amount of financial resources required to achieve the goal		-	-
Connection with other areas		"Public Administration" "Economic Recovery and Development" "European integration" "Digitalization"	"Public Administration" "European integration" "Digitalization"

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
2. Despite the constant improvement of the methodological base, program-based budgeting, performance-based budgeting in Ukraine has limited practical application. In particular, due to unsatisfactory coherence of the strategic and medium-term budget planning systems. As a result, the Key Spending Units of the budget funds do not always use performance-based budgeting for managerial decision-making.			
Each stage's goal to be achieved to solve the problem		The state provides quality public services, ensuring efficient and effective use of budget funds.	
Deadline within the stage		2025	
Risks for achieving the goal		1) Insufficient coherence in the systems of strategic and medium-term budget planning 2) Low capacity of the authorities to apply new approaches	
Measurable indicator of goal achievement		The share of Key Spending Units of state budget funds that revised their budget programs following the new approaches is 100 per cent	
The total amount of financial resources required to achieve the goal		-	
Connection with other areas		"Public Administration" "Economic Recovery and Development" "European integration"	

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
		"Digitalization"	
3. Imperfection of the existing horizontal equalization system. Under conditions of significant forced movement of the population from places of hostilities to the other regions of Ukraine, the incorrectness of the mechanism for horizontal equalization of fiscal capacity of local budgets became obvious. When preparing the draft state budget for the current year, last year's data, which do not correspond to the actual situation in communities, is used to calculate financial equalization instruments. In the case of the expected mass return of the population to pre-war places, the problem will be reproduced next year. In addition, the analysis of local budgets for 2021 indicates the existence of significant disparities in the budgets of territorial communities. Overcoming these is the main task of the mechanism for the horizontal equalization.			
Each stage's goal to be achieved to solve the problem	Improving the horizontal equalization system	Further improvement of the mechanism of horizontal equalization and reducing the disparities in the financial sustainability of communities. The alignment system is based on timely and accurate information about the location of the population.	
Deadline within the stage	2022-2023	2025	
Risks for achieving the goal	- military actions on the territory of Ukraine; - political risks when making changes to the legislation; - lack of data on population and IDPs	- lack of political will to adhere to specific decentralization priorities; - political risks when making changes to the legislation; - lack of data to conduct the necessary analyzes and research	- hostilities on the territory of Ukraine; - political risks when making changes to the legislation; - lack of data on population and IDPs
Measurable indicator of goal achievement	Development of the draft law "On Amendments to the Budget Code of Ukraine" to improve the system of horizontal equalization	Basic/reverse subsidies size 1 to 2% of GDP, according to the EU standards. Reduction of the standard deviation of local	Reduction of the standard deviation of local budget revenues per capita by 20%

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
		budget revenues per capita by 15%	
The total amount of financial resources required to achieve the goal	Depending on the disparities in local budget revenues	Depending on the disparities in local budget revenues	Depending on the disparities in local budget revenues
Connection with other areas	"Public Administration" "Reconstruction and development of infrastructure" "Economic Recovery and Development" "Construction, urban planning, modernization of cities and regions" "European integration" "Digitalization"	"Public Administration" "Reconstruction and development of infrastructure" "Economic Recovery and Development" "Construction, urban planning, modernization of cities and regions" "European integration" "Digitalization"	"Public Administration" "Reconstruction and development of infrastructure" "Economic Recovery and Development" "Construction, urban planning, modernization of cities and regions" "European integration" "Digitalization"
4. The inefficiency of the external state control (audit) system due to its inconsistency with the best world practices and international standards.			
Each stage's goal to be achieved to solve the problem		Bring the external state financial control (audit) system in the accordance with the best international practices and standards	
Deadline within the stage		2024	
Risks for achieving the goal		- hostilities on the territory of Ukraine;	

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
		- political risks when making changes to the legislation; - lack of financial resources	
Measurable indicator of goal achievement		Implementation of measures of state external financial control (audit) of all public funds, state and municipal property	
The total amount of financial resources required to achieve the goal		-	
Connection with other areas		"Public Administration" "European integration" "Digitalization"	

2.2. The current stage of implementation of program documents

#	Name of the program document	Current status
1	Strategy for reform of the public finance management system for 2022-2025	Adopted
2	Action plan for the implementation of the Strategy for reform of the public finance management system for 2022-2025	Adopted
3	Med-term public debt management strategy for 2021-2024	Adopted
4	Development Strategy of the Accounting Chamber for 2019-2024	Adopted

2.3. Determining tasks for achieving goals from subsection 2.1 (for every goal)

#	Description of the task to achieve the goal	Deadline within the stage	Dependence on goals from other directions, spheres, problems
Goal 1: Restore the predictability and balance of fiscal policy in the medium term and strengthen the strategic approach to budget planning			
Stage I: June 2022 – end of 2022			
1	-		
Stage II: January 2023 – December 2025			
1	Conduction of a comprehensive assessment of the effectiveness of the public financial management system to identify gaps and compliance with EU rules (recommendations)	2023	
2	Development of a methodology for preparing proposals for the Budget Declaration	2023	
3	Increasing the strategic direction of the budget process by reducing the number of the Key Spending Units of budget funds, ensuring their definition following their powers and responsibilities in the management of a particular sphere of public life	2023	
4	Update the organizational and methodological principles of local budget forecasting, including a standard form	2024	
5	Approval of local budget forecasts as medium-term budget planning documents	2025	
6	Establishment of a system for monitoring local budget forecasts	2025	
7	Strengthening the requirements for the financial and economic assessments of draft regulations and their compliance with the budget legislation	2023	
Stage III: January 2026 – December 2032			
1	Conduction of a balanced debt policy with the gradual reduction of the ratio of total public debt and state-guaranteed debt to GDP to pre-war levels	2035	
Goal 2: The state provides quality public services, ensuring efficient and effective use of budget funds			
Stage I: June 2022 – end of 2022			

#	Description of the task to achieve the goal	Deadline within the stage	Dependence on goals from other directions, spheres, problems
1	Improving approaches to the preparation of budget programs by the Key Spending Units of state budget funds to optimize their number and strengthen their coherence with public policy objectives	2022	
Stage II: January 2023 – December 2025			
1	Preparation of budget programs by the Key Spending Units of state budget funds, taking into account new approaches	2025	
2	Strengthening the capacity of the Key Spending Units of state budget funds to use the program-based budgeting, including budget programs efficiency evaluation	2023-2025	
3	Regular state budget expenditures reviews based on the improved methodology	2023-2025	
4	Optimization of the Standard Program Classification of Expenditures and Lending to the Local Budget	2024	
5	Improving the system of performance indicators for local budget programs	2023	
6	Improving the capacity of local governments to use program-based budgeting	2023-2025	
Stage III: January 2026 – December 2032			
	-		
Goal 3: Improving the horizontal equalization system			
Stage I: June 2022 – end of 2022			
1	Determining the list of possible models of the horizontal equalization system and preliminary calculation of indicators for each model of the horizontal equalization system	2022-2023	
2	Determining the optimal model and agreeing with all stakeholders	2022-2023	
Stage II: January 2023 – December 2025			
1	Analysis of the efficiency of the horizontal equalization system for the previous period	2024	
2	The new model for horizontal equalization development is based on the best European practices for ensuring the fiscal capacity of local communities and regions.	2025	

#	Description of the task to achieve the goal	Deadline within the stage	Dependence on goals from other directions, spheres, problems
Stage III: January 2026 – December 2032			
1	-		
Goal 4: Bring the external state financial control (audit) system in the accordance with the best international practices and standards			
Stage I: June 2022 – end of 2022			
1	-		
Stage II: January 2023 – December 2025			
1	Bringing the system of external state financial control (audit) to international standards and improving the processes of external state financial control (audit) over public funds, in particular, local budgets, state social and pension insurance funds, funds of state entities and communal property	2024	
Stage III: January 2026 – December 2032			
1	-		

3. List of national projects corresponding with tasks under Section 2.3 (for the relevant task)

Project description to the task under Section 2.3	Project justification	Qualitative indicators of project implementation	Economic effect (impact on GDP, budget, employment, etc.)	Responsible authority	Required financing (million UAH)	Proposed sources of financing	Regulatory support	Related area of EU regulation (in general)
Stage I: June 2022 - end of 2022								
-								

Project description to the task under Section 2.3	Project justification	Qualitative indicators of project implementation	Economic effect (impact on GDP, budget, employment, etc.)	Responsible authority	Required financing (million UAH)	Proposed sources of financing	Regulatory support	Related area of EU regulation (in general)
Stage II: January 2023 - December 2025								
Establishment of the Budget Office at the Verkhovna Rada of Ukraine	Strengthening the institutional capacity of the Parliament and improving the efficiency of its activities, in particular for: - examination of legislative initiatives that have a systemic impact in specific areas of legislation, and their effect on economic and social development - assessment of the financial system, primarily budget - analysis of the implementation of the adopted financial and budgetary legislation and the effectiveness of public policy - the adaptation of budget legislation to the EU rules	The Budget Office established as an independent advisory body to the Verkhovna Rada of Ukraine to strengthen its institutional capacity and improve efficiency.		Verkhovna Rada		International Technical Assistance		

Project description to the task under Section 2.3	Project justification	Qualitative indicators of project implementation	Economic effect (impact on GDP, budget, employment, etc.)	Responsible authority	Required financing (million UAH)	Proposed sources of financing	Regulatory support	Related area of EU regulation (in general)
Improving the horizontal equalization system	The analysis will identify the strengths and weaknesses of the system and areas for further improvement Adapting the best practices will enable the implementation of the most progressive model in Ukraine	Calculation of basic / reverse subsidy amounts for each local budget Draft law New alignment model	-	MoF		International Technical Assistance		

4. The necessity of legal amendments

№	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
1	Budget Code of Ukraine	Update of the Budget Code of Ukraine taking into account EU rules	MoF, Verkhovna Rada	2025	
2	Instructions for preparing proposals for the Budget Declaration	Methodological approaches to budget planning at the level of the Keys Spending Units of the state budget	MoF	2023	
3	Instructions for preparing budget requests	Clarification of the methodology for the preparation of budget requests following the Budget Declaration	MoF	2023	

№	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
4	Instructions for compiling a local budget forecast	Clarification of organizational and methodological principles of local budget forecasting, including a standard form	MoF	2024	
5	Methodical recommendations on the preparation of budget programs by the Key Spending Units of the state budget	Development of unified approaches to the preparation of budget programs, their content and characteristics by the Key Spending Units of the state budget funds	MoF	2022-2024	
6	Budget Code of Ukraine	Making changes to Articles 98-99 BCU	MoF	2023	2024
11	Budget Code of Ukraine, other laws of Ukraine on financial control (audit)	Amendments to the legislative acts of Ukraine to bring the external state financial control (audit) system in the accordance with the best international practices and standards	Verkhovna Rada, Accounting Chamber, MoF (State Audit Office)	2023-2024	2024

AREA "DEVELOPMENT OF THE BANKING SYSTEM, NON-BANK FINANCIAL SERVICES AND CAPITAL MARKETS"

SUBGROUP 4: BANKING SYSTEM AND NON-BANK FINANCIAL SERVICES MARKET

1. The main problems that need to be addressed in the framework of the Recovery Plan in the area of "Functioning of the financial system, its reform"

Impact of the war on the defined sphere of analysis:	
Key challenges (summarized for a defined scope: **Banking system and non-bank financial services market**)	1. Pressure on the national currency due to deterioration of the payments balance 2. Rapid growth of inflation 3. Deterioration of the financial condition of current and potential borrowers: reduction of liquidity, physical inability to sell products or services, loss of assets 4. Deterioration of financial conditions of banks and non-bank financial institutions: - deterioration of the loan portfolio; NPL growth; loss (physical destruction) of collateral in combat zones or reduction of its value; loss of insurance portfolios (loss of client bases) of insurers, withdrawal from existing contracts due to policyholders' lack of funds - loss of assets (fixed assets, cash) 5. Accumulation of risks, with a high probability of their occurrence: - widespread loss of population and business as a result of hostilities - catastrophic nature of such losses 6. High level of cyber threats 7. Settlement of financial and legal relations that arose in the temporarily occupied territories during the occupation process 8. Reduction of access to financial services, means of payment (cash / non-cash payments) in the territories affected by hostilities or temporarily occupied territories: aggressor's attempts to introduce a ruble zone in uncontrolled territories
Key opportunities (summarized for a defined scope: **Banking system and non-bank financial services market**)	1. Emergence of market supply of financial services reflecting the war and its impact, in particular, new insurance programs 2. Financial measurement of the temporarily occupied territories' reintegration 3. Restoration of financial inclusion, deepening of financial literacy of financial services consumers 4. Decrease in NPL growth in banks and non-bank financial institutions (NFIs) 5. Strengthening of the protection of investors' and creditors' rights 6. Development of the financial market open architecture, oversight and cash circulation

Impact of the war on the defined sphere of analysis:	
	7. Ensuring the development of Fintech, SupTech, RegTech and other digital financial technologies 8. Development of the digital economy 9. Cyber resilience of the financial system
Key constraints (summarized for a defined scope: **Banking system and non-bank financial services market**)	1. Maintaining price stability 2. Maintaining financial stability / application of macroprudential regulation requirements 3. Uncertainty about the timing of the end of hostilities, mobilization of the population, etc.

2. Goals, objectives, and stages of the Recovery Plan in the defined scope

2.1. Specific goals

	Stage I: June 2022 – end of 2022	**Stage II: January 2023 – December 2025**	**Stage III: January 2026 – December 2032**
1. The deterioration of banks and non-bank financial institutions financial condition is happening for a number of reasons: • loss of collateral in combat zones • loss of assets of borrowers and banks themselves and NFIs • widespread loss of population and business as a result of hostilities • catastrophic nature of such losses • reduction in the ability of borrowers to service debt • deterioration of the loan portfolio; NPL growth. Therefore, the Recovery Plan proposes to reach the goal of achieving and maintaining financial stability under martial law. This task requires a number of problems to be solved: • effective regulation of the financial sector and improvements to supervisory approaches • ensuring the transparency of the financial sector • maintaining the financial sector's resilience to challenges • improving the quality of the financial sector's corporate governance and risk management.			

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
Each stage's goal to be achieved to solve the problem	1. Effective regulation of the financial sector and improving supervisory approaches	1. Effective financial sector regulation and improving supervisory approaches 2. Boosting financial sector's resilience to challenges 3. Improving the financial sector's quality of corporate governance and risk management	
Deadline within the stage	December 2022	December 2024	
Risks for achieving the goal	1. Inconsistency of positions, lack of understanding of the need for appropriate changes in legislation	1. Inconsistency of positions, lack of understanding of the need for appropriate changes in legislation	
Measurable indicator of goal achievement	1. Adoption of relevant amendments to regulations 2. Liquidity of banks (H6) > 60%.	1. Adoption of relevant amendments to regulations 2. Liquidity of banks (H6) > 60%.	
The total amount of financial resources required to achieve the goal			
Connection with other areas	WG on functioning of the financial system, its reform / WSG (working subgroup) on tax policy / budget policy WG on ecological issues	WG on functioning of the financial system, its reform / WSG (working subgroup) on tax policy / budget policy WG on ecological issues	
2. Reduction of economic activity and limited business liquidity lead to a postponement of demand and investment. The financial sector is expected to provide effective solutions for the resumption of lending and the rapid leveling of NPL growth, which could significantly slow down lending recovery.			

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
Therefore, the Recovery Plan proposes to achieve the goal of promoting economic recovery and development under martial law. This task requires a number of problems to be solved: • Promoting lending the economy (stimulating the provision of new loans). Reducing the growth of NPLs in banks and NFIs, including strengthening the protection of creditors ' and investors' rights. • Reducing the growth of NPLs in banks and NFIs, including strengthening the protection of creditors ' and investors' rights.			
Each stage's goal to be achieved to solve the problem	1. Promoting lending the economy (stimulating the provision of new loans) 2. Reducing the growth of NPLs in banks and NFIs, including strengthening the protection of creditors 'and investors' rights	1. Promoting lending the economy (stimulating the provision of new loans) 2. Reducing the growth of NPLs in banks and NFIs, including strengthening the protection of creditors' and investors' rights	1. Promoting lending the economy (stimulating the provision of new loans).
Deadline within the stage	December 2022	December 2024	
Risks for achieving the goal	1. Inconsistency of positions, lack of understanding of the need for appropriate legislative changes 2. Lack of funding sources for such funds and programs	1. Inconsistency of positions, lack of understanding of the need for the appropriate legislative changes 2. Lack of funding sources for such funds and programs	
Measurable indicator of goal achievement		1. Volume of net bank loans to GDP (business entities and individuals) > 15% 2. Share of gross non-performing loans in banks' portfolio, % - 10%	

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
The total amount of financial resources required to achieve the goal

3. Reduction of access to financial services, means of payment (cash / non-cash payments) in the territories affected by hostilities or temporarily occupied territories: aggressor attempts to introduce a ruble zone in uncontrolled territories. Reducing users' access to financial services and cash as a result of the war raises new questions: how not only to reach the target audience of financial literacy and financial inclusion programs, but also to make such content available to Ukrainians abroad. Therefore, the Recovery Plan proposes to achieve the goal of promoting economic recovery and development under martial law. This task requires a number of problems to be solved: • improving the availability and use of financial services • strengthening the protection of financial services consumers' rights • increasing the financial literacy level of the population.			
Each stage's goal to be achieved to solve the problem	1. Improving the availability and use of financial services 2. Strengthening the protection of financial services consumers' rights	1. Improving the availability and use of financial services 2. Strengthening the protection of financial services consumers' rights 3. Increasing the financial literacy level of the population	

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
Deadline within the stage	December 2022	December 2024	
Risks for achieving the goal	1. Inconsistency of positions, lack of understanding of the need for appropriate legislative changes	1. Inconsistency of positions, lack of understanding of the need for appropriate legislative changes.

The total amount of financial resources required to achieve the goal			
Connection with other areas	WG on digitalization WG on the issues of education and science WG on the rule of law	WG on digitalization WG on the issues of education and science WG on the rule of law	
4. Non-bank financial institutions have found themselves in a difficult situation due to the greater importance of territorial assets, some of which are currently located in communities where hostilities are taking place. Some companies have not provided their reports, which limits the controllability of the financial sector. Therefore, the Recovery Plan proposes to achieve the goal of promoting economic recovery and development under martial law. This task requires a number of problems to be solved: • promoting the development of the non-bank financial services markets • integration of Ukraine's financial market into the global financial market.			
Each stage's goal to be achieved to solve the problem	1. Promoting the development of the non-bank financial services markets 2. Integration of Ukraine's financial market into the global financial market	1. Promoting the development of the non-bank financial services markets 2. Integration of Ukraine's financial market into the global financial market	

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
Deadline within the stage	December 2022	December 2024	
Risks for achieving the goal	1. Inconsistency of positions, lack of understanding of the need for appropriate legislative changes	1. Inconsistency of positions, lack of understanding of the need for appropriate legislative changes	
Measurable indicator of goal achievement		Non-bank lending penetration rate, % to GDP > 3%	
The total amount of financial resources required to achieve the goal			
Connection with other areas			
5. Continuation of financial sector innovative development goals implementation to facilitate access to Ukrainian financial services, their security and competitiveness in the European market. Therefore, the Recovery Plan proposes to achieve the goal of promoting economic recovery and development under martial law. This task requires a number of problems to be solved: • Development of financial market open architecture, oversight and cash circulation. • Ensuring the development of Fintech, SupTech, RegTech and other digital financial technologies. • Development of the digital economy. • Cyber resilience of the financial system.			
Each stage's goal to be achieved to solve the problem	1. Ensure the development of Fintech, SupTech, RegTech and other digital financial technologies 2. Development of the digital economy 3. Cyber resilience of the financial system	1. Development of financial market open architecture, oversight and cash circulation 2. Ensuring the development of Fintech, SupTech, RegTech and other digital financial technologies	

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
		3. Development of the digital economy 4. Cyber resilience of the financial system

2.2. The current stage of implementation of program documents:

Item of the plan	Name of the program document	Current status
1.	Programs of activity of the Cabinet of Ministers of Ukraine, approved by the Resolution of the Cabinet of Ministers of Ukraine № 471 on 12 June 2020	Under implementation
2.	Strategy of Ukrainian Financial Sector Development until 2025 (latest version), approved under decision of the National Commission on Securities and Stock Market № 140, dated 2 March 2021, decision of the Board of the National Bank of Ukraine № 97, dated 18 March 2021, and decision of the Deposit Guarantee Fund № 193, dated 25 February 2021	Under implementation

3.	National Economic Strategy for the period up to 2030, approved by Resolution of the Cabinet of Ministers of Ukraine № 179 on 3 March 2021	Under implementation
4.	Plan of draft law work of the Verkhovna Rada of Ukraine for 2022 (PZR), approved by Resolution of the Verkhovna Rada of Ukraine № 2036-IX, dated 15 February 2022	Under implementation
5.	Plan for organizing the implementation of decision of the National Security and Defense Council of Ukraine dated August 11, 2021, *On the Strategy of Economic Security of Ukraine for the period up to 2025*, approved at a meeting of the Cabinet of Ministers of Ukraine on 1 September 2021	Under implementation
6.	Action plan for the implementation of the Letter of Intent of the Government of Ukraine and the National Bank of Ukraine dated 8 November 2021, and the Memorandum on Economic and Financial Policy	Under implementation
7	National Bank of Ukraine Strategy until 2025 (updated version), approved under Decision of the NBU Board № 412 on 13 August 2021	Under implementation
8	The Cybersecurity Strategy of Ukraine, put into effect by the Decree of the President of Ukraine № 447/2021, dated 26 August 2021	Under implementation

2.3. Determining tasks for achieving goals from subsection 2.1 (for every goal)

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
Goal 1. Financial stability			
1.1. Effective regulation of the financial sector and improvement of supervisory approaches			
Stage I: June 2022 - end of 2022			
1.1.1	Develop and implement a plan for the temporary simplification or modernization of regulatory requirements for capital, liquidity, information disclosure; and the gradual restoration of the banks' capital adequacy levels,	June - July 2022	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	given the actual state of banks after the crisis caused by the military invasion of Russia		
1.1.2	Clarify the regulation of the non-bank financial services market in the temporarily occupied territories (in particular, on reporting requirements, on certain items of the regulation of the NFIs)	December 2022	
Stage II: January 2023 - December 2025			
1.1.3	Introduce an effective system for preventing conflicts of regulators' interests during the exercise of their oversight powers and other functions performed by regulators.	December 2023	
1.1.4	Implement regulatory requirements under the EU-Ukraine Association Agreement, in particular on capital requirements, liquidity and disclosure.	December 2024	
1.1.5	Improve the efficiency of NFI management, in particular: • Exclude credit unions of Ukraine from the scope of Directive 2013/36 / EU on access to credit institutions and prudential supervision of credit institutions and investment firms (CRDIV) and Regulation (EU) 575/2013 of the European Parliament and of the Council on prudential requirements for credit organizations and investment companies (CRR). • Introduce a risk-oriented approach to the supervision of non-bank financial institutions using the principle of proportionality, perspective, professional judgment and early detection and response to potential risks. • Create transparent and equal conditions for doing business in life insurance in Ukraine. • Introduce a monitoring system for systemically important non-bank financial institutions. • Development of legal acts to ensure the deregulation of low-risk or non-EU non-bank financial services markets.	December 2023 December 2024	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	• Improve the procedures for assessing the financial condition of financial companies and pawnshops, in particular, in terms of simplifying the procedure for increasing equity (by amending the already adopted Law *On Financial Services and State Regulation of Financial Services Markets*)		
1.1.6	Introduce payment instruments oversight in accordance with international standards	December 2024	
1.1.7	Ensure the development of significant financial market infrastructure monitoring	December 2024	
1.1.8	Support the legislative establishment of the market for securitization of mortgage, leasing and other bank assets in order to secure lending programs with long-term financing and diversify risks by: • amendments in legislation regarding the organization of agreements on bank assets securitization • popularization and active promotion of bank assets securitization	2025 year	WG on functioning of the financial system, its reform / WSG (working subgroup) on Capital markets
1.2. Resilience of the financial sector to challenges			
Stage II: January 2023 - December 2025			
1.2.1	Improve macroprudential tools: • For macroprudential capital instruments: (a) develop a tool and, if necessary, implement a countercyclical capital buffer and a systemic risk buffer; (b) establish requirements for the leverage ratio. • Calibrate and, if necessary, introduce additional capital requirements in case of significant concentrations in certain sectors or types of loans. • If necessary, set additional risk weights for certain risky types of loans. • Calibrate and, if necessary, limit the loan-to-value ratio (LTV), debt service-to-income ratio (DSTI), and total debt -to-income ratio (DTI).	December 2024	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	• If necessary, develop macroprudential regulation tools for the non-bank financial sector. • Introduce a mechanism for long-term planning, early detection of problems in banks, early intervention and settlement of bank insolvency. • Launch an effective system of early warning tests based on the system of financial institution supervision, taking into account the specifics of life insurance		
1.2.2	Encourage international financial institutions to contribute to the capital of banks (including state-owned ones) that, according to the NBU, need to be recapitalized	2025 year	
1.2.3	Establish the market for distressed assets securitization by: • improving regulation in terms of agreements on securitization of distressed bank assets. • promotion of distressed bank assets securitization	2025 year	WG on functioning of the financial system, its reform / WSG (working subgroup) on Capital markets
1.3. Improve the quality of corporate governance and risk management in the financial sector			
Stage I: June 2022 - end of 2022			
1.3.1	Improve the quality of corporate governance in state owned banks according to the world-best practices	December 2022	
Stage II: January 2023 - December 2025			
1.3.2	Improve the quality of corporate governance in state owned banks according to the world-best practices	December 2025	
1.3.3	Implement sustainable financing practices based on effective corporate governance, which includes environmental, social and governance factors (ESG):	December 2024	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	• Sustainable Finance development in Ukraine: developing recommendations for the implementation of sustainable financing standards; • Introduce environmental, social and management practices (ESG) in Ukrainian banks: (a) develop requirements for environmental and social risk management in banks; (b) develop standards for the disclosure of ESG by banks; • Promote sustainable financing practices based on effective corporate governance considering ESG factors, in particular through: o taking measures for relevant institutions regulated by the NBU to raise awareness and develop the capacity for sustainable financing o developing and approving the Annex on Corporate Governance and Sustainable Development to the Corporate Governance Code (ESG Appendix) o developing and approving Recommendations on the implementation or financing of environmental projects through the issuance of green bonds o developing an online ESG assessment card o developing the ESG Disclosure Guidelines o conducting activities and developing training materials on raising awareness of sustainable financing standards among NBU-regulated market participants		
1.3.4	Introduce the European Green Taxonomy into the legislation of Ukraine, and a system of independent verification of compliance, as well as a reporting system for it	December 2025	WG on ecological issues
Goal 2. Promote economic recovery and development			
2.1 Promote lending to the economy (stimulate the provision of new loans)			

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
Stage I: June 2022 - end of 2022			
2.1.1	Introduce military-political risk insurance: - By Ukrainian insurers in the partnership of international reinsurance (in particular, high-quality reinsurance coverage for military and political risks in the Lloyd's of London insurance market). Adoption of amendments to the legislation on the introduction of military-political risk insurance are expected and rules/procedures for participants of the process on insuring military-political risks are needed/ - Through involvement in the system (mechanism) of insurance (guarantees) of a leading international organization - the Multilateral Investment Guarantee Agency (MIGA). To this end, it is anticipated that a special trust fund will be created, which would be administered directly by MIGA and provide investment guarantees under specially modified procedures. This fund will accumulate the financial resources provided by the pool of sponsors and it would be at the expense of WBG IGTF that insurance indemnities were paid in the event of insured events. - Consider alternative in introducing the population and business military risks insurance program at the expense of the new established Compensation fund (Pool) creation based on public-private partnership (at the expense of means of funds for restoration, from international partners). The following steps are anticipated: o Determining the basic principles of the military risks insurance program with the participation of the state (basic conditions of insurance, conditions of insurers membership in the Compensation Fund (Pool), procedure for formation of the Fund's funds (Pool), participation of insurers/Fund	December 2022	WG on economic recovery and development

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	(Pool)/state in compensation and/or reinsurance depending on the amount of losses). o Developing a bill regulating the establishment and operation of the Compensation Fund (Pool), supervision and control of the Fund. o Extending the Pool's activities to a wide range of areas of the state's economy, covering the protection of both material objects and people's lives and health from military and political risks.		
2.1.2	Leasing policy response - Stimulate the development of financial leasing, for instance, by creating a program to finance the purchase or sale of production equipment for leasing. Raising funds from international donors and rehabilitation funds to fund the program. - Develop a concept of lease with the right of redemption to increase the availability of financing for the purchase of real estate, in particular, commercial.	December 2022	WG on functioning of the financial system, its reform / Tax policy, Budget policy WG on economic recovery and development
2.1.3	Synchronization with state programs on destroyed housing and financing its restoration in particular of homeless individuals and/or IDPs with ability to repay housing loans	August 2022	WG on issues of infrastructure restoration
2.1.4	Ensure open access to public registers	December 2022	
2.1.5	Increase efficiency and expand access to existing funds and lending programs, state guarantees, and risk insurance coverage of certain business types to restore Ukraine's economy. Provide funding with reconstruction funds and / or using the funds of international donors.	December 2022	WG on economic recovery and development
2.1.6	Policy response on trade finance - active use of the Export Credit Agency (ECA) instrument	By the end of 2022	WG on economic recovery and development

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	• Launch a program to finance SME exporters together with the ESA and banking institutions at the expense of international donors and recovery funds. • The program for financing exporters together with the ECA and banking institutions has been launched: a new section has been created on the Diia.Business portal with an appropriate form for collecting applications and forwarding them to the employees of relevant banks at the expense of international donors, recovery funds. • Elaboration of the possibility of expanding access to a bank guarantee for Ukrainian manufacturers' participation in international procurement. • Ensure the full and effective functioning of the ECA, attract a donor and expert environment that will provide the best global experience necessary for the effective functioning of the ECA, and create the necessary conditions for attracting financial assistance to increase the financial capacity of the ECA. • Actively promote ECA products and services for the SME segment. • Provide information and educational support for SMEs to enable them to access export financing with the participation of the ECA.		
Stage II: January 2023 - December 2025			
2.1.7	Policy response on trade finance Improve the legal framework for the development of ABF (trading factoring tools) and electronic invoicing (e-invoicing): • Settle cases of legal ambiguity and uncertainty regarding the regulation of collateral, especially the priority of creditors' claims. • Ensure that the regulatory framework provides effective enforcement methods as key prerequisites for increasing secured credit.	December 2024	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	• Modernize the existing register of creditors' claims and harmonize it with modern standards for maintaining a register based on notifications. • Amend/adopt some legislative acts: the Law *On Factoring*, the Law *On Securing Creditors' Claims* and the Law *On Pledges*. • Develop strategic approaches to the regime of legal regulation of relations in the field of reverse factoring (make adjustments and clarifications to the provisions of the Civil Code governing the assignment of requirements in general and factoring in particular and ensure that these rules meet the latest international standards) and calculate the risk weighing of corporate loans. • Promote the development of other trade factoring forms (without recourse and international factoring) and forfaiting. • Promote the development of export letters of credit, guarantees and other trade finance instruments.		
2.1.8	Develop an electronic platform for lending under the provision of assets to support the recovery of SMEs during the postwar period	December 2023	
2.1.9	Improve credit technologies (reduction of costs, including time, for decision-making and loan administration)	December 2023 for banks December 2024 for NFIs	
2.1.10	Improve the functions of the NBU Credit Register through: • testing hypotheses about different models of data collection for the Credit Register from non-bank financial institutions • identifying the regulatory objectives of the BCH market surveillance system in Ukraine • studying international experience and selecting the most optimal model for Ukraine • developing drafts of necessary regulations, consulting with market representatives so they accept them.	June 2024	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
2.1.11	Launch of the updated Credit Register platform	January 2024	
2.1.12	Elaborate the possibility of spreading military and political risk coverage on small and medium business loans (after elaboration of group categories subject to such guarantees)	December 2023	WG on economic recovery and development
2.1.13	Investigate the possibility and probable models of a Bank for Reconstruction and Development (BRD) establishment, which will include such issues: - expediency of BRD creation - organizational and legal forms - financial products and mechanisms - target audiences - sources of capital	July 2023	WG on economic recovery and development
2.2. Reduce the growth of NPLs in banks and NFIs, including strengthening the protection of creditors 'and investors' rights			
Stage I: June 2022 - end of 2022			
2.2.1	Policy Response on loan restructuring • Develop mechanism of loan restructuring of borrowers (individuals) affected by the war using funds from international donors, reconstruction funds. • Develop a loan restructuring mechanism for borrowers (legal entities) affected by the war (including through the “Kyiv Approach / Financial Restructuring”) using funds from international donors, recovery funds. • Legislatively regulate credit relations in which collateral has been lost or its market value has decreased due to the war. • Amend regulations on the issues of taxation of the developed mechanics of individuals and legal entities loan restructuring, lost loan collateral.	2022 year	WG on functioning of the financial system, its reform / Tax policy, Budget policy, Capital markets WG on economic recovery and development

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	• Synchronization of presence of information on the pledged property (real estate, movable property, other assets) - in all the registers of damaged property; • Elaborate the possibility of the legislative regulation of the transfer all of assets, the credit risk of which has increased to 100%, to a separate institution in exchange for bonds of this institution with a value equal to the assets' net value as of February 23, 2022: o A separate institution carries out legal work to obtain compensation for the losses of banks, draws up documents confirming losses and files consolidated claims. o Funds received by the organization as compensation for losses are used to repay the bonds. o On loans to borrowers who have viable businesses but are in temporary financial difficulties caused by the war, banks restructure the debt by converting the part of the debt that exceeds the amount of debt that can be serviced on market terms into contingent liabilities, and takes them into account in off-balance sheet accounting. Contingent liabilities are repaid in this case and according to a certain schedule: receipt of compensation from the aggressor state for damages, cash-sweep (excess of actual profitability / profitability over projected during the loan agreement).		
2.2.2	Ensure the improvement of valuation activities, in particular by providing additional requirements for valuation entities that can conduct independent valuations in cases established by the legislation on financial markets	December 2022	
2.2.3	Develop a program of social lending and loan restructuring for military service members using recovery funds and / or international funds	December 2022	WG on social protection issues
2.2.4	Policy response on balancing creditors' rights to initiate amendments to procedural legislation regarding financial services disputes:	December 2022	WG on the rule of law

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	• improvement of the rules that serve as tools for delaying litigation and for abuse of rights, in order to minimize them • improvement of the norms establishing the terms of consideration of the case in court, in order to minimize them • development of amendments to the legislation of Ukraine on the rights and obligations of public and private executors, methods and procedures for the execution of decisions.		WG on social protection issues
Stage II: January 2023 - December 2025			

2.2.5	Implement measures to increase the institutional capacity of the DGF (Deposit Guarantee Fund for Individuals) through:
	• preparation of appropriate amendments to the legislation to ensure action to compensate creditors (damages), protect the rights of depositors, and other issues related to the functionality of the DGF
	• adoption of amendments to the Law of Ukraine *On the Deposit Guarantee System for Individuals*, to the legislation on the functioning of the securities market, which will shift the focus onto the Fund's instruments for selling assets to obtain funds from borrowers by restructuring loans and / or issuing bonds, secured by these problem loans
	• amendments to the legislation in order to increase the proceeds from the Fund's the sale of assets:
	  • adoption of amendments to the Law of Ukraine *On the Deposit Guarantee System for Individuals*
	  • creation of financial instruments for reinsurance of the Fund's risks under the provided guarantees
	  • adoption of regulatory documents required for the hosting bank (Cabinet of Ministers resolutions, NBU resolutions).
		2025 year	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	Simplification of the process of alienating the liabilities of the insolvent bank to the host bank: • Introduce profit and loss sharing agreements between the Fund (insolvent bank) and the host bank and allow guarantees to be provided to the host party in case of the incorrect valuation of assets. • Introduce incentive mechanisms for host state-owned banks that will receive financial support (including in the form of guarantees for transferred assets) of the Fund, for example to increase their capital through IGLBs, in a certain proportion of the amount of asset insufficiency. • Create a mechanism for the rapid recovery of a transferred borrower's solvency by converting part of the debt into the capital of such a borrower. • Increase the Fund's financial resources to provide financial support to host banks. Expand the tools for restoring the solvency of insolvent banks' borrowers: • Anticipate the possibility of the forcible conversion of part of the borrower's debt transferred to the host bank into the capital of such debtor (see paragraph 1), including debt to persons related to the bank. • Restore their ability to provide the host bank with their assets as collateral for new loans. To do this, the borrower's assets must be released from encumbrances imposed in the interests of persons associated with the aggressor country. Simplify the process of converting liabilities (deposits) into the bank's capital in order to simplify one of the options for resolving the bank's insolvency:		

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	• Fully implement Directive 2014/59/EU, including the establishment of a settlement fund that can provide financial support to host banks. • Extend Directive 2014/59/EU legislation to all banks (and not just systemically important ones), including the instrument for converting bank deposits into capital (bail-in) of a bank for any bank and change the requirements for the list of deposits, suitable for such conversion.		
2.2.6	Balance the rights of creditors Initiate amendments to procedural legislation regarding financial services disputes: • Reduce the legal risks of lenders in connection with the provision of credit for the purchase of real estate secured by such real estate, prevention of abuse by the mortgagor of their rights, ensuring effective satisfaction of the lender's claims through the subject of the mortgage through: • revocation of the permit of the body of guardianship and trusteeship for the mortgage of housing, which will only be purchased at the expense of a bank loan • expansion of the possibility of using the data of the Unified Demographic Register for processing loan applications for a mortgage loan • increasing the efficiency of the mortgagee's rights when applying for foreclosure on the mortgage subject. Strengthen creditors' rights when dealing with overdue and problematic loan obligations. • Implement a system of control over the quantity and quality of eligible assets, which represent the reserves of insurance companies, implement a system of inter-sectoral control.	1 March 2023 (entry into force of changes in the procedure for concluding mortgage agreements) 01.07.23 (entry into force of changes in the application for foreclosure on housing mortgaged) June 2023 December 2023 December 2024	WG on the rule of law WG on social protection issues

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	• Change the judicial system with the aim of more effectively resolving financial disputes. • Improve the legislation on notaries to execute writs of execution on loan agreements. • Develop minimum standards for the settlement of disputes using mediation legislation. • Reduce the decision-making term and execution (court-executive-compensation). • Introduce an out-of-court dispute resolution mechanism between financial market participants and consumers.		
Goal 3. Financial inclusion			
3.1. Improve the availability and level of use of financial services			
Stage I: June 2022 - end of 2022			
3.1.1	Management and provision of cash under martial law: • Provide uncontrolled / de-occupied territories with access to financial services, means of payment (cash/non-cash payments): (a) stimulate banks with tariffs to open mobile branches and ATMs; (b) prepare amendments to regulations that will allow agents (from banks or NFIs) to be involved in the provision of a wider range of financial products and services. • Identify storage locations abroad / in Ukraine to preserve NBU cash balances and provide the market with the necessary amounts and denominations. • In order to diversify and minimize risks, decide on the construction / long-term lease of premises abroad / in Ukraine to preserve the balance of cash of the NBU and provide the market with the necessary amounts and denominations.	December 2022 August 2022	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems

3.1.2	Policy response on the development of identification systems and identification infrastructure:
	• Ensure the development of the NBU BankID system considering the established key indicators.
	• Use of the NBU identification system by EU financial institutions for identification:
	  • Identify and mitigate legal barriers that may hinder the cross-border use of NBU BankID data.
	  • Ensure the technical integration of pilot EU banks with the NBU BankID system.
		December 2022	

3.1.3	Develop a conceptual model for simplified authorization of payment service providers that are already duly authorized in the EU, prepare draft regulations/amendments and additions to current legislation that will allow the existence of simplified procedures for authorization of payment service providers that are already duly authorized in the EU	December 2022	
3.1.4	Introduce standards for the provision of financial services by financial institutions through remote channels (speed, availability, continuity) with a ranking of institutions that meet such standards	December 2022	
3.1.5	Simplify and optimize operational activities of volunteer, charitable organizations (currency control, financial monitoring, etc.)	December 2022	
Stage II: January 2023 - December 2025			
3.1.6	Develop a conceptual model for the procedures of transferring accounts of relocated enterprises and IDPs. Develop changes and additions to regulations governing the requirements for the transfer of accounts. This proposal includes the implementation of account transfer procedures currently in use in the EU. According to the procedure, a business will have to apply to a new bank; all other actions,	December 2022	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	such as balance transfer, transfer of standing orders, etc., will be performed by the donor bank.		
3.1.7	Manage and provide cash under martial law: • Introduce innovative elements of logistics and increase the level of cash handling automation. • Introduce a tariff policy for cash.	December 2023	
3.1.8	A complete solution for Cashless Determine the maximum amounts for cash payments for legal entities and individuals, as well as natural persons-entrepreneurs. Determine the executive body that will monitor the established restrictions and penalties for violating such restrictions, including by amending the Civil Code of Ukraine at the legislative level. Also, implement a number of steps by regulators: • Disclose information by trade aggregator sites about transactions. • Amend legislation changes to clarify liability for violations of tax legislation in the field of transactions. • Elaborate sources of accountability for administration cost reduction. • Finalize the concept for the legal regime of banking secrecy in Ukraine. • Develop a plan to increase the involvement of postal infrastructure and non-bank financial institutions in payments, transfers, etc. in the short term. Develop / amend regulations that would allow for a wider provision of financial services by several providers (e.g., transfers, payments, loans to agricultural producers and SMEs from credit unions).	2025 year	WG on the functioning of the financial system, its reform / Tax policy
3.1.9	Establish the "UCashless"/"Cashless Ukraine" fund for joint financing by participants (state, MES, commercial banks) of the fund's programs, in order to develop the infrastructure of non-cash payments, disseminate and	December 2023	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	promote non-cash payments among citizens of Ukraine, and promote innovation, information and educational activities		
3.1.10	Adopt and implement regulations on simplified procedures for authorization of payment service providers that are already duly authorized in the EU	June 2023	
3.1.11	Policy response on the development of identification systems and identification infrastructure Regulate the use of different types of electronic signatures of clients of financial institutions • Introduce new models of remote customer identification and verification. • Introduce the transfer of digital documents to financial institutions for the purpose of remote identification and customer verification. • Develop a public key infrastructure and a network of qualified e-trust providers in the financial sector. • Develop the provision of qualified electronic trust services in the financial sector (increase the number of clients of financial institutions using qualified electronic trust services).	December 2023 December 2024	
3.1.12	Continue to develop the National Strategy for Financial Inclusion (NFIS), which is closely linked to the issues identified in Stage II. Provide a structured and coordinated approach to the collection and dissemination of banking statistics broken down by gender-disaggregated indicators, incl. women-consumers, women-owners of MSEs	2025 year	
3.2. Strengthen the protection of financial services consumers' rights			
Stage I: June 2022 - end of 2022			
3.2.1	Deposit Guarantee Policy Response • Elaborate on the possibility of extending the DGF guarantee to other bank depositors' categories, in particular to legal entities, and	December 2022	WG on the functioning of the financial system, its reform / Budget Policy

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	develop a roadmap for increasing the amount of repayments of deposits in banks.		
	Stage II: January 2023 - December 2025		
3.2.2	Deposit Guarantee Policy Response • Develop and implement a deposit guarantee system for credit union members based on the DGF (with a potential source of recapitalization from international partners). • Create a system for guaranteeing payments under accumulative life insurance contracts (with a potential source of recapitalization from international partners).	December 2024 (but not before the entry into force of the new law on credit unions) December 2025	WG on the functioning of the financial system, its reform / Budget Policy
3.2.3	Create a single window for financial services consumers to receive consolidated information on the activities of banks and financial institutions	December 2024	
3.2.4	Implement the requirements of the General Data Protection Regulation (EU GDPR) for the financial sector	December 2024	
3.3. Increase the level of financial literacy of the population			
	Stage II: January 2023 - December 2025		
3.3.1	Develop and put into force The National Strategy On Financial Literacy Development. And implement a number of measures to increase financial literacy: • Create a single communication platform (site) with important information about financial services and features of their use. • Implement a program for internally and externally displaced persons and residents of reintegrated territories. Provide information on financial literacy and support for individuals returning from abroad, as well as internally displaced persons (IDPs) returning to their regions in connection with the cessation of hostilities.	March 2023	WG on digital transformation

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	• Introduce targeted programs for the formation of knowledge and skills in the use of financial services.	December 2024	
3.3.2	Develop an educational program on digital literacy in the financial field	December 2024	WG on digital transformation WG on the issues of education and science
Goal 4. Develop the financial services markets			
4.1. Promote the development of non-bank financial services markets			
Stage II: January 2023 - December 2025			
4.1.1	Establish an effective system for supervising the activities of the Bureau of Credit Histories (BCH): clearly define the regulatory and supervisory objectives, as well as the functions of the regulator. Prepare and submit a relevant bill regulating the exchange of credit information and the activities of credit bureaus to the Verkhovna Rada of Ukraine. Deploy a cross-border data exchange • Create support for cross-border data exchange of the BCH under current legislation. • Analyze current legislation to identify priority areas for the development of changes, and for the legislation of Ukraine governing the exchange of credit information and the activities of credit bureaus. • Develop and make amendment to legislation in order to clearly consolidate the possibilities of cross-border data exchange.	June 2023	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
4.1.2	Increase the level of international cooperation (including cooperation with foreign regulators the EBA, EIORA and ESMA) in the field of information exchange	December 2024	
4.1.3	Implement amendments to the legislation on the regulation of actuarial activities	December 2024	
4.1.4	Introduce amendments to the legislation on regulating the nuclear insurance market, including the creation of a nuclear insurance concept, as well as by improving the rules for the formation, placement and accounting of insurance reserves for compulsory civil liability insurance for nuclear damage: • Accede to the International Convention on Additional Compensation for Nuclear Damage (Vienna, September 12, 1997). • Approve the roadmap for Ukraine's accession to international agreements in the field of civil liability for nuclear damage; • Introduce state supervision over the activities of the Nuclear Insurance Pool. • Bring the concept of reimbursable nuclear damage in line with international conventions and best practices; • Review (increase) the limits of the operator's liability to individual victims of individuals and legal entities (per person). • Introduce a mechanism for the redistribution of pool members' responsibilities. • Promote the expansion of international risk reinsurance of Ukrainian insurers and the Nuclear Insurance Pool of Ukraine.	December 2024	WG on issues of energy
4.1.5	Introduce a system of environmental insurance activities that pose an increased environmental risk	2025 year	WG on ecological issues
4.1.6	Create the necessary prerequisites for the development of a reliable, transparent and solvent market of credit unions by amending the Law of Ukraine *On Credit Unions*	December 2023	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
4.1.7	Introduce a methodology for the comprehensive assessment of the competitiveness of the banking services market of Ukraine to determine the factors of scale, business efficiency and competition of players, based on quantitative indicators and comparison with commensurate markets of other countries	December 2023	
4.1.8	Develop and implement key performance indicators of Ukraine's financial services markets for key market participants	December 2023	
4.2. Integrate the financial market of Ukraine into the world financial space			
Stage I: June 2022 - end of 2022			
4.2.1	Start the SEPA accession project, appeal to the European Payments Council regarding Ukraine's intention to join SEPA, appeal to the Cabinet of Ministers regarding the establishment of a Working Group	December 2022	
Stage II: January 2023 - December 2025			
4.2.2	Initiate the definition of a clear mechanism (procedure) by the European Union for the financial services market of Ukraine obtaining EU internal market status	2025 year	WG on European Integration
4.2.3	International cooperation in the development of financial markets • Develop, approve and implement a roadmap for the “Basic Principles of Insurance” of the International Association of Insurance Supervisors (IAIS) and adapt Ukrainian legislation to EU legislation on insurance regulation, considering the specifics of the national market • Ensure accession to the International Association of Insurance Supervisors (IAIS)	December 2024 (after the adoption of a clause on the implementation of regulatory requirements provided by the Association Agreement between Ukraine and the EU, in particular on capital requirements, liquidity, disclosure of information and nuclear insurance)	
Goal 5. Innovative development			

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
5.1. Develop an open architecture for the financial market, oversight and cash circulation			
Stage I: June 2022 - end of 2022			
5.1.1	Implement the ISO 20022 standard • Prepare normative legal acts that will regulate the implementation of the ISO 20022 standard. • Implement a technology platform for the international standard ISO 20022 (subject to funding and / or international technical assistance). • Take measures to stimulate the implementation of ISO 20022 standards by market participants.	December 2022	
5.1.2	Develop the EPS (Electronic Payment System) • Implement EPS-4 and transfer it to 24/7 mode (with funding and / or international technical assistance). • Determine the optimal model of instant payment architecture and a roadmap for its implementation in the EPS.	December 2022	
Stage II: January 2023 - December 2025			
5.1.3	Prepare draft regulations related to the introduction of the instant payment system	December 2024	
5.1.4	Ensure implementation of the system of instant payments, including technological (subject to funding and / or international technical assistance)	December 2024	
5.1.5	Develop the PROSTIR National Payment System • Ensure the acceptance of NPS PROSTIR cards in the entire card payment infrastructure of Ukraine. • Ensure further development of the issue of NPS PROSTIR cards and their popularization among the issuing banks of Ukraine.	December 2024	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	• Increase the recognition of the PROSTIR brand among the population of Ukraine. • Implement the ability to pay for PROSTIR products using electronic wallets (Google Pay, Apple Pay, etc.).		
5.1.6	Promoting establishment of open banking in Ukraine, develop industry standards and create conditions for their effective implementation	December 2025	
5.2. Ensure the development of the Fintech, SupTech, RegTech and digital technologies market			
Stage I: June 2022 - end of 2022			
5.2.1	Policy response regarding e-hryvnia • Prepare an updated concept for the issuance of the e-hryvnia with an analysis of different models for its issuance.	December 2022	
Stage II: January 2023 - December 2025			
5.2.2	Create regulatory and technical sandboxes (subject to funding and / or international technical assistance)	December 2024	
5.2.3	Create a favorable environment to stimulate introduction of innovative technologies in compliance with financial market participants: • Introduce communication principles for interaction between financial market participants, REGTEK companies and regulators (conferences, round tables) to assess the impact of the introduction of regulatory technologies on the market. • stimulate the implementation of the best world practices of RegTech companies' decisions and their use by financial market participants.	December 2023	
5.2.4	Introduce a single Register of Payment Infrastructure.	December 2024	
5.2.5	Policy response regarding the e-hryvnia • Issue digital money of the National Bank (e-hryvnia). (subject to funding and / or international technical assistance).	December 2024	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
5.2.6	Explore the possibilities of using CBDC for public procurement, social benefits and to promote the tool Use digital currency by the NBU (CBDC) for public procurement: • Develop specification for the integration of the e-hryvnia in the procurement process. • Involve a technical platform provider. Use of digital currency by the NBU (CBDC) for public procurement: • Develop regulations. • Launch the project on an experimental basis. • Adopt regulations. • Develop and implement NBU regulations, which will regulate the issuance and circulation of the e-hryvnia	October 2023	
5.2.7	Simplify the administration of supervisory procedures: • Introduce mechanisms to control the legality of the use of non-bank financial institutions in the provision of financial services, including information and telecommunications systems, names and trademarks of other financial institutions. • Introduce an internal analytical platform for comprehensive analysis of customer information and financial sector operations, owned by government agencies and financial services providers: o Develop a methodology for calculating personal indicators according to individual classifiers (fictitious entrepreneurship, fraud, etc.). o Implement EWS and scoring models in some areas of analysis of bank customers using artificial intelligence. o Use all available sources of information (information from banks, public authorities).	December 2023 December 2024	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	• Introduce the automation of instruments used for the supervision of banks and non-bank institutions in the field of financial monitoring, compliance with currency and sanctions legislation. • Develop and implement algorithms for detecting violations of the deadlines for the provision of information to the SCFM by the subjects of primary financial monitoring.		
5.3. Develop the digital economy			
Stage I: June 2022 - end of 2022			
5.3.1	Integrate the state banks' information systems with state registers and information systems of the State Tax Service: • Facilitate the introduction of a certificate of payment for the unified social contribution in electronic form. • Reduce the costs of banking institutions for the processing of collection orders, the costs of the State budget – for collection orders preparation, approval, and sending, increase revenues to the state and local budgets through instant receipt and processing of collection orders to banking institutions. • Amend the Procedure dated 3 September 2018 No. 733 *On approval of the Procedure for providing a certificate of absence of arrears of payments, control over the collection of which is entrusted to the supervisory authorities.* Based on the order of the Ministry of Finance of Ukraine dated February 13, 2015 No. 67 (as amended) *On approval of forms of information on payment of taxes by natural monopolies and business entities that are payers of rent for subsoil use; information on business entities that have a tax debt and the procedure for their publication*, introduce a standardized API for data exchange between banking institutions and the State Tax Service. • Establish information exchange and interaction between the State Tax Service of Ukraine and banking institutions in an automated manner in accordance with the provisions of paragraph 42-1.2 of	2022 year	WG on functioning of the financial system, its reform / Tax policy

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	Article 42-1 of the Tax Code of Ukraine, effective July 1, 2022, namely, to consent to data transfers from the taxpayer's open office by client's submission of the corresponding application from Internet banking or a mobile application signed with a Qualified Electronic Signature. • Consolidate the obligation of the State Tax Service to provide banks with information on the codes and accounts of the State Tax Service to which the relevant tax must be paid through the API (by analogy with how it is implemented in the DIIA mobile application). • Expand the list of parameters that should be available to banks through the State Tax Service API.		
Stage II: January 2023 - December 2025			
5.3.2	Implement European standards for ensuring open registers and the exchange of API information in the interests of financial services consumers • Ensure the opening of registers of government agencies to the financial ecosystem according to the API • Develop and implement unified databases, information security rules, and the procedure for exchanging information between information databases, including through the API. • Improve the exchange of information between regulators and other government agencies: o Determine the perimeter of information assets in accordance with the need to obtain them from the financial sector to perform their functions. o Identify, process and eliminate legal (access to information, legitimacy of the received information) and technical (including protection of information) barriers to the exchange of relevant information in electronic form. • In order to automate the process of clients' personal information transfer from banks to government agencies, introduce of an	2025 year	WG on digital transformation WG on the rule of law

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	effective mechanism (regulatory procedure) in the field of electronic data exchange between the subjects of power of state electronic information resources during the provision of administrative services.		
5.3.3	Implement European standards for modifying reporting approaches to improve the efficiency of regulators and supervisory processes: • Strengthen cooperation between regulators to optimize the disclosure requirements of financial ecosystem actors, in particular in the iXBRL format. • Develop the regulations necessary for optimization of disclosure requirements by financial ecosystem entities, in particular in iXBRL format. • Introduce a platform for information and messages exchange between the regulator and market participants in electronic form. Identify technology that will support the functioning of a single platform. • Define the legal framework for the operation of a single platform for the information and messages exchange between the regulator and market participants in electronic form and, if necessary, prepare amendments to legislation and regulations. • Introduce a full-fledged exchange of protected and legitimate information assets in electronic form between regulators and other financial market participants within the framework of their powers.	2025 year	WG on the Functioning of the financial system, its reform / Capital markets
5.3.4	Implement European standards for document automation in the interests of financial services consumers and financial market regulators (Paperless) • Facilitate the further transition of documents (including cash, documents accompanying the registration of financial products, etc.) in electronic format: to increase the terms of submission by the accountable persons of the report on used means issued on business trips or under the report, on non-cash settlements which were carried out with use of a corporate payment card; give the right to	2025 year	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems

	accountable persons to provide in electronic form supporting documents confirming the expenditure of funds issued for business trips or for reporting, by non-cash payments made by them, including with the use of payment cards (personal / corporate).
	• Facilitate the transition to electronic document management of market participants with government agencies.
	• Facilitate the regulation of issues related to the use of cloud technologies in the financial market.
	• Optimize archival storage of banks' and NFIs' collegial bodies decisions; simplify remote conclusion and execution of agreements with clients; simplify the receipt of documents from clients for currency control, financial monitoring, and obligatory payments control. Possible solutions are:
	  • creating a single channel for the transfer of documents between banks, government and other bodies, considering the requirements of banking, trade and insurance secrecy
	  • unifying the requirements for the API of government agencies for integration with banks and NFIs
	  • transitioning to an electronic archive of bank and NFI documents in full.		

5.3.5	Build and certify the NBU data processing center in accordance with the requirements of the international Uptime Institute Tier IV (subject to funding and / or international technical assistance)	December 2024	
5.4. Cyber resilience of the financial system			
Stage I: June 2022 - end of 2022			
5.4.1	Harmonize and implement legal and regulatory requirements for the cybersecurity of the financial sector:	December 2022	

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
	Pass the external (European) certification of the Information Security Management System.		
	Stage II: January 2023 - December 2025		
5.4.2	Introduce NBU supervision over banks and NFIs regarding cyber resilience • Streamline regulations to monitor cyber resilience in non-bank financial institutions. • Legislate the powers of the NBU to implement state regulation on cybersecurity and information security in the financial sphere. • Introduce specialized supervision over the scope of banks' activities, considering international experience and the results of diagnostic surveys. • Introduce control / supervision of cybersecurity in banks.	December 2024	
5.4.3	Improve approaches to the use of international protection standards and cryptographic transformation of information, along with Ukrainian ones	December 2024	
5.4.4	Develop the NBU Cyber Defense Center • Analyze the possibilities for developing the Cyber Defense Center in terms of improving FinTech companies' cyber security. • Ensure information exchange with international and national partners on capacity building of the National Bank's Cyber Security Center. • Develop the services and capabilities of the NBU's Cyber Defense Center to detect and respond to cyber incidents and cyberattacks.	December 2024

Draft Law of Ukraine *On Amendments to Certain Legislative Acts of Ukraine Concerning Ensuring the Conclusion of an Agreement between Ukraine and the European Union on Mutual Recognition of Qualified Electronic Trust Services and the Implementation of European Union Legislation in the Field of Electronic Identification* (№ 6173 of 12 October 2021). 2. Draft resolutions of the NBU Board have been prepared: • *On approval of the Regulation on the use of enhanced authentication in the payment market* • *On approval of the Regulation on risk management in the payment market.*	NBU, Ministry of Finance of Ukraine, Ministry of Justice of Ukraine, Ministry of Digital Transformation of Ukraine, Migration Service of Ukraine, NSSMC	30/09/2024	31/12/2024

	Electronic Identification; draft resolutions of the NBU Board				
11	3.2.1. Deposit Guarantee Policy Response – amendments to the Law of Ukraine *On the Deposit Guarantee System for Individuals*	Study the possibility of extending the DGF guarantee to other categories of bank depositors, in particular to legal entities, and to develop a roadmap for increasing the amount of repayment of deposits in banks	DGF NBU	30/09/2022	31/12/2022
12	4.1.6. Create the necessary prerequisites for the development of a reliable, transparent and solvent market of credit unions by amending the Law of Ukraine *On Credit Unions*	Draft Law of Ukraine *On Credit Unions* (№ 5125) has been prepared for second reading	NBU	30/06/2023	31/12/2023
13	2.2.5. Implement measures to increase the institutional capacity of the DGF – amendments to the Law of Ukraine *On the Deposit Guarantee System for Individuals*	1. Adopt changes that would shift the focus of the DGF's asset-selling instruments to borrow from borrowers themselves through loan restructuring and / or the issuance of bonds secured by these troubled loans (asset securitization of insolvent banks). 2. Improve the legislation in the field of assets and liabilities transfer from an insolvent bank to a solvent (receiving) bank: ▪ Fully implement Directive 2014/59/EU, including the establishment of a Settlement Fund through which financial support to host banks can be provided. ▪ Extend Directive 2014/59/EU to any bank, not just systemically important ones. ▪ Simplify the mechanism of liabilities (deposits) conversion into the capital (bail-in) of the bank,	DGF Cabinet of Ministers of Ukraine NBU NSSMC	30/06/2025	31/12/2025

		clarify the requirements for the list of deposits suitable for the conversion of liabilities into bank capital. ▪ Regulate methods of restoring the solvency of borrowers of insolvent banks. 3. Adopt amendments to the regulations that will allow the DGF to use financial instruments (derivatives) to cover the risks of the DGF under the guarantees provided. 4. Adopt amendments to regulations that will regulate the procedure for transferring all assets whose credit risk has increased to 100% to a separate institution in exchange for bonds of this institution in an amount equal to their net asset value as of 23 February 2022			
14	2.1.10. Improve the functions of the NBU Credit Register 2.1.11. Launch of the updated Credit Register platform – amend the Law of Ukraine *On the organization of the formation and circulation of credit histories*, the Law of Ukraine *On personal data protection*, Law of Ukraine *On financial services and financial companies*, adopt new / amend existing NBU regulations regulating credit information exchange, credit histories and the	Improve the legislation governing the improvement of the NBU Credit Register's functions	Verkhovna Rada of Ukraine NBU	31/07/2023	31/01/2024

	functioning of the Credit Register of the NBU				
15	4.1.1. Establish an effective system for supervising the activities of the Bureau of Credit Histories. Deploy cross-border data exchange – amend the Law of Ukraine *On the organization of the formation and circulation of credit histories*, the Law of Ukraine *On personal data protection*, the Law of Ukraine *On financial services and financial companies*, adopt new / amend existing NBU regulations regulating credit information exchange, credit histories and the functioning of the Credit Register of the NBU	Clearly define the regulatory and supervisory objectives, as well as the functions of the regulator. Prepare and submit a relevant bill regulating the exchange of credit information and the activities of credit bureaus to the Verkhovna Rada of Ukraine. Improve legislation governing the cross-border credit information exchange establishment, which will promote Ukraine's integration into the European financial space	Verkhovna Rada of Ukraine NBU	31/01/2023	30/06/2023
16	5.3.4. Implement European standards for document automation in the interests of financial services consumers and financial market regulators (Paperless) – Law of Ukraine *On Amendments to the Tax Code of Ukraine* (draft 4366), Resolution of the	Update the legislation on requirements to SG on acceptance of non-cash payments, simplify the reporting on transactions with the use of corporate payment cards procedure. Abolish the requirement to provide originals (in paper form) of supporting documents for card transactions and a limited period for reporting transactions. The Verkhovna Rada Committee supported the EBA proposals and by its Decision dated 15 December 2021 recommended them for consideration during the finalization of Draft Law of Ukraine 4366 *On Amendments to the Tax*	Verkhovna Rada of Ukraine Cabinet of Ministers of Ukraine Ministry of Economy of Ukraine	30/09.2022	31/01/2023

	Cabinet of Ministers of Ukraine *On setting deadlines for traders to ensure the possibility of non-cash payments for goods sold (services provided) by them*	*Code of Ukraine (concerning Payment Services)* until second reading (4366 was not voted on). The Ministry of Economy of Ukraine has developed a draft resolution of the Cabinet of Ministers of Ukraine, in accordance with the provisions of the Law of Ukraine *On Payment Services*. Currently, the procedure for the internal approval of the Draft Resolution by the Ministry of Economy is ongoing			
17	2.1.9 Improve credit technologies (reduction of costs, including time, for decision-making and loan administration) – amendments to the Resolution of the Cabinet of Ministers of Ukraine № 28 dated 24 January 2020	Add innovative non-bank financial institutions that can receive loans under the state "Affordable Loans" program	Cabinet of Ministers of Ukraine	01/01/2023	01/06/2023
18	2.2.3. Develop a program of social lending and loan restructuring for military service members using recovery funds and / or international funds	Social lending program for military service members. Establish which types of military service members can be credited on preferential terms. Partial coverage of creditors' risks of possible loans non-repayment received by military service members. Partial compensation of creditors losses from restructuring conditions for servicemen	Cabinet of Ministers of Ukraine NBU	01/01/2023	01/03/2023
19	1.1.5. Improve the efficiency of NFI management – amendments to the Regulation *On licensing and registration of financial service providers and conditions of their financial services activities*	Simplify the equity increasing procedure (a capital increase of 1% requires the submission of many documents at the request of the regulator)	NBU	01/12/2022	01/01/2023

20	2.1.1 Introduce military-political risks insurance - incl. possible introduction of a military risks insurance program for the population and business through the creation of a Compensation Fund (Pool) on the basis of public-private partnership	▪ Adopt amendments to the legislation on the introduction of military-political risks insurance (in particular: requirements for the parties to insurance contracts; subject of insurance contract; insurance risks and insurance cases; procedure for determining the insurance amounts; procedure for payment (compensation) of insurance payments; procedure and conditions for making insurance payments, conditions for terminating the insurance contract, etc.) and the spread of legislative changes in Ukraine. ▪ Adopt a regulation of the NBU that would establish the "the game rules" (criteria for selecting insurers and insurance brokers, the order of participants interaction in the process, etc.). ▪ Extend the Pool's activities to a wide range of areas of the state's economy, covering the protection of both material objects and human life and health from military and political risks.	NBU Ministry of Economy of Ukraine	30/09/2022	31/12/2022
21	2.1.1 Introduce military-political risk insurance – *amend tax legislation*	Elaborate the need to amend the regulations on the issues of taxation of military-political risks insurance activities	Ministry of Finance of Ukraine Verkhovna Rada of Ukraine NBU	30/09/2022	31/12/2022
22	2.1.1 Introduce military-political risk insurance – *amend the regulations in terms of military-political risk insurance throughout Ukraine*	Introduce a military-political risk insurance: ▪ through the involvement of non-resident insurance companies of Ukraine; International Financial Institutions (Lloyd's of London, Multilateral Investment Guarantee Agency (MIGA))	Verkhovna Rada of Ukraine NBU	31/12/2022	2025 year

		▪ through the creation of a state investment insurance system based on ESA or on a newly established investment promotion agency. The recommended changes in the legislation concern the following issues: requirements to the parties to insurance contracts; the subject of the insurance contract; insurance risks and insured events; the procedure for determining insurance amounts; the procedure for payment (compensation) of the insurance payment; the procedure for concluding insurance contracts; the procedure and conditions for making insurance payments; and conditions of insurance contract termination; criteria for selecting insurers and insurance brokers, the order of participants interaction in the process, etc.			
23	2.1.5. Increase efficiency and expand access to existing funds and lending programs, state guarantees, and risk insurance coverage of certain business types to restore Ukraine's economy. Provide funding with reconstruction funds and / or using the funds of international donors – *develop a concept and amend relevant regulations*	The procedure for submitting the application form of economic entities for obtaining guarantees for economic recovery loans. Clarification of business entity categories of that fall under this guarantee. Ensure the effective functioning of existing Funds, improve the regulations on supervision, risk management system, credit risk management, liquidity, credit policy, preparation and reporting. Increase the efficiency of corporate governance in existing funds, diversification of funding sources. Provide funding from reconstruction funds and/or international donors. Elaborate the possibility of introducing a bank guarantee for the Ukrainian producers' participation in international procurement	Cabinet of Ministers of Ukraine	31/10/2022	31/12/2022

24	2.2.1. Policy Response on loan restructuring – Draft Law of Ukraine *On Amendments to the Law of Ukraine On Financial Restructuring and some other laws of Ukraine*	Extend the validity of such an instrument as NPL settlement and restore the creditworthiness of business borrowers as financial restructuring, extending it to a wider range of borrowers and reducing access to the instrument. The goal is to increase the creditworthiness of corporate borrowers and to settle non-performing loans due to the war	Verkhovna Rada of Ukraine	31/03/2023	31/08/2023
25	2.2.1. Policy Response on loan restructuring – *amend relevant regulations*	Amendments to the NPA on the issues of the developed mechanics of individuals and legal entities loans restructuring taxation, lost loans collateral	Ministry of Finance of Ukraine DGF (if necessary) Verkhovna Rada of Ukraine NBU	30/09/2022	31/12/2022
26	2.2.1. Policy Response on loan restructuring – amend relevant regulations	▪ Develop mechanics for borrowers (individuals) affected by war loan restructuring at the expense of international donors, reconstruction funds. ▪ Develop mechanics for loan restructuring of borrowers (legal entities) affected by the war (including through the application of the Kyiv Approach / Financial Restructuring) at the expense of international donors, recovery funds. ▪ Legislatively regulate credit relations under which the collateral is lost or its market value has decreased due to the war. ▪ Create a state register of lost assets (real estate, movable property, other assets). ▪ Elaborate the possibility of all assets transfer legislative regulation, the credit risk of which has increased to 100%, to a single institution in exchange for the bonds of this institution.	NBU DGF Ministry of Finance of Ukraine Ministry of Justice of Ukraine	30/09/2022	31/12/2022

27	5.3.4. Implement European standards for document automation in the interests of financial services consumers and financial market regulators (Paperless) – amend the Rules of application of the list of documents formed in the activities of the National Bank of Ukraine and banks of Ukraine, approved by the Resolution of the Board of the National Bank of Ukraine № 130 dated 27 November 2018	Grant the status of temporary storage documents by the decision of the bank's collegial bodies	NBU	Stage II	2025 year
28	3.1.11. Policy response on the development of identification systems and identification infrastructure – make amendments to the Regulation on the use of electronic signatures in the banking system of Ukraine (Resolution of the Board of the NBU № 78 dated 14 August 2017)	Anticipate the possibility of creating / using Qualified Electronic Signatures (QES) / simple ES for signing contracts / documents in the relationship between the bank and the client, if the signature is created during remote identification / verification of the client and using software used by the Bank, and provide unique identification of the person using QES simple ES	NBU	30/09/2023	31/12/2023
29	5.3.3. Implement European standards for modifying reporting approaches to improve the efficiency of regulators and supervisory processes	Establish that electronic copies of documents scanned from the originals may be submitted by means of software and the "client-bank", "client-Internet bank" or other software and hardware complexes used by the bank. The client is	NBU	Stage II	2025 year

	–amend the Instruction on the procedure for foreign exchange supervision of banks for compliance by residents with the deadlines for settlements for export and import of goods, and the Regulation on protection measures and determination of the procedure for certain transactions in foreign currency	responsible for the validity of the documents in a copy provided by him. Copies of documents in electronic form, provided to the bank in a manner other than that specified in the previous paragraph, must be certified by a qualified electronic signature The bank provides a fixation of the method of providing the client with electronic copies of documents			
30	5.3.1. Integration of state banks' information systems with state registers and information systems of the State Tax Service – *amend the Instruction on non-cash payments in Ukraine in the national currency*	Establish the right for clients to submit documents confirming the absence of grounds for the bank to control the payment of USCs and / or payment of USCs and Income Tax / military fees through remote service channels, with certification of copies of QES documents of the client / client's representative remote service system itself requires proper authorization from the customer)	NBU Ministry of Finance of Ukraine	01/09/2022	31/12/2022
31	3.1.11. Policy response on the development of identification systems and identification infrastructure – *amend the Regulations on financial monitoring by banks*	Establish that the Bank may take measures to update customer data, other measures of proper verification using remote service systems, means of e-mail with QES / advanced electronic signature, telephone, call center, other remote communication channels within the technical capabilities of the bank. In any case, the bank shall document the taking of these measures in such a way as to be able to demonstrate their proper application	NBU	01/09/2024	31/12/2024
32	5.3.4. Implement European standards for document automation in the interests of	Grant the NBU the exclusive right to regulate the use of banks as objects of critical cloud services infrastructure	NBU Verkhovna Rada of Ukraine	Stage II	2025 year

	consumers of financial services and financial market regulators (Paperless) – amend the Law of Ukraine *On Cloud Services*, the Regulations on the Application of Cloud Computing Technology by Banks and provision of cloud services (currently being drafted), Regulations on the organization of accounting, accounting control during the implementation of operational activities in the banks of Ukraine	Abolition of the Cabinet of Ministers of Ukraine regulation of the procedure for concluding agreements on the banks' use of cloud services Abolish Ukrainian legislation on the mandatory application of agreements on the provision of cloud services to banks by foreign providers Maximum availability and universality of banks' use of the cloud environment, no bans / restrictions on the use of the world's leading providers' services (including the physical location of servers in the EU) Withdrawal of obligatory storage of information on servers located on the territory of Ukraine (currently for the period of martial law this norm is not actually applied, placement on servers outside the territory of Ukraine is temporarily allowed)			
33	2.2.6. Initiate amendments to procedural legislation regarding financial services disputes - in order to balance creditors' rights – amend the Family Code of Ukraine, the Law of Ukraine *On Child Protection*, the Law of Ukraine *On Mortgage*, the Law of Ukraine *On Fundamentals of Social Protection of Homeless Citizens and Homeless Children*, the Law of Ukraine *On the Unified*	Eliminate the need for the consent of a guardianship and trusteeship body to mortgage housing, which is only purchased on credit and, subject to obtaining a loan and purchase, be used for a child's residence (Family Code of Ukraine, Article 177) Eliminate the need for the consent of the body of guardianship and trusteeship to mortgage housing, which is only purchased on credit and, subject to obtaining a loan and purchase, used for a child's residence (the Law of Ukraine *On Child Protection*, Articles 17 & 18) Clarify the procedure for eviction and deregistration of residents when applying for foreclosure on real estate (the Law of Ukraine *On Mortgage*, Article 40)	Verkhovna Rada of Ukraine Verkhovna Rada of Ukraine Verkhovna Rada of Ukraine	01/03/2023 01/10/2022 31/12/2022	01/07/2023 01/03/2023 01/07/2023

	State Demographic Register and Documents Proving Ukrainian Citizenship or its special status	Exclude the need for the consent of a guardianship and trusteeship body to mortgage housing, which is only purchased on credit and, subject to obtaining a loan and purchase, is used for a child's residence (the Law of Ukraine *On Fundamentals of Social Protection of Homeless Citizens and Homeless Children*, Art. 12)	Verkhovna Rada of Ukraine	01/10/2022	01/03/2023
		Establish the presumption of data contained in the register accuracy, provide access to the register to creditors for the purpose of transactions (the Law of Ukraine *On the Unified State Demographic Register and documents confirming citizenship of Ukraine, identity or special status*, Article 8,11)	Verkhovna Rada of Ukraine	01/10/2022	01/03/2023
34	2.1.7. Policy response on trade finance – amend the Law of Ukraine *On Securing Creditors' Claims and Registration of Encumbrances* and the Law of Ukraine *On Pledges;* to adopt the Law of Ukraine *On Factoring*	Improve the legal and regulatory framework for the development of ABF (trade factoring tools) and electronic invoicing (e-invoicing): • Settle cases of legal ambiguity and uncertainty regarding the regulation of collateral, especially regarding the priority of creditors' claims. • Ensure that the regulatory framework provides effective enforcement methods as key prerequisites for increasing secured credit. • Modernize the existing register of creditors' claims and harmonize it with modern standards of maintaining a register based on notifications. • Develop strategic approaches to the regime of legal regulation of relations in the field of reverse factoring (make adjustments and clarifications to the provisions of the Civil Code governing the assignment of requirements in general and factoring in particular, and ensure that these rules meet the latest international	Verkhovna Rada of Ukraine NBU	Stage II	2025 year

		standards) and calculate risk weights of corporate loans. • Promote the development of other trade factoring forms (without recourse and international factoring) and forfaiting.			
35	2.2.1. Policy response on loan restructuring – *study the need to develop / amend regulations regarding the settlement of NPLs through the acquisition and recovery of assets*	Elaborate on the feasibility and amendments to the regulations regarding the NPL settlement system, in particular, through the ARC tool	Verkhovna Rada of Ukraine NBU	31/12/2022	31/03/2023
36	3.1.1 Management and provision of cash under martial law - *amend regulations on the activities of banks and the NBU in the field of financial services*	Provide uncontrolled / de-occupied territories with access to financial services, and means of payment (cash/non-cash payments): ▪ Stimulate banks with tariffs to open mobile branches and ATMs. ▪ Prepare amendments to regulations that will allow agents (from banks or NFIs) to be involved in the provision of a wider range of financial products and services.	NBU	31/10/2022	31/12/2022
37	3.1.6. Develop a conceptual model for the procedures for transferring accounts of relocated enterprises and IDPs - *adopt amendments to the regulations governing the servicing of bank customer accounts*	Develop a conceptual model, changes and additions to regulations, which provide requirements for the transfer of accounts	NBU	01/03/2023	2025 year

SUBGROUP 5: CAPITAL MARKETS

1. The main issues that need to be resolved as a part of the Recovery Plan in the field of "Finance system operation, its transformation, and development"

Impact of the war on the defined sphere of analysis:	
Key challenges (summarized for a defined scope: **Capital markets**)	1. The significant outflow of capital from Ukraine, a sharp decline in liquidity in local money markets. Loss of assets of real sector enterprises, depreciation of working capital, limited access of enterprises to credit resources of the banking sector 2. The simultaneous rapid decline in real and nominal incomes and savings of the population, limited opportunities for citizens to invest in financial instruments 3. High risks to the national economy and specific enterprises in the war and post-war economy, which discourage investors from direct investment in the capital of enterprises 4. Limited functioning of capital markets due to the cessation of activities of a significant number of market participants during the war (issuers, investors, financial intermediaries) 5. Lack of effective mechanisms in the current legislation of Ukraine to finance innovative projects, new technologies and scientific developments, attracting foreign investment for these purposes 6. The development of fully functioning capital markets is an extremely important and responsible task for the development of the Ukrainian economy at the present stage 7. The need to ensure the further development of capital markets and organized commodity markets of Ukraine in accordance with international standards and European legislation through comprehensive reforms to ensure proper regulation and supervision of these markets, increase investor rights protection, expand the variety of financial instruments and development of market infrastructure 8. Strong and efficient domestic capital markets and organized commodity markets will allow the creation of a powerful long-term investment resource that will be invested in the national economy and ensure the formation of capital to cover future costs
Key opportunities (summarized for a defined scope: **Capital markets**)	1. Activation and increase of efficiency of capital markets and organized commodity markets will help to increase investments in the country's economy and increase revenues to the state budget of Ukraine 2. Improving the quality of state regulation and supervision of capital markets and organized commodity markets, development and approval of model documents related to administrative services

Impact of the war on the defined sphere of analysis:	
	3. Ensuring the functioning of an effective system of counteraction to abuse in these markets in accordance with the Objectives and Principles of Securities Regulation of the International Organization of Securities Commissions (IOSCO) and the provisions of European law, will provide the legal preconditions for accession to the IOSCO Memorandum, which will facilitate the integration of domestic markets into global financial markets, which in turn will simplify and increase the attraction of investors (including foreign) in the economy of Ukraine due to increased confidence in investing through capital market instruments 4. Accelerate efforts to analyze gaps and bring Ukrainian legislation in line with EU legislation 5. The introduction of investment funds in Ukraine in accordance with European rules of activity, such as Undertakings for Collective Investment in Transferable Securities (UCITS), alternative investment funds (AIFs), long-term investment funds (ELTIFs), venture capital funds (EuVECA), social entrepreneurship funds (EuSEF) and money market funds (MMFs), will provide opportunities to effectively attract investment through collective investment mechanisms 6. The integration of the Ukrainian capital markets into the European financial space, attraction of foreign investments in the share and debt capital of the real sector renewable enterprises 7. The introduction of full functioning of the system of compulsory accumulative pension provision, in combination with I and III levels of the pension system, will provide social guarantees and financial stability to the pension system of Ukraine, and also will promote providing the economy with long-term financial resources
Key constraints (summarized for a defined scope: **Capital markets**)	1. Significant duration of the process of transforming citizens' savings into long-term domestic financial resources 2. Impossibility of proper functions performance by the domestic regulator of capital markets and organized commodity markets, the low institutional capacity of the regulator 3. Lack of an effective system of counteraction to abuse in these markets, outdated and discriminatory mechanisms of taxation in capital markets and organized commodity markets negatively affect the further development of these markets in Ukraine due to investors' distrust of proper protection of their interests and lack of incentives to invest through the capital markets instruments

2. Goals, objectives, and stages of the Recovery Plan in the defined scope

2.1. Specific goals

	Stage I: June 2022 – end of 2022	**Stage II: January 2023 – December 2025**	**Stage III: January 2026 – December 2032**
1. Lack of an effective system of counteraction to abuse in the capital markets and organized commodity markets and proper mechanisms of state regulation and supervision in these markets, including low level of institutional and financial capacity of the domestic regulator of capital markets and organized commodity markets. Capital markets and organized commodity markets, the regulation of which is provided by the Law of Ukraine "On Amendments to Certain Legislative Acts of Ukraine to Facilitate Investment Attraction and Introduction of New Financial Instruments" № 738-IX of 19.06.2020, require an appropriate level of state regulation and supervision. Thus, the issue of improving the protection of investors from abuse in the capital markets and organized commodity markets cannot be resolved without legislative improvement of state regulatory mechanisms in this area. First of all, such legislative improvements should include ensuring the institutional capacity and financial independence of the domestic regulator of capital markets and organized commodity markets, ensuring the functioning of an effective system of counteraction to abuse in these markets, and ensuring international cooperation of the National Securities and Stock Market Commission (NSSMC). The need to bring Ukrainian legislation in line with the Objectives and Principles of Securities Regulation of the International Organization of Securities Commissions (IOSCO), the provisions of EU Regulation № 596/2014 of 16.04.2014 on market abuse (MAR), EU Directive № 2014/57/EU of 16.04.2014 on criminal sanctions against market abuse (MAD) and other EU acts in the field of financial services. In addition, the lack of regulatory equivalence in the areas of confidentiality and professional secrecy does not allow the NSSMC to fully participate in oversight activities to support effective cross-border oversight. This harms the effective regulation of Ukraine's financial markets and their financial stability.			
Each stage's goal to be achieved to solve the problem	1. Improving the legal framework and implementing mechanisms for proper state regulation and supervision of capital markets and organized commodity markets in accordance with international standards and European legislation, as well as building an effective system of counteraction to abuse in these markets	1. Introduction of mechanisms of proper state regulation and supervision of capital markets and organized commodity markets in accordance with international standards and European legislation, as well as building an effective system of counteraction to abuse in these markets 2. Achieve compliance with EU legislation of domestic	

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
		legislation on the regulation of professional secrecy in capital markets in order to deepen the interaction of the NSSMC with ESMA	
Deadline within the stage	31.12.2022	31.12.2023	
Risks for achieving the goal	Inconsistency of positions, lack of agreement on the need for appropriate legislative changes	Inconsistency of positions, lack of agreement on the need for appropriate legislative changes	
Measurable indicator of goal achievement	1. Improvement of the legal framework and implementing mechanisms for proper state regulation and supervision of capital markets and organized commodity markets in accordance with international standards and European legislation, as well as building an effective system of counteraction to abuse in these markets	1. Signing of the IOSCO Multilateral Memorandum of Understanding Concerning Consultation and Cooperation and the Exchange of Information (IOSCO MMoU) 2. Has received from ESMA the status of equivalence of domestic legislation on the regulation of professional secrecy in capital markets with EU legislation	
The total amount of financial resources required to achieve the goal		Improving state regulation and supervision of capital markets and organized commodity markets and building an effective system of counteraction to abuse in these markets requires additional costs to increase the capacity of	

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
		the National Securities and Stock Market Commission	
Connection with other areas	WG "Functioning of the financial system, its reform and development" / WSG "Banking system and non-banking services market" WG on European integration	WG "Functioning of the financial system, its reform and development" / WSG "Banking system and non-banking services market" WG on European integration	
3. Inconsistency of certain provisions of the Tax Code of Ukraine with the terminology of basic legislation in the field of capital markets and organized commodity markets, as well as the lack of harmonization of the taxation system in this area and tax incentives for investment. The current version of the Tax Code of Ukraine (TCU) contains provisions that do not agree with the terminology of the basic legislation in the field of capital markets and organized commodity markets. Also, the TCU contains a significant number of outdated and obsolete rules that hinder the further active development of capital markets and organized commodity markets in Ukraine. In addition, there is a need to reform taxation mechanisms in the field of capital markets and organized commodity markets in order to stimulate investment through financial instruments in the real sector of the economy, including the promotion of long-term investment. Thus, there is a need to improve tax legislation in the field of capital markets and organized commodity markets, taking into account the expectations and needs of market participants.			
Each stage's goal to be achieved to solve the problem	1. Improving the legal framework to ensure harmonization of the taxation system in the capital markets and organized commodity markets and tax incentives for investment, including long-term		
Deadline within the stage	31.12.2022		
Risks for achieving the goal	Inconsistency of positions, lack of agreement on the need for appropriate legislative changes		

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
Measurable indicator of goal achievement	1. Adoption of appropriate changes to the legal framework	1. Increasing investment through capital market instruments, including long-term ones, through tax incentives and harmonization of taxation systems in the field of capital markets and organized commodity markets 2. Growth of revenues to the state budget of Ukraine due to intensification of capital markets and organized commodity markets and increase of investments in the country's economy	
The total amount of financial resources required to achieve the goal			
Connection with other areas	WG "Functioning of the financial system, its reform and development" /WSG Tax policy	WG "Functioning of the financial system, its reform and development" /WSG Tax policy	

4. Imperfect legal framework for the implementation of new and development of existing financial instruments.

Today, agriculture is one of the strategic sectors of Ukraine's economy, which ensures the growth of the country's economy, and access to finance for the agricultural sector can increase its productivity and profitability, while improving the quality of materials and means of production. An important mechanism that would facilitate access to financial and commodity resources for agricultural producers is the circulation of agricultural receipts.

In addition, Ukraine lacks regulations on the issuance of such financial instruments used in European financial markets as social bonds. Also, imperfect regulation of the derivatives market limits the ability of investors to manage their own risks and hedge their investments.

The development of investment instruments and the introduction of new financial instruments linked to reliable and trusted index benchmarks can also help direct domestic and external liquidity to the financial markets of Ukraine and, accordingly, increase investment in the Ukrainian economy.

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
Each stage's goal to be achieved to solve the problem	1. Improving the circulation of agricultural receipts	1. Development of new financial instruments linked to the UONIA overnight interbank rate index 2. Improving the legal framework for the regulation of derivative contracts markets in order to obtain from the International Swaps and Derivatives Association (ISDA) a positive legal opinion on netting, liquidation netting and collateral 3. Introduction of new financial instruments, in particular, settlement of social bond issues	
Deadline within the stage	31.12.2022	31.12.2025	
Risks for achieving the goal	Inconsistency of positions, lack of agreement on the need for appropriate legislative changes	1. Achieving the goal depends on the resumption of interbank activity on which the UONIA overnight interbank rate index is based 2. Inconsistency of positions, lack of agreement on the need for appropriate legislative changes	
Measurable indicator of goal achievement	1. Expanding the use of agricultural receipts, in particular for agricultural producers who will be able to access	1. Parliament's adoption of amendments to relevant legislation that will regulate	

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
	financial and commodity resources through agricultural receipts	some aspects related to derivative contracts 2. Settlement of the issue of social bond issues. Introduction of financial instruments linked to the UONIA overnight interbank rate index 3. Obtaining a positive legal opinion on netting, liquidation netting and collateral from ISDA	
The total amount of financial resources required to achieve the goal			
Connection with other areas	WG New agrarian policy	WG "Functioning of the financial system, its reform and development" / WSG "Banking system and non-banking services market"	
5. The need to improve the activities of companies, increase the level of corporate governance and protection of minority investors, and ensure full harmonization of national company legislation and corporate governance legislation with European Union legislation. At present, there is a need to improve the activities of companies and increase the level of corporate governance in accordance with EU legislation by, in particular, introducing a one-tier corporate governance structure, a mechanism for holding general meetings using electronic voting, settling the issue of liability of officials of the joint-stock company and bringing the rules on the representation of shareholders, as well as the rules on mergers, acquisitions, spin-offs and splits of joint-stock companies in accordance with European Union legislation.			
Each stage's goal to be achieved to solve the problem	1. Improving the legal framework in order to improve the activities of companies, increase the level of corporate governance and		

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
	protection of minority investors in accordance with the best world practices and the requirements of EU legislation		
Deadline within the stage	31.12.2022		
Risks for achieving the goal	Inconsistency of positions, lack of agreement on the need for appropriate legislative changes		
Measurable indicator of goal achievement	Improving the activities of companies, increasing the level of corporate governance and protection of minority investors by introducing a one-tier governance structure in joint-stock companies, a mechanism for holding general meetings using electronic voting, resolving the issue of liability of company officials in accordance with world best practices and requirements of the EU legislation.		
The total amount of financial resources required to achieve the goal			
Connection with other areas	WG on European integration WG on Economic Recovery and Development		
5. Lack of full functioning of the system of compulsory accumulative pension provision in Ukraine and imperfection of the non-state pension provision system. The demographic situation in Ukraine now and in the future will lead to a reduction in contributions of single social contribution payers, which is the main source of the solidarity pension system, which in turn leads to an increase in the burden on the state budget. In such conditions, it is impossible to count on a real increase in the level of pensions in the future at the expense of the solidarity system alone. This increase is possible only through the introduction of the system			

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
of accumulation and effective investment of savings of citizens, which will be made by them during their work, namely by introducing the second level of the pension system - compulsory accumulative pension provision and effective functioning of the third level of the pension system - non-state pension provision. In addition, there are a number of problems in the field of non-state pension provision that need an improvement of the regulation, supervision, liability and reliability of non-state pension providers in accordance with European acts, in particular, Directive (EU) № 2016/2341 of 14.12.2016 on the activities and supervision of institutions for occupational retirement provision (IORPs).			
Each stage's goal to be achieved to solve the problem		Adoption of the legislative framework in order to introduce the full functioning of the system of compulsory accumulative pension provision in Ukraine and to improve the non-state pension provision	
Deadline within the stage		31.12.2023	
Risks for achieving the goal		1. Inconsistency of positions, lack of agreement on the need for appropriate legislative changes 2. Reduction of the working population, rising unemployment, and falling GDP will negatively affect the growth rate of average wages, which is the basis for ensuring sustainable growth of the accumulative pension provision system	
Measurable indicator of goal achievement			1. Introduction of full-fledged functioning of the system of compulsory

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
			accumulative pension provision in Ukraine and improvement of non-state pension provision 2. Increasing the volume of assets of the accumulative pension provision 3. Increasing the level of penetration of pension assets of non-state pension funds
The total amount of financial resources required to achieve the goal			Introduction of the functioning of the system of compulsory accumulative pension provision may involve expenditures of the state budget of Ukraine according to approximate calculations in the first year of implementation in the amount of UAH 30.8 billion, of which UAH 15.4 billion - to compensate losses from underreceipts of the single social contribution to the funds of compulsory state social and pension insurance,

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
			UAH 15.4 billion - for the payment of additional accumulative contribution from the state budget in favor of system participants
Connection with other areas		WG on Social Protection	WG on Social Protection
6. Lack of full compliance of Ukrainian legislation with the provisions of the European Union in the field of financial markets infrastructure, rating, joint ventures and securitization. In order to ensure the development of capital markets infrastructure in accordance with European rules and to improve its efficiency, it is necessary to ensure full compliance of Ukrainian legislation with EU regulations on financial market infrastructure, in particular, in the operation of clearing, settlement and depository systems. In order to improve the investment climate in Ukraine, revitalize investment processes and minimize risks in capital markets, it is necessary to reform the rating market, in particular, improve the legal framework for rating and use of ratings, and establish liability for rating agencies for breaches of law in accordance with EU legislation. In order to ensure effective collective investment mechanisms in Ukraine, there is a need to establish investment funds in accordance with European rules, such as Undertakings for Collective Investment in Transferable Securities (UCITS), alternative investment funds (AIFs), long-term investment funds (ELTIFs), venture capital funds (EuVECA), social entrepreneurship funds (EuSEF) and money market funds (MMFs). In order to introduce new and develop existing financial instruments in accordance with the requirements of European Union acts, it is necessary to introduce a legal framework for covered bonds and securitization in Ukraine.			
Each stage's goal to be achieved to solve the problem	Unlocking operations with collective investment institutions assets, non-state pension funds, resumption of securities circulation	1. Improving the legal framework in order to implement the provisions of the legislation of the European Union in the field of capital markets infrastructure, rating, joint investment and securitization to domestic legislation	

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
		2. Introduction of new investment opportunities	
Deadline within the stage	31.12.2022	31.12.2025	
Risks for achieving the goal	Continuation of martial law	Inconsistency of positions, lack of agreement on the need for appropriate legislative changes	
Measurable indicator of goal achievement			Improving the functioning of capital markets infrastructure, rating activities, joint investment and the introduction of securitization mechanisms in accordance with the requirements of European Union law
The total amount of financial resources required to achieve the goal			
Connection with other areas		WG on European integration WG on Digitization WG Functioning of the financial system, its reform and development / Banking system and non-banking services market WG on Economic recovery and development	

	Stage I: June 2022 – end of 2022	Stage II: January 2023 – December 2025	Stage III: January 2026 – December 2032
7. Lack of effective mechanisms for recovery and withdrawal from the market of troubled financial institutions, compensation schemes for investors, as well as the functioning of the institute of benchmarks. In order to improve the investment climate in Ukraine, revitalize investment processes and minimize risks for investors in capital markets, it is necessary to introduce an effective system of early response and supervision based on risk assessment, the implementation of improved mechanisms for regulating the withdrawal of troubled financial institutions from the market, the introduction of mechanisms to compensate for investments in securities lost as a result of fraudulent actions, as well as the introduction of benchmarks in accordance with European legislation.			
Each stage's goal to be achieved to solve the problem			Adoption of a legal framework to address the recovery and withdrawal from the market of troubled financial institutions, the introduction of compensation schemes for investors, as well as the introduction of benchmarks
Deadline within the stage			31.12.2027

7.	Action Plan for the implementation of the Human Development Strategy for 2021-2023, approved by the CMU Order of 09.12.2021 № 1617-r	Under implementation

2.3. Determining tasks for achieving goals from subsection 2.1 (for every goal)

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
Stage I: June 2022 - end of 2022			
Goal (1) Improving state regulation and supervision of capital markets and organized commodity markets			
1.1	Adoption by the Verkhovna Rada in the second reading and as a whole of the Draft Law of Ukraine "On Amendments to the Law of Ukraine "On State Regulation of Capital Markets and Organized Commodity Markets" and some other legislative acts of Ukraine on regulation and supervision of capital markets and organized commodity markets" (registration number in the Verkhovna Rada № 5865 of 26.08.2021)	31.12.2022 (The Plan of work of the Verkhovna Rada provided a deadline - the first quarter)	1. Inconsistency of positions, lack of agreement on the need for appropriate legislative changes 2. WG “Functioning of the financial system, its reform and development” / WSG “Banking system and non-banking services market”

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
			3. WG on European integration
1.2	Development and adoption of legal acts necessary for the implementation of the adopted Law	After the implementation of paragraph 1.1	
1.3	Signing of the IOSCO Multilateral Memorandum of Understanding Concerning Consultation and Cooperation and the Exchange of Information (IOSCO MMoU) and gaining the status of a full member of this international financial organization	After the implementation of paragraph 1.1	WG “Functioning of the financial system, its reform and development” / WSG “Banking system and non-banking services market”
1.4	Carrying out a study on compliance with EU legislation of domestic legislation on the regulation of professional secrecy in capital markets in order to deepen the interaction of the NSSMC with ESMA	31.12.2023	WG “Functioning of the financial system, its reform and development” / WSG “Banking system and non-banking services market”
1.5	Bringing, if necessary, domestic legislation on the regulation of professional secrecy in capital markets in line with EU law in order to achieve regulatory equivalence	After the implementation of paragraph 1.4	WG on European integration
1.6	Preparation of comprehensive information activities (explanatory and presentation materials, round tables, seminars) on the implementation of changes in the regulation and supervision of capital markets and organized commodity markets	Constantly	
Goal (2) Ensure harmonization of the taxation system in the field of capital markets and organized commodity markets and tax incentives for investment, including long-term			

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
2.1	Submission to the Verkhovna Rada and adoption of the draft Law of Ukraine "On Amendments to the Tax Code of Ukraine (on Improving Taxation in the Sphere of Capital Markets and Organized Commodity Markets)", in particular: - introduction of mechanisms of tax incentives for investors to invest in financial instruments, including long-term investments, in particular through the introduction of special investment accounts; - settlement of issues related to the taxation of trade in commodity derivative contracts and other assets admitted to trading on organized markets, with the transition to taxation of transactions on a net basis (after netting/clearing); - improving the activities of tax agents in the taxation of transactions in financial instruments, and other issues.	Before 31.10.2022 (The Plan of work of the Verkhovna Rada provided a deadline - February)	WG “Functioning of the financial system, its reform and development” / WSG Tax policy
2.2	Submission to the Verkhovna Rada and adoption of the draft Law of Ukraine "On Amendments to the Tax Code of Ukraine (on stimulating investments of individuals in financial instruments by setting a single personal income tax rate of final passive income from investments of individuals at 5%).	Before 31.10.2022	WG “Functioning of the financial system, its reform and development” / WSG Tax policy
2.3	Submission to the Verkhovna Rada and adoption of the draft Law of Ukraine "On Amendments to the Tax Code of Ukraine (concerning the creation of tax benefits for contributions to non-state pension funds").	Before 31.10.2022	WG “Functioning of the financial system, its reform and development” / WSG Tax policy
2.4	Development and adoption of legal acts necessary for the implementation of the adopted Law	After the implementation of paragraphs 2.1-2.3	WG “Functioning of the financial system, its reform and development” / WSG Tax policy

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
2.5	Preparation of comprehensive information activities (explanatory and presentation materials, round tables, seminars) on the implementation of changes in taxation and investment intensification	Constantly	
Goal (3) Introduction of new and development of existing financial instruments			
3.1	Adoption by the Verkhovna Rada in the repeated first reading and as a whole of the Draft Law of Ukraine "On Amendments to the Law of Ukraine "On agricultural receipts" and some other legislative acts of Ukraine on the functioning and circulation of agricultural receipts" (registration number in the Verkhovna Rada № 2805-d of 29.12.2021, revised)	Before 31.12.2022	WG New agrarian policy
3.2	Development and adoption of legal acts necessary for the implementation of the adopted Law	After the implementation of paragraph 3.1	WG New agrarian policy
3.3	Complete the reform of the derivative contracts market in order to ensure the practical effect of legislative provisions by parliament's adoption of amendments to the relevant legislation that will regulate some aspects related to derivative contracts	Before 31.12.2023	
3.4	Settlement of issues of social bonds emission	Before 31.12.2024	
3.5	Development and implementation of new financial instruments linked to the UONIA overnight interbank rate index	Before 31.12.2023	WG “Functioning of the financial system, its reform and development” / WSG “Banking system and non-banking services market”
3.6	Preparation of comprehensive information activities (explanatory and presentation materials, round tables, seminars) on the implementation of new financial instruments	Constantly	
Goal (4) Improving the activities of companies, increasing the level of corporate governance and protection of minority investors			

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
4.1	Adoption by the Verkhovna Rada in the second reading and as a whole the Draft Law of Ukraine "On Joint Stock Companies" (registration number in the Verkhovna Rada № 2493 of 25.11.2019)	Before 31.12.2022	WG on European integration WG on Economic Recovery and Development
4.2	Development and adoption of legal acts necessary for the implementation of the adopted Law	After the implementation of paragraph 4.1	
4.3	Preparation of comprehensive information activities (explanatory and presentation materials, round tables, seminars) on the implementation of changes in company and corporate governance legislation	Constantly	
Stage II: January 2023 - December 2025			
Goal (5) Introduction of full-fledged functioning of the system of compulsory accumulative pension provision in Ukraine and improvement of non-state pension provision			
5.1	Adoption by the Verkhovna Rada in the repeated first reading and as a whole the Draft Law of Ukraine "On Compulsory Accumulative Pension Provision" (registration number in the Verkhovna Rada № 2683 of 23.11.2021, revised)	Before 31.12.2023	WG on Social Protection
5.2	Submission to the Verkhovna Rada and adoption of the Draft Law of Ukraine "On Amendments to the Law of Ukraine "On Non-State Pension Provision" and other legislative acts on improving non-state pension provision"	Before 31.12.2023	WG on Social Protection
5.3	Development and adoption of legal acts necessary for the implementation of adopted laws	After the implementation of paragraphs 5.1 and 5.2	WG on Social Protection
5.4	Preparation of comprehensive information activities (explanatory and presentation materials, round tables, seminars) on the implementation of the system of compulsory accumulative pension provision in Ukraine and changes on non-state pension provision	Constantly	WG on Social Protection

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
Goal (6) Improving the functioning of capital markets infrastructure, rating activities, joint ventures and the introduction of securitization mechanisms			
6.1	Making amendments to the NSSMC Decision № 144 of 08.03.2022	Before 31.12.2022	Continuation of martial law
6.2	Adoption by the Verkhovna Rada in the first reading and as a whole of the Draft Law of Ukraine "On Rating" (registration number in the Verkhovna Rada № 5819 of 22.07.2021)	Before 31.12.2023	Inconsistency of positions, lack of agreement on the need for appropriate legislative changes
6.3	Submission to the Verkhovna Rada and adoption of the Draft Law of Ukraine on the implementation of EU acts in the field of capital markets infrastructure	Before 31.12.2025	WG on European integration
6.4	Submission to the Verkhovna Rada and adoption of the Draft Law of Ukraine on Covered Bonds and Securitization	Before 31.12.2024	WG on European integration
6.5	Submission to the Verkhovna Rada and adoption of the Draft Law of Ukraine "On Investment Funds"	Before 31.12.2024	WG on European integration
6.6	Expanding the possibility of combining professional activities in the capital markets and providing opportunities for professional participants to lend money by amending the legal framework	Before 31.12.2025	
6.7	Development and implementation of legislation on the functioning of crowdfunding platforms	Before 31.12.2025	WG on Digitalization
6.8	Exploring digitalization initiatives: deploying distributed ledger technology in capital markets services, introducing smart contracts for conducting operations in capital markets	Before 31.12.2025	WG on Digitalization
6.9	Creation of a regulated money market	Before 31.12.2025	WG “Functioning of the financial system, its reform and development” /

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
			WSG "Banking system and non-banking services market"
6.10	Establishment of a trade repository for information on over-the-counter derivative contracts in Ukraine	Before 31.12.2023	WG "Functioning of the financial system, its reform and development" / WSG "Banking system and non-banking services market"
6.11	Creating a legal framework and implementing the necessary measures to launch the National Investment Fund, which will introduce professional asset management and help prepare state-owned enterprises for their gradual privatization through the mechanisms of capital markets	Before 31.06.2025	WG on Economic Recovery and Development
6.12	Further development of domestic repo markets, in particular, due to the expansion of the number of repos with risk control through the Clearing Center for servicing contracts in financial markets	Before 31.12.2025	WG "Functioning of the financial system, its reform and development" / WSG "Banking system and non-banking services market"
6.13	Development and adoption of legal acts necessary for the implementation of the adopted laws	After the implementation of paragraphs 6.1 – 6.6, 6.10	
6.14	Preparation of comprehensive information activities (explanatory and presentation materials, round tables, seminars) on the implementation of these legislative initiatives	Constantly	
Stage III: January 2026 - December 2032			

№	Description of the task to achieve the goal	Deadline within the stage	Depending on goals from other directions, spheres, problems
Goal (7) Introduction of effective mechanisms for recovery and withdrawal from the market of troubled financial institutions, compensation schemes for investors, as well as ensuring the functioning of the institution of benchmarks			
7.1	Submission to the Verkhovna Rada and adoption of the Draft Law of Ukraine on settlement of issues of recovery and withdrawal of investment firms from the market	Before 31.12.2026	Inconsistency of positions, lack of agreement on the need for appropriate legislative changes WG on European integration
7.2	Submission to the Verkhovna Rada and adoption of the Draft Law of Ukraine on compensation schemes for investors	Before 31.12.2026	WG on European integration
7.3	Submission to the Verkhovna Rada and adoption of the Draft Law of Ukraine on the introduction of the institute of benchmarks	Before 31.12.2027	WG on European integration
7.4	Development and adoption of legal acts necessary for the implementation of the adopted laws	After the implementation of paragraphs 7.1 – 7.3	WG on European integration
7.5	Preparation of comprehensive information activities (explanatory and presentation materials, round tables, seminars) on the implementation of stated legislative initiatives	Constantly	

3. List of national projects corresponding with tasks under Section 2.3 (for the relevant task)

Project description to the task under Section 2.3	Project justification	Qualitative indicators of project implement ation	Economic effect (impact on GDP, budget, employment, etc.)	Responsible authority	Required financing (million UAH)	Proposed sources of financing	Regulatory support	Related area of EU regulation (in general)
To achieve goal 1 of table 2.3. Improving state regulation and supervision of capital markets and organized commodity markets	Ensuring the functioning of an effective system of counteraction to abuse in the capital markets and organized commodity markets in order to increase investor protection Providing conditions for joining the IOSCO Multilateral Memorandum of Understanding Concerning Consultation and Cooperation and the Exchange of	Ensuring effective fight against violations of the law in the capital markets and organized commodity markets and improving the discipline of participants in these markets, which in turn will increase confidence in investing through capital markets instruments	Improving the quality of state regulation of capital markets and organized commodity markets will help increase confidence in these markets and increase investment in the country's economy Growth of revenues to the State Budget of Ukraine due to increasing the effectiveness of financial sanctions (fines) for violations of	Parliamentary Finance, Tax and Customs Policy Committee, NSSMC (by agreement)	Requires additional costs to increase the financial capacity of the National Securities and Stock Market Commission **No calculations were made**	The state budget of Ukraine and special funds International technical assistance	Adoption of the Draft Law of Ukraine "On Amendments to the Law of Ukraine "On State Regulation of Capital Markets and Organized Commodity Markets" and some other legislative acts of Ukraine on regulation and supervision of capital markets and organized commodity markets" (registration number in the Verkhovna Rada № 5865	Objectives and Principles of Securities Regulation of IOSCO, EU Regulation № 596/2014 of 16.04.2014 on market abuse (MAR), EU Directive № 2014/57/EU of 16.04.2014 on criminal sanctions against market

13	Creating a legal framework for the launch of the National Investment Fund	Implementing the necessary measures to launch the National Investment Fund, which will introduce professional asset management and help prepare state-owned enterprises for their gradual privatization through the mechanisms of capital markets	Parliamentary Committee on Economic Development, NSSMC (by agreement)	31.12.2024	31.06.2025
14	The Draft Law of Ukraine on settlement of issues of recovery and withdrawal of investment firms from the market	Implementation into the domestic legislation provisions of the European Union legislation in terms of implementing an effective system of early response and supervision based on risk assessment, implementation of improved mechanisms for regulating the procedures for withdrawal from the market of troubled financial institutions	NSSMC (by agreement)	31.12.2025	31.12.2026
15	The Draft Law of Ukraine on compensation schemes for investors	Implementation into the domestic legislation provisions of the European Union legislation regarding the introduction of mechanisms for compensation of investments in securities lost as a result of fraudulent actions	NSSMC (by agreement)	31.12.2025	31.12.2026

№	Name of the regulatory act for the task from subsection 2.3	Content of development and changes to the regulatory act	State authority	Deadline for development	Deadline for entry into force
16	The Draft Law of Ukraine on the introduction of the institute of benchmarks	Implementation of the provisions of Regulation (EU) 2016/1011 of 08.06.2016, which establishes framework provisions to ensure the accuracy and fairness of indices used in the EU as benchmarks in financial instruments and financial contracts, or to measure the performance of investment funds	NSSMC (by agreement)	31.12.2026	31.12.2027

The National Council for the Recovery of Ukraine from the Consequences of the War

Draft Ukraine Recovery Plan

Materials of the “Healthcare” working group

July 2022

TABLE OF CONTENTS

Introduction	**2**
Priority 1. Strengthening policies and institutions of the national healthcare system to guide the recovery process	**5**
Priority 2. Ensuring financial stability of the healthcare system	**17**
Priority 3. Restoration and transformation of the healthcare facility network	**23**
Priority 4. Health services development to meet the needs of people (including IDPs, war veterans) caused by the war	**30**
Priority 5. Consolidation and strengthening of human resources of the healthcare system	**39**
Priority 6. Strengthening of the public health system and preparedness for health emergencies	**56**
Priority 7. Developing the electronic healthcare and strengthening of cybersecurity	**79**
Priority 8. Strengthening national- and local-level quality management system	**89**
Priority 9. Recovering pharmaceutical sector, improving accessibility and proper use of medicines	**98**

Situation in the healthcare sector before the war

Preservation, protection and promotion of public health are among the key priorities of the state that should be implemented by a healthcare system. Russia's full-scale invasion of Ukraine has put a critical strain on the national healthcare system associated not only with massive destruction of healthcare facilities, but also with increase of demand for various types of medical care and services that were not priority before the war among the citizens. The situation is further exacerbated by significant migration of the population and healthcare workers. Rebuilding a healthcare system that takes into account the current realities would contribute to the effective restoration of human resources, which is the foundation for rehabilitation of the country from the consequences of the war. Rebuilding destroyed healthcare infrastructure is not an end of the actions proposed below in itself. Recovery efforts should primarily focus on transforming the healthcare system in accordance with the needs of citizens and available public resources so that it is able not only to provide citizens with quality and timely medical care, but is also prepared to respond to health emergencies of various nature.

Key performance indicators of the healthcare system before the war

Live expectancy (according to a 2020 study) was 76 years for women and 66 years for men, which was one of the lowest levels in Europe.

Healthcare expenditures in Ukraine were growing annually, but were still not close to the global levels in terms of GDP proportion. For example, total expenditures on the Programme of Medical Guarantees (the PMG) in 2021 amounted to approximately 2.4% of GDP. At the same time, the level of patients' out-of-pocket payments was high: 49% of current healthcare costs.

Ukraine had excessive capacities in the hospital sector with the number of hospitals almost twice higher compared to that in the countries of the WHO European Region (42 hospitals per 1 million persons). At the same time, Ukrainian hospitals provided care of lower intensity: At least 20% of all inpatient cases could be managed in outpatient settings, and 57% of inpatient bed days could not be justified by the need for 24-hour inpatient hospital stay.

Non-communicable diseases (NCDs) were a major cause of premature mortality in Ukraine: NCDs accounted for 6 out of 10 main causes of death, 9 out of 10 causes of premature deaths and 84% of all annual deaths.

Major reforms implemented over the last years:

The full-scale transformation of the system started with the adoption of the Law of Ukraine "On the State Financial Guarantees of Healthcare Services to the Population" in 2017. In April 2018, a single national purchaser of healthcare services, the National Health Service of Ukraine (the NHSU), was established. Simultaneously, the process of healthcare facilities autonomization was launched, changing the principles of managing the facilities by transforming them from municipal budget-funded institutions into municipal non-profit enterprises, which laid the foundation for the improvement of transparency and accountability and, as a result, contributed to combatting corruption in the form of hidden patients' payments and irrational use of investment resources and current funds. In July 2018, the NHSU contracted the first autonomous primary healthcare providers on the basis of the capitation rate — amount of payment for the provision of healthcare services to one patient, laid down at the legislative level. People were given the right to independently choose their physicians. Public and private primary healthcare providers were given equal opportunities for the provision of services under the PMG. In April 2019, the NHSU began administering reimbursement of the costs of e-prescribed medicines. As of 18.02.2022, 444 medicines were subject to reimbursement under the Affordable Medicines Programme.

The reform of specialized healthcare began on 1 April 2020: most public expenditures on healthcare were centralised and integrated into the Programme of Medical Guarantees (the PMG) consisting of service (benefit) packages that define healthcare services and medicines which are paid for by the NHSU. There was a shift from item-by-item budgets of healthcare facilities to performance-based payments (i.e. payment for actually treated cases or the population assigned) in the autotomized facilities contracted by the NHSU. Thus, instead of following the infrastructure of healthcare facilities, money started to "follow the patient".

The COVID-19 pandemic exposed weaknesses of the public health and emergency response system, and, in some cases, a lack of national, regional and local emergency preparedness plans and procedures. The Ministry of Health of Ukraine (the MoH) established a Public Health Center, which marked the beginning of the transformation

of the public health system in the country. Over the past four years, Ukraine implemented a number of large-scale measures to digitalise the healthcare sector.

Situation during the war

The healthcare sector is one of the most affected by the war. As of 21.06.2022, 118 healthcare facilities were totally destroyed and 633 healthcare facilities were partially destroyed (2% to 90% of destruction). The pre-estimated damages amount to almost UAH 35 billion.

The Programme of Medical Guaranteed does not fully represent the priority services packages that become of paramount importance during the war and the post-war period (treatment of injuries and burns, rehabilitation, mental health services). State healthcare programmes do not account for the losses of the healthcare system, damages incurred and the necessary changes of healthcare priorities (list of healthcare services and health conditions).

The healthcare system is also under particular pressure due to the migration of the population (approximately 7 million Ukrainians were forced to leave their homes), as well as the loss of healthcare professionals and their movement. 12 healthcare professionals have been killed and 47 have been wounded during the war. 2,372 employees of emergency medical care centres are currently in the occupied territories. 2,273 healthcare professionals have moved abroad (0.5 of the total number of healthcare professionals in the country), 1,714 physicians and 1,095 nurses changed their places of work due to the war. The lack of human resources and organisational capacities of the healthcare system for the provision of rehabilitation and mental health services exacerbates the situation with satisfying the needs of the citizens for high-quality and accessible services.

Future priorities

The main goal of the Health Recovery Plan is to restore and develop the healthcare system ensuring better quality and accessibility of services to meet the needs of citizens.

To achieve this goal, the Health Recovery Plan provides for:

1) **Strengthening policies and institutions of the national healthcare system to guide the recovery process** that envisages implementing universal approaches and governance tools that ensure professional autonomy, sustainability and capability of national health institutions; creating an effective system for intersectoral cooperation to ensure a unified national approach to healthcare based on approved evidence-based policies; creating a system for effective management of healthcare facilities that allows for public accountability and supervision.

2) **Ensuring financial stability of the healthcare system** by introducing flexible financing methods in the healthcare sector, expanding the programme of medical guarantees, developing the voluntary health insurance market;

3) **Recovering and transforming the healthcare facility network** in accordance with the approaches to hospital planning aimed at providing essential healthcare services by expanding primary health care, implementing multidisciplinary team model at the primary healthcare level, implementing long-term agreements between the National Health Service of Ukraine and healthcare facilities.

4) **Strengthening healthcare services to meet specific war-related needs of the population (including IDPs and veterans),** which includes developing rehabilitation care, mental health services that are close to individuals and communities, trauma, orthopaedic, burn care and intensive care services, improving the benefit packages of the medical guarantees programme to take into account the needs of war veterans and survivors of the hostilities;

5) **Strengthening and reinforcing healthcare workforce** by implementing the efforts aimed at integrating health education and research in the current international context; planning and implementing healthcare system staffing in terms of staff number and structure in accordance with the needs of the system; creating conditions for ensuring the professional well-being of healthcare workers.

6) **Strengthening public health system and preparedness to healthcare emergencies,** which envisages ensuring the functioning of a capable public health system aimed at preserving and promoting public health, disease prevention and timely detection of and response to health challenges; creating a coordination mechanism within the public health system; ensuring the functioning of the national blood system to guarantee

equitable and timely access of the patients to safe and high-quality components of donor blood in sufficient quantities.

7) **Developing e-health system and reinforcing cybersecurity** by developing a single medical information space featuring national and cross-border interoperability and end-to-end processes and services; providing infrastructural and technical conditions for the provision of quality medical services using information and communication systems at all the levels; creating friendly and transparent mechanisms for user access to the comprehensive data on their health and management of this information.

8) **Strengthening national- and local-level quality management system,** which involves developing and implementing quality assurance system elements in healthcare at the national and healthcare facility level.

9) Recovering pharmaceutical sector, improving accessibility and proper use of medicines by harmonizing the state policies on access to medicines and medical devices; establishing an independent agency for health technology assessment as the single expert body that ensures validity and evidence base for the selection and evaluation of the effectiveness of medicines and medical devices; facilitating the development of the pharmaceutical industry with a focus on fostering investment in R&D, localisation and other methods for exploring new technologies of the production of medicines and medical devices, promoting organization of clinical trial in Ukraine, strengthening control over intellectual property rights, full implementation of the Bolar exemption in the national legislation (allowing to register generics in advance of the expiration of the originators' patents) and other state-of-art tools aimed at reinforcing the sector; ensuring public access to effective medicines by establishing a strict regulatory system in Ukraine in line with those existing at the international level.

Analysis area (of a specific component) within the direction:
Priority 1: Strengthening policies and institutions of the national healthcare system to guide the recovery process

1. Key issues to be solved within the framework of the Recovery Plan

Impact of the war on the defined analysis area:	
1. Key challenges	● Particularly high burden on the healthcare system and key institutions due to the growing demand for healthcare services during the war ● The need to adapt and temporarily change approaches, methods of implementing state health policy, regulation of the healthcare system in the absence of reliable baseline data during the war ● Insufficient capacities and lack of clear division of roles of key healthcare institutions at national, regional and local level ● Insufficient financial capacity of communities to perform the facility owner's functions during the war and in the post-war period ● Weak participation of civil society in the management of the healthcare system, creation of parallel logistics systems and decision-making centres ● Low level of private sector involvement ● Weak intersectoral coordination with other areas
2. Key possibilities	● Acceleration of important political decision-making and adoption of healthcare legislation ● Improvement of intersectoral coordination to face the challenges posed by the war ● Engagement of international expertise into recovering/building a qualitatively new healthcare system ● Consolidation of the community and strengthening partnerships with the civil society and private sector in all governance areas of the healthcare system, significant demand for the transparency and accountability of healthcare facilities and institutions ● Radical review of the system for the regulation of healthcare activities, complete eradication of outdated rules and procedures, maximum harmonisation of the legislative framework in accordance with the EU requirements.
3. Key limitations	● Lack of relevant and trustworthy data for strategic and operational decision-making, intensive dynamics of changes in the basic parameters of the population, infrastructure and healthcare needs, challenges in creating scenarios, assumptions and models of recovery and development ● Lack of international expertise for strengthening healthcare policies and institutions during armed conflicts of similar scale ● Lack of human resources for the implementation of policies and decisions made

2. Goals, tasks and stages of the Recovery Plan within the direction "Strengthening policies and institutions of the national healthcare system to guide the recovery process"

2.1. Goals aimed at resolving identified problems:

	Stage 1: June 2022 – end of 2022	**Stage 2: January 2023 – December 2025**	**Stage 3: January 2026 – December 2032**
1. Identified problem to be resolved in the relevant analysis area The healthcare system of Ukraine is currently under immense pressure due to the war. The Ministry of Health of Ukraine, the NHSU and other national and regional healthcare authorities are resolving challenging problems on a daily basis in order to ensure responding to new needs for services caused by the war, including the delivery of services in the temporarily occupied territories and providing for the specific needs of people affected by the hostilities. This requires making quick political and regulatory decisions with insufficient data and information. Managing the recovery plan requires consolidation of efforts by the Ministry of Health of Ukraine and other authorities responsible for the development and implementation of healthcare policy in order to ensure the operational management, coordination and monitoring of the recovery process.			

The lack of intersectoral coordination is a traditional weakness of healthcare system management in Ukraine, which is particularly true for issues requiring multi-sectoral solutions and interventions at national and local levels. This includes a number of public health issues such as emergency preparedness and response, providing for the social needs of vulnerable populations and their specific healthcare needs, including the ones related to HIV, tuberculosis, etc. These problems have been exacerbated by the war, particularly for internally displaced persons. At the regional level, communities face new challenges due to the lack of financial resources, which interferes with their ability to properly fund healthcare facilities and ensure required oversight of local response efforts. In order to improve the engagement of private sector, political decisions should also be made and regulatory acts and efficient mechanisms should be adopted, since the involvement of the private sector, as well as its experience and resources, may become an additional resource for the healthcare system.			
Goal to be achieved to solve the issue during each stage **1. Restoring, developing and reforming the healthcare system based on approved evidence-based policies that take into account the needs of the population during martial law and in the post-war period**	● Ensure the national-level solution to the issue of the functioning of the healthcare system in the temporarily occupied territories of Ukraine ● Adopt the Law on amendments to certain laws and regulations of Ukraine on improving the provision of medical care (r. No. 6306) to allow for changing the approaches to creation of a capable network of healthcare facilities and regionalization of medical and rehabilitation care provided to the population	● Strengthen the capacity of the healthcare central executive body in development of evidence-based healthcare policies ● Improve data collection mechanism for all medical and operational data generated during health services provision, and for important information on citizens' life activities. ● Develop a new model for programming and funding science and research in the healthcare system. - Ensure legal regulation of the transformation of interaction between the institutes of the National Academy of Medical Sciences of Ukraine and the MoH in accordance with best international practices and objectives for the development of a new model of programming and funding health science, education and research. - Take into account, at the policy level, the peculiarities of functioning of the health system in the areas of Ukraine non-government controlled as of 24 February 2022. ● Develop, approve and implement the National Health Strategy of Ukraine ● Develop and implement a nationwide platform for monitoring, evaluation and review of the National Health Strategy of Ukraine ● Ensure legal regulation of the functioning of the oblast units of the platform for monitoring, evaluation and	● Review the programming and funding models for all the healthcare system components, including staff training, research and development, public health, payment for medical services and medicines, based on the healthcare financing reform launched in 2017–2022; ● Evaluate the National Health Strategy of Ukraine ● Improve the implementation of policies aimed at universal health coverage ● Review the "Concept for the development of primary healthcare and rehabilitation" in the framework of expanding and optimizing the healthcare services model ● Conduct regular evaluations and studies to measure health system effectiveness

			review of the National Health Strategy of Ukraine. ● Ensure a system for monitoring policy implementation based on performance indicators. ● Ensure providing feedback on healthcare policy implementation services to public authorities	
Risks related to the goal achievement		Lack of political will, underfunding, active hostilities	Limited funding; understaffing; active hostilities, impossibility of long-term planning because of constant disruptions	Limited funding; understaffing
Quality goal achievement indicator		The draft law is adopted, the legislation is amended	The legislation is amended The National Health Strategy of Ukraine is adopted Monitoring system is implemented	The legislation is amended The effectiveness is assessed
	Goal to be achieved to solve the issue during each stage **2. Implementing universal governance approaches and tools that ensure professional autonomy, sustainability and capacity of national healthcare institutions**	● Strengthen the capacity of the MoH of Ukraine as the manager of the national healthcare system during wartime ● Create a mechanism for coordination of 2022–2032 Ukrainian Healthcare System Post-War Recovery Plan ● Ensure stable functioning of the National Health Service of Ukraine during wartime ● Strengthen the cooperation with regional healthcare departments and local authorities, particularly by means of clarifying roles and responsibilities of the national, regional and local healthcare levels ● Assign the regional health departments the functions and responsibilities related to development and operation of a capable hospital network and a primary healthcare providers' network.	● Strengthening the MoH's capacity as a national health system governing authority through development of evidence-based policies and intersectoral cooperation. - Review the model of interaction of the MoH of Ukraine with the expert community, non-governmental agencies and private sector for their participation in healthcare policy making - Develop the procedures for interaction in the healthcare system based on data and involvement of stakeholders - Develop and implement an institutional development plan for the MoH ● Conduct an evaluation of the activities and ensure institutional strengthening of the National Health Service of Ukraine as the national strategic procurement agency. - Review the model of interaction of the NHSU with the expert community, non-governmental agencies and private sector for their participation in development of the PMG	● Continue the institutional development of the MoH, the NHSU and other key national agencies ● Strengthen the role of regional and local health departments in development and implementation of local health policies and objectives

			- Review the model of interaction between the NHSU and HCFs to introduce the practice of payment tariffs agreement - Gradually reduce the share of payment for hospital costs from global budgets and, accordingly, increase the share of payment for a case - Continuously update and improve the costing methodology for the formation of medical care tariffs ● Strengthening the accountability of the NHSU to the Government and the public ● Strengthen the cooperation with regional healthcare departments and local authorities, particularly by means of clarifying roles and responsibilities of the national, regional and local healthcare levels ● Ensure strengthening of human, material and technical capacities of the healthcare structural subdivisions of local state administrations ● Ensure regulatory and legal support of the coordination and activities of healthcare structural subdivisions for the purposes of effective cooperation with the MoH and self-governing bodies in the implementation of state healthcare policy ● Ensure the operation of Medical Procurement of Ukraine State-Owned Enterprise as a purchasing hub by using up-to-date procurement tools and methodologies at the national and regional level.	
	Deadline within the stage	June 2022 – December 2022	January 2023 – December 2025	January 2026 – December 2032
	Risks related to the goal achievement	Lack of understanding of such a way of solving problems by the political circles, underfunding, active hostilities	Limited funding; understaffing; active hostilities	Limited funding; understaffing; active hostilities

	Quality goal achievement indicator	The draft law is adopted, the legislation is amended	The national institutions are capable	
	Goal to be achieved to solve the issue during each stage **3. Having an effective system of intersectoral cooperation in place to ensure nation-wide approach to addressing healthcare issues**	● Strengthen coordination between institutions involved in healthcare and social decision-making at all management levels in order to ensure a harmonised and efficient approach to solving the problems faced by the population during martial law ● Create a coordination council for healthcare system recovery, which would include, on equal footing, the representatives of: The Verkhovna Rada of Ukraine; the Office of the President of Ukraine; the MoH; the NHSU; scientific and educational state-owned and private institutions; civil society sector; donor organizations; the Cabinet of Ministers of Ukraine (Ministries). ● Create an intersectoral platform for the development and implementation of healthcare policies requiring intersectoral planning and decisions	● Strengthen coordination mechanisms between institutions involved in healthcare and social decision-making at all the management levels in order to ensure a harmonised and efficient approach to meeting the needs of vulnerable populations - Ensure participation in the development and implementation of the state policy for chemical safety and management of chemicals - Adopt the Draft Law "On Assisted Reproductive Technologies" - Ensure an effective intersectoral approach to resolving healthcare issues in the territories with different levels of healthcare services disruption and ongoing conflict or areas that are temporarily not government-controlled, taking into account the number of IDPs and returning persons, the number of healthcare professionals who keep working at healthcare facilities or in the region, the specificities of the transition from military to civilian management and the use of healthcare facilities, etc.	● Improve the current mechanism of intersectoral cooperation based on "Health in All policies" approach
	Deadline within the stage	June 2022 – December 2022	January 2023 – December 2025	January 2026 – December 2028
	Risks related to the goal achievement	Lack of understanding of ensuring intersectoral cooperation in the field of healthcare in such a way by the political circles, underfunding, active hostilities	Limited funding; understaffing; active hostilities	Limited funding; understaffing; active hostilities
	Quality goal achievement indicator	The draft law is adopted, the legislation is amended	• Governmental decision-making is based on "Health in All Policies" approach • Clear intersectoral health cooperation mechanism is functional	

	Goal to be achieved to solve the issue during each stage **4. Establishing a system for effective management of healthcare facilities that ensures accountability to and oversight by the public**	● Complete changes of the regulatory framework concerning the operation of supervisory boards of healthcare facilities, particularly the ones related to the composition of the boards, procedures for appointment and rotation, and their functions and responsibilities ● Improve the mechanisms for the management of hospital districts and rules for the establishment of an efficient network of facilities ● Develop and implement national standards/guidelines, create an effective healthcare facilities' network taking into account the existing demographic and infrastructural needs of each region in health care ● Develop mechanisms for coordination and cooperation between local authorities and self-governing bodies in the planning, development and operation of the healthcare facilities' network ● Identify the role and status of healthcare facilities in hospital districts to build a capable health facilities' network	● Improve and regulate licensing criteria and mechanisms ● Develop the concept for accreditation of healthcare facilities ● Create the possibility of receiving a permit ● Update the lists of equipment and provide for their regular revision ● Develop a system for efficient control over the activities of healthcare facilities ● Defining the criteria for monitoring and control of healthcare facilities, including accreditation criteria, performance and quality indicators, etc. ● Introduce a requirement for the preparation and publication of reports corresponding to the public sector format standards by municipal healthcare facilities ● Support engagement of patient organizations, local community and private sector in the governance of healthcare facilities and measurability of the impact of initiatives taking into account the introduction of mechanism to prevent conflict of interest ● Create digital services of public accountability to enable public and patient oversight of availability and quality of medical services ● Create an open registry of programmes for the provision of medicines for compassionate use and monitor their implementation in order to ensure informing the healthcare sector and the public and provide for control ● Create an application within the eHealth system to provide physicians with detailed information on clinical studies which are planned or being held in Ukraine in order to enable them to engage patients in appropriate international	

			clinical studies of innovative medicines, medical devices, etc.	
	Deadline within the stage	June 2022 – December 2022	January 2023 – December 2024	January 2026 – December 2028
	Risks related to the goal achievement	Lack of understanding of the necessity of creating supervisory boards at healthcare facilities by the political circles, underfunding, active hostilities	Limited funding; understaffing; active hostilities	Limited funding; understaffing; active hostilities
	Quality goal achievement indicator	The draft law is adopted, the legislation is amended	● 100% of municipal healthcare facilities separated the positions of medical director and administrator ● 90% of municipal healthcare facilities established supervisory boards for the new management system ● 90% of municipal healthcare facilities prepare and publish reports corresponding to the public sector format standards	
	Goal to be achieved to solve the issue during each stage **5. Harmonizing Ukrainian legislation with relevant EU *acquis***	● Ensure the compliance with the requirements of EU-Ukraine Association Agreement on the harmonization of healthcare legislation	● Constantly update Ukrainian legislation in line with EU legislation	● Facilitate high-level consultations on the compliance with/ implementation of EU Directives in the area of healthcare and related areas that were not included in the scope of the Association Agreement ● Facilitate legislative initiatives for implementation of defined EU regulations into Ukrainian legislation
	Deadline within the stage	June 2022 – December 2022	January 2023 – December 2025	January 2026 – December 2028
	Risks related to the goal achievement	Lack of understanding of the necessity of ensuring the harmonisation of healthcare legislation by the political circles, underfunding, active hostilities	Limited funding; understaffing; active hostilities	Limited funding; understaffing; active hostilities
	Quality goal achievement indicator	Amendments to the legislation aimed at harmonization with EU *acquis* are made, specifically: ● Article 21 of Council Recommendation 2003/488/EC of 18 June 2003; ● Article 64, Annex V of Regulation (EC) No 1331/2008; ● Article 64, Annex V of Regulation (EC) No 1333/2008; ● Article 64, Annex V of Commission Regulation (EU) No 231/2012;		Amendments to the legislation aimed at harmonization with EU *acquis* are made taking into account the reviews of the EU *acquis*

		• Article 64, Annex V of Commission Regulation (EU) No 234/2011; • Article 64, Annex V of Regulation (EC) No 1334/2008; • Article 64, Annex V of Regulation (EC) No 2065/2003; • Article 64, Annex V of Commission Regulation (EU) No 872/2012; • Article 64, Annex V of Commission Regulation (EU) No 873/2012; • Article 64, Annex V of Regulation (EC) No 1332/2008; • Article 64, Annex V of Regulation (EC) No 396/2005; • Article 64, Annex V of Commission Regulation (EC) No 2023/2006; • Article 64, Annex V of Council Directive 82/711/EEC; • Article 64, Annex V of Council Directive 85/572/EEC; • Article 64, Annex V of Commission Decision 2010/169/EU; • Article 64, Annex V of Council Directive 84/500/EEC; • Article 64, Annex V of Commission Directive 2007/42/EC; • Article 64, Annex V of Commission Regulation (EC) No 1895/2005; • Article 64, Annex V of Commission Regulation (EC) No 450/2009; • Article 64, Annex V of Commission Regulation (EC) No 10/2011; • Article 64, Annex V of Commission Directive 93/11/EEC; • Article 64, Annex V of Commission Regulation (EC) No 284/2011; • Article 64, Annex V of Regulation (EC) No 258/97; • Article 64, Annex V of Directive 1999/2/EC; • Article 64, Annex V of Directive 1999/3/EC; • Article 64, Annex V of Commission Regulation (EC) No 282/2008; • Article 64, Annex V of Regulation (EC) No 396/2005; • Article 342, Annex XXVII of Council Directive 2013/59/Euratom; • Article 424, Annex XL of Council Directive 83/477/EEC, Council Directive 91/382/EEC, Directive 2003/18/EC; • Article 424, Annex XL of Directive 2004/37/EC; • Article 424, Annex XL of Directive 2000/54/EC; • Article 424, Annex XL of Council Directive 98/24/EC; • Article 424, Annex XL of Directive 2003/10/EC; • Article 420, Annex XL of Council Directive 92/29/EEC; • Article 424, Annex XL of Directive 90/269/EEC; • Article 428, Annex XLI of Directive 2004/23/EC, Commission Directive 2006/17/EC, Commission Directive 2006/86/EC; • Article 428, Annex XLI of Directive 2004/23/EC, Commission Directive 2006/86/EC, Annex XLI of Directive 2004/23/EC; • Article 428, Annex XLI of Directive 2002/98/EC, Commission Directive 2004/33/EC, Commission Directive 2005/62/EC; • Article 428, Annex XLI of Directive 2002/98/EC, Commission Directive 2005/61/EC; • Article 428, Annex XLI of Directive 2002/98/EC; • Article 428, Annex XLI of Recommendation 2003/54/EC; Council Recommendation 2003/488/EC; Council	

		Recommendation 2001/458/EC; Council Recommendation 2007/C 164/01; ● Article 368, Annex XXXII of Directive 2006/126/EC (updated Council Directive 91/439/EEC); ● Directive 2001/83/EC of the European Parliament and of the Council; ● Commission Delegated Regulation (EU) 2016/161; ● Regulation (EC) No 536/2014; ● Commission Implementing Regulation (EU) 2017/556 of 24 March 2017; ● Commission Delegated Regulation (EU) 2017/1569 of 23 may 2017; ● Regulation (EU) No 726/2004 ● Commission Directive 2005/28/EC of 8 April 2005 ● Regulation (EU) No 1901/2006 ● Regulation (EU) 2017/745 of the European Parliament and of the Council ● Regulation (EU) 2017/746 of the European Parliament and of the Council		
	Goal to be achieved to solve the issue during each stage **6. Improving healthcare system accountability and outcomes as a result of awareness and cooperation of the whole society**	● Ensure the engagement of the civil society in development of the legislation and monitoring of its implementation ● Ensure the engagement of the private sector as a full participant of the health system and, therefore: ● Identify and develop a regulatory framework for implementation of an effective model of public-private partnership in the healthcare sector ● Adopt the amendments to the Law of Ukraine "On Concession" as regards peculiarities of concessions in healthcare sector	● Strengthen public-private partnership in the healthcare sector under the defined directions ● Strengthen the engagement of the private sector as a full participant of the health system ● Simplify the procedure for physicians to start their private practices ● Develop and implement the mechanisms for the public accountability of the national authorities (the MoH, the NHSU, the Public Health Center, etc.) to the government and the population concerning the implementation of the policy and the use of allocated funds ● Ensure the development of the state policy in the field of the development of private healthcare sector as an independent participant of the single healthcare space ● Develop and approve the universal framework concession agreement for the healthcare sector	● Assess civil society engagement ● Assess the engagement of the private sector as a full participant of the health system ● Conduct analysis of starting private practices and amend regulatory acts on the basis of such analysis, if necessary ● Perform the monitoring of the public reporting mechanism and review the reporting format based on its results (if necessary) ● Regularly monitor the engagement of the private sector in the healthcare system ● Ensure evaluation of the implementation of a universal framework concession agreement in healthcare sector

	Deadline within the stage	June 2022 – December 2022	January 2023 – December 2025	January 2026 – December 2028
	Risks related to the goal achievement	Lack of understanding of the necessity of private sector engagement as an independent healthcare system actor by the political circles, underfunding, active hostilities	Lack of understanding of the necessity of private sector engagement as an independent healthcare system actor by the political circles, limited funding, understaffing	Lack of understanding of the necessity of private sector engagement as an independent healthcare system actor by the political circles Limited funding
	Quality goal achievement indicator	The adopted law and the amended legislation provide for the creation of new conditions for the establishment of public-private partnership and private sector engagement as an independent actor within the healthcare system	● PPP legal framework is updated ● Healthcare sector concession is implemented ● Terms of the concession agreement are defined that are fair and mutually beneficial for investors and local authorities, including the responsibilities of the parties, the period of validity of the agreement and the guarantees of payment for the services provided by healthcare institutions on the basis of concession. ● The assessment of awareness of and satisfaction with healthcare services is performed on a quarterly basis, and its results are used as a source of data for policy adjustment	A new favourable climate for civil society engagement is created A new style of public-private partnership is introduced A new public reporting mechanism that allows for providing quality feedback is introduced
	Goal to be achieved to solve the issue during each stage **7. Establishing professional self-governance system for healthcare workers**		● Adopt a law and related regulatory framework to regulate healthcare sector professional associations and therefore to: ● Adopt the Law on self-governance of health professions in Ukraine (comprehensive version) ● Extend the list of forms of healthcare services delivery, which are currently limited to labour relations and licensed individual entrepreneurs Provide for an opportunity to work on the basis of civil law contracts ● Ensure support of the functions defined for healthcare professional associations. ● Develop a regulatory framework for the involvement	Strengthen the mechanisms of professional associations' participation in the elaboration of the policies, development of the profession, quality improvement and performance of other healthcare system tasks

			of professional healthcare associations into resolving urgent issues concerning the management of the sector in accordance with the current legislation ● Engage professional healthcare associations in the work of commissions, expert and working groups, as well as standing or temporary advisory and other subsidiary bodies of the MoH.	
	Deadline within the stage	June 2022 – December 2022	January 2023 – December 2025	January 2026 – December 2032
	Risks related to the goal achievement		● Lack of understanding of the necessity of introducing professional self-government by the political circles, underfunding, active hostilities	Limited funding; understaffing; active hostilities
	Quality goal achievement indicator		● The necessary legal framework is created. Professional self-governance system for healthcare workers is established. ● A new healthcare self-government model is created that enables economic and professional actors to self-regulate their activities in the healthcare sector, namely: ● Actively participate in the development of healthcare policy; ● Expand the list of forms of healthcare services delivery; ● Develop healthcare professions; ● Ensure quality control and other healthcare system tasks; ● The procedure for starting a private practice is simplified	The legislation is amended

Priority 2. Ensuring the financial stability of the healthcare system

Impact of the war on the defined analysis area:	
Key challenges	● Insufficient funding for healthcare to meet the needs of various groups of the population in health services, including additional needs arising from the war and hostilities ● Inefficient allocation of financial resources in healthcare, that may lead to underfunding or overfunding of certain services ● Programme of medical guarantees does not fully reflect the priority service packages that are of urgent importance during the war and in the post-war period (rehabilitation, mental health, etc.) ● Government programs do not take into account the losses of the healthcare system, the damages, the necessary changes in health care priorities (list of health services and conditions) ● Damage or destruction of health infrastructure, as well as loss of human resources, which restricts or prevents access to health care in areas that are or have been occupied, and areas affected by hostilities ● Limited funding for health care from non-governmental sources ● Inefficient funding mechanism for health and social services, which may lead to double funding or lack of funding for some services ● Inflexible payment systems under government programs, which may affect the quality and scope of health care provided in case of unforeseen events (military actions, natural disasters, humanitarian catastrophes, etc.)
Key possibilities	● Implementation of international best practices in the health financing ● Introduction of flexible payment methods within the Programme of Medical Guarantees and procurement methods that will be based on the needs of the population in health care ● Rebuilding the health care infrastructure taking into account the approaches of hospital planning ● Significant reduction in the practice of informal payments for state-guaranteed health services under PMG ● Involvement of international experts in the health care recovery ● Improving coordination between stakeholders in health financing ● Creating an environment to involve the private sector in financing and providing health services ● Increase funding for the health care sector through non-governmental sources
Key limitations	● Economic and social crisis caused by the full-scale war of the Russian Federation against Ukraine ● Unpredictable timing of the end of the war and the uncertain war impact on each region of the country ● Lack of additional state financial resources to cover additional health care needs ● Potentially insufficient institutional capacity of executive bodies to implement innovative solutions in the healthcare financing ● Lack of reliable and up-to-date data, as well as dynamic indicators that are constantly changing due to the impact of hostilities and the movement of population and human resources in the health care ● Uncertain and growing needs for health infrastructure reconstruction ● The need to restore health care in accordance with the modern standards and approaches

2. Goals, tasks, stages of the Recovery Plan within the priority "Ensuring the financial stability of the health care system"

2.1. Goals aimed at resolving identified problems:

	Stage 1: June 2022 – end of 2022	**Stage 2: January 2023 – December 2025**	**Stage 3: January 2026 – December 2032**

1. Identified problem to be resolved in the relevant analysis area

Preserving, protecting and promoting the health and well-being of citizens remain key priorities of the Ukrainian Government. In order to transform the health care system, the Government has been implementing health care reform since 2017, including the health financing. Starting from 2019, different types of health care and different types of health care providers (communal and private) were gradually included in the PMG.
However, the amount of funding for PMG remains quite low (does not correspond to the 5% of GDP declared by law), and national healthcare facilities have not been included in PMG, funding flows for health and social care have not been coordinated, and so on. In addition, there have been cases where the providers adjusted the scope of health services included in PMG, at their own discretion, forcing patients to pay in part for the care provided out of pocket. This somewhat hindered the implementation of the principle of reform "money follows the patient".
Due to the full-scale invasion of the Russian Federation, the health care system is undergoing significant changes that consist in damage or destruction of healthcare infrastructure, which limits or even prevents access to health care in the territories that are or have been occupied, and areas affected by hostilities. The losses from the war to the healthcare system are increasing every day, so it is important to respond quickly to the challenges that exist today and to ensure that measures are taken to help the healthcare system recover as soon as possible after the war. The war showed insufficient funding for healthcare, especially to cover additional healthcare needs; insufficient backup of material and technical resources. The filling of the healthcare budget and the expansion of the list of sources of filling is especially relevant given the martial law in the country and the conduct of hostilities. Addressing the above mentioned issues of health financing needs to consolidate the efforts of society and public authorities at the national, regional and local levels, as well as the support of the international community.

Goal to be achieved to solve the issue during each stage **1. Ensuring financial protection to people when receiving state-guaranteed quality and affordable healthcare services; significantly decreasing the level of out-of-pocket payments and, thus, preventing limitation of demand and access to services and catastrophic costs in the event of illness**	● Continue the implementation of healthcare reform and ensure public access to the healthcare ● Prepare proposals for the necessary amount of additional financial resources to cover additional health care needs from all possible sources ● Introduce flexible methods of health financing ● Gradually rebuild the healthcare infrastructure based on an assessment of the needs of the population and the network of facilities in each oblast	● Increase public spending on health care: - Ensure funding for PMG in the amount of not less than 5% of GDP of Ukraine - Update PMG annually - Gradually include state, sectoral healthcare facilities and institutions of the National Academy of Medical Sciences of Ukraine (NAMS) in PMG - Develop and implement the mechanisms to attract non-state funds to finance healthcare - Gradually include the cost of medicines, medical devices, including rehabilitation aids and consumables in the tariffs for health services ● Spend public resources in an effective way:	● Increase public spending on health care to the level of average European indicators ● Ensure financing of all healthcare facilities (except healthcare facilities of the Armed Forces of Ukraine) at the expense of PMG ● Develop and implement a mechanism for attracting non-state funds to finance healthcare, taking into account priority services and conditions ● Create a state reserve fund to cover healthcare expenses that arise as a result of unforeseen events (war, natural disasters, humanitarian disaster, etc.) ● Ensure the integration of financial flows between health and social services ● Develop the mechanisms for financing long-term

		- Conduct research on the level of informal payments for priority types of health care - Strengthen monitoring and improve the system of penalizing health care providers for informal patient payments - Introduce control over financial and budgetary discipline in the healthcare facilities ● Take measures on the implementation of a clearer and more transparent process for the development, expansion and approval of PMG: - Change the PMG development procedure (review of PMG, calculation of tariffs, financing mechanisms, public discussion, etc.) - Involve healthcare facilities in the PMG development ● Extend the list of services that are paid for by the NHSU based on healthcare services actually provided ● Improve the payment methods in the framework of the PMG: - Develop and implement effective payment methods for health services for internally displaced persons - Develop and implement effective methods of payment for health services, including the performance-based payments' indicators	care services based on the developed model of providing such services with the involvement of the private sector ● Expand the role of VHI

		- Include the utility costs and other elements to the PMG tariffs - Improve the payment methods in the framework of the PMG, using a mixed system concerning health service readiness despite of the quantity of patients, including burns, polytrauma and disaster medicine ● Implement multi-year contracts between the NHSU and the healthcare facilities according to their role in the capable network ● Provide additional revenues to the health care system through the introduction of taxation of sugar-sweetened beverages. ● Develop the market for voluntary health insurance (VHI), including complementary: - Ensure access of insurers to medical data of insured persons and persons who intend to enter into a VHI agreement, with their consent - Introduce credit benefits for the companies in order to stimulate VHI - Develop and adopt a Law on the development of the VHI ● Update the approval procedures and the list of paid services provided by healthcare facilities outside the PMG	

		• Rebuild infrastructure and provide access to health services for lower-income households: • Assess the cost of capital investment to reconstruct the damaged (lost) healthcare infrastructure based on a simulated network	
Deadline within the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	• continuation of the war on the territory of Ukraine • lack of state budget resources to meet the needs of the population • Lack of understanding in the political environment of the need to increase funding for health care and relevant decision-making initiatives • low capacity of executive bodies (central and local) • lack of reliable data sources for economically sound calculations • the emergence of unpredictable factors that will significantly affect the simulation results • lack of consent among stakeholders	• continuation of the war on the territory of Ukraine • lack of state budget resources to meet the needs of the population • Lack of understanding in the political environment of the need to involve the private sector as a full participant in the health care system and relevant decision-making initiatives • lack of reliable data sources for economically sound calculations • the emergence of unpredictable factors that will significantly affect the simulation results • lack of consent among stakeholders	• continuation of the war on the territory of Ukraine • lack of state budget resources to meet the needs of the population • Lack of understanding in the political environment of the need to involve the private sector as a full participant in the health care system and relevant decision-making initiatives • lack of reliable data sources for economically sound calculations • the emergence of unpredictable factors that will significantly affect the simulation results • lack of consent among stakeholders • low desire of the population to participate in the VHI
Quality goal achievement indicator	• the network of healthcare facilities has been partially recovered • financing of facilities is based on the results of their activity • PMG packages have been updated in terms	• the annual amount of PMG financing is at least 5% of GDP • the network of healthcare facilities has been partially recovered • various resources have been	• the annual amount of PMG financing is at least 5% of GDP • various resources have been consolidated to finance the health care system

	of rehabilitation services (including provision of prosthetic devices), mental health services, treatment of injuries, etc.	consolidated to finance the health care system ● tariffs for PMG are economically justified ● the financing mechanism within the PMG, which includes performance indicators has been implemented ● PMG has been updated in accordance with the needs of the population and state priorities ● the level of informal payments for priority types of health care has been reduced ● new approaches for VHI have been introduced	● PMG has been updated in accordance with the needs of the population and state priorities ● tariffs for PMG are economically justified ● the financing mechanism within the PMG, which includes performance indicators has been implemented ● the procedure for introducing paid services has been updated ● the level of informal payments for priority types of health care has been reduced ● the level of informal payments for priority types of health care has been significantly reduced
The total amount of the need for financial resources to achieve the goal	● PMG 2022: UAH 157.3 billion (approved by the Law of Ukraine "On the State Budget of Ukraine for 2022")	● For the healthcare system in 2023 (2.3% + 1.5% of forecast GDP): UAH 116.3 billion ● For the healthcare system in 2024 (5% + 1.5% of forecast GDP): UAH 210.0 billion ● From 2025, at least 6.5% of GDP will be spent on the healthcare system	From 2026, at least 7% of GDP will be allocated to the healthcare system

Priority 2. Restoration and transformation of the healthcare facility network

1. Key issues to be solved within the framework of the Recovery Plan

Impact of the war on the defined analysis area:	
Key challenges	● The network of healthcare facilities, especially the hospital sector, does not meet the needs of the population and the epidemiological situation in the country ● Excessive and outdated health care infrastructure, which did not have time to reform in the pre-war period, requires significant resources for its maintenance ● Despite the high expenses on the healthcare infrastructure, the quality of services remains at a low level and requires additional patient costs ● The damage during the war to the infrastructure of healthcare facilities and the migration of specialists led to an increase in disparities in the provision of health care both in the regional dimension and in terms of types of health care ● Migration processes caused by the war require an assessment of the health needs of the population, the development of flexible mechanisms for the provision of services and a review of the network of healthcare facilities that existed before the war ● Territorial communities, as the owners of health care facilities, do not have sufficient information about the range of health services needed by the population, as well as the necessary resources for infrastructure restoration. Decisions of individual owners, isolated from the other territorial communities, on the restoration of health care facilities may lead to fragmentation of the system of healthcare services delivery and the creation of excess capacity ● The reform of primary health care, which has achieved significant shifts and changes since 2017, requires the continued expansion of the integrated service delivery model and the introduction of flexible financing models
Key possibilities	● Centralization of management and planning of the health care network at the national and oblast levels ● Involvement of international expertise in the reconstruction/construction and transformation of a qualitatively new network of health care facilities ● Use of hospital planning experience across all areas ● Drafts of legislative and regulatory acts regarding hospital planning have been developed ● Potential increase in funding for capital expenditures from international sources
Key limitations	● The economic and social crisis caused by the full-scale war of the Russian Federation against Ukraine ● Unpredictable timing of the end of the war ● Lack of experience in the design and construction of health care facilities taking into account modern approaches and technologies ● Lack of healthcare professionals, including healthcare workers and rehabilitation specialists to restore the health care network ● Opposition to the transformation of networks of health care facilities ● Opposition of some PHC specialists to expanding of their functions ● Lack of opportunities and/or reluctance of primary care physicians to take on new responsibilities

2. Goals, tasks, stages of the Recovery Plan within the priority "Restoration and transformation of the healthcare facility network "

2.1. Goals aimed at resolving identified problems:

	Stage 1: June 2022 – end of 2022	**Stage 2: January 2023 – December 2025**	**Stage 3: January 2026 – December 2032:**	
2. Identified problem to be resolved in the relevant analysis area				

Ukraine suffered significant destruction of the health care infrastructure during the military aggression. However, in addition to the changes caused by the war, the health care system of Ukraine suffers from unsolved problems that existed before the war and continue to have a negative impact on the situation.

Despite the rapid changes and the introduction of new approaches in funding of primary and specialized health care in previous years, the network of health care facilities in Ukraine remains unreformed.

Ukraine has excess capacity in the hospital sector with almost twice as many hospitals compared to countries in the WHO European Region.

Ukraine has excessive capacities in hospital sector with the number of hospitals almost twice higher compared to that in the countries of the WHO European Region. Many of the hospitals are outdated, do not use modern technologies to a sufficient extent and have low capacity for providing intensive care in emergency situations such as stroke, myocardial infarction or severe injuries. While the multidisciplinary nature of hospitals can ensure a comprehensive set of services, higher quality and safety for patients, a significant share of the total number of hospitals are narrowly specialized hospitals (psychiatric/dependency, tuberculosis, infectious diseases and recreational facilities). There are almost no such hospitals in countries with more developed economies, since the best practice is their integration into multidisciplinary hospitals. Furthermore, many services offered by Ukrainian hospitals can be provided in primary healthcare settings, outpatient specialised healthcare settings in one-day facilities, or outside the healthcare system.

The processes of administrative and territorial reform and decentralization of healthcare facilities management feature some gaps in ensuring the capacity of territorial communities to manage the healthcare system at the local level. Upon obtaining greater authority, territorial communities represented by their leaders proved to be unprepared to manage the healthcare sector. This often leads to erroneous decisions concerning the development of healthcare facilities without regard to the needs and size of the population, healthcare safety, procurement of inappropriate equipment, construction works or establishment of new healthcare facilities. There is also a need for close cooperation between the territorial communities to support the healthcare facilities that provide services to their populations, which is currently a significant problem in practice. At the same time, there are large territorial communities with several or even dozens of healthcare facilities that are trying to develop them without interacting with other communities and healthcare management at the oblast level.

Goal to be achieved to solve the issue during each stage **1. Improving people's health through the implementation of an effective integrated model that ensures balanced, evidence-based and continuous provision of safe and quality services.**	● Provide continuous health and rehabilitation care in wartime conditions - Ensure the integration of some services currently provided through humanitarian assistance (short-term support for urgent needs) into expanded PHC services - Create mechanisms for the additional deployment of healthcare staff members (surge capacity) - mobile points (brigades) for the provision of PHC, taking into account the needs of the population for such assistance in war conditions, to implement their organizational support and staffing ● Identify additional needs of the population connected with the war ● Initiate health services according to the identified additional needs ● Bring the network of healthcare providers in line with people's needs and resources available - Develop national guidelines for the restoration of health care infrastructure at the regional level (including the use of eco-materials, renewable energy sources, implementation of energy efficiency, etc.) - Adopt comprehensive plans for the recovery	● Increase the capacity of primary healthcare to address most of the patients' health issues, with special attention to the sphere of prevention of NCDs and support of patients with mental disorders and chronic diseases. - Expand the range of PHC services - Develop an expanded list of functions and the scope of activities of PHC nurses and implement them to the requirements of the contract with the National Health Service of Ukraine - Implement new approaches to the consultative process at the PHC level, including strengthening mental health services - Develop and implement a model of work of multidisciplinary teams at the PHC level. ● Prioritise prevention and early diagnosis services - Implement effective disease prevention programmes for the most common chronic diseases and healthy lifestyle programmes at the primary healthcare level - Develop national screening programs on the principles of evidence-based medicine	● Strengthen PHC as one of the main components of the health care system ● Analyse the activity of PHC providers based on electronic medical records in a regular way ● Implement an expanded list of functions and the scope of activities of nurses at the PHC level to the requirements of the contract with the National Health Service of Ukraine - Provide a constant analysis of the interaction of PHC with the other levels of health care and developing appropriate solutions for integrated and complex services - Ensure integration of PHC, public health and social support services - Ensure constant improvement of the skills of PHC workers in determining the needs of patients in relation to their health and identifying risk factors for diseases - Ensure effective implementation of comprehensive prevention programs, as well as healthy lifestyle programs at the PHC level - Implement national screening programs for different age groups on the

	and transformation of regional health care networks (including PHC facilities, emergency services and hospitals), starting with war-affected areas. ● Develop the provision on vulnerable population groups (including IDPs) in the context of receiving health and rehabilitation care.	- Provide funding for national prevention programs ● Bring the network of healthcare providers in line with people's needs and resources available: - Implement comprehensive plans for the recovery and transformation of regional health care networks (including PHC facilities, emergency services, and hospitals), starting with war-affected areas - Synchronise the transformation of hospital network with the optimization of PMG packages - Develop and start the implementation of the National Plan for the Transformation of the Hospital Network - Develop the concepts of university hospitals and national specialized centres for high-tech assistance (cardiac surgery, neurosurgery, transplantation, polytrauma, burn treatment) within the national network of healthcare facilities - Develop the sequence of actions for health care facilities to create the supply chains, logistics and procurement of medicines and	principles of evidence-based medicine - Provide funding for the national prevention programs ● Bring the network of healthcare providers in line with people's needs and resources available: - Complete the implementation of comprehensive plans for the recovery and transformation of regional health care networks (including PHC facilities, emergency services, and hospitals), for all oblasts - Implement the National Plan for the Transformation of the Hospital Network, including the development of university hospitals and national specialized centres for high-tech assistance (cardiac surgery, neurosurgery, transplantation, polytrauma, burn treatment) ● Expand a single healthcare space - Provide barrier-free transfer of health records between different countries in the amount necessary for the provision of health and rehabilitation care to patients and for making management decisions ● Ensure sustainability of long-term care and treatment services with annual analysis and publication of results

		medical products, including rehabilitation aids - Develop algorithms for health care facilities regarding the creation and operation of hospital laboratories - Begin the process of transformation of the outdated, fragmented and inefficient system of health care laboratories, ● Create a single healthcare space where unified rules apply. - Analyze, develop and implement solutions to eliminate barriers and discriminatory norms in the activities of various health care providers ● Provide the development of long-term care and treatment services (long-term care) ● Ensure people's access to quality and safe health services: - Develop and implement requirements for health care facilities to identify and eliminate barriers to providing health and rehabilitation care - Standardize the requirements for the minimum set of information that the health care facility must publish on its website and information on the health care facility's territory - Provide a system of informing people of the availability of health services at the	● Ensure people's access to quality and safe health services: - Ensure compliance with the requirements for the minimum set of information that the health care facility is obliged to publish on its website and information on the territory of the health care facility - Provide stable and effective information to people about the availability of health services at the national, regional and local levels with an annual assessment of its effectiveness - Ensure regular collection of research results regarding the availability of health and rehabilitation care, including financial barriers and their publication on the website of the Ministry of Health of Ukraine ● Ensure compliance with the requirements for health care facilities regarding inclusive approaches in the provision of health and rehabilitation care through appropriate standards and contracting of NHSU

		national, regional and local levels with an annual assessment of its effectiveness - Develop a user guide for the Ukrainian health care system with sequence of actions in various situations ● Apply inclusive approach when developing healthcare services, including electronic services ● Implement the national classifier 030:2022 Classifier of functioning, vital activities limitations and health	
Deadline within the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	● Continuation of the war on the territory of Ukraine ● Lack of state budget resources ● Absence of reliable sources of data and methodology for estimating the forecast amount number of population in terms of territorial communities ● Lack of consent among stakeholders	● Continuation of the war on the territory of Ukraine ● Lack of state budget resources ● Influence of corruption factors ● lack of understanding in the political environment of the need to solve problems in this way and the corresponding initiatives for decision-making ● Low capacity of executive bodies ● Lack of consent among stakeholders ● Different approaches to the planning and transformation of the network of health care facilities	● Lack of state budget resources ● Influence of corruption factors ● lack of understanding in the political environment of the need to solve problems in this way and the corresponding initiatives for decision-making ● Low capacity of executive bodies ● Lack of consent among stakeholders
Quality goal achievement indicator	● Provision of continuous health and rehabilitation care in war conditions was ensured ● Additional needs of the population in	● Provision of continuous health and rehabilitation care in the post-war period was ensured	● A constant analysis of the interaction of PHC with the other levels of health care was introduced to support decisions regarding

	connection with the war were identified and the provision of services to meet them was started ● An assessment of the damaged infrastructure in the liberated territories was carried out ● A rapid assessment of the availability of health services was carried out, with priority given to the affected areas ● Provision has been developed on vulnerable population groups (including IDPs) in the context of receiving health and rehabilitation care ● National guidelines on the restoration of health care infrastructure at the regional level have been developed	● Comprehensive plans for the recovery and transformation of regional health care networks (including PHC facilities, emergency services, and hospitals) for all regions have been implemented ● ● The role of PHC as one of the main components of the health care system has been strengthened ● Comprehensive prevention programs for the most common chronic diseases, as well as healthy lifestyle programs have been implemented at the PHC level. ● National screening programs for different age categories on the principles of evidence-based medicine were developed and implemented ● Long-term care services have been introduced ● Requirements for health care facilities regarding inclusive approaches in the provision of health and rehabilitation care through appropriate standards and contracting of NSHU have been introduced ● The international ICF classification was introduced ● Integration and regionalization of health services was ensured at the regional level ● A single healthcare space has been created ● Barrier-free transfer of health records between different healthcare providers in the amount necessary for the	integrated and complex services in health care ● Integration of PHC, public health and social support services was ensured ● At the PHC level, there are comprehensive prevention programs for the most common chronic diseases, as well as healthy lifestyle programs, which are implemented in cooperation with public health institutions and the provision of social services. ● National screening programs for different age groups on the principles of evidence-based medicine are financed from the state budget ● The development of hospital networks is based on three-year plans ● Synchronization of the transformation of the hospital network with the optimization of PMG packages has been ensured ● The stability of the data collection system for long-term care services for annual analysis and publication of results is ensured ● Fulfilment of requirements for health care facilities regarding inclusive approaches in the provision of health and rehabilitation care through appropriate standards and contracting of NHSU was ensured ● A single healthcare space with European countries has been created ● Barrier-free transfer of health records

		provision of health and rehabilitation care to patients and for making management decisions was ensured	between healthcare providers of different countries is ensured in the necessary amount for the provision of health and rehabilitation care
Connection with the other directions		Priority 2 Financing - on the reconstruction of the infrastructure - on the transformation of the health care network - on equipment -for the PMG national prevention programs: - expansion of PHC services - the optimization of PHC packages is synchronized with the transformation of the health care network	
The total amount of the need for financial resources to achieve the goal	UAH 500 million	UAH 101 billion	UAH 235 billion

Priority 4. Health services development to meet the needs of people (including IDPs, war veterans) caused by the war

2. Key issues to be solved within the framework of the Recovery Plan

Impact of the war on the defined analysis area:	
Key challenges	● The war led to significant changes in the provision of health services, their fragmentation and partial inaccessibility for patients ● Among the most common experiences that affect health are: change of residence, separation from loved ones and anxiety for their well-being, loss of a source of income and limited access to basic services ● Modern warfare causes significant civilian casualties, so the public health consequences are as important as those caused by traumatic injuries. ● The system of health services, which did not have time to reform in the pre-war period, has significant disproportions due to a shortage of some services and an excess of the others ● The structure of health services does not correspond to the epidemiological situation and the needs of the population ● A significant part of health services uses outdated technologies and does not comply with the principles of evidence-based medicine ● The results of the migration of the population and health care professionals require a review of the availability of resources and the localization of providers ● The rehabilitation system has a significant lack of organizational and human resources capacity ● Certain types of health services require additional resources in the war and post-war periods
Key possibilities	● Centralization of management and planning of the health care network at the national and regional levels ● Involvement of international expertise in the creation of new types of health services ● The possibility of international assistance for the transfer of knowledge and skills to Ukrainian healthcare workers and rehabilitation professionals ● Opportunity for Ukrainian professionals to study in clinical conditions of other countries ● Potential increase in funding for recovery from international sources
Key limitation	● The economic and social crisis caused by the full-scale war of the Russian Federation against Ukraine ● Unpredictable timing of the end of the war ● Lack of carriers of clinical skills and conditions for training a significant number of healthcare workers and rehabilitation professionals ● The need to continue the development of most rehabilitation professions under martial law ● Lack of qualified staff to restore/create health services in certain areas

- **Goals, tasks, stages of the Recovery Plan within the direction «Health services development to meet the needs of people (including IDPs, war veterans) caused by the war»**

2.1. Goals aimed at resolving identified problems:

	Stage 1: June 2022 – end of 2022	**Stage 2: January 2023 – December 2025**	**Stage 3: January 2026 – December 2032**
1. Identified problem to be resolved in the relevant analysis area Ukraine suffered significant destruction of the health care infrastructure during the military aggression. However, in addition to the changes caused by the war, the health care delivery system suffers from unsolved problems that existed before the war and continue to have a negative impact on the situation. Particular attention should be paid to healthcare services that were not being historically developed in Ukraine or did not comply with modern approaches to their provision. Protection of mental health in the conditions of war and post-war times requires extraordinary decisions and large-scale measures in a very short time. The same			

applies to rehabilitation services. There is absolutely no reserve of time for the development of such types of health care as traumatology, intensive care, reconstructive surgery, treatment of burns and others related to the mass trauma of people during the war, and the development of specialized rehabilitation for spinal traumas, amputations, burns, etc. These services are needed now.			
Goal to be achieved to solve the issue during each stage **1. Ensuring the development of rehabilitation care and its integration into all levels of health and rehabilitation care**	● Develop a multi-level integrated model of rehabilitation care provision and its financial support ● Develop a concept and create specialized rehabilitation departments / facilities for patients with complex needs ● Develop, within the framework of the PMG, additional packages of rehabilitation services to ensure the provision of assistance for health conditions that arise during the war ● Synchronize the development of the network of rehabilitation care providers with the system of hospital districts - Conduct an audit of the needs of IDPs and servicemen in rehabilitation care, taking into account the demographic and infrastructural changes that have occurred/may occur due to active hostilities. ● Ensure the functioning of multidisciplinary rehabilitation teams in each health care facility that provides inpatient rehabilitation care	● Implement a multi-level integrated model of providing rehabilitation care and its financial support (rehabilitation aids for patients; PHC packages; standards) ● Create specialized rehabilitation departments for patients with complex needs; implement a system of analysis and reporting of their activities - Remove sanatorium-resort treatment and unsubstantiated rehabilitation from Ukrainian legislation and budget programs, replacing it with rehabilitation care within the framework of PMG ● Synchronize the network of rehabilitation care providers with the system of hospital districts; implementing a system of analysis and reporting of their activities ● Integrate the provision of rehabilitation care into the PHC system; implement a system of analysis and reporting of their activities ● Ensure the functioning of multidisciplinary rehabilitation teams as the basis for the provision of rehabilitation services in each health care facility that provides inpatient rehabilitation care; implement a system of	● Ensuring the sustainable functioning of the multi-level integrated system of providing rehabilitation care and its financial support ● Ensuring the sustainable functioning of the system of specialized rehabilitation departments, analysis and reporting of their activities ● Ensuring the sustainable functioning of the network of rehabilitation care providers, which is synchronized with the system of hospital districts, analysis and reporting of their activities ● Integrating the provision of rehabilitation care into the PHC system - PMG packages, analysis and reporting system ● Ensuring the sustainable functioning of multidisciplinary rehabilitation teams in all health care facilities that provide rehabilitation care

		analysis and reporting of their activities ● Assess the needs for rehabilitation aids when providing rehabilitation services ● Provide funding for the provision of rehabilitation aids, in particular prostheses when providing rehabilitation assistance	
Deadline within the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	● Continuation of the war on the territory of Ukraine ● Lack of state budget resources ● Lack of rehabilitation professionals ● Insufficient professional level of existing rehabilitation professionals	● Continuation of the war on the territory of Ukraine ● Lack of state budget resources ● Lack of consent among stakeholders ● Lack of rehabilitation professionals ● Insufficient professional level of existing rehabilitation professionals	● Lack of state budget resources ● Lack of consent among stakeholders
Quality goal achievement indicator	● A multi-level integrated model of providing rehabilitation care and its financial support has been developed, including mechanisms for providing patients with rehabilitation aids ● A concept was developed and at least 3 specialized rehabilitation departments for patients with complex needs were created ● Each hospital district has an inpatient post-acute and long-term rehabilitation department in at least one cluster hospital ● ● Each health care facility that provides inpatient rehabilitation care has a functioning multidisciplinary rehabilitation team	● A multi-level integrated model of providing rehabilitation care and its financial support was introduced, including mechanisms for providing patients with rehabilitation aids ● Specialized rehabilitation departments for patients with complex needs were created with a clear system of their analysis and reporting ● Each cluster hospital in each hospital district has an inpatient post-acute and long-term rehabilitation department with a clear system of their analysis and reporting ● Each health care facility that provides	● The sustainable functioning of the multi-level integrated system of rehabilitation care delivery and its financial support is ensured, including mechanisms for providing patients with rehabilitation aids

		inpatient rehabilitation care has a functioning multidisciplinary rehabilitation team ● Rehabilitation care is integrated into the PMG system	
The total amount of the need for financial resources to achieve the goal	-	UAH 2 billion	UAH 900 million
Connection of the goal with other directions		Priority 2 Financing - For the equipment	
The goal to be achieved to solve the problem at each stage **2. Ensuring the development of mental health services that are close to the person and the community, and are also planned taking into account the needs of the community, in particular during the war and the recovery period**	● Integrate mental health services into PHC using evidence-based tools (such as mhGAP) ● Develop a package of mental health services at the PHC level and provide training of PHC professionals, regulate the prescription of psychotropic medications, data entry in eHealth according to ICPC-2 together with international partners ● Ensure the provision of mental health services at the PHC level ● Create a PMG package of outpatient psychiatric care and stimulate its implementation in multiprofile healthcare facilities ● Ensure the further development of the PMG package "Psychiatric care provided by mobile multidisciplinary teams" as a key structural unit of the psychiatric care system, as well as the expansion of the range of services due to the inclusion of post-traumatic stress disorder	● Develop a model for the integration of mental health services at all levels of the health care system (update the concept; develop, implement the concept action plan; develop the regulatory acts; services in the community; IT for mental health; standards, service packages) ● Develop a package of mental health services at the PHC level (review existing packages; develop universal screenings; approve a mental health package for PHC; contract for it) ● Ensure the provision of mental health services at the PHC level; implement a system of analysis and reporting of their activities ● Create psychiatric departments at the level of cluster hospitals; implement a system of analysis and reporting of their activities	● Continue the implementation of the plan of actions for the realization of the Concept of Mental Health Care Development in Ukraine for the period until 2030 ● Ensure sustainable provision of mental health services at the PHC level ● Ensure sustainable functioning of psychiatric departments at the level of cluster hospitals, analysis and reporting of their activities

	• Improve the living conditions in inpatient psychiatric care facilities, as well as simultaneously create the competitive conditions for general health care facilities by submitting and implementing a package of inpatient psychiatric care in multiprofile facilities. • together with the Ministry of Social Policy of Ukraine and with the support of international partners, carry out piloting and implementation of transitional services (e.g. supported living), which are an alternative to psycho-neurological orphanages and provide assistance in a way that respects human rights and dignity		
Deadline within the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	• Continuation of the war on the territory of Ukraine • Lack of state budget resources • Lack of consent among stakeholders	• Continuation of the war on the territory of Ukraine • Lack of state budget resources • Influence of corruption factors • lack of understanding in the political environment of the need to develop mental health care services and the corresponding decision-making initiatives • Low capacity of executive bodies • Lack of consent among stakeholders	• Lack of state budget resources • Influence of corruption factors • lack of understanding in the political environment of the need to develop mental health care services and the corresponding decision-making initiatives • Low capacity of executive bodies • Lack of consent among stakeholders
Quality goal achievement indicator	• The Concept of Mental Health Care Development in Ukraine for the period up to 2030 has been updated, taking into	• The plan of actions for the realization of the Concept of Mental Health Care Development in Ukraine for the period	• The plan of actions for the realization of the Concept of Mental Health Care Development in Ukraine for the period

	account the consequences of the war ● The scope of services was approved and a package of mental health services was developed at the PHC level	2024-2026 has been implemented. ● The package of mental health services at the PHC level based on the results of the previous implementation was revised ● Provision of mental health services at the PHC level is ensured ● Psychiatric departments have been created at the level of cluster hospitals	2026-2030 has been implemented. ● The package of mental health services at the PHC level based on the results of the previous implementation was revised ● Provision of mental health services at the PHC level is ensured ● Psychiatric departments have been created at the level of cluster hospitals
The total amount of the need for financial resources to achieve the goal		UAH 1,5 billion	
Connection of the goal with other directions		Priority 2 Financing - for equipment - expansion of PHC services	
Goal to be achieved to solve the issue during each stage **3. Ensuring the development of traumatological, orthopedic, burn and intensive care services**	● Develop the concept of regionalization and organize the provision of traumatological and orthopedic services within the hospital cluster ● Develop the concept of regionalization and create a national network of burn centres ● Develop the concept of regionalization and create a national network of reconstructive surgery centres ● Develop the concept of regionalization and organize the provision of intensive care services by levels within the hospital cluster	● Implement the concept of regionalization and organize the provision of traumatological and orthopedic services within the hospital cluster; implement a system of analysis and reporting of their activity ● Implement the concept of regionalization and create a national network of burn centers; implement a system of analysis and report of their activity ● Implement the concept of regionalization and create a national network of reconstructive surgery centers; implement a system of analysis and reporting of their activity ● Implement the concept of regionalization and	● Ensure sustainable functioning of traumatological and orthopedic departments at the level of cluster hospitals, system of analysis and reporting ● Ensure the sustainable functioning of burn centers, the system of analysis and reporting of their activity ● Ensure sustainable functioning of reconstructive surgery centers, the system of analysis and reporting of their activity ● Ensure sustainable functioning of intensive care units by levels within the hospital cluster, the system of analysis and reporting of their activity

		organize the provision of intensive care services by levels within the hospital cluster; implement a system of analysis and reporting of their activity	
Deadline within the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	• Continuation of the war on the territory of Ukraine • Lack of state budget resources • Lack of consent among stakeholders	• Continuation of the war on the territory of Ukraine • Lack of state budget resources • Lack of consent among stakeholders	• Lack of state budget resources • Lack of consent among stakeholders
Quality goal achievement indicator	• The concept of regionalization of trauma and orthopedic services within the hospital cluster was developed • The concept of regionalization of burn centers has been developed • The concept of regionalization of reconstructive surgery centers was developed • The concept of regionalization of intensive care services by levels within the hospital cluster has been developed	• The provision of traumatological and orthopedic services is organized according to the level of their complexity within the hospital cluster with a clear system of their analysis and reporting • A national network of burn centers with a clear system of their analysis and reporting has been created • The provision of intensive care services by levels within the hospital cluster is organized with a clear system of their analysis and reporting	• Sustainable functioning of traumatological and orthopedic departments at the level of cluster hospitals, analysis and reporting system is ensured • The sustainable functioning of burn centers, the system of analysis and reporting of their activity is ensured • Sustainable functioning of reconstructive surgery centers, analysis and reporting system is ensured • Sustainable functioning of intensive care units by levels within the hospital cluster, the analysis and reporting system is ensured
The total amount of the need for financial resources to achieve the goal	-	UAH 731 million	
Connection of the goal with other directions		Priority 2 Financing - for equipment - expansion of PMG services	Priority 2 Financing - for equipment - expansion of PMG services
Goal to be achieved to solve the issue during each stage **4. Developing health services in accordance**	• Determine the range of special needs of veterans and improve PMG packages to take into account the needs	• Improve the PMG packages to take into account the veteran's needs (screening system; primary provision of	

with the needs of war veterans and persons affected by hostilities	of veterans and war victims	rehabilitation aids; updated packages) ● Provide veterans with the full scope of necessary rehabilitation care ● Ensure the provision of rehabilitation care that comply with the evidence-based principles ● Ensure the presence of a veteran's route in the integrated system of rehabilitation care ● Reorganize networks of health care facilities in order to ensure the veteran's route in the rehabilitation system ● Ensure the provision of rehabilitation services to the veteran based on the bio-psychosocial model of needs, and not on the basis of the disability status within the framework of the integrated route of the veteran in the rehabilitation system ● Develop a veteran-oriented system of providing rehabilitation aids ● Provide a mechanism for interaction and involvement of the employment sector and the social sector	
Deadline within the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	● Continuation of the war on the territory of Ukraine ● Lack of state budget resources	● Continuation of the war on the territory of Ukraine ● Lack of state budget resources ● Influence of corruption factors ● Lack of understanding in the political environment of the need to develop health services for veterans and relevant	

		decision-making initiatives	
Quality goal achievement indicator	● PMG packages take into account the needs of veterans	● PMG packages take into account the needs of veterans ● ● Veterans receive a full range of rehabilitation services	
The total amount of the need for financial resources to achieve the goal	State budget funds	UAH 2,9 billion	-
Connection of the goal with other directions		Priority 2 Financing - for equipment - expansion of PMG services	

Priority 5. Consolidation and strengthening of human resources of the healthcare system

3. 1. Key issues to be solved within the framework of the Recovery Plan

Impact of the war on the defined analysis area:	
Key challenges	● The training curricula are outdated and irrelevant, which leads to a lack of practical skills, clinical thinking and change management in future healthcare workers. ● The uneven distribution of human resources in health care was exacerbated by the migration of healthcare workers during the war to the western regions and abroad ● Lack of staff planning mechanisms at the level of the facility and the region, which makes it impossible to understand the necessary quantity of specialists to provide a certain scope of services, which is aggravated by the lack of data on the real amount of the population that needs services in the most affected areas during the war ● Lack of an effective system of motivation for local authorities to attract healthcare workers and rehabilitation professionals to the most affected areas during the war ● Absence/limitation of a transparent/fair system of recruitment, support and career development of healthcare workers within the health care facility ● Limited powers of nurses in providing health services ● Absence/limited mechanisms for involving non-healthcare workers (social workers) in the provision of health care services ● Absence/limited critical skills of health workers to provide services in trauma care, rehabilitation care, mental health, and facility management during wartime and postwar period
Key possibilities	● Modern approaches to hospital planning determine the need and requirements for staffing of healthcare facilities ● Availability of a tool for planning the workforce based on activity (activity-based planning), which was tested in the field of public health ● High motivation of ordinary workers to change/reform the health care system ● Involvement of international experts in the restoration of the health care system ● Competition between facilities for the patient ● Motivation of healthcare workers and rehabilitation professionals to develop in the modern context ● Broad opportunities to study using online formats ● Awareness of heads of facilities that money is not the only motivation to work among healthcare workers
Key limitations	● Ongoing full-scale military aggression of the Russian Federation against Ukraine ● Limited funding caused by the economic crisis caused by the war ● Corruption in the education system in health care ● The outflow of human resources from the regions that suffered the greatest destruction

2. Goals, tasks, stages of the Recovery Plan within the direction "Consolidation and strengthening of human resources of the healthcare system"

2.1. Goals aimed at resolving identified problems:

	Stage 1: June 2022 – end of 2022	**Stage 2: January 2023 – December 2025**	**Stage 3: January 2026 – December 2032**
1. Identified problem to be resolved in the relevant analysis area The system of staff training in the field of health care has a number of problems. Currently, there is no network of strong medical universities. The training curricula are outdated and irrelevant, and the lack of modern and potent university clinics and simulation centers leads to insufficient practical skills of future medical healthcare workers. The COVID-19 pandemic has revealed a shortage of human resources in the field of public health, particularly epidemiologists. The uneven distribution, exacerbated by the war, is aggrevated by the lack of staff planning mechanisms at the facility and regional level, which makes it impossible to determine the required quantity of			

specialists to provide a certain scope of services. Even before the war, the fragmented social protection of health care workers did not contribute to their general well-being, which directly affected the level of work in providing health and rehabilitation care to the population and ensuring public health functions. The procedure for passing continuous professional development (CPD) by rehabilitation professionals has not been implemented. During the war and in the post-war period, when a large part of the infrastructure in Ukraine is destroyed, and access to doctors and rehabilitation specialists is significantly complicated, the role of nurses becomes especially important. The modern health care system indicates the expediency of shifting the boundary between the professions of doctor and nurse in the direction of giving nurses greater powers, expanding their clinical and managerial functionality. The involvement of social workers in the health care system becomes especially relevant during the war and the post-war period. The absence of social workers in the staff of healthcare facilities indicates that the functions that they could perform are currently performed by nurses, and some of the functions related to care fall on the shoulders of relatives or are not performed at all. Modern training programs for primary care specialists in the management of PTSD and other mental health disorders associated with the consequences of military operations should be introduced into the curricula of educational institutions. In addition, the growing role of the physician demands to expand his knowledge and skills on various issues. Special attention should be given to the acquisition of new clinical skills by doctors with a special emphasis on the treatment of physical injuries in war victims (eg techniques in reconstructive surgery), and therefore appropriate training programs should be initiated and operated to meet the demand. At all stages, the implementation of measures to strengthen human resources should be aimed at achieving the key characteristics of human resources of the health care system: availability, acceptability and quality.			
Goal to be achieved to solve the issue during each stage **1. Integration of healthcare sector education and research into the current international context.**	● Develop and strengthen the critical skills of health workers during the war and in the post-war period, namely: - Provide extensive mental health training for family doctors and primary care nurses - Provide extensive training in clinical and organizational issues of trauma treatment and rehabilitation ● Stimulate the evolution of new forms of CPD for all healthcare professionals, which are consistent with the priorities of the healthcare system, namely: - Ensure the organizational development of the CPD Agency: develop an organizational structure, detail functionality of key roles, develop basic business processes - Update/create a legal framework for modern postgraduate education of nurses	● Align the curricula of higher education institutions in the field of knowledge “22 Healthcare” with the European requirements and regularly review them: - Conduct a comprehensive assessment of the organizational, financial and personnel capacity and infrastructural capacity of the higher education institutions (HEI) in the field of knowledge "22 Health Care". - Develop and approve a road map for creating an effective network of capable HEIs in the field of knowledge "22 Health Care" - Develop and approve a roadmap of activities to bring educational standards in the field of knowledge "22 Health Care" into line with the	● Comply with the special licensing requirements for of higher education institutions that prepare students in the field of knowledge "22 Healthcare", namely: - Ensure monitoring of the quality of the educational activities of higher education institutions that train specialists in the field of knowledge "22 Health Care" ● Provide conditions for acquiring practical skills of healthcare workers on the basis of modern university hospitals and simulation centers ● Improve the independent evaluation system for the quality of student training in the field of knowledge "22 Health care", namely: - Provide the analysis and revision of the database of test tasks of all components of the unified state qualification exam and

		European requirements - Ensure the development of modern educational programs for the training of doctors for obtaining secondary specialization - Develop a concept for the evolution of education for nurses, which will take into account the differentiation of roles and functionality of nurses and include requirements for the content, structure, level of the institution where practical training should take place, etc. - Develop requirements for creating a student-oriented environment in higher healthcare education institutions - Develop an effective mechanism for reducing corruption risks in the educational process (admission, training, distribution) ● Introduce special licensing requirements for higher education institutions in the field of knowledge “22 Healthcare”. - Define at the legislative level the concept of healthcare and pharmaceutical education as a type of specialized education and the powers of the	their updating on an ongoing basis - Implement a unified international exam for applicants in the field of knowledge "22 Health care" ● Implement a modern model of residency based on international experience, namely: - Develop and implementing the unified state qualification exam for residency graduates ● Plan pertinent scientific topics (areas) in accordance with the state’s needs in the field of healthcare, ensure a sufficient level of their financing and implementation of achievements on the basis of modern university clinics, namely: - Support the work of scientific and practical centers (science parks) for the implementation of priority directions for the development of science in the field of health care

		executive body, which forms and implements policy in the field of health care - Ensure monitoring of the quality of the educational activities of higher education institutions that train specialists in the field of knowledge "22 Health Care" - Provide conditions for the acquisition of practical skills of healthcare workers and rehabilitation professionals on the basis of modern university hospitals and simulation centers - Develop provisions on the institution that has the status of "University hospital" with the definition of criteria and obligations of health care facility and HEI. - Develop an algorithm for creating a university hospital and transparent procedures for assigning and suspending the status of "University Hospital" - Develop a transparent mechanism for the management of university hospitals and ensure openness of data on the activities of university hospitals - Create university hospitals on the basis of the most potent healthcare facilities in	

		cooperation with leading HEI - Developing requirements for simulation centers for teaching practical skills of students of higher education institutions - Equip the simulation centers with the modern simulation equipment - Improve the independent evaluation system for the quality of student training in the field of knowledge “22 Healthcare”. - Provide analysis and revision of the database of test tasks of all components of the unified state qualification exam and their updating on an ongoing basis - Revise «STEP-3» and bring it into line with the sample internship training programs - Introduce a unified international exam for applicants in the field of knowledge "22 Health care" - Implement a modern model of residency based on international experience - Develop and approve the "Regulations on Residency" taking into account the best global practices - Determine licensing requirements for institutions that will train resident doctors	

		- Determine the list of specialties of resident doctors - Develop the samples of training programs at the residency - Stimulate the development of quality education of managers in the field of health care - Review training programs for managers with health and non-healthcare education according to the best European practices - Train the existing management teams and supervisory boards of the healthcare facilities in the skills of financial and strategic management of the institution - Stimulate the development of new forms of CPD for all healthcare professionals, which are consistent with the priorities of the healthcare system - Ensure the organizational development of the CPD Agency: involvement of the professional community in the creation and development of expert councils at the CPD Agency - Develop and implement the procedure for passing CPD by rehabilitation professionals	

		- Develop and implement the procedure for passing CPD by nurses, pharmacists and pharmacist assistants - Plan pertinent scientific topics (areas) in accordance with the state's needs in the field of healthcare - Create scientific and practical centers (science parks) to implement priority areas of science development in the field of health care - Develop and strengthen the critical skills of healthcare workers and rehabilitation professionals in the post-war period - Create training centers for the development of clinical skills of doctors and nurses on the basis of potent healthcare facilities - Provide extensive training of family doctors and nurses of primary health care institutions in accordance with the requirements of the Procedure for the provision of primary health care - Provide extensive training in clinical and organizational issues of trauma treatment and rehabilitation - Provide free access to the world's best online learning platforms for healthcare	

		professionals, professionals with higher non-healthcare education who work in the field of health care and rehabilitation professionals - Provide the state-ordered training of professionals in the following specialties: Epidemiology, laboratory diagnostics, microbiology and virology	
Deadline within the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	● Limited funding; ● Lack of understanding in the political environment of the need for the development of health care education and science; ● Continuation of the war on the territory of Ukraine ● Lack of consent among stakeholders	● Limited funding; ● Lack of understanding in the political environment of the need for the development of health care education and science; ● Lack of consent among stakeholders	● Limited funding; ● Lack of understanding in the political environment of the need for the development of health care education and science; ● Lack of consent among stakeholders
Quality goal achievement indicator	● Family doctors, nurses of primary healthcare institutions have the knowledge and skills to provide mental health care ● Healthcare workers gained knowledge and skills in matters of organization of care and treatment of trauma and rehabilitation ● The organizational structure, functionality of key roles and basic business processes of the CPD Agency have been developed ● A regulatory and legal framework has been	● Curricula of higher education institutions in the field of knowledge "22 Healthcare" are brought in line with the European requirements ● Modern educational programs for the training of doctors for obtaining secondary specialization are developed ● A student-oriented environment has been created in higher healthcare education institutions ● Developed mechanisms for reducing corruption	● Monitoring of the quality of the educational activities of higher education institutions that train specialists in the field of knowledge "22 Health Care" is ensured ● University hospitals, created on the basis of the most potent health care facilities in cooperation with the leading HEI, are flagships in the provision of health services ● A unified international exam

	created for the introduction of modern postgraduate education of nurses	risks in the educational process (admission, training, distribution) minimize the occurrence of corruption in the higher healthcare education institutions ● There are special licensing requirements for the higher education institutions that train students in the field of knowledge "22 Healthcare" ● Monitoring of the quality of the educational activity of higher education institutions that train specialists in the field of knowledge "22 Health Care" is ensured on the basis of the created center/agency for monitoring the quality of educational activity of higher education institutions that train specialists in the field of knowledge "22 Health Care" ● Modern university hospitals have been established and are operating ● A unified international exam for applicants in the field of knowledge "22 Health Care" has been introduced ● A modern residency model has been implemented, taking into account international experience ● Expert councils at the CPD Agency were created to analyze the work of CPD providers ● The CPD system of rehabilitation	for applicants in the field of knowledge "22 Health Care" has been introduced ● A unified state qualification exam was introduced for residency graduates

		specialists has been introduced ● CPD systems have been introduced for nurses/doctors, pharmacists and pharmacist assistants ● Scientific and practical centers (science parks) have been organized to implement the priority areas of science development in the field of health care ● Training/simulation centers have been created for the development of clinical skills of doctors and nurses on the basis of powerful healthcare facilities ● Healthcare workers and specialists with higher non-healthcare education who work in the field of healthcare have received free access to the world's best online educational platforms	
The total amount of the need for financial resources to achieve the goal		UAH 6,09 billion	UAH 14,210 billion
Connection of the goal with other directions	All human resources development tasks are closely related to all priorities, in particular, such as ensuring the financial stability of the health care system and the restoration and transformation of the network of health care facilities	Priority 2 Financing - on equipment for simulation centers All human resources development tasks are closely related to all priorities, in particular, such as ensuring the financial stability of the health care system and the restoration and transformation of the network of health care facilities	All human resources development tasks are closely related to all priorities, in particular, such as ensuring the financial stability of the health care system and the restoration and transformation of the network of health care facilities
Goal to be achieved to solve the issue during each stage **2. The scope and structure of healthcare system HR**	● Introduce healthcare system HR planning in line with the needs to	● Introduce healthcare system HR planning in line with the needs to	● Support and develop a flexible system of incentives and rewards at both

planning meeting the existing needs	ensure the delivery of quality services, namely: - Develop approaches to HR planning based on optimal workload and taking into account the level of the facility ● Develop and implement a flexible system of incentives and rewards at both the national and local levels to attract and retain health care workers in areas that are understaffed in order to provide health and rehabilitation care and in areas that have suffered the most during the war, namely: - Develop the mechanisms for motivating healthcare workers at the national and local levels to work in the regions most affected by the war	ensure the delivery of quality services, namely: - Ensure planning of health care human resources at the regional level based on the hospital plan ● Develop and implement a flexible system of incentives and rewards at both the national and local levels to attract and retain health care workers in areas that are understaffed in order to provide health and rehabilitation care and in areas that have suffered the most during the war, namely: - Implement local programs to motivate healthcare workers to work in the regions most affected by the war - Provide effective mechanisms for the fulfilment of the obligations of HEI graduates who studied under the state (regional) order and concluded agreements to work for at least three years in rural areas or urban-type settlements ● Ensure access to health services by involving non-healthcare workers and expanding the role of the nurse: - Develop a policy framework regarding the autonomization	national and local levels to attract and retain health care workers in areas that are understaffed in order to provide health and rehabilitation care

		(expansion of powers and functional responsibilities) of the nurse's role in the health care system. - Determine the differentiation of the roles of the nurse and provide the corresponding functionality in health care facilities ● Develop a policy framework regarding the inclusion of a social worker in the healthcare services delivery - Review the models of services delivery by a social worker in the health care system - Develop a model of financing of services delivery by a social worker in the health care system - Develop and implement appropriate training for the inclusion of a social worker as a member of a multidisciplinary team in the provision of services in the health care system ● Create a transparent and clear admission system for foreign doctors and rehabilitation professionals to conduct training and provide health and rehabilitation care on the territory of Ukraine - Simplify the procedure for granting permission to foreign specialists to practice in Ukraine	
Deadline within the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	● Limited funding; ● Lack of understanding in the	● Limited funding; ● Lack of understanding in	● Limited funding; ● Lack of understanding in the

	political environment of the need for the changes in approaches to health care staff training ● Continuation of the war on the territory of Ukraine	the political environment of the need for the changes in approaches to health care staff training	political environment of the need for the changes in approaches to health care staff training
Quality goal achievement indicator	● Approaches to HR planning have been developed based on the optimal workload and taking into account the level of the facility ● Mechanisms have been developed to motivate health care workers at the national and local levels to work in the regions most affected by the war	● Planning of health care human resources which is based on the approaches of optimal workload and take into account the level of the facility is implemented in healthcare facilities ● Programs have been introduced at the national and local levels to motivate healthcare workers and rehabilitation professionals to work in the most affected regions and regions that are in need of healthcare workers and rehabilitation professionals ● A system of differentiation of nurse roles was introduced ● Social workers are involved in the services delivery in the health care system ● A transparent system of admission of foreign doctors and rehabilitation professionals to conduct training and provide health and rehabilitation care on the territory of Ukraine has been created	● Health care facilities are provided with properly trained staff
The total amount of the need for financial resources to achieve the goal	Requires calculation	Requires calculation	Requires calculation

Connection of the goal with other directions	All human resources development tasks are closely related to all priorities, in particular, such as ensuring the financial stability of the health care system and the restoration and transformation of the network of health care facilities	All human resources development tasks are closely related to all priorities, in particular, such as ensuring the financial stability of the health care system and the restoration and transformation of the network of health care facilities	All human resources development tasks are closely related to all priorities, in particular, such as ensuring the financial stability of the health care system and the restoration and transformation of the network of health care facilities
Goal to be achieved to solve the issue during each stage **3. Creating conditions to ensure the professional well-being of healthcare workers**	● Ensure decent pay and develop a flexible system of motivation and support for healthcare system human resources	● Ensure decent pay and develop a flexible system of motivation and support for healthcare system human resources, including through the introduction of key performance indicators and optimum workload, namely: - Develop fair mechanisms for financial motivation of healthcare workers and rehabilitation professionals and professionals with higher non-healthcare education who work in the field of healthcare - Develop the quality indicators of work of doctors, rehabilitation professionals, nurses and professionals with higher non-healthcare education who work in the field of health care, with further introduction of a transparent system of financial motivation - Introduce a transparent system of non-financial motivation of health care workers	● Support and develop a comprehensive approach to the formation of the professional well-being of the healthcare system human resources at the level of health care facilities (safety, social and living conditions, burnout prevention, professional development in the facility, etc.), namely: - Provide support for ongoing professional burnout prevention programs in health care facilities ● Introduce professional liability insurance for healthcare workers

		● Introduce transparent and competitive procedures for attracting and retaining medical, managerial and other staff at the level of healthcare facilities, as well as for their career development and professional growth: - Develop modern approaches to the organization of the HR system in health care facilities - Organize training for employees of HR departments and managers of health care facilities on the implementation of new approaches to the involvement and development of health care workers ● Introduce a comprehensive approach to the development of professional well-being of HCS HR at the level of healthcare facilities (safety, social conditions, burnout prevention, professional development in the facility, etc.) - Determine legislatively the obligation of the owner of the healthcare facility to create safe and comfortable working conditions - Introduce permanent programs for the professional	

		burnout prevention in health care facilities ● Introduce professional liability insurance for healthcare workers - Develop financial approaches and legal framework for providing professional liability insurance for healthcare workers	
Deadline within the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	● Limited funding; ● Lack of understanding in the political environment of the need to ensure the professional well-being of healthcare workers ● Continuation of the war on the territory of Ukraine	● Limited funding; ● Lack of understanding in the political environment of the need to ensure the professional well-being of healthcare workers	● Limited funding; ● Lack of understanding in the political environment of the need to ensure the professional well-being of healthcare workers
Quality goal achievement indicator	Healthcare workers receive a guaranteed salary	● There are fair financial motivation mechanisms for healthcare workers, rehabilitation professionals and professionals with higher non-healthcare education working in the field of health care. ● Performance indicators of doctors, rehabilitation professionals, nurses and professionals with higher non-healthcare education working in the field of health care have been introduced ● A transparent system of non-financial employee	● Health care facilities have comprehensive programs to ensure professional well-being

		motivation has been introduced in health care facilities ● Transparent and competitive procedures for attracting, retaining, career development and professional growth of health care workers, managerial and other staff have been introduced in health care facilities ● Health care facilities have implemented measures to ensure the safety, social conditions and professional development of healthcare workers and to prevent professional burnout ● Professional liability insurance for healthcare workers has been introduced	
Connection of the goal with other directions	All human resources development tasks are closely related to all priorities, in particular, such as ensuring the financial stability of the health care system and the restoration and transformation of the network of health care facilities	All human resources development tasks are closely related to all priorities, in particular, such as ensuring the financial stability of the health care system and the restoration and transformation of the network of health care facilities	All human resources development tasks are closely related to all priorities, in particular, such as ensuring the financial stability of the health care system and the restoration and transformation of the network of health care facilities

Priority 6. Strengthening of the public health system and preparedness for health emergencies

1. Key issues to be solved within the framework of the Recovery Plan

Impact of the war on the defined analysis area:	
Key challenges	● Imperfectness of the system of preparedness and response to emergency situations in public health ● Inadequacy of epidemiological surveillance system, in particular in forecasting the individual outbreaks and epidemics ● Low rates of vaccination coverage, increasing resistance to antimicrobial drugs, risks of outbreaks of infectious diseases ● Environmental pollution, lack of access to safe drinking water and food, hygiene and sanitation related to hostilities. ● High risks of chemical and radiation-nuclear threats.
Key possibilities	● Involvement of international expertise in rebuilding/building a qualitatively new public health system. ● Improvement of the legal framework and procedures. Maximum harmonization of the legislative framework with the EU regulations. ● Increasing coordination and cross-sectoral cooperation during martial law. ● Implementation of the best global practices in the transformation of the system. ● Rapid development of the public health system in response to the growing need for an effective health emergency response system.
Key limitations	● Ongoing military aggression of the Russian Federation against Ukraine; ● Unfinished reform of the public health system in Ukraine; ● Shortage of qualified human resources for the effective functioning of the public health system; ● Fragmentation of the public health system of Ukraine and the EU countries and the duplication of individual public health services by various institutions without ensuring proper coordination; ● The need to build/modernize the infrastructure of the public health system in accordance with modern standards, approaches and practices; ● Economic and social crisis caused by hostilities.

The full-scale invasion Russian Federation in Ukraine has aggrevated gaps in the health care system and created new challenges that require rapid response and solutions.

The challenges of strategic planning and emergency response are compounded by a lack of knowledge and information related to threats and challenges to human health. The war also aggravated the problems of public health surveillance and monitoring of environmental factors.

2. Goals, tasks, stages of the Recovery Plan within the direction "Strengthening of the public health system and preparedness for health emergencies"

2.1. Goals aimed at resolving identified problems:

	Stage 1: June 2022 - end of 2022	**Stage 2: January 2023 - December 2025**	**Stage 3: January 2026 - December 2032**
1. Identified problem to be resolved in the relevant analysis area. Ukraine's public health system has undergone a number of significant and substantial reforms. The State Sanitary and Epidemiological Service (SES) has been dissolved and its functions have been distributed among different institutions and other bodies ensuring the function of state supervision (control) in the respective areas of activity. The National Public Health Concept approved by the Cabinet of Ministers of Ukraine in 2017 outlined the strategic directions for the transformation of the public health system at all levels. Gradual progress has been reported in the transformation of the system and integration of parallel public health systems under the supervision of the Public Health Centre (PHC). However, some problems remain unresolved, in particular, the organization of the public health system at oblast and local levels. In addition, the comprehensive transformation of the public health system was not supported by significant amendments to the legislation, and the Law on Public Health has not yet been adopted, creating legal barriers to the implementation of the reform. Moreover, the spheres of biological safety, biological protection, chemical and radiation safety require legislative regulation. The response of the system to the			

COVID-19 pandemic has somewhat improved the consolidation of management and updated the functionality of the position of the state sanitary doctor and the establishment of coordination mechanisms in the network of public health institutions. The start of a full-scale war also revealed gaps in the surveillance system, the work of the network of health laboratories, the readiness of the system to detect and respond to biological, chemical and radiation threats, including those related to their insufficient funding in recent years.			
Goal to be achieved to solve the issue during each stage 1. **Ensuring the functioning of a capable public health system aimed at preserving and promoting public health, disease prevention and timely detection of and response to health challenges, creating a coordination mechanism in the public health system**	● Develop regulations and create coordination mechanisms of management in the public health system at the national and regional levels, defining the roles and responsibilities of representatives of non-healthcare sectors, local authorities and the non-governmental sector. ● Adopt in the second reading and as a whole the Draft Law on the Public Health System (No. 4142) ● Ensure the development of a new strategy for the development of immunoprophylaxis and a plan for its implementation. - Determine a clear division of roles and responsibilities between authorized institutions in the field of health and safety in the regulatory and legal field - Draft and approve a road map for the development of a network of regional disease control and prevention centers ● Start implementation of enhanced (syndromic) epidemiological surveillance in places where a large number of people,	● Develop the regulatory acts in accordance with the list based on the results of the audit conducted in the previous period. - Adopt the Law of Ukraine on overcoming tuberculosis in Ukraine - Adopt the Law of Ukraine on biological safety and biological protection - Ensure the functioning and implement monitoring of the activity of the coordination mechanism in the public health system at the national and regional levels - Enable the involvement of employees of non-governmental organizations without healthcare education to perform certain activities and functions in the public health system with the definition of the mechanisms of their involvement and quality assessment standards - Ensure the operation and due organizational, financial and human resource capacities of the Public Health Center at the national level as the main expert institution in	● . Continue the implementation of measures to strengthen the potential and practical skills of workers in the field of public health (national, regional levels) in accordance with the national plan. - Conduct a periodic assessment of the organizational, financial, and human resource capacity of the oblast disease control and prevention centers to perform the key operational functions in the field of public health in order to adjust measures for the formation of the functional sustainability of the centers - Support adequate resource provision of public health institutions at the national and regional level, in particular public health system laboratories ● Ensure the functioning of an efficient system for the surveillance of public health status and indicators and the monitoring of risk factors affecting them by strengthening cross-sectoral cooperation under “One Health” framework and integrating public health and primary healthcare services using big data technologies. ● Promote the production of diagnostic kits by national institutes, their further purchase/use after validation and approval

	in particular IDPs, stay; ● Ensure the planning and implementation of public health programs to meet the challenges of wartime: ● Address food insecurity by introducing a nutrition assistance program, including nutritional supplements and mixtures for infants; ● Expand the network of service providers for mental health, behavioral health problems related to anxiety by training non-traditional providers and providing care in non-traditional settings (schools, churches, NGOs, community health workers); ● Conduct an assessment of the level of vaccination of children throughout the country; ● Assess the damage to vaccine storage infrastructure at the regional level; ● Conduct a communication campaign among the population in order to ensure the population's access to reliable information about vaccination; ● Ensure proper funding of public health programmes, allocation of	the public health sector - Conduct an assessment of the organizational, financial and human resource capacities of the Public Health Center (baseline assessment in the first half of 2023, follow-up assessment in 2025); - Develop and approve a road map for strengthening the capacity of the Public Health Center; - Start implementation of road map measures to strengthen the capacity of the Public Health Center; - Prepare terms of reference and project estimates for updating the infrastructural facilities of the Public Health Center of the Ministry of Health of Ukraine, including equipment for the BSL-4(3) level public health laboratory, the genomic center and the national reference laboratory in accordance with the modern international standards and requirements. (Reconstruction work is expected to begin in 2024) - Develop and approve a national comprehensive plan for strengthening the staff potential and practical skills of employees in the field of health and safety	

	financial resources according to identified priorities for each area and monitoring the use of budget(s) in accordance with the established performance indicators.	and start the implementation of such measures; - Create a National Training Center for the public health system on the basis of the Public Health Centre; - Implement measures to improve the supply system, logistics, and procurement procedures (equipment, medical products, materials, personal protective equipment) for the public health system throughout the country, including implementing the development of 3-year procurement plans for the public health system. - Ensure the updating of an effective vaccine storage and transportation system ("cold chain"). - Provide stock management of vaccine residue managing at the national level (setting up a system for online monitoring of residue and vaccine logistics in live time mode). - Resource the network of disease control and prevention centres in accordance with the system's needs to perform the essential public health operational functions: - Develop a mechanism for periodic assessment of the organizational,	

		financial, and human resources capacity of the Disease Control and Prevention Centres (DCPC); - Approve the road map for the development of the network of the Disease Control and Prevention Centers and start implementation of the measures; - Start the implementation of measures to strengthen the potential and practical skills of the employees of the Disease Control and Prevention Centers in accordance with the national plan. - Create public health laboratories of BSL-3 level (biosafety level) and 1st chemical safety level for the national 24/7 response network (Kharkiv, Odesa, Lviv, Kyiv) at Public Health Centre and 3 regional Disease Control and Prevention Centers, including the development of a concept, project estimates, construction and full equipment of centers according to the standards and requirements of laboratories of this level and biosafety and biosecurity standards. - Create public health laboratories BSL-2 (biosafety level) and 2nd level of chemical safety in all Disease Control and Prevention	

		Centres as part of the national network of public health laboratories, including the development of the concept, project estimates, construction and full equipment according to the standards and requirements of the laboratories of such level and standards of biosafety and biosecurity. - Create an immunization module. ● Ensure the functioning of an efficient system for the surveillance of public health status and indicators and the monitoring of risk factors affecting them by strengthening cross-sectoral cooperation under “One Health” framework and integrating public health and primary healthcare services using big data technologies Create the list of priority communicable diseases and especially dangerous communicable diseases for the purposes of epidemiological surveillance. - Ensure the availability of qualified specialists for the development and improvement of the capacity of the surveillance system, including for NCDs and	

		the laboratory network. - Strengthen the capacity of the system to detect communicable diseases, in particular, tuberculosis, viral hepatitis and HIV, with a particular focus on the territories that were temporarily occupied and most affected by the aggression of the Russian Federation - Strengthen surveillance system for healthcare-associated infections, including antimicrobial resistance. - . Train epidemiologists and other specialists of the Disease Control and Prevention Center in modern epidemiological approaches, including on issues of conducting epidemiologic surveillance for NCDs. - Implement the use of analytical epidemiology and statistical analysis methods for surveillance purposes on a routine basis, as well as the use of epidemiological data to forecast reagent needs and the load on the laboratory network. - Identify the laboratories of the health care system and the veterinary service for the detection of particularly dangerous	

		communicable diseases both among people and among animals according to the "One Health" principle. ● Create a laboratory network that meets biosafety and biosecurity standards in accordance with WHO Laboratory Biosafety Manual, 4th edition. ● Strengthen the capacity of the laboratory network to identify, verify and report public health threats and hazards in a timely manner - Define functions and tasks for each level of laboratories, including clinical ones. - Determine the redirection system for test samples, in particular, the cases that require redirection, the level of the laboratory for redirection. - Develop procedures for the internal quality management system of public health laboratories, ensuring compliance with metrological requirements. - Develop standard operating procedures for laboratories. - Ensure the participation of laboratories in external quality assessment. - Ensure the accreditation of	

		laboratories, in particular, in accordance with the ISO17025 standard. - From 2024, provide for regular maintenance of equipment, in particular, through the creation of an appropriate division or by purchasing services. - Review, update, develop, ensure regulatory and reagent provision of laboratory algorithms for case confirmation of surveillance diseases and infections of concern - Establish requirements for diagnostic capabilities (list of necessary laboratory tests, etc.) in the system of public health laboratories at each level, in accordance with the list of diseases subject to supervision - . Evaluate the existing laboratory system, develop a recovery and development plan, including a plan for the recovery (improvement) of the infrastructure, provision of human resources and necessary equipment - Ensure reporting of laboratory data on disease cases to European surveillance systems (TESSY, EUCAST, etc.) - Provide the Disease Control and Prevention	

		Center with the mobile laboratories, on a wheeled base with increased cross-country ability, with appropriate laboratory equipment for conducting express research for the purpose of prompt response to hazards of biological, chemical and physical (radiation) nature. - Implement the right of the Public Health Centre to access to the existing databases of in other spheres without personal data of individuals and taking into account the confidentiality of information, in particular in the areas of ecology, veterinary medicine, justice, crop production, water resources and others - Legislatively ensure the exchange of data and research results, conduction of joint research, access to the necessary infrastructure for conducting research between the Public Health Centre, the Disease Control and Prevention, scientific institutions, non-governmental organizations conducting research in the field of public health, health care facilities and individual researchers. - When planning the research, ensure the use of modern	

		laboratory research methods and their comparability with international practices. ● Ensure the planning and implementation of public health programmes to be developed on the basis of evidence concerning the health status of the population and the burden of diseases focused the determinants of health ● Determine priorities in the field of public health based on a regional analysis of the causes of morbidity, disability and mortality, taking into account the state-wide (national) strategic goals of promoting the health of the population.	
Deadline within the stage	June 2022 - December 2022	January 2023 - December 2025	January 2026 - December 2032
Risks related to the goal achievement	● Continuation of the war on the territory of Ukraine ● Lack of state budget resources ● Lack of consent among stakeholders	● Continuation of the war on the territory of Ukraine ● Lack of state budget resources ● Lack of consent among stakeholders	● Lack of state budget resources ● Lack of consent among stakeholders
Quality goal achievement indicator	● An audit of the regulatory framework was conducted ● The Draft Law on the Public Health System (No. 4142) was adopted in the second reading and as a whole ● A road map for the development of a network of regional disease control and prevention centers has been developed	● Normative and legal regulation on disease prevention and control in accordance with EU acts is ensured ● The functioning and due organizational, financial, and human resources capacity of the Public Health Centre is ensured at the national level ● The network of oblast disease control and prevention centres effectively perform the key operational functions of public	● Centers for disease control and prevention throughout the country are provided with resources, including for the needs of laboratories ● Epidemiological surveillance for infectious and non-infectious diseases has been improved and strengthened ● A laboratory network that meets WHO biosafety and biosecurity standards is provided

		health at the regional level and is provided with the necessary resources ● The functioning of an effective system for epidemiologic surveillance of public health status and indicators is ensured and risk factors affecting them are monitored ● The capacity of the laboratory network to identify, verify and report public health threats and hazards in a timely manner has been strengthened ● Planning, financing and implementation of public health programs are ensured	
The total amount of the need for financial resources to achieve the goal	Requires calculations	UAH 5.0 billion	UAH 800 million
Connection of the goal with other directions	The goal is related to the implementation of the Human Development Strategy for 2021-2023		
1. Identified problem to be resolved in the relevant analysis area The war aggravated the problems with the ability to cover a significant number of the population with vaccination and exacerbated the challenges associated with the incidence of tuberculosis, HIV, viral hepatitis, resistance to antimicrobial drugs, and outbreaks of communicable diseases. The hostilities resulted in damage to both public health facilities (centers and laboratories) and the destruction of critical infrastructure facilities, such as damage to centralized water supply and sewerage. In some areas, due to unbearable living conditions, a catastrophic lack of drinking water and food, chaotic burials within settlements, lack of access to hygiene and sanitation, the risk of individual outbreaks and epidemics of communicable diseases, including particularly dangerous diseases (for example, cholera) has increased. Prolonged stay in bomb shelters, shelters with unsatisfactory nutrition, physical activity, hygienic procedures, lack of anti-epidemic measures, on the one hand, and environmental pollution, on the other hand, will lead to delayed public health problems related to non-communicable diseases. Therefore, in the Recovery Plan, it is important to concentrate efforts on restoring safe conditions and environment for human activities, as well as to implement measures to minimize the impact of hostilities and other risk factors on the health and well-being of Ukrainians.			
Goal to be achieved to solve the issue during each stage **2. Creating safe living conditions and living environment contributing to the preservation and promotion of health**	● Undertake actions to address the key risk factors for combating non-communicable diseases and promoting mental health and well-being during wartime ● Create conditions for food systems that	● Use a comprehensive multisector approach integrated with primary healthcare in addressing the issues associated with the to risk factors for health at different stages of	● Implement comprehensive measures targeting the environmental determinants of health, including climate change, in order to create a safe, healthy environment for human activities. ● Undertake actions to address the key risk factors for high burden of diseases, including by

	promote equal access to safe, healthy and sustainable food throughout the life cycle ● Implement measures to assess and reduce environmental hazards to life and health of the population.	human lifecycle to promote health equity ● Develop mechanisms for implementing the "Health in all policies"principle into the process of state policy forming and the development/approval of regulatory acts ● Take comprehensive measures to promote the increase of the level of responsibility of people regarding their own health and the right to make clinical decisions ● Implement comprehensive measures targeting the environmental determinants of health, including climate change ● Strengthen the health care system readiness for emergency events related to climate change (extreme temperatures, other climate changes not typical for the territory of Ukraine). ● Strengthen and improve the surveillance system for communicable diseases whose outbreaks may be associated with extreme temperatures. ● Improve the monitoring of water quality in open water, the development of notification system of the population about its quality. ● Improve atmospheric air quality monitoring systems and develop a system for early notification of the population, including measures to reduce the impact on health.	strengthening the introduction of best practices (“best-buys”) to combat non-communicable diseases. ● Create conditions for food systems that promote equal access to safe, healthy and sustainable food throughout the life cycle.

		● Develop proposals for revising building regulations and requirements for urban planning documentation to take into account climate change during planning and construction ● Ensure the implementation of measures to address key risk factors that cause a high burden of disease. ● Improve the legislation regarding the complete prohibition of advertising and other types of promotion of the sale of tobacco products and alcoholic beverages. ●Conduct an information campaign among the population regarding the importance of increasing physical activity. ● Create conditions for food systems that promote equal access to safe, healthy and environmentally friendly food throughout life: ● Promote breastfeeding ● Harmonize Ukrainian legislation with the EU legislation in the field of sanitary and phytosanitary standards, food safety. ●Develop and adopt amendments to the regulatory acts regarding the labeling of food products (in particular, regarding the content of sugar, added sugar, transfats and saturated fats, cholesterol).	

		● Continue the implementation of the principles of healthy nutrition in educational institutions. ● Implement measures to reduce the problem of iodine deficiency among the population, reduce the use of salt by the population of Ukraine. ● Ensure the spread of favorable inclusiveness, safety, sustainability and environmental sustainability of cities and other settlements.	
Deadline within the stage	June 2022 - December 2022	January 2023 - December 2025	January 2026 - December 2032
Risks related to the goal achievement	● Insufficient funding ● Lack of necessary expertise ● Lack of understanding in the political environment of the need to create safe conditions and environment for human activity.	● Continuation of hostilities ● Insufficient funding ● Lack of necessary expertise ● Lack of understanding in the political environment of the need to create safe conditions and environment for human activity.	● Insufficient funding ● Lack of necessary expertise ● Lack of understanding in the political environment of the need to create safe conditions and environment for human activity.
Quality goal achievement indicator	● An assessment of the environmental danger to the life and health of the population was carried out and a plan of measures to reduce such a threat was developed.	● Comprehensive multisector approach integrated with primary healthcare in addressing the issues associated with the social determinants of health is applied ● Comprehensive measures aimed at environmental determinants of health have been implemented ● Increased excise duties on tobacco products, expanded taxation of alcoholic products, introduced an excise tax on sugar-sweetened beverages.	● Residents of Ukraine have access to safe living conditions and environments that contribute to preserving and strengthening health and increasing the average life expectancy of Ukrainians.
The total amount of the need for financial resources to achieve the goal	Requires calculation.	Requires calculation.	Requires calculation.

<table>
<tr><td>Connection of the goal with other directions</td><td colspan="3">The goal is directly related to the implementation of the Strategy for Human Development for 2021-2023, the Strategy for Environmental Security and Adaptation to Climate Change for the period up to 2030.</td></tr>
<tr><td colspan="4">1. Identified problem to be resolved in the relevant analysis area:
The imperfection of the system of preparedness and response to emergency situations in public health has become one of the critical challenges of the public health system of Ukraine in the conditions of martial law. The lack of a system for preventing the occurrence, early detection and effective response to emergency situations and the practice of developing and implementing emergency preparedness and response plans in the field of public health at the national, regional and health care facility levels creates potential risks for the lives and health of Ukrainians. In order to proactively respond to biological, chemical and radiation threats and overcome the consequences of such threats, Ukraine needs to create a qualitatively new functional system of preparedness for and response to emergency situations in the field of public health.</td></tr>
<tr><td>Goal to be achieved to solve the issue during each stage
3. Ensuring public health protection through prevention, early detection and effective response to emergencies</td><td>● Establish a coordination cross-sectoral platform with the involvement of all stakeholders in the field of the "One Health" initiative as an advisory body on health issues in emergency situations
● Ensuring the availability and efficient functioning of the key elements of an emergency preparedness and response system in line with International Health Regulations for wartime needs:
● Implement a human resource development strategy that includes the selection, motivation, and staff training to support the public health emergency preparedness and response system;</td><td>● Develop and approve a national plan, regional plans, and plans at the level of health care faccility on preparedness for emergency situations in the field of public health, define the roles and responsibilities of authorized bodies, including the Public Health Center and regional disease control and prevention centers;
● Improve the electronic integrated system of monitoring and routine surveillance of all communicable diseases at all levels, ensuring coordinated analysis of epidemiological surveillance data and laboratory data.
● Create an operational information mechanism for early warning of risks and emergency situations in the field of public health
● Create an operational center for emergency situations in the field of public health, synchronized with national and international (WHO,</td><td>● Ensure effective functioning of key elements of the emergency preparedness and response system in accordance with the International Health Regulations:
- Ensure the implementation of measures to introduce the strategy for the prevention of diseases with pandemic/epidemic potential and implement measures to reduce the risk of the appearance of pathogens with a high degree of danger
● Ensure the functioning of a mechanism for activating rapid funding and actions to prevent and mitigate the consequences of emergencies
● Provide efficient and high-quality crisis communication, taking into account behavioural research data, including non-targeted alerts of citizens or their groups on public health events.
● Ensure the functioning of information and analytical tools for forecasting and modelling the development of emergencies.</td></tr>
</table>

		EU) warning and response systems; ● Conduct simulation training for public health and health care workers on the early warning system. ● Ensure the availability and effective functioning of key elements of the emergency preparedness and response system in accordance with the International Health Regulations (continued): - Take into account the needs of people from risk groups, as well as communities, in emergency response plans and ensure their participation in the development of such plans; - Improve regional and national reporting systems on key indicators of preparedness and response to ensure prioritization of funding and technical assistance. ● Implement strategies for the prevention of diseases with pandemic/epidemic potential and introducing measures to reduce the risk of emergence of highly dangerous pathogens: ● Create an early warning system about emergencies in the field of public health and safety to launch a rapid response; ● Develop and implement clear safety protocols for exposure to animal-borne infections;	

		● Ensure the functioning of a mechanism for activating rapid funding and actions to prevent and mitigate the consequences of emergencies: ● Improve the procedure for the formation and use of state funds in the direction of responding to emergency situations in the field of public health; ● Provide effective and high-quality crisis communication, taking into account the data of behavioral studies, including untargeted alerts of citizens or their groups regarding events in the field of public health: ● Develop GESI (Gender Equality and Social Inclusion) language to warn of the threat of sexual or exploitative violence in times of crisis. ● Appoint and conduct training of officials of the Disease Control and Prevention Center, departments of healthcare, healthcare facilities on issues of public relations, informing the public during emergency situations in the field of health and safety. ● Conduct educational activities, social communication activities, and ensure cross-sector partnerships to improve health awareness and risk communication with an emphasis on public awareness of	

		emergency preparedness issues. ● Create information and analytical tools for forecasting and modelling the development of emergencies ● Strengthen the capacity of specialists in the public health system regarding modeling and forecasting; ● Improve prognostic and other models regarding the development of extraordinary events or situations in the field of public health.	
Deadline within the stage	June 2022 - December 2022	January 2023 - December 2025	January 2026 - December 2032
Risks related to the goal achievement	● Insufficient funding ● Lack of necessary expertise ● Lack of understanding in the political environment of the need for an effective response to emergencies	● Continuation of hostilities ● Insufficient funding ● Lack of necessary expertise ● Lack of understanding in the political environment of the need for an effective response to emergencies.	● Insufficient funding ● Lack of necessary expertise ● Lack of understanding in the political environment of the need for an effective response to emergencies.
Quality goal achievement indicator	● A coordination cross-sectoral platform was created with the involvement of all stakeholders in the field of the "One Health" initiative ● A strategy for the development of human resources (selection, motivation, staff training) was implemented to support the system of preparedness and response to emergencies in the field of public health ● regular forums for healthcare workers to share practices on emergency response	● An operational information mechanism for early warning of risks and emergencies in the field of public health was created ● Availability and effective functioning of key elements of the emergency preparedness and response system in accordance with International Regulations is ensured. ● Strategies for the prevention of priority diseases with pandemic/epidemic potential have been implemented and	● An effective public health protection system has been created through prevention, early detection and effective response to emergencies.

	and crisis management has been established.	measures to reduce the risk of pathogens with a high degree of danger have been implemented ● A systematic review, analysis, and assessment of the system's ability to prepare for and respond to emergencies and the potential of natural disaster risk management were conducted ● Effective and high-quality crisis communication is provided, in particular, regarding events in the field of health and safety ● Information and analytical tools for forecasting and modeling the development of emergencies have been created.	
The total amount of the need for financial resources to achieve the goal	UAH 100 million	UAH 2.5 billion	UAH 440 million
Connection of the goal with other directions	The goal is related to the implementation of the Biosafety and Biological Protection Strategy, put into effect by the Decree of the President of Ukraine No. 668 of 12/17/2021 and the actions of the National Security and Defence Council of Ukraine.	Priority 2 Financing -to create a coordination center -on equipment	Priority 2 Financing - to create an operational center - on equipment

1.1.4 Identified problem to be resolved in the relevant analysis area:

Ensuring the development of the national blood system based on voluntary free donation of blood and blood components in accordance with the European safety and quality standards by creating a single centralized, cost-effective blood system under the management and coordination of the Ministry of Health of Ukraine, which guarantees the self-sufficiency of the state in blood components in peacetime and wartime. Formation and implementation of an informational component in the field of blood donation and blood components.

Goal to be achieved to solve the issue during each stage	● Create the National Transfusion Center as a specialized state institution in the sphere of management of	● Create and ensure the functioning of the National Transfusion Committee within the National Transfusion Center	● To ensure an increase in the volume of collection of donated blood and blood components due to an increase

4. Ensuring the functioning of the national blood system to guarantee equal and timely access of patients to safe and high-quality components of donor blood in sufficient quantities by the state	the Ministry of Health of Ukraine, after the issuance of the Decree of the President of Ukraine on the termination of the legal regime of martial law, in order to ensure effective management of blood system entities and coordination of blood system activities ● Unify approaches to calculating the cost of donated blood and blood components with the aim of transitioning to the reimbursement of the cost of blood components within the PMG, as well as forming the purchase price of plasma for fractionation ● Introduce a unified mechanism for the sale of donated blood and blood components between the participants of the blood system ● Provide legal regulation of the issue of reimbursement of the cost of donor blood components within the PMG ● Approve the procedure and conditions for the contract production of blood products from plasma for fractionation, produced by business entities producing blood products on the territory of Ukraine, with the return of blood products produced to the order of blood system entities of state and communal forms of ownership, with the definition prices, as well as the order of contract production of blood products ● Develop and submit to the Cabinet of Ministers of Ukraine a draft resolution on the functioning of the Information Space of the Blood System ● Develop, implement and ensure the functioning of at least two modules of the Blood System Information Space to ensure the	● Introduce the European standards of safety and quality of donor blood and its components in accordance with regulatory standards in the EU ● Introduce regulation through mandatory and separate licensing based on the requirements of the European Blood Institution Inspection (EuBIS). ● Strengthen the functional capacity and increase the economic efficiency of blood system entities by standardizing and streamlining the main technological processes, planning activities and performing tasks for self-sufficiency of the state with donor blood and blood components under the coordination of the National Transfusion Center. ● Ensure the functioning of the blood system at the hospital level in order to provide blood component transfusion services ● Establish surveillance procedures to collect and evaluate information on serious adverse events and serious adverse reactions in both blood and blood component donors and recipients. ● Establish a procedure for investigating serious adverse events and serious adverse reactions ● Develop, implement and ensure the functioning of all modules of the Information Space of the blood system for the proper functioning of the blood system.	in the number of donors by implementing an effective communication campaign and a system of encouraging voluntary free blood and blood component donors ● Continue the implementation of measures for the development of blood donation and blood components with the aim of self-sufficiency of the state with sufficient amounts of donor blood and blood components ● Conduct a periodic assessment of the organizational, financial and staff capacity of the national blood system in order to improve public administration measures.

	functioning of the blood system.		
Deadline within the stage	June 2022 - December 2022	January 2023 - December 2025	January 2026 - December 2032
Risks related to the goal achievement	● Continuation of hostilities ● Destruction of existing infrastructure ● Insufficient funding	● Continuation of hostilities ● Destruction of existing infrastructure ● Insufficient funding	● Continuation of hostilities ● Destruction of existing infrastructure ● Insufficient funding
Quality goal achievement indicator	● The National Transfusion Center was created as a specialized state institution in the sphere of management of the Ministry of Health of Ukraine, after the issuance of the Decree of the President of Ukraine on the termination of the legal regime of martial law, with the aim of ensuring effective management of subjects of the blood system and coordination of activities of the blood system ● Issues of donor blood value and blood components are settled in order to proceed to reimbursement the value of blood components within the PMG, as well as purchase prices of plasma for fractionation based on reference pricing ●A single mechanism for donor blood and blood components realization between blood entities, as well as in health care facilities providing transfusion services has been introduced ● The procedure and conditions of contractual production of blood preparations from plasma for fractionation in accordance with the requirements of the legislation have been approved, as well as the price of contract fractionation is determined ● Project Resolutions on the functioning of the information space of the blood system has been developed and submitted to	● The activities of the National Transfusion Center are ensured ● European standards of safety and quality of donor blood and blood components have been introduced in accordance with regulation in the EU ● Regulation was introduced through mandatory and separate licensing based on the requirements of the European Blood Institution Inspection (EuBIS) ● The coordination activity of the National Transfusion Center has been ensured to strengthen the implementation of tasks for self-sufficiency of the state with donor blood and blood components. ● Hospital blood banks, transfusion immunology laboratories, hospital transfusion committees in health care facilities that provide transfusion services of blood components have been established ● Hemomonitoring procedures and the appropriate procedure for investigating adverse reactions and cases of both blood and blood component donors and recipients have been introduced ● Support for the functioning of all modules of the Blood System Information Space to ensure the functioning of the blood system has been developed, implemented and provided	● An effective blood system coordinated by the National Transfusion Center at the national level has been created, which functions on the principles of: voluntary free donation of blood and blood components; self-sufficiency of the state's need for sufficient amounts of donor blood and blood components; economic efficiency; state guarantee of equal and timely access of patients to safe and high-quality components of donor blood in sufficient quantity ● The annual rate of voluntary free blood donors is at least 95% of the total number ● The annual rate of procurement of canned donor blood is no less than 15,000 doses ● Annual indicator of the ratio of the number of doses of stored canned blood to the number of full-time personnel of the entity in the amount of at least 100 per individual ● The annual rate of write-off of erythrocyte blood components (doses) after the expiration date is no more than 5% ● The percentage of unfulfilled applications of health care institutions that provide transfusion services by subjects of the blood system is no more than 15%.

	the Cabinet of Ministers of Ukraine ● At least two modules of the information space of the blood system have been developed, implemented and maintained.		
The total amount of the need for financial resources to achieve the goal	Requires calculations	UAH 30 million	Requires calculations
Connection of the goal with other directions	The planning of measures and their implementation is closely related to the results of the implementation of the plan of measures of the National Blood System Development Strategy until 2022. https://zakon.rada.gov.ua/laws/show/120-2019-%D1%80#n115		

Priority 7. Developing the electronic healthcare and strengthening of cybersecurity

1. Key issues to be solved within the framework of the Recovery Plan

Impact of the war on the defined analysis area:	
Key challenges	● The development of electronic healthcare gave rise to an increase in the number of information and communication systems and registers, volume of data and, consequentially, the number of attacks at them; ● the risks of losing or compromising personal and healthcare data of the patients are rising; ● the war continues resulting in aggressive actions against critical information infrastructure; ● the attackers use advanced methods and multiple ways of cyberattacks, ransomware cyberattacks and attacks via IT service providers has become the most common methods; ● internally displaced persons and Ukrainians, who have been forced to move abroad, have no access to the data of their electronic medical histories, which content must meet international standards and legal requirements at the new place of residence; ● in cases where medical staff members have been displaced or changed their workplaces, communication between a family doctor and patients becomes complicated and requires their remote interaction or a patient must choose a new family doctor and remotely issue a new declaration; ● due to remote interaction between patients and doctors, the number of telemedicine consultations is expected to increase, and the scope of medical services, in addition to traditional ones, will include increased demand for rehabilitation services and mental health services. It is important for healthcare institutions to receive feedback from their patients about the quality of medical services provided. ● the rapid development of donation of blood and blood components and the national blood system operation demand the use of new specialized electronic tools; ● Healthcare institutions require maximum efficient management of medicines and medical devices stock using an electronic record-keeping system; ● there is a large number of existing electronic registers and databases in healthcare sector, and in order to use them efficiently, optimization is required.
Key possibilities	● The use of information and communication systems in healthcare sector has become an integral part of healthcare reform, which has significantly changed the principles of providing and financing medical care in Ukraine. Russia's full-scale invasion has posed new challenges related to the need to improve cyberdefense of information and communication systems and to develop an electronic healthcare system in general. ● Improvement and extension of the functions of the electronic healthcare system and other healthcare information and communication systems using the widespread international standards and classifications will enable the implementation of the priority areas of state healthcare policy. ● Improving and expanding the functionality of electronic healthcare system and other healthcare information and communication systems using modern artificial intelligence technologies, telemedicine and other innovative solutions will allow ensuring the quality and accessibility of healthcare, as well as the transparency and efficiency of management decisions based on received data. ● Analysis of existing forms of medical and statistic documents in the healthcare sector and a gradual transition from paper-based medical records to structured electronic medical records will improve the quality of data collection and ensure their receipt in real-time mode to effectively respond to current changes in the healthcare sector, as well as reduce the burden on healthcare workers.

	● Improving the analytical capabilities of healthcare institutions and implementing innovative solutions will contribute to further development of data use. ● Implementing electronic patient account and ensuring patients' access to their personal data and other functional capacities of the electronic healthcare system. ● Strengthening the social and economic connections between the EU and Ukraine and the intensive migration of the population will result in the necessity of the integration with the global healthcare information space with cross-border interoperability of the Ukrainian electronic healthcare system and electronic healthcare systems of other countries of Europe and the world. ● The widespread introduction of telemedicine services in healthcare facilities will improve the availability of healthcare services in remote areas.
Key limitations	● Insufficient level of computerization, ensuring high-speed Internet connection, digital competence of medical staff, as well as coverage by electronic medical information systems of healthcare service providers, in particular private ones. ● Healthcare consumers also have limited digital competence, under-informed about healthcare issues and the use of healthcare data. ● The use of electronic healthcare system and other information and communication systems data is limited in the healthcare sector of Ukraine, and the decision-making system based on the data obtained is not widely used. ● Special risks associated with processing of personal and sensitive patient's data and compliance with national legislation on the protection of personal data should be taken into account. ● The continuation of a full-scale war results in limitations imposed on project implementations throughout Ukraine. ● Human resources are limited, some cybersecurity specialists are involved in ensuring national defence; ● Due to the martial law and the condition of the national economy, there are certain limitations on budget financing of the projects and support for the existence and development of information and communication systems, their cyberdefense.

2. Goals, tasks and stages of the Recovery Plan within the direction "Developing the electronic healthcare and strengthening of cybersecurity"

2.1. Goals aimed at resolving the identified problems:

	Stage 1: June 2022 – end of 2022	**Stage 2: January 2023 – December 2025**	**Stage 3: January 2026 – December 2032**
Identified problem to be resolved in the relevant analysis area The main problems that need to be solved today are: insufficient efficiency of electronic healthcare system, which, in particular, is characterized by: - doctors' lack timely and standardized patients' information, which leads to duplication of consultations, laboratory tests, other medical services at various levels of medical care provision and to spending resources in an inefficient manner; - the use by healthcare professionals and healthcare institutions of inefficient tools related to maintenance of lots of paper-based medical documentation forms and collection of statistic data that needs to be reviewed and evaluated in terms of its impact on health care system's operational performance; extensive form of keeping medical records and insufficient information about the patient's health. Information about the patient's health is fragmented: primary health records are stored by various healthcare service providers, mainly in a paper-based form, which leads to administrative burden on healthcare workers and time-consuming processes; lack of the information about the patient's health outside the relevant healthcare facility, high probability of its loss, low capacities for monitoring, controlling and managing healthcare services quality;			

limited accessibility of medical services. The regions of Ukraine differ by their coverage by the network of healthcare institutions, a lack of qualified medical personnel, a disproportionate territorial distribution of medical professionals (concentration in cities, insufficient human resources in rural areas), resulting in the demand for healthcare via means of remote communication. Collection and formation of medical statistics are disconnected from each other in the process, there is no reliable validation and verification of primary data used to generate statistical reporting. Underdeveloped national healthcare IT infrastructure, in particular staff capacities and level of digital competence of healthcare workers, as well as insufficient computerisation of healthcare facilities.			
Goal to be achieved to solve the issue during each stage **1. Developing a single medical information space featuring national and cross-border interoperability and end-to-end processes and services**	● Ensuring integration of the e-health system with the key public registers	● Conducting a thorough analysis and preparing a visualised model of the structure of the medical card in the electronic healthcare system taking into account important standards and requirements (HL7, FHIR, CDA) in the sector and current regulatory requirements, and implementing the medical card ● Developing, implementing and maintaining interoperability and data exchange between the key information and communication systems and healthcare registers	● Harmonisation of national standards with common global standards and classifications, introduction of internationally recognised and wide-spread standards in Ukraine for the further integration with the global information space ● Ensuring the interoperability of the Ukrainian electronic healthcare system with the electronic healthcare systems of other countries of Europe and the world
Deadline within the stage	June 2022 – December 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities; lack of initiative from other countries of Europe and the world
Quality goal achievement indicator	● Integration of the e-health system with the SFS (PFU) Workplace Register, Personal Taxpayer Number Register of the State Tax Service, the Unified State Demographic Register and the State Register of Civil Status Acts in ensured	● A comprehensive analysis is conducted and a visualised model of the structure of the medical card in the electronic healthcare system is prepared, taking into account important standards and requirements (HL7, FHIR, CDA) in the sector and current regulatory requirements, and the medical card is implemented ● Development, implementation,	● National standards are harmonised with common global standards and classifications, the recognised and wide-spread standards are implemented in Ukraine. ● Technical conditions are created and interoperability of the Ukrainian electronic healthcare system with the electronic healthcare systems of at least 10 countries of Europe and the world is ensured in accordance with the

		interoperability and data exchange between electronic healthcare system and electronic integrated infectious diseases surveillance system (EIDSS), SSD information system, blood information system, the state single transplantation information system, MedData information and analytical system and eStock electronic system for the management of stocks of medicines and medical devices are ensured	established standards and data exchange protocols, particularly the FHIR international standard
Total funding requirement for the goal achievement	≈UAH 60 million	≈ UAH 600 million	≈UAH 400 million
Links between the goal and other directions	Public Health and Digitalization	Public Health and Digitalization	Public Health and Digitalization
Goal to be achieved to solve the issue during each stage **2. Providing infrastructural and technical conditions for the provision of quality medical services using information and communication systems at all the levels**	● Development of key requirements to the technical infrastructure of healthcare providers and informatisation of healthcare facilities	● Ensuring development of the national healthcare informatisation infrastructure that includes proper computerisation conditions, and ensuring access to fast internet for healthcare providers. ● Extending the functional capacities of the electronic healthcare system and other healthcare information and communication systems for ensuring quality and accessibility of medical services ● Ensuring the accessibility of electronic healthcare services for users/patients with visual, hearing musculoskeletal, speech and intellectual development impairments, as well as patients with various combinations of impairments	● Full-fledged implementation of telemedicine and intelligent clinical decision making support systems, big data processing systems and artificial intelligence technologies
Deadline within the stage	June 2022 – December 2022	January 2023 – December 2025	January 2026 – December 2032

Risks related to the goal achievement	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities
Quality goal achievement indicator	● Key requirements to the technical infrastructure of healthcare providers and informatisation of healthcare facilities are developed	● 80% of healthcare providers meet the indicators for the implementation of modern national healthcare informatisation infrastructure. ● The functional capacities of the electronic healthcare system and other healthcare information and communication systems are extended, more than 30 new electronic services are introduced for ensuring quality and accessibility of medical services. ● Requirements on ensuring adherence to the DSTU ISO/IEC 40500:2015 "Information technologies. Guidelines on the accessibility of web-content W3C (WCAG) 2.0" standard are included in the terms of reference for the development of electronic healthcare software	● Telemedicine and intelligent clinical decision making support systems, big data processing systems and artificial intelligence technologies are implemented at all levels.
Total funding requirement for the goal achievement	≈ UAH 1 million	≈UAH 2.5 billion	≈UAH 700 million
Links between the goal and other directions	Public Health and Digitalization	Public Health and Digitalization	Public Health and Digitalization
Goal to be achieved to solve the issue during each stage **3. Transition to paperless records and ensuring electronic mechanisms for data collection and quality control, visualisation and analysis of public**	● Developing and starting implementation of the healthcare digitalization roadmap	● Replacing the data model and enabling transition from paper-based medical and statistical documents to structured electronic medical records ● Introduction of healthcare data collection mechanisms through information and communication systems,	● Creating a data science centre and developing IT innovations using the advantages of big data processing and intelligent systems for forecasting healthcare needs

data in the healthcare sector		including private healthcare providers, as well as control of their quality ● Re-organization of the methodology of healthcare statistical analysis formulation	
Deadline within the stage	June 2022 – December 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities
Quality goal achievement indicator	● The healthcare digitalization roadmap is developed and its implementation is started	● The data model is replaced and the transition from paper-based medical and statistical documents to structured electronic medical records is ensured. ● Healthcare data collection systems are introduced through information and communication systems, including private healthcare providers, as well as control of their quality. ● The re-organization of the methodology of healthcare statistical analysis formulation is performed	● A centre for statistical and research analysis of medical data and necessary technical infrastructure ensuring data processing was established, in particular for the following purposes: - receiving aggregated population data for decision-making while developing healthcare policies; providing access to depersonalised data for scientific and research purposes; - using the results of the analysis in the sphere of clinical research, biobanking, etc. ● Development of IT innovations and use of the advantages of big data processing and intelligent systems for forecasting healthcare needs and resource planning is ensured
Total funding requirement for the goal achievement	≈ UAH 20 million	≈ UAH 400 million	≈UAH 300 million
Links between the goal and other directions	Public Health and Digitalization	Public Health and Digitalization	Public Health and Digitalization
Goal to be achieved to solve the issue during each stage **4. Creating friendly and transparent mechanisms for user access to the**	● Introduction of the first phase of the patient account (displaying and signing declarations with family doctors by the patients)	● Ensuring patients' access to their personal data and other functional capacities of the electronic healthcare system through the electronic patient account	

comprehensive data on their health and management of this information			
Deadline within the stage	June 2022 – December 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities	
Quality goal achievement indicator	The first stage of the patient account has been introduced (displaying and signing declarations with family doctors by the patients)	Patients' access to their personal data and other functional capacities of the electronic healthcare system through the electronic patient account is ensured	
Total funding requirement for the goal achievement	≈ UAH 30 million	≈ UAH 100 million	
Links between the goal and other directions	Public Health and Digitalization	Public Health and Digitalization	
Goal to be achieved to solve the issue during each stage **5. Ensuring cybersecurity and information protection**	● Development of the healthcare cybersecurity concept; beginning of creation of the sectoral Cybersecurity centre for the coordination, analysis and development of healthcare cybersecurity policy, as well as for the response to cyberthreats	● Full implementation of the healthcare cybersecurity concept at different levels and the sectoral Cybersecurity Centre ● Ensuring the cybersecurity, monitoring, protection and analysis of potential interferences, losses and damages of healthcare information and communication systems and registers	● creating a system for management and maintenance of the largest health information and communication systems and registers using distributed registers (blockchain) technology, which will significantly increase their resilience
Deadline within the stage	June 2022 – December 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities
Quality goal achievement indicator	● The concept is developed and a sectoral Cybersecurity centre for the coordination, analysis and development of healthcare cybersecurity policy, as well as responding to cyberthreats, is created	● The healthcare cybersecurity concept is implemented in full at different levels as well as the sectoral Cybersecurity Centre. ● The cybersecurity, monitoring, protection and analysis of potential interferences, losses and damages of healthcare	● A system for management and maintenance of the largest health information and communication systems and registers using distributed registers (blockchain) technology to significantly increase their resilience is created

		information and communication systems and registers are ensured, namely: - sectoral cyberthreat response centres (Security operation centres) and sectoral healthcare CIRT groups are created - SIEM (Security information and event management) systems for monitoring and analysis of cyber incidents and SOAR (Security Orchestration, Automation and Response) automatic healthcare cyber incident response systems are implemented; - other programmes and platforms required to detect vulnerabilities in systems, programmes, healthcare registers, and continuous monitoring of rapidly evolving cyberthreats are introduced	
Total funding requirement for the goal achievement	≈UAH 50 million	≈UAH 500 million	≈UAH 500 million
Links between the goal and other directions	Public Health and Digitalization	Public Health and Digitalization	Public Health and Digitalization
Goal to be achieved to solve the issue during each stage **6. Development and maintenance of digital competencies of information technology users in the healthcare sector**	● Disseminating information materials to facilitate developing of digital competencies of information technology users in the healthcare sector ● Updating the general qualification requirements to healthcare specialties regarding the required knowledge and skills of modern information technologies	● Introducing programmes and training on cybersecurity and cyber hygiene for users of electronic medical technologies to ensure the compliance with personal data storage requirements and standards. ● Improving digital competence of healthcare workers and fully integrating the requirements of the conceptual and reference digital competency framework	● Updating the requirements of the conceptual and reference digital competency framework for health professionals, taking into account innovative solutions and technologies

		for health professionals to professional standards, training and professional development system, requirements for staff recruitment, attestation and certification, incentivizing healthcare workers ● Implementing digital services of public accountability to enable public and patient oversight of the availability and quality of healthcare services	
Deadline within the stage	June 2022 – December 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities
Quality goal achievement indicator	● Information materials for the development of digital competencies of information technology users in the healthcare sector have been disseminated. ● The general qualification requirements to healthcare specialties regarding the required knowledge and skills of modern information technologies are updated	● The programmes and training on cybersecurity and cyber hygiene for users of information technologies in the sphere of healthcare to ensure the compliance with personal data storage requirements and standards ● Digital competence of healthcare workers is improved and the requirements of the conceptual and reference digital competency framework for health professionals is fully integrated into professional standards, training and professional development system, requirements for staff recruitment, attestation and certification, healthcare workers are incentivized ● Digital services of public accountability to enable public and patient oversight of the availability and quality of	● The requirements of the conceptual and reference digital competency framework for health professionals, taking into account innovative solutions and technologies are updated

		healthcare service are implemented	
Total funding requirement for the goal achievement	≈UAH 20 million	≈UAH 100 million	≈UAH 5 million
Links between the goal and other directions	Public Health and Digitalization	Public Health and Digitalization	Public Health and Digitalization
Goal to be achieved to solve the issue during each stage **7. Sustainable institutions operating under a clearly defined management model ensuring flexibility and efficiency of e-health development**	Launching committees into operation to manage e-health	Ensuring the development of sustainable institutions with a clearly defined management model and sustainable resource support for e-health capable of responding to rapid changes and emergencies	
Deadline within the stage	June 2022 – December 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities	Lack of adequate financial and human resources to implement tasks; lack of political will; active hostilities	
Quality goal achievement indicator	Committees for e-health management are launched into operation	Sustainable institutions with a clearly defined management model and sustainable resource support for e-health capable of responding to rapid changes and emergencies are developed	
Total funding requirement for the goal achievement	no need	≈UAH 10 million	
Links between the goal and other directions	Public Health and Digitalization	Public Health and Digitalization	

Priority 8. Strengthening national- and local-level quality management system

1. Key issues to be solved within the framework of the Recovery Plan

Impact of the war on the defined analysis area:	
Key challenges	● Unsatisfactory situation with regard to quality of medical services provided ● Fragmentation and lack of certain important elements of the quality assurance system in the healthcare sector ● Ignoring world's best practices in many aspects of quality management ● Lack of a holistic vision of the quality system among various stakeholders ● Decentralisation-related risks
Key possibilities	● Centralization of healthcare facilities network management at the national and regional levels ● Engagement of international expertise into recovering/building a qualitatively new healthcare system ● Potential funding from international sources
Key limitations	● Economic and social crisis caused by the full-scale war of the Russian Federation against Ukraine ● Unpredictable finishing date of the war ● Lack of qualified personnel to build a quality management system at all levels of the system

2. Goals, tasks and stages of the Recovery Plan within the direction "Strengthening national- and local-level quality management system"

2.1. Goals aimed at resolving the identified problems:

	Stage 1: June 2022 – end of 2022	**Stage 2: January 2023 – December 2025**	**Stage 3: January 2026 – December 2032**
The quality management system in the healthcare sector was fragmented in the pre-war period, while during the war, the focus is on the availability of medical care. Quality should be ensured by the management system at the national, regional and local levels and should be a measurable category. According to these dimensions, the healthcare in Ukraine should become safer, more efficient, timely, cost-effective, fair and human-centric. To this end, an appropriate environment should be created through improvement of registration and licensing processes, external quality assessment, contracting based on healthcare institution performance, clinic management, public reporting and comparative analysis, training of medical professionals and mentoring system. Prevention of damage during provision of healthcare and rehabilitation services will be ensured by inspecting of healthcare institutions, introducing of safety checklists and protocols, improvement of the system of registration of undesirable events during receiving healthcare services. To improve in-patient medical care, it is necessary to widely implement clinical guidelines, standards, protocols and clinical routes; creation of quality groups at institutions, the introduction of tools such as clinical audit and quality improvement cycles. Engagement and empowerment of patients and their families to participate in the processes of creating, providing and improving health services should also become important elements of the quality management system, as well as striving to control all aspects of their own health.			
Goal to be achieved to solve the issue during each stage **1. Developing and implementing quality assurance system elements in healthcare at the national level**	● Developing and coordinating between stakeholders a long-term concept of quality and patient safety in the healthcare system. – Delineating the areas of responsibility among stakeholders and approving the concept of quality and safety of patients in the healthcare system	● Approving a long-term concept of quality and patient safety in the healthcare system. – Identifying, elaborating and implementing the list of healthcare standards – Introducing the risk management system and damage prevention at all levels	● Ensuring implementation of a long-term concept of quality and patient safety in the healthcare system. – Continuously adhering to healthcare standards – Ensuring sustainable operation of the risk management and damage prevention system at all levels

	● Updating and harmonising with the EU legislation of the regulatory framework regarding quality and patient safety – Elaborating a Draft Law On Amending the Fundamentals of the Legislation of Ukraine on Healthcare concerning healthcare quality assurance; the definitions, subjects and objects of external assessment of healthcare quality and patient safety	– Creating a single register of doctors, rehabilitation professionals and nurses with multilevel access ● Updating and harmonising with the EU legislation of the regulatory framework regarding quality and patient safety – Reviewing current regulations and adopting new ones that will ensure compliance with the EU acquis communautaire – Adopting a Law On Amending the Fundamentals of the Legislation of Ukraine on Healthcare concerning healthcare quality assurance; the definitions, subjects and objects of external assessment of healthcare quality and patient safety ● Establishing a national institution for healthcare quality and patient safety and ensuring regular external assessment of HCFs with the publication of results – Elaborating a draft Regulation On the Quality Assurance Agency in Healthcare Sector (goals, objectives, functions, powers) – Establishing a quality assurance agency in healthcare sector; identifying, substantiating and approving the organizational chart and staff structure, searching	● Ensuring a regular external evaluation of the healthcare facility activities with the evaluation results published – Developing a national agency for healthcare quality and patient safety – Conducting a baseline quality evaluation in HCFs – Creating the rating of HCFs – Launching a regular HCF evaluation process – Ensuring sustainable updating of the rating of HCFs based on the evaluation findings ● Ensuring sustainable contracting within the NHS in view of the quality of services provided by healthcare facilities – Reviewing medical guarantee program packages with incorporating the quality standards, incorporating them in contracts with HCFs – Ensuring a system of reporting and verification against the set of indicators for "result-based payment" including functionality of the e-healthcare system ● Developing a system of Medical Technology Assessment extending it to service delivery models, clinical interventions and public health measures – Ensuring MTA is conducting as a prerequisite for centralised public procurement

		for/training of professionals – Elaborating a national quality assessment system (quality indicators to be harmonised with the OECD and integrated into the e-healthcare system) – Developing and implementing educational activities on quality issues: launching a quality management system at the institution level; quality standards; quality assessment procedure – Launching a national awareness campaign for HCFs on the quality assessment system being introduced ● Introducing a contracting system within the NHS in view of the quality of services provided by healthcare facilities – Developing medical guarantee program packages incorporating quality standards, incorporating them in contracts with HCFs – Ensuring a system of reporting and verification against the set of indicators for the introduction of "result-based payment" including functionality of the e-healthcare system ● Develop a system of Medical Technology Assessment (MTA) extending it to service delivery models, clinical interventions	– Human capacity building with MTA at the national level ● Improving a clinical recommendation and standard development system – Ensuring sustainable use of clinical decision-making support systems – Engaging professional associations, HCFs, patient associations to elaboration/adaptation of clinical recommendations on regular basis

		and public health measures – Expanding, supplementing and harmonising the MTA-related regulatory framework based on the international practices – Clearly splitting up responsibility between organisations, for MTA, transparency of processes and public reporting of organizations dealing with MTA – Before the launch of centralized procurement, shaping a state request with MTA – Human capacity building with MTA at the national level ● Improving a clinical recommendation and standard development system – Harmonizing the regulatory framework on development/adaptation and adoption of clinical recommendations in healthcare with the EU legislation – Introducing the systems to support clinical decision-making – Engaging professional associations, HCFs, patient associations to elaboration/adaptation of clinical recommendations – Harmonising Technical Regulations on Medical Products of	

		Ukraine with the EU Regulations	
Deadline within the stage	June 2022 – December 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	● lack of understanding of ensuring quality system in the field of healthcare by the political circles	● Lack of funding ● Lack of required expertise ● lack of understanding of ensuring quality system in the field of healthcare by the political circles	● Lack of funding ● Lack of required expertise ● lack of understanding of ensuring quality system in the field of healthcare by the political circles,
Quality goal achievement indicator	● Areas of responsibility among stakeholders and the concept of quality and safety of patients in the healthcare system are approved ● Draft Law On Amending the Fundamentals of the Legislation of Ukraine on Healthcare concerning healthcare quality assurance; the definitions, subjects and objects of external assessment of healthcare quality and patient safety is elaborated	● The regulatory framework regarding quality and patient safety is updated and harmonised with the EU legislation ● A national quality assurance institution is created ● Healthcare standards are developed and approved ● Risk management system and damage prevention is introduced at all levels ● A national quality assessment system is developed, which is harmonised with the OECD and integrated into the E-healthcare system, including a system of quality indicators ● Health technology assessment system is improved: (1) the legal framework is updated, (2) organizational responsibility for HTA is shared, (3) transparency of processes and public reporting are established, (4) a state request for HTA is created before the launch of a central procurement ● A clinical recommendation and standard development system is improved	● The standards required to ensure the proper functioning of the healthcare system are introduced ● A regular external evaluation of the healthcare facility activities is ensured with the evaluation results and the rating of healthcare facilities published ● A contracting system within the NHS is introduced in view of the quality of services provided by healthcare facilities ● Evidence-based (EBP) and value-based (VBP) practices are routinely applied in the daily operations of healthcare facilities as part of clinical management

		● Clinical decision-making support systems are introduced	
Total funding requirement for the goal achievement		UAH 8 billion	
Links between the goal and other directions		Priority 2. Funds - to establish a public authority - to purchase equipment Line: Public Administration	
Goal to be achieved to address the issue at each stage **2. Developing and implementing quality assurance system elements in healthcare at the healthcare facilities level**		● To introduce Clinical Management Systems in healthcare facilities – To introduce clinical audit and clinical risk management procedures – To involve patients/patient organisations in the development and evaluation of routes based on clinical recommendations – To introduce quality improvement tools involving staff (quality assurance groups, peer groups, etc.) – To use IT solutions to support clinical decisions – To support and apply evidence-based (EBP) and value-based (VBP) practices – To develop risk/adverse event reporting procedures developing the culture of open reporting ● To introduce a monitoring and internal service quality assessment system – To develop and introduce an internal quality assessment procedure and tools – To provide training for healthcare specialists to be responsible for	● To ensure the use of Clinical Management Systems in healthcare facilities – To ensure the development and evaluation of routes based on clinical recommendations involving patients/patient organisation members – To ensure the sustainable use of the quality improvement tools involving staff – To promote the use of IT solutions to support clinical decisions – To apply evidence-based (EBP) and value-based (VBP) practices on a regular basis – To introduce risk/adverse event reporting procedures developing the culture of open reporting ● To ensure that the quality of services is controlled and internally assessed – To ensure regular internal quality assessment and ensure its control in healthcare facilities with mandatory public reporting of the results

		internal quality assessment – To introduce regular internal quality assessment and ensure its control in healthcare facilities with mandatory public reporting of the results – To introduce first aid quality indicators – To introduce key performance indicators for managers of healthcare facilities in public and communal ownership ● To introduce quality-oriented HR management approaches – To introduce a number of incentive mechanisms for the staff (individual contracts, grades, etc.) – To strengthen the ability of associations to proactively participate in the elaboration of policies and regulation of the quality assurance system in healthcare ● To engage and empower patients, families, and communities – To provide training for medical staff to ensure the building of relationships of trust and partnership with patients and their families – To collect feedback on a regular basis and evaluate patient satisfaction with their experiences of receiving healthcare and other services	● To engage and empower patients, families, and communities – To collect feedback on a regular basis and evaluate patient satisfaction with their experiences of receiving healthcare and other services – To ensure the sustainable involvement of patient communities in the corporate management of healthcare facilities, new service planning, local program evaluation, etc.

		– To involve patient communities and community members in the corporate management of healthcare facilities, new service planning, and local program evaluation – To introduce a mechanism for the involvement of the ATC residents in the planning and management of healthcare services through public hearings – To ensure the independence of the forensic medical examination with it being controlled by the Ministry of Justice rather than the Ministry of Healthcare – To introduce individual licences for doctors and rehabilitation specialists to practice medicine	
Deadline within the stage	June 2022 – December 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	● Lack of funding ● Lack of required expertise ● lack of understanding of ensuring quality system in the field of healthcare by the political circles,	● Lack of funding ● Lack of required expertise ● lack of understanding of ensuring quality system in the field of healthcare by the political circles,	● Lack of funding ● Lack of required expertise ● lack of understanding of ensuring quality system in the field of healthcare by the political circles,
Quality goal achievement indicator		● Clinical Management Systems are introduced at the level of healthcare facilities: (1) clinical audit; (2) quality improvement tools; (3) IT solutions to support clinical decisions, etc. ● Monitoring and service internal quality assurance are	● Healthcare facilities conduct regular internal quality assessment with results being publicly published ● Patients, their families and communities are actively involved in the quality management system in healthcare facilities, their opportunities are

		implemented at HCF level ● A number of incentive mechanisms for the staff are introduced ● A unified register of healthcare workers with multi-level access is created ● The power of associations is strengthened; they participate in the elaboration of policies and regulation of the quality assurance system	expanded, for example: (1) feedback is regularly collected, including assessment of patient satisfaction with their experiences of receiving medical and other services; (2) patient community members are involved in the corporate management of healthcare facilities, new service planning, local program evaluation, etc.
Total funding requirement for the goal achievement		Funding is included as Priority 7 as it pertains to register creation	
Links between the goal and other directions		Priority 7 Information systems in healthcare	

Analysis area (of a specific component) within the direction:

Priority 9. Recovering pharmaceutical sector, improving accessibility and proper use of medicines

Impact of the war on the defined analysis area:	
Key challenges	● Dangerous environment and impossibility for pharmaceutical sector operators to conduct operations within the occupied territories ● Destruction of critical infrastructure within the de-occupied territories and potential danger of shelling regardless of the location make it impossible to ensure normal production, storage, distribution and creation of conditions for access of patients to medicinal products ● Large-scale evacuation and emigration of the population caused a sharp decline in the number of healthcare workers in the regions. ● Additional internal displacement of the population resulted in the disbalance in the demand for certain categories of pharmaceutical products and the need for the provision of associated services compared to the pre-war period in a number of regions ● A significant increase in the demand and use of emergency and life-saving medicinal products compared to the pre-war period resulted in a sharp drop in the stocks of such products ● Complicated access to the remaining stock of pharmaceutical products purchased out of state budget funds at the central and regional levels, on the one hand, and the period required to form a proper humanitarian aid distribution system, on the other hand, resulted in the lack medicinal products in healthcare facilities on a number of cases ● Increasingly limited access to vital treatment for patients with chronic and socially significant diseases may result in increased morbidity, the development of resistance to certain groups of therapeutic schemes and irreparable consequences for the health of patients in case of disease decompensation ● Limited access to fuel, national currency volatility, political and regulatory processes introduced under martial law in Ukraine
Key possibilities	● The national healthcare system transformation processes are introduced and partially implemented, including those in the pharmaceutical sector, which currently creates a great potential for further process improvement/renewal. ● The overall political course regarding the acceleration of Ukraine's accession to the European Union prioritising the harmonisation of the legal framework with European practices and standards. ● Expansion and active interaction with the international community to strengthen the scientific, technical and procedural potential in the area of production, distribution and control of pharmaceutical product circulation. ● Continued institutionalisation of medical technology assessment processes in accordance with the concepts as developed and approved.
Key limitations	● Completely or partially destroyed production infrastructure and supply chains; limited access of patients to medicinal products. ● Lack of relevant and trustworthy data for strategic and operational decision-making, intensive dynamics of changes in the basic parameters of the population, infrastructure and needs in medicinal products, challenges in creating scenarios, assumptions and models of recovery and development ● Lack of international expertise for strengthening healthcare policies and institutions during armed conflicts of similar scale ● The need to strengthen the procurement option at the regional level ● Shortage of human resources required to harmonise national practices with the EU, including, but not limited to, the implementation of strict regulatory practice standards, bioequivalence and a national medicinal product verification system.

2. Goals, tasks and stages of the Recovery Plan within the direction "Recovering pharmaceutical sector, improving accessibility and proper use of medicines"

2.1. Goals aimed at resolving the identified problems:

	Stage 1: June 2022 – end of 2022	**Stage 2: January 2023 – December 2025**	**Stage 3: January 2026 – December 2032**
1. Identified problem to be resolved in the relevant analysis area			

Since the beginning of the Russian invasion of Ukraine, the access of patients to pharmaceutical products has become increasingly difficult, regardless of the source of distribution, be it a government procurement system or a pharmaceutical retail sector. First of all, the war caused a shortage of key medicinal products, especially vital medicinal products. A severely damaged and in some cases destroyed distribution infrastructure is a major factor in drastically limiting access to therapeutics in both the public and private pharmaceutical sectors. The need to harmonise national policies with the best global practices and the introduction of innovative sectoral mechanisms to improve patients' access to effective, safe and high-quality medicinal products are of paramount importance for the pharmaceutical sector. Eventually, it is necessary to facilitate the development of the pharmaceutical industry in Ukraine with a focus on fostering investment in R&D, localisation and other methods for exploring new technologies of the production of medicinal products and medical devices, promoting clinical trials in Ukraine and other state-of-art tools aimed at reinforcing the sector: The damage to the healthcare system caused by war, including the pharmaceutical sector, is increasing every day, so it is important to ensure a quick response to the challenges existing today and the implementation of measures contributing to the speedy recovery of the healthcare sector, including the pharmaceutical sector.			
Goal to be achieved to solve the issue during each stage **1. Recovering pharmaceutical sector, improving accessibility and proper use of medicines.**	● Update the National List of Essential Medicines with new drugs in line with recommendations made as a result of the medical technology assessment ● Adopt as a whole the new version of the Law of Ukraine "*On Medicinal Products"*, No. 5547 of 21.5.2022. ● Complete and finalize benchmarking in line with WHO recommendations regarding establishment of a strict regulatory system in Ukraine	● Ensure transition from the National List of Essential Medicines to the single Positive List of Medicines procured with public funds, and its regular updating, accordingly. ● Ensure implementation of provisions of the new version of the Law of Ukraine "*On Medicinal Products"* ● Adopt the draft Law of Ukraine "*On Medicinal Products"* ● Ensure full functioning of such instruments to access innovative treatments as managed access contracts and the PMG expansion due to assessment of medical technologies. ● Create an independent Agency to assess medical technologies as a single expert body that ensures validity and evidence base for selection and efficacy assessment of medicines, medicinal products, as well as the PMG expansion.	● Continue implementation of provisions of the new version of the Law of Ukraine "*On Medicinal Products"* ● Enforce provisions of the Law of Ukraine "*On Medicinal Products".* ● Ensure regular update and actualization of the Positive List.
Deadline within the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032

Risks related to the goal achievement	• War on the territory of Ukraine continues • Lack of resources in the State Budget to cover the needs of the population • Lack of political will and relevant initiatives to take decisions • Appearance of unpredictable factors that will significantly affect results of the simulation • Lack of consensus among stakeholders (interested parties)	• War on the territory of Ukraine continues • Lack of resources in the State Budget to cover the needs of the population • Lack of political will and relevant initiatives to take decisions • Appearance of unpredictable factors that will significantly affect results of the simulation • Lack of consensus among stakeholders (interested parties)	• War on the territory of Ukraine continues • Lack of resources in the State Budget to cover the needs of the population • Lack of political will and relevant initiatives to take decisions • Appearance of unpredictable factors that will significantly affect results of the simulation • Lack of consensus among stakeholders (interested parties)
Quality goal achievement indicator	• The new version of the Law of Ukraine *On Medicinal Products* has been adopted; • The National List of Medicines has been updated • Benchmarking in line with WHO recommendations has been completed	• The single Positive List of Medicinal Products procured with public funds has been approved and updated on the regular basis; • An independent Agency for assessment of medical technologies has been established as a single expert body	• Provisions of the Law of Ukraine *"On Medicinal Products"* have been implemented. • Provisions of the draft Law of Ukraine *"On Medicinal Products"* have been implemented • The Positive List of Medicines has been updated.
Total funding requirement for the goal achievement	No additional costs needed	State Budget and/or local budgets	No additional costs needed
2. Establishing an independent agency for health technology assessment as the single expert body that ensures validity and evidence base for the selection and evaluation of the effectiveness of medicines and medical devices, and extending the HGP		• Develop and approve a road map to set up the independent Agency for Medical Technology Assessment (MTA) • Develop provisions on the Agency for Medical Technology Assessment, • Establish the independent MTA Agency. • Ensure integration of operational, technical, financial, legal, institutional, and communication processes into the structure of the health care system. • Ensure transfer of the functionalities from the MTA department (SEC) to the agency established • Develop the Agency's staff list and budget	• Ensure launch and sustainable operation of the Medical Technology Assessment Agency
Deadline within the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032

Risks related to the goal achievement	• War on the territory of Ukraine continues • Lack of resources in the State Budget to cover the needs of the population • Lack of political will and relevant initiatives to take decisions • Appearance of unpredictable factors that will significantly affect results of the simulation • Lack of consensus among stakeholders (interested parties)	• War on the territory of Ukraine continues • Lack of resources in the State Budget to cover the needs of the population • Lack of political will and relevant initiatives to take decisions • Appearance of unpredictable factors that will significantly affect results of the simulation • Lack of consensus among stakeholders (interested parties)	• War on the territory of Ukraine continues • Lack of resources in the State Budget to cover the needs of the population • Lack of political will and relevant initiatives to take decisions • Appearance of unpredictable factors that will significantly affect results of the simulation • Lack of consensus among stakeholders (interested parties)
Quality goal achievement indicator	-	• The road map to set up the independent Agency for Medical Technology Assessment (MTA) has been approved • Provisions on the Agency for Medical Technology Assessment have been developed. • The independent MTA Agency has been established.	• Sustainable operation of the MTA Agency has been supported
Total funding requirement for the goal achievement	-	State Budget and/or local budgets	State Budget and/or local budgets
3. Facilitating the development of the pharmaceutical industry with a focus on fostering investment in R&D, localisation and other methods for exploring new technologies of the production of medicines and medical devices, promoting organization of clinical trial in Ukraine, strengthening control over intellectual property rights,	• Adopt the draft Law "*On Amendments to the Tax Code of Ukraine to Regulate Compassion-Based Provision of Medicines to Patients"* (No. 5737 of 6.7.2021) regarding reduction of the financial burden on the provider of compassion-based medicines distributed free of charge (VAT exemption of importation of medicines for such purposes) and the financial burden on the patient who receives free treatment. • Adopt the draft Law "*On Amendments to the Criminal Code of Ukraine and the Code of*	• Adapt and approve national bioequivalence guidelines based on European standards and recommendations. • Include production of medicinal products into priority sectors of the economy (amendments to CMU Resolution No. 843-r). • Develop and adopt a draft law on introduction of the full functioning Bolar provision in the field of intellectual property (provide for the possibility of registering generic drugs before expiration of patent protection, and the possibility of exporting to third countries after expiration of the main patent). • Adopt the Law on bringing requirements for protection	• Adopt the draft Law of Ukraine "*On Clinical Trials"* • Assess effectiveness of the tools introduced to stimulate R&D investments, localize new technologies for production of medicinal products, conduct clinical trials in Ukraine.

full implementation of the Bolar exemption in the national legislation and other state-of-art tools aimed at reinforcing the sector	*Administrative Offenses of Ukraine Regarding Improved Liability for Violation of the Established Procedures of Preclinical Studies, Clinical Trials, and State Registration/Re-registration of Medicinal Products"* (No. 5815 of 21.7.2021). ● Amend the procedures for confirming compliance of production conditions of medicinal products with requirements of the good manufacturing practice (GMP), in view of the conditions and limitations of their implementation in the light of the martial law.	of intellectual property rights in the pharmaceutical sector in compliance with international and European standards, international commitments of Ukraine, and in view of the flexible provisions of the TRIPS Agreement and Article 73 of the TRIPS Agreement, as well as Article 219 "Patents and Public Health" of the EU-Ukraine Association Agreement. ● Update the current legislation on clinical trials (CL) - amendments to the current Law of Ukraine "*On Medicinal Products"* No. 123/96-VR (Article 8): to shorten the terms of CT approval and establish the general term - up to 25 calendar days for international CTs that are approved in countries with a strict regulatory system (EU, USA, etc.), up to 40 calendar days for all CTs; to withdraw part 8, which was erroneously preserved when amending this article on insurance; to regulate the requirements for inclusion into CTs individuals under the age of 18; to regulate in the Law opportunities to introduce the latest technologies for holding CTs in Ukraine (application of telemedicine, conducting procedures and providing services within CTs at the trial subjects' place of residence/stay, remote monitoring and data verification, etc.). ● Adopt legislation on stimulating development of the field of clinical trials - amendments to the Tax Code of Ukraine: to exempt from VAT imports of medicinal products, medical devices, and related materials for the purposes of holding CTs; to exempt from VAT services within CTs (researchers, HCFs, service organizations)	

		for the period of 10 years; to regulate taxation of investigators (without introduction of additional benefits); the cost of regulatory support, etc. ● Regulate in the law and introduce tax benefits for applicants of international clinical trials in Ukraine - benefit proportionality in accordance with the level of R&D investments into Ukraine. ● Introduce a tax calculator for R&D investments, in particular for international clinical trials. ● Develop the draft Law of Ukraine *"On Medicinal Products"*. ● Develop and implement a plan for development of the national infrastructure for conducting clinical trials, including through public-private partnerships. ● Develop a plan for building a network of laboratories of various forms of ownership for quality control of medicinal products and conducting bioequivalence tests meeting EU standards. ● Update requirements for functioning of control laboratories and determine sources of funding. ● Ensure continuous access for clinical trial experts to professional development in Ukraine	
Deadline within the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	● War on the territory of Ukraine continues ● Lack of resources in the State Budget to cover the needs of the population ● Lack of political will and relevant initiatives to take decisions ● Appearance of unpredictable factors that will significantly	● War on the territory of Ukraine continues ● Lack of resources in the State Budget to cover the needs of the population ● Lack of political will and relevant initiatives to take decisions ● Appearance of unpredictable factors that will significantly affect results of the simulation	● War on the territory of Ukraine continues ● Lack of resources in the State Budget to cover the needs of the population ● Lack of political will and relevant initiatives to take decisions ● Appearance of unpredictable factors that will significantly affect results of the simulation

The National Council for the Recovery of Ukraine from the Consequences of the War

Draft Ukraine Recovery Plan

Materials of the “Justice” working group

July 2022

Introduction

Ukraine has made its civilizational choice in favor of the European trajectory of development, which, among other things, means the conclusive rule of law and justice in all spheres of public policy and public life. The war did not destroy or even stop the functioning of the judiciary and constitutional justice, the prosecutor's office and the criminal justice system, the bar, the notary and the penitentiary system. But it is obvious that today it is important for Ukraine to solve the problems of the justice sector which arose because of the large-scale invasion of the russian federation and these problems need to be solved at the stage of rebuilding our country.

At the same time, one of the most important workstreams in the field of justice should be to bring the russian federation to international legal responsibility for armed aggression, human rights violations and violations of other rules of international law. Ukrainian society obviously demands that the enemy pay for the damage it caused. Since 2014, Ukraine has been taking all possible steps to bring the russian federation to justice while having extremely limited jurisdiction of international judicial institutions. In fact, international legal mechanisms that exist can only give a legal assessment of russia's actions in part. However, the scale of the new offenses indicates that it is necessary to enter into fundamentally new international agreements and create new institutions that will be able to fill existing jurisdictional problems, ensure the principle of inevitability of punishment, and provide Ukraine with proper satisfaction for the offenses committed.

The process of relaunching the judiciary began even before the full-scale invasion of the russian federation as judicial reform is one of the main indicators that Ukraine is ready to integrate with the European Union. Resuming the functioning of the High Council of Justice, the High Qualification Commission of Judges of Ukraine, human-centricity that is manifested by making it easier for people to have access to justice and participate in the administration of justice; digitalization of the judiciary is the priority area for overcoming the aftermath of the war.

The large-scale armed aggression by the russian federation against Ukraine has exacerbated problems that exist in the field of constitutional justice. Society is more interested than ever in the functioning of the Constitutional Court of Ukraine which is a position to ensure the supremacy of the Constitution of Ukraine, protect the constitutional order of the state, and ensure human rights and freedoms. Solving problems around the body having constitutional jurisdiction is able to meet the public demand for justice and demonstrate the high standards of constitutional justice to the world. Solving these problems will improve the arrangement of the work of the Constitutional Court of Ukraine and increase public trust to it.

The real challenge in the current lay of the land is to continue the reform launched previously in respect of the prosecutor's office as a body focused on the needs of the state and society which operates on the basis of the principles of professionalism, independence and responsibility. Filling gaps in regulations will help prosecutors improve carrying out their constitutional powers to ensure public prosecution, arranging and administering pre-trial investigations and representing the state in court, including while prosecuting the war crimes committed by the aggressor state in the territory of our country.

An independent system of criminal justice and law enforcement is a requisite component of a democratic state which operates effectively on the basis of the principles of respect for human and civil rights and freedoms. To set up such a system, such issues should be addressed: conducting criminal proceedings during a state of emergency, streamlining the rules of investigative jurisdiction with due regard to the outlines of improving the law enforcement agencies' activities, improving the investigative measures within criminal proceedings,

completing the list of misdemeanors, improving the principles of law enforcement. Achieving these goals will contribute to creating a policy of preventing criminal offenses instead of responding to criminal offenses already committed.

It should also be borne in mind that people's access to a fair and efficient court is impossible without an institutionally developed and independent bar. As for the post-war reconstruction of Ukraine, the bar is one of the important guarantees of observance and protection of the rights of citizens, in particular victims of the consequences of armed aggression. Therefore, the key goals in this area are to align the institutional setup and activities of the bar to the best international standards and standards of the Council of Europe, institutional independence of the bar, creating favorable conditions for effective and quality legal aid to war victims, ensuring full access to justice for them both in Ukraine and abroad.

Specific attention should be given the notary, which plays a significant role as an institution of undisputed civil jurisdiction and preventive justice. Currently, notaries in Ukraine mostly provide offline services, notaries' activities remain bureaucratic, the full range of services are provided in paper form and notarial records and archive are also kept paper form. Aware of this and taking into account the key opportunities, it is now necessary to introduce into notaries' activities modern technologies facilitating people to get this service, as well as to modernize the notary system by improving national legislation and aligning it to European institutions.

The penitentiary system and probation protect society from crime, ensure a balance between enforcing criminal charges and correcting criminals and facilitates their rehabilitation in the community without breaking the law. The hostilities because of which prison facilities were destroyed and damaged, which led to evacuation and relocation of convicts and prisoners has exacerbated the problem of detention conditions which are inconsistent with international standards.

The fact that systemic changes are required, including those caused by the war, makes the transition from punitive to rehabilitation in approaches to working with convicts and prisoners even more relevant. In order for social, educational and psychological work with convicts and detainees to be done, it is necessary to expand the list of tools, improve educational services, useful activities for convicts, effective use of convicts' free time. Further development of the above areas is possible only through coordinated and streamlined work of the state, the civic sector and international partners. The implementation of the intervention planned will be not a formal but a qualitative transformation of the justice system in Ukraine which corresponds to EU best practices, protects the legitimate rights and interests of the state and individuals.

Bringing russian federation to international legal responsibility for armed aggression and violation of other international law rules	**4**

Societal safety and social rehabilitation of convicts and prisoners. Maintaining prisoners of war	**125**

Bringing russian federation to international legal responsibility for armed aggression and violation of other international law rules

The aggression of the russian federation (rf) against our state at the stage of large-scale invasion is accompanied by mass and flagrant violations of international law. An obvious demand from the Ukrainian society is to bring the russian federation as a state, as well as its particular citizens to responsibility for committing these offenses. At the same time, there are a number of legal challenges along the way. Since 2014, Ukraine has been taking all possible steps to bring the russian federation to justice while having extremely limited jurisdiction of international judicial institutions. In fact, international legal mechanisms in place can only partially, within the framework of specific conventions, give a legal assessment of russia's actions. However, the scale of the new offenses indicates that it is necessary to enter into fundamentally new international agreements and create new institutions that will be able to address jurisdiction-related challenges, ensure the principle of inevitability of punishment, and provide Ukraine with proper satisfaction for the offenses committed.

Substantiating the goals

Given the above, the following main objectives have been outlined as regards bringing rf to international legal responsibility:

- setting up a special tribunal to prosecute the crime of aggression; and
- setting up a national and international mechanisms to seize the rf's assets, that of its citizens or other persons taking part in rf's armed aggression against Ukraine or otherwise support it to compensate for the damage caused to Ukraine.

The scale and nature of crimes committed by the Russian armed forces during a large-scale invasion constitutes a challenge for both national and international criminal justice systems. After more than 40 countries filed applications on the basis of a declaration lodged by Ukraine accepting the ICC's jurisdiction, the Office of the Prosecutor of the International Criminal Court sent its 'largest-ever' team of experts to launch investigations. However, the ICC has no jurisdiction to prosecute citizens of states that are not parties to the Rome Statute for the crime of aggression. Namely, the fact that top political and military leadership of russia committed the crime of aggression can be considered as the root cause of further committed war crimes and other international crimes by the armed forces of the rf in Ukraine over which the ICC has jurisdiction. Therefore, it is necessary to set up a fundamentally new international criminal mechanism for prosecuting the crime of aggression against Ukraine, which will enable bringing this group of people to responsibility for the crime of aggression quickly and effectively.

Moreover, russia's violation of the laws and customs of war is accompanied by mass destruction of civilian infrastructure, illegal blockade of Ukrainian ports, etc., which causes enormous economic damage to our country. In response to such actions, many civilized states have imposed sanctions against russia, which, among other things, include seizing russian assets in the territories of these states. In order to partially

compensate for the damage caused to Ukraine, it is necessary to conclude fundamentally new international agreements on confiscating these assets and subsequently transferring them to Ukraine.

Expected outcomes and further development

It is expected that the accomplishment of the objectives set will have profound and multifaceted consequences. First of all, bringing russia to justice through international law tools is a demand on the part of Ukrainian society. Thus, adopting court judgements in favor of Ukraine, international condemnation of the actions taken by top political and military leadership of russia can satisfy the society's need for justice.

In terms of international relations, achieving the goals will have far-reaching and multifaceted consequences. Depending on specific wording of court judgments, legal victories can ensure a more favourable attitude to Ukraine from the states that usually take a neutral position; these legal victories can become the basis for lodging claims for compensation for the damages caused; they can permanently destroy any territorial claims russia may have in respect occupied territory of Ukraine etc.

Thus, achieving goals within mechanisms in place should forever secure for russia a reputation of a country violating international law, which may have a negative impact on both the public and private spheres. Many international companies refuse to work with countries such as North Korea, Iran, Eritrea, etc. Securing for russia a reputation of a country violating international law should for a long time ensure that russia is in the cohort of such states.

Although the immediate scope of the special tribunal to be set up to punish the crime of aggression against Ukraine is still under discussion, this mechanism is already seen as a mechanism similar to the Nuremberg tribunal in order to condemn the current Kremlin regime. In the long run, the special tribunal may provide a basis for deputinizing russia and shaping a non-aggressive, predictable neighbor on Ukraine's eastern borders.

Creating a multi-level compensation mechanism for Ukraine from Russian assets confiscated in third countries, from its citizens/other persons who take part in russia's armed aggression against Ukraine or otherwise support it will not only facilitate Ukraine's postwar rebuilding, but will also promote consolidation of partner countries around Ukraine and building deep trust between Ukraine and partner countries. In the future, this cooperation will be an important step towards Ukraine being perceived as a state belonging to Western civilization.

Impact of the war on the defined area of analysis:

Key challenges (summarized for the area specified)

The architecture of international judicial institutions in place has a fragmented jurisdiction and cannot ensure full and complete bringing russia to justice for violations of international law, nor can it provide compensation for the damage caused to Ukraine

Key opportunities (summarized for the area specified)

A strong international coalition around Ukraine can be used to fill the gaps in international justice administration and bring to justice not only russia as a state, but also all the political and military leadership of russia involved; moreover, it can create a unique mechanism to compensate Ukraine for the damage caused from foreign assets of the aggressor

Key constraints (summarized for the area specified)

1. Setting up and operations of international judicial institutions is highly time-consuming and costly;
2. The legitimacy of such bodies cannot be supported at the highest level, in particular, by the UN Security Council given russia's veto power;
3. For the property of the aggressor state and persons related to it to be confiscated and transferred in favor of Ukraine, a special approach will have to be introduced in almost every jurisdiction, some countries need to adopt new laws in respect of that

2	**Goals, objectives, stages of the Recovery Plan as per the area**			
2.1	**Description of problem No.1 to be solved in this area of the analysis:**	No international court or tribunal having jurisdiction to investigate and prosecute Russia's top political and military leadership for committing the crime of aggression against Ukraine.		
2.1.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.1.2	Task to be achieved to solve the problem at each stage:	Drawing up legal framework to make sure that it will be possible to set up a special tribunal for the crime of aggression against Ukraine.	Setting up a Special Tribunal for the Crime of Aggression against Ukraine (the tribunal is to have jurisdiction to investigate and prosecute the rf top political and military leadership for the crime of aggression against Ukraine. The tribunal is also not to recognize any immunities of senior officials)	
2.1.3	Deadline within the stage:	till 12/2022	till 12/2023	

2.1.4	Risks related to achieving the objective:	Lack of political will and consent of other states and / or international organizations to set up a tribunal. Trial in absentia is not widespread and is not recognized among international tribunals.	Lack of political will and consent of other states and / or international organizations to set up a tribunal	
2.1.5	Indicator measuring the achievement of an objective	Draft statutory documents (multilateral international treaty and rules of procedure) of the new special tribunal enabling trial in absentia, as well as enforcing the sentence regarding confiscation of the convict's assets and paying compensation to victims from the convict's assets drawn up.	The texts of the multilateral international agreement on setting up a Special Tribunal on the Crime of Aggression against Ukraine and its rules of procedure agreed upon. Their entry into force. The Special Tribunal actually commenced its operations.	
2.1.6	Total amount financial resources required to achieve the objective:			
2.1.7	Link of the objective with other areas:			
2.2	**Description of problem No.2 to be solved in this area of the analysis:**	No national and international mechanism to compensate for the damage caused by the rf's aggression and, accordingly, no guarantees as to confiscating assets of russians and other persons taking part in rf's armed aggression or of those who in some way support it abroad; no unified approach in shaping state policy during the transition period		
2.2.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.2.2	Task to be achieved to solve the problem at each stage:	Introducing national legislation to limit the sovereign immunity of foreign states which will be consistent with international law of other jurisdictions	1. Establishing an international compensation mechanism based on a multilateral agreement between key partner countries and introducing in key partner countries legislation which will ensure confiscating assets of russia, russians/other certain	

			specified categories of persons in order to utilize them to compensate for damages caused to Ukraine 2. Drawing up and implementing the Concept in the field of protection and restoration of human rights and fundamental freedoms while overcoming the consequences of the armed conflict on the territory of Ukraine caused by the armed aggression of the russian federation, as well as drafting and approving the government plan for its implementation	
2.2.3	Deadline within the stage:	till 12/2022	1. till 06/2023 2. till 12/2023	
2.2.4	Risks related to achieving the objective:	No international compensation mechanism; lack of resources to launch such a mechanism.	1. The achievement of the objective depends on the political will of the participating States. 2. Social tension and no consensus in society and among MPs	
2.2.5	Indicator measuring the achievement of an objective	A legislative act on the sovereign immunities of foreign states adopted which is aligned at the contractual level with the laws of other countries in which the seized assets of the russian federation are located	1. A multilateral agreement on a compensation mechanism for Ukraine drafted and concluded; the treaty entered into force; the bodies of the compensation mechanism are operational. Foreign aassets of the russian federation, russians and other persons connected with russian aggression or in some way supporting it used to	

			compensate for the damage caused to Ukraine. 2. The Concept in the field of protection and restoration of human rights and fundamental freedoms while overcoming consequences of the armed conflict on the territory of Ukraine caused by the armed aggression of the russian federation drafted and implemented; the government plan for its implementation drafted and approved	
2.2.6	Total amount financial resources required to achieve the objective:		will incur no extra costs with from the state budget of Ukraine	
2.2.7	Link of the objective with other areas:		1. No link 2. “Improving the system of prosecutor’s offices”, “Developing criminal justice institutions system”, “Societal safety and social rehabilitation of convicts and prisoners. Maintaining prisoners of war”	
3	**Current status of implementing program documents in the field of analysis selected as to the problem identified**			
3.1	**The name of the program document**	**Brief description of the current status**		**Name and last name of the member of the group submitting this information**
3.1.1.				0
				0
4.	**Determining tasks on achieving the objectives from point 2 (for each objective defined)**			
	Task (from point 2)	**Description of the task to achieve the objective**	**Deadline**	**Dependencies of the task on the tasks in other areas, spheres, problems**

	Stage 1: 06/2022 – 12/2022			
	Drawing up legal framework to ensure that it will be possible to set up a Special Tribunal for the Crime of Aggression against Ukraine	Task 1. Holding extensive consultations with foreign countries.		
		Task 2. Drawing up draft statutory documents (multilateral international agreement and rules of procedure) of the new Special Tribunal		0
	Stage 2: 01/2023 – 12/2025			
	Setting up a Special Tribunal for the Crime of Aggression against Ukraine on the basis of a multilateral international agreement	Task 3. A multilateral international agreement on setting up a tribunal agreed upon and concluded. Measures for its ratification taken.		
		Task 4. Actual start of the Special Tribunal's operations arranged		0
		Task 5. The Rome Statute of the International Criminal Court ratified.		
	Stage 1: 06/2022 – 12/2022			
	Introducing national legislation to limit the sovereign immunity of foreign states which will be consistent with international law of important jurisdictions	Task 6. Holding consultations with stakeholders.		
		Task 7. Drawing up and adopting legislation on sovereign immunities of foreign states.		0
	Stage 2: 01/2023 – 12/2025			
	Establishing an international compensation mechanism based on a multilateral agreement between key partner countries and introducing in key partner countries legislation which will ensure confiscating assets of russia, russians/other certain specified categories of persons in order to utilize them to compensate for damages caused to Ukraine	Task 8. Holding consultations with countries and international organizations that have imposed sanctions against russia because of its aggression against Ukraine and with other stakeholders as to creating an international compensation mechanism based on a multilateral agreement		
		Task 9. Concluding a multilateral agreement on creating an international compensation mechanism that will enable to (1) determine the process of obtaining		0

		compensation for losses and damages caused by russian aggression, (2) determine sources for compensation, (3) provide a "one stop shop" approach, (4) comply principles of the rule of law and due process, (5) reduce the damages Ukraine suffered as a victim state		
		Task 10. Taking measures to ratify the multilateral agreement		0
		Task 11Setting up treaty bodies of the compensation mechanism		
	Stage 2: 01/2023 – 12/2025			
	Drafting and implementing the Concept in the field of protection and restoration of human rights and fundamental freedoms while overcoming consequences of the armed conflict on the territory of Ukraine caused by the armed aggression of the russian; drafting and implementing the government plan for its implementation	Task 12. Drafting and implementing the Concept in the field of protection and restoration of human rights and fundamental freedoms while overcoming consequences of the armed conflict on the territory of Ukraine caused by the armed aggression of the russian; drafting and implementing the government plan for its implementation	12.2023	0

Fair, independent and accessible court

Introduction of martial law on the territory of the state affected the processes of administering justice by the courts of Ukraine to some extent. However, under such difficult circumstances, the constitutional human right to judicial protection provided for in Article 55 of the Constitution of Ukraine cannot be restricted.

Currently, Ukrainian judiciary needs sustainable development and adjusting to martial law. It should also be borne in mind that judicial reform is one of the main indicators for assessing how ready Ukraine is to integrate with the European Union.

Since the war broke out in Ukraine, the courts and justice sector institutions have been facing many tough and large-scale challenges that require immediate and effective solutions.

At this stage, the priority task is to resume the High Council of Justice operations, without the quorum of which it is impossible to form the

High Qualification Commission of Judges of Ukraine that is in charge of filling the judiciary with professional judges and judges having integrity and is also in charge of filling the vacancies in the Disciplinary inspectors service without which disciplinary complaints against the actions of judges pile up, which need to be considered and decisions need to be made within the timeframes prescribed by law.

Local courts remapping remains a relevant and urgent issue.

To date, the procedure of liquidating local general and commercial courts which were subject to liquidation under the decrees of the President of Ukraine has not been completed.

During 2021, the working group at the Parliamentary Committee on Legal Policy continued to develop a new network of general local courts in connection with changes in administrative and territorial structure.

In course of drawing up the future map of district courts, in addition to other components, there was taken as the basis the need to overcome different levels of court workload, optimize budget costs and streamline the remuneration of judges. Thus, in district general courts with the expected number of 3 judges the number of court staff is up to 6 people per judge, while in larger courts this ratio is about 4 court staff members per judge. At the same time, judges' workload within one instance and jurisdiction differs 12 times in some instances. Thus, in 2021, the Pechersk District Court of Kyiv where the expected number of judges is 36 judges, 20 judges work de-facto, received 71,782 cases (1,994 cases by expected number of judges and 3,589 cases per judge de facto). The Novodnistrovskyi City Court of Chernivtsi region where the expected number of judges is 3 judges, there are 2 judges there de facto, received 589 cases in 2021 (196 cases per the expected number of judges and 294 cases per judge de facto).

Therefore, balancing workload which can be done by remapping the existing network of courts is becoming urgent as on the one hand, the state spends budget funds to maintain courts with small workload and at the same time cannot provide a sufficient number of judges in overloaded courts, which negatively affects opportunities to consider cases within a reasonable timeframe.

It is the remapping (consolidation) of the existing network of local courts, among other things, that aims to create a "judge's office" model which will be aligned to a single way to determine and balance not only the terms of remuneration, but also the judicial workload.

Moreover, remapping of the network of local general courts on the principle of "one district court - one district" (where appropriate and possible), taking into account the resolution of the Verkhovna Rada of Ukraine from 17.07.2020 № 807-IX "On forming and liquidating districts" will not only save budget funds, but also significantly increase the level of public trust to justice as it is impossible to trust a court where, because of excessive workload, court proceedings take years.

One of the challenges caused by the hostilities is the destruction and damage of the premises of judicial institutions, as well as the theft and damage of material and technical resources of judicial institutions and bodies in the justice system. Rebuilding damaged court premises and building new premises of appellate and local courts and justice sector institutions in accordance with European standards is also a priority workstream on the path of overcoming the consequences of the war.

Another innovative workstream that will improve the quality of court services and access to justice for many citizens is developing e-justice, digitization of elements of court proceedings, implementing E-Court and the Unified Judicial Information and Telecommunication System with due regard to the recommendations of the European Commission on the Efficiency of Justice.

The existing system of enforcing court decisions requires changes. The European Commission and the Committee of Ministers of the

Council of Europe have repeatedly emphasized that it is necessary to change the system of enforcing judgments and applying the best practices of the European Union. Thus, in 2020, reforming enforcement system in respect of court judgements was included in the terms of the Macro-Financial Agreement between the European Union and Ukraine.

The European Court of Human Rights noted that the problem of non-enforcement of court decisions is of a systemic nature, the causes behind which include faults in national legislation, enforcement moratoria and the lack of effective enforcement tools. Non-enforcement or too lengthy enforcement of court decisions is one of the structural issues on the agenda of the Committee of Ministers of the Council of Europe regarding Ukraine, and the number of cases it is overseeing now is 635. A significant part of decisions of national courts that are not enforced are decisions of a non-property nature issued against authorities and other subjects of power.

In view of the tasks put before the Government today as to ensuring functioning of the state economy, building a new effective system for enforcement of court decisions is one of the priorities.

In "Fair, independent and accessible court" workstream, the following main challenges have been identified:

– judicial governance bodies not formed, their faulty operations (duplication of functions, redundant powers, faulty mechanism for bringing judges to responsibility);

– the need to overcome staff crisis in Ukrainian judiciary;

– the need to remap the existing network of courts and bring it closer to the new administrative and territorial system;

destruction and damage to premises, theft and damage to material and technical resources of appellate and local courts, the need to rebuild them in accordance with European standards;

– insufficient funding of the judiciary;

– slow development of e-justice, digitization of the judicial process, challenges with implementing the E-Court and the Unified Judicial Information and Telecommunication System;

– ineffective use of alternative (out-of-court) and pre-trial dispute settlement mechanisms regulated by legislation;

– the need to introduce direct participation of citizens in the process of administering justice (jury court, justices of the peace);

– low level of voluntary enforcement of court decisions, improper enforcement and non-enforcement of court decisions that have entered into legal force.

Definition of goals. Based on the challenging areas identified, priority objectives and respective measures and deadlines for their achievement have been agreed upon:

– resuming the full-fledged work of the newly formed High Council of Justice and the High Qualification Commission of Judges of Ukraine;

– structural modernization and optimization of judicial governance bodies, including carrying out a comprehensive audit of the powers of justice sector institutions (the High Council of Justice, the High Qualification Commission of Judges of Ukraine, the State Judicial Administration of Ukraine, the Court Security Service, the National School of Judges of Ukraine and others) in order to eliminate duplicated

functions thereof and provide procedures for efficient use of resources;

– filling full-time positions of judges in the busiest courts of first instance and appellate courts;

- commencing operations of the High Court on intellectual property issues;

- improving the procedures for appointment, dismissal, and disciplinary sanctions in respect of judges;

– remapping the existing network of general courts in accordance with the new administrative and territorial system and present challenges, drawing up and adopting relevant draft laws on the liquidation (reorganization) and formation of local general and specialized courts, as a result of which the number of local general courts is to be reduced by at least three times;

– summarizing the extent of the damage caused, estimating material resources required to rebuild damaged buildings/court premises and rebuild new appellate and local courts in accordance with European standards, with due regard to the projected court map;

– designing typical blueprints of "houses of justice" with due regard to best European practices, construction of new buildings for newly created district courts based on such blueprints;

- ensuring a sufficient financing of the judiciary and solving the issue of remuneration of court staff members by introducing respective legislative changes;

– optimizing court costs, improving court fee administration procedures and sending it directly to the general fund of the State Budget;

- ensuring information and cyber security in information and communication systems and services of the judiciary;

– digitalizing court proceedings, developing remote court proceedings, developing the Unified judicial information and telecommunication system;

- working out the issue whether it is possible to use elements of artificial intelligence in court proceedings;

– developing the use of mediation, implementing the Law of Ukraine "On Mediation";

– improving and expanding the use of the institution of juries, adopting and implementing the Law of Ukraine "On Jury Trials";

– forming the model of the institute of justices of the peace and its approbation; developing and adopting respective legislative framework in case of this institute proves to be feasible.

Defininitin of tasks.

To achieve the objectives, specific tasks are defined; carrying them out will contribute to solving respective challenges of the justice system as a whole.

Currently, consolidated proposals have been prepared as to:

– shaping an effective system of judicial governance: honest and professional composition of the High Council of Justice, the High Qualification Commission of Judges of Ukraine for the full-fledged performance of their powers;

– remapping the existing network of local courts and aligning it to the new administrative and territorial system; drawing up and adopting respective draft laws on the liquidation (reorganization) and formation of local general and specialized courts based on the principle of "one district court - one district" (where possible and feasible);

- conducting a functional audit of the powers of justice sector institutions so that to eliminate duplicated functions and balancing competencies; drafting respective legislative changes;

- summarizing the damages suffered by courts and justice sector institutions during the full-scale war of russian state against Ukraine, including because of damage and destruction of court buildings (premises), theft and damage to the equipment, etc.; determining financial indicators, conducting estimations, determining the source of funding (state budget, international technical assistance, donor financial assistance);

– encouraging the parties to use alternative methods of dispute settlement (amendments to procedural codes, the Law of Ukraine "On Court Fees", etc.);

– building infrastructure for information security and cyber protection of courts and judiciary data centers; protection of end points (personal computers, laptops of users), obtaining information security gateways for courts and data centers;

- providing centralized secure storage of documents in the "court cloud" - distributed data centers, while making it possible to store backup copies of information in the public cloud;

– developing the Unified State Register of Enforcement Documents with due regard to architectural requirements for further application of "Big Data" analysis technologies;

– setting forth in legislation the judge's right to free access to information contained in state registers, information systems, data banks, etc. via automated interaction of the Unified Judicial Information and Telecommunication System (through the judge's account) while administering justice;

– study and application of the best world practices and experience of implementing elements of artificial intelligence in court proceedings through cooperation with donor and other international organizations;

– setting forth in legislation the categories of cases that can be considered online, as well as enabling access to information (in particular, public information) exclusively via the Unified Judicial Information and Telecommunication System (in particular, the web portal of the judiciary); preventing the collection of personal data from online services (prohibition of publication of information about the participants in the case).

Expected results. The objectives set can be achieved on time only via coordinated and streamlined work of all parties involved in the reform. It is assumed that the implementation of the interventions planned will influence not only the amendments of the respective legislation, but will actually ensure proper and effective functioning of courts and justice sector institutions during martial law and in the post-war period.

The impact of war on a specific area of analysis:

Because of the full-scale aggression of the Russian Federation against Ukraine, justice in Ukraine is carried out to a limited extent, with a certain balance between the safety of judges, court staff members, participants in the court process and observance of the procedural rights of the parties in the case and the principles of administration judiciary. However, even in such difficult circumstances, a person's constitutional right to judicial protection cannot be restricted since under Articles 10 and 26 of the Law of Ukraine "On the Legal Regime of Martial Law" during martial law, the powers of the courts cannot be terminated. However, in view of the fact that martial law is introduced on the territory of Ukraine, revenues to the special fund of the state budget have significantly decreased, which jeopardizes proper support to the operations of

appellate courts and local courts in the administration of justice. Moreover, judiciary infrastructure was partially destroyed/damaged, there have been thefts and damages to network equipment, the material and resource base of courts and justice sector recorded.

Key challenges (generalized for the area specified):
It is necessary to solve the following challenges, in particular, regarding resumption of the full-fledged work of the newly formed High Council of Justice and the High Qualification Commission of Judges of Ukraine; structural modernization and optimization of judicial governance authorities; remapping the existing network of general courts in accordance with the new administrative and territorial system and existing challenges; developing e-justice, digitization of the court proceedings, enabling remote consideration of cases and the resuming court proceedings lost during the wartime; etc. To address a number of issues, it is necessary to draw up and adopt respective legislative amendments.

Key opportunities (generalized for the area specified):
Relaunching the judiciary of Ukraine as the judicial reform itself is one of the main indicators of assessing whether Ukraine is ready for integration with the European Union. Increased public attention to reforming the judiciary. Political will to modernize justice sector institutions and optimize courts. Attracting international aid to rebuild the infrastructure of the courts in order to ensure international standards of the judiciary.

Key limitations (generalized for the area specified):
Security (restriction of operations because of hostilities and martial law).
Financial (restrictions on state budget funding).
Logistics (restrictions as to the movement of judges, court staff, equipment, etc.).
Information (limited opportunities as to receiving and providing up-to-date information on objects in a temporarily uncontrolled territory or in a combat zone).

2	**Goals, Objectives, Stages Recovery Plan by spheres**			
2.1	**Description of problem No.1 to be solved in this area of the analysis:**	Judicial governance bodies not formed, their faulty operations (duplication of functions, redundant powers, faulty mechanism for bringing judges to responsibility)		
2.1.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.1.2	Task to be achieved to solve the	1. Renewing the composition of the High Council of Justice. 2. Renewing the composition of the High Qualification	3. Structural modernization and optimization of judiciary bodies, introducing online	

	problem at each stage:	Commission of Judges of Ukraine	congress of judges and electronic voting. 4. Introducing an effective mechanism of bringing judges to responsibility. 5. Reviewing mechanism of judge notifying about interference with his/her activity	
2.1.3	Deadline within the stage:	till 12/2022	till 12/2024	
2.1.4	Risks related to achieving the objective:	- because of hostilities, peculiarities of the legal regime of martial law and other objective and subjective circumstances, respective competitions will not be held and completed. - forming the quoras of the HCJ and the HQCJ is carried out in equal partnership with independent entities – international partners and judicial self-government, and therefore the State cannot be solely responsible for how long these processes will last		
2.1.5	Indicator measuring the achievement of an objective	1. At least 15 HCJ members appointed/elected. 2. At least 11 members of the HQCJ appointed	3. Functional audit conducted; legislative amendments introduced to eliminate duplicated functions; balanced and not duplicated mandate of judicial bodies and institutions. 4. A disciplinary complaint against a judge is not considered for more than 6 months. 5. Legislative amendments introduced	
2.1.6	Total amount financial resources required to achieve the objective:			
2.1.7	Link of the objective with other areas:			

2.2	**Description of problem No.2 to be solved in this area of the analysis:**	It is necessary to overcome the staff crisis in the judiciary of Ukraine (procedures for the competition to fill judicial vacancy are too lengthy; A significant number of judicial vacancies in appellate and local courts; loss of human resources as regards court staff members; the system of higher specialized courts is not fully formed)		
2.2.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.2.2	Task to be achieved to solve the problem at each stage:	1. To fill full-time positions of judges in the most overloaded first instance courts. 2. To fill full-time positions of judges in appellate courts 3. To optimize procedures for appointing judges to positions 4. The High Court on Intellectual Property Issues started its operation	1. To fill full-time positions of judges in the most overloaded first instance courts. 2. To fill full-time positions of judges in appellate courts. 3. To optimize procedures for appointing judges to positions. 4. The High Court on Intellectual Property Issues started its operation. 5. Improving the operations of the High Anti-Corruption Court	
2.2.3	Deadline within the stage:	till 12/2022	3. 4. till 12/2024 5. till 12/2025	
2.2.4	Risks related to achieving the objective:	HCJ and HQCJ will not be formed	3. legislative amendments not introduced. 4. HCJ, HQCJ will not be formed. 4. limited financial resources. 5. legislative amendments not introduced, limited financial resources	
2.2.5	Indicator measuring the achievement of an objective	1. The difference in workload does not differ more than 5 times. The number of vacancies in the most overloaded courts reduced by 50% 2. 60 percent of vacancies filled	3. The competition for the position of a judge of any instance does not last more than 3 months. New competitive procedures enable appointing any number of judges. 4. High Court of Intellectual Property operates with the required number of judges 5. HACC and the HACC Appeals Chamber operate with the required number of judges 6. Criminal proceedings in the	

			first instance of the HACC are carried out individually, except for proceedings on especially grave crimes	
2.2.6	Total amount financial resources required to achieve the objective:			
2.2.7	Link of the objective with other areas:			
2.3	**Description of problem No.3 to be solved in this area of the analysis:**	The need to carry out court remapping, aligning it to the new administrative and territorial structure		
2.3.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.3.2	Task to be achieved to solve the problem at each stage:	Remapping the existing network of general courts in accordance with the new administrative and territorial structure and current challenges		
2.3.3	Deadline within the stage:	till 12/2022		
2.3.4	Risks related to achieving the objective:	Constantly changing situation as to the territories under active hostilities, or temporarily occupied territories/territories not under Ukrainian control		
2.3.5	Indicator measuring the achievement of an objective	The number of local general courts reduced by at least three times. The minimum number of judges in a court is 5 judges, the workload per judge in any court does not differ by more than 30%		
2.3.6	Total amount financial resources required to achieve the objective:			

2.3.7	Link of the objective with other areas:			
2.4	**Description of problem No.4 to be solved in this area of the analysis:**	Destruction and damage of premises, theft and damage of equipment and facilities of appellate and local courts, the need to rebuild them in accordance with European standards, in particular, to ensure the accessibility of court premises and court services		
2.4.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.4.2	Task to be achieved to solve the problem at each stage:	Summarizing the scale of damage, calculating the required resources to rebuild the damaged property with due regard to the projected map of the courts. Carrying out a thorough inspection of all damaged buildings to establish financial indicators and estimate the attraction of funds and investments	Rebuilding damaged court buildings / premises and reconstructing new appellate and local courts under international standards, ensuring, inter alia, barrier-free of court premises and court services	Providing newly created (optimized) district courts with staff-only premises. Analyzing the actual lay of land in the premises of existing courts with due regard to the new map of courts in terms of whether they meet construction and architectural standards.
2.4.3	Deadline within the stage:	12.2022	12.2025	12.2032
2.4.4	Risks related to achieving the objective:	Active hostilities taking place in respective territories, temporary occupation of territories. Insufficient funding or limited financial resources. Changing number of damaged/destroyed infrastructure facilities, network and other types of equipment.	Changing number of damaged / destroyed infrastructure facilities, network and other equipment. Complicated logistics. Limited funding for rebuilding damaged courts and premises of justice sector institutions. Insufficient funding for building new courthouses instead of destroyed ones.	Lack of financial resources.
2.4.5	Indicator measuring the achievement of an objective	The total amount of losses determined, financial indicators determined, estimations made, the source of financing determined (state budget, international technical assistance, donor financial assistance). About 34% of the total number of damaged premises or approximately 24 premises of courts and justice sector institutions rebuilt (contingent on whether there are active hostilities in respective territories and whether there are financial resources for that)	The list of premises of courts and that of justice sector institutions which are not feasible to rebuild taking into account the forecasted map of courts defined. Construction works and extensive repairs carried out in respect of buildings / premises, in which it	Standard blueprints of "houses of justice" with due regard to best practices, including international ones drawn up. New premises for newly created district courts on the basis of such blueprints built. 60% of district courts are located in premises that meet all construction and architectural standards and are accessible to less mobile groups.

			is planned to have optimized court-related institutions in the future.	
2.4.6	Total amount financial resources required to achieve the objective:	Allocating budget, attracting funds and investments to rebuild damaged premises of courts and justice sector institutions, carrying out construction works and extensive repairs of court buildings/premises	Allocating budget, attracting funds and investments to rebuild court premises, network and other equipment to ensure proper access to justice for citizens.	
2.4.7	Link of the objective with other areas:			
2.5	**Description of problem No.5 to be solved in this area of the analysis:**	Insufficient funding of the judiciary.		
2.5.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.5.2	Task to be achieved to solve the problem at each stage:	1. Ensuring a sufficient funding for the judiciary. 2. Solving the issue of remuneration of court staff and creating appropriate conditions for court operations	1. Solving the issue of remuneration of court staff and creating appropriate conditions for court operations 2. Improving the procedures for administering court fee and sending it directly to the State Budget general fund	
2.5.3	Deadline within the stage:	till 12/2022	till 12/2023	
2.5.4	Risks related to achieving the objective:	limited financial resources		
2.5.5	Indicator measuring the achievement of an objective	1. The needs of courts in 2022 are 100% financed; 2. Draft law № 6311 of 16.11.2021 on amending the Law of Ukraine "On the Judiciary and the Status of Judges" as to solving the issue of remuneration of court staff members adopted. The lowest salary of a court staff member is not less than UAH 12,000. The maximum amount of incentive payments does not exceed 30%.	funds from the court fee go to the State budget general fund	

2.5.6	Total amount financial resources required to achieve the objective:	1. Budget allocations in the amount of UAH 1,324.1 million directed at ensuring the functioning of appellate and local courts, as well as other justice sector institutions by the end of 2022. 2. The estimated need for extra financial resources for 2023 will be UAH 13,348.8 million.		
2.5.7	Link of the objective with other areas:			
2.6	**Description of problem No.6 to be solved in this area of the analysis:**	**Gaps in cyber security of the information infrastructure of courts and other justice sector institutions**		
2.6.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.6.2	Task to be achieved to solve the problem at each stage:	building basic infrastructure of information security and cyber protection of courts, data centers and user endpoints; storing documents in "court cloud" and storing separate backup copies in public cloud; 100% of software for virtualization infrastructure, databases, courts, etc. are licensed	building backup infrastructure of information security and cyber protection of courts and data centers; building a second backup data center; SOC - Security Operational Center of the judiciary started functioning; obtaining UJITS Comprehensive information protection system certificate	Supporting information security infrastructure operations (service subscriptions, technical support, etc.)
2.6.3	Deadline within the stage:	12.2022	12.2024	12.2032
2.6.4	Risks related to achieving the objective:	inadequate funding; logistics challenges in supplying equipment	inadequate funding; logistics challenges in supplying equipment; poor expertise of SOC specialists; working conditions for cyber security specialists are not achievement-oriented	inadequate funding; obsolete hardware and (or) software
2.6.5	Indicator measuring the achievement of	data centers and operational courts: equipped with information protection gateways and endpoint protection software; use 100% licensed system	data centers and 100% of courts are equipped with backup information security gateways,	proper equipment and software functioning is ensured, required subscriptions and services are available

	an objective	software (OS, databases) and at least 95% application software	judiciary SOC is operational	
2.6.6	Total amount financial resources required to achieve the objective:	643 722	555 514	640 407
2.6.7	Link of the objective with other areas:			
2.7	**Description of problem No.7 to be solved in this area of the analysis:**	**The development of the Unified Judicial Information and Telecommunication System has not been completed. No e-document flow in courts and other justice sector institutions. Courts not having enough computerization tools.**		
2.7.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.7.2	Task to be achieved to solve the problem at each stage:	Developing the Unified State Register of Enforcement Documents; Developing new software for the Unified State Register of Court Judgements (with due regard to new features provided by procedural codes); Connecting the Kyiv Court of Appeal to the "E-Court" subsystem; Implementing automated compilation and maintenance of the judge's file and personnel records of judges and court staff; Implementing e-document management in the State Administration of Ukraine and its territorial administrations; Providing courts with informatization means	Implementing procedural document flow in general and specialized courts; Implementing automated staff accounting system for judges and court staff members; Implementing analytics and statistics subsystems; Equipping 95% of courts with information technologies in accordance with regulations	Supporting e-services operations, their improvement
2.7.3	Deadline within the stage:	12.2022	12.2025	12.2032
2.7.4	Risks related to achieving the objective:	inadequate funding; legislative amendments changing requirements as to registers; no legislative amendments preventing automated collection of personal data and giving judges the right to access state registers	inadequate funding; mistakes in planning and/or implementing systems	inadequate funding; improper assessment of the needs of judges and system users; untimely updating of components which leads to their being obsolete and irrelevant
2.7.5	Indicator measuring the		introducing the updated procedural document flow	

	achievement of an objective		platform in Ukrainian courts; the functioning of the Unified State Register of Court Decisions and the Unified State Register of Enforcement Documents as part of the UJITS; raising citizens' awareness of e-services	
2.7.6	Total amount financial resources required to achieve the objective:	777 483	727 700	1 195 474
2.7.7	Link of the objective with other areas:			
2.8	**Description of problem No.8 to be solved in this area of the analysis:**	**Narrow spread of the use of electronic tools for remote communication between courts and participants in the legal process (notifying parties, sending documents, familiarizing with case materials via electronic communication)**		
2.8.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.8.2	Task to be achieved to solve the problem at each stage:	Expanding E-Court features; Introducing additional sources of communication with participants in court proceedings Streamlining automated interaction of EJITS with information resources of other authorities	10% of applications are submitted to court via electronically (via respective account) 95% of the courts are equipped with scanners for filling e-court	Support for the functioning of electronic services, their improvement
2.8.3	Deadline within the stage:	12.2022	12.2025	12.2032
2.8.4	Risks related to achieving the objective:	political risks (no legislative changes), lack of funding, logistics issues	no funding and no legislative amendments, choosing wrong target audience or wrong channel of interaction with potential users	
2.8.5	Indicator measuring the achievement of	courts' need for planetary scanners is 95% covered	10% of applications are submitted via e-court	

	an objective			
2.8.6	Total amount financial resources required to achieve the objective:	125 874	177 698	210 755
2.8.7	Link of the objective with other areas:			
2.9	**Description of problem No.9 to be solved in this area of the analysis:**	**Addressing the issue whether it is possible to use artificial intelligence in the judiciary**		
2.9.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.9.2	Task to be achieved to solve the problem at each stage:	Drawing up recommendations on the use of AI tools in court proceedings	Using AI tools when searching in the USRCD, the USRED and when predicting the outcome of cases consideration	
2.9.3	Deadline within the stage:	12.2022	12.2025	
2.9.4	Risks related to achieving the objective:	lack of support from international organizations and/or governments in providing information; insufficient amount of information	no aligned vision and no consolidation among stakeholders; inadequate funding; poor qualification of technical specialists	
2.9.5	Indicator measuring the achievement of an objective	systematic analysis of world practices and priority development areas	the efficiency of using artificial intelligence algorithms is more than 90% (in 90% of cases the result obtained meets the requirements and criteria established)	
2.9.6	Total amount financial resources required to achieve the		38 626	

	objective:			
2.9.7	Link of the objective with other areas:			
2.10	**Description of problem No.10 to be solved in this area of the analysis:**	Developing mechanisms for alternative (out-of-court) and pre-trial settlement of disputes		
2.10.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.10.2	Task to be achieved to solve the problem at each stage:		Improving the procedure of settling the dispute with the participation of a judge	1. Encouraging the use of out-of-court methods of dispute settlement, for certain categories of cases, establishing a mandatory pre-trial dispute settlement procedure using mediation and other practices. 2. Developing mediation
2.10.3	Deadline within the stage:		till 12/2025	till 12/2026
2.10.4	Risks related to achieving the objective:			
2.10.5	Indicator measuring the achievement of an objective		the number of cases resolved via the dispute resolution procedure with the participation of a judge increased by 10%	1. The number of cases subject to a mandatory pre-trial dispute settlement procedure increased. A list of such categories of disputes defined; the number of a mediation clause included in contracts and mediation agreements concluded increased by 5%; the number of referrals to mediation in the categories of disputes where amicable settlement is expedient increased by 2%. The number of mediators in the register of mediators increased by 10%
2.10.6	Total amount financial resources required to achieve the			

	objective:			
2.10.7	Link of the objective with other areas:			
2.11	**Description of problem No.11 to be solved in this area of the analysis:**	Introducing direct participation of citizens in the court proceedings (jury trial, justices of the peace)		
2.11.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.11.2	Task to be achieved to solve the problem at each stage:		Improving and expanding engagement of jurors	Shaping of the model of the institute of justices of the peace and its approbation (if feasible).
2.11.3	Deadline within the stage:		till 12/2025	till 12/2030
2.11.4	Risks related to achieving the objective:			
2.11.5	Indicator measuring the achievement of an objective		the Law of Ukraine “On Jury Trial” adopted	legislative amendments introduced
2.11.6	Total amount financial resources required to achieve the objective:			
2.11.7	Link of the objective with other areas:			
2.12	**Description of problem No.12 to be**	Improper enforcement and non-enforcement of court decisions that have entered into force		

	solved in this area of the analysis:			
2.12.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.12.2	Task to be achieved to solve the problem at each stage:	Facilitating operations of the system for enforcing court decisions and decisions of other bodies during martial law	1. Digitization of enforcement proceedings 2. Ensuring enforcement of ECtHR judgements by Ukraine (Ivanov, Burmych case group), (including the implementation of the recommendations of the Committee of Ministers of the Council of Europe)	
2.12.3	Deadline within the stage:	till 12/2022	till 12/2025	
2.12.4	Risks related to achieving the objective:			
2.12.5	Indicator measuring the achievement of an objective	1. The draft law on the peculiarities of enforcing decisions during martial law registered in the Verkhovna Rada of Ukraine 2. Legal framework regarding the peculiarities of enforcing decisions during martial law adopted	1. Legal framework as to mandatory connection and participation of banks in the information interaction between enforcement officers and banks (revised with due regard to comments of the Ministry of Justice and draft law 5660 adopted or a resolution of the National Bank of Ukraine providing for mandatory obligation to connect banks to the ASEP and for banks to participate in the automated garnishment of debtors' funds on accounts adopted) 2. Enabled service of enforcement documents using the Unified State Register of Enforcement Documents 3. The draft law on the lifting	

			moratoria that make enforcing court decisions more complicated registered in the Verkhovna Rada of Ukraine 4. The draft law on introducing effective and efficient judicial control over the enforcement of decisions registered in the Verkhovna Rada of Ukraine 5. The draft law on the effective procedure for establishing or changing the method or manner of enforcing decisions of a non-property nature registered in the Verkhovna Rada of Ukraine 6. Draft law 5660 (On enforcement of decisions) revised, taking into account observations of the Ministry of Justice, and adopted. 7. The number of court decisions enforced has actually increased	
2.12.6	Total amount financial resources required to achieve the objective:			
2.12.7	Link of the objective with other areas:			
3	**Current status of implementing program documents in the field of analysis selected as to the problem identified**			
3.1	**The name of the program document**	**Brief description of the current status**		**Name and last name of the member of the group submitting this information**
3.1.1.	Concept of the Unified Judicial Information and Telecommunication System	Work on developing and implementing UJITS started in 2018, were not completed because of lack of funding		
4	**Definition of tasks to achieve goals from point 2 (for each objective set)**			
	Task (from para 2)	**Description of the task to achieve**	**Deadline**	**Task dependency on other workstreams,**

		the objective		**areas, problems**
	Stage 1: 06/2022 – 12/2022			
	Renewing the composition of the High Council of Justice	Task 1. The President of Ukraine announces a competition for the vacant position of a member of the HCJ		
		Task 2. Congresses (conferences) are convened by competent entities the agenda of which includes electing members of the HCJ		
		Task 3. The Secretariat conducts a special background check of candidates for the positions of members of the HCJ		
		Task 4. The Ethics Council conducts integrity checks of HCJ candidates		
		Task 5. Entities in charge of electing/appointing members of HCJ elect/appoint HCJ members		
	Renewing the composition of the High Qualification Commission of Judges of Ukraine			
		Task 6. The competition commission resumes its operations and conducts a competition for the position of a member of the HQCJ. The High Council of Justice appoints members of the High Qualification Commission of Judges of Ukraine		
	Stage 2: 01/2023 – 12/2025			
	Structural modernization and optimization of judicial governance bodies, introducing online congress of judges and electronic voting	Task 7. Conducting a comprehensive audit of the powers of justice sector institutions (HCJ, HQCJ, SJA, CSS, NSJU and others) to eliminate duplicated functions, ensure procedures for effective use of resources		
		Task 8. Drawing up draft		

		legislative acts regarding revision of powers and functions of justice sector institutions		
		Task 9. Adopting relevant laws and their implementation		0
	Stage 2: 01/2023 – 12/2025			
	Improving the mechanism for bringing a judge to disciplinary responsibility	Task 10. Drawing up and adopting respective legislative amendments		
	Stage 2: 01/2023 – 12/2025			
	Reviewing the mechanism for the judge to notify that his/her activities have been interfered with;	Task 11. Drawing up and adopting respective legislative amendments		
	Stage 1: 06/2022 – 12/2022			
	Fill full-time positions of judges in the most overloaded first instance courts.	Task 12. The President of the Supreme Court announces the procedure for secondment to the busiest courts for all judges		
		Task 13. Judges are seconded from the least loaded courts to the most loaded courts (both from the first instance courts and from appellate courts)		
	Stage 2: 01/2023 – 12/2025			
		Task 14. Competitions for vacant positions are held in accordance with new procedures – providing courts with the necessary server and computer equipment, and IT tools, as envisaged in the regulations;		

		- introduction of the principles of Good Data Governance – data management and transition from reporting to strategic forecasting; - finalization of the electronic court, including video conferencing software, eCourt mobile application; - implementation of the principles of minimizing the amount of information entered by the user, as well as one-time entry and multiple use of data; - creation of the judiciary contact center; - promotion of electronic court services, creation of educational and informational programs and materials, user training, cooperation with mass media		
	Stage 1: 06/2022 – 12/2022			
	Fill full-time positions of judges in appellate courts	Task 15. Introducing the possibility of secondment of judges of the first instance who are in office for more than 5 to 10 years from courts with moderate workload to courts of appellate instance with a significant shortage of judges		

	Stage 2: 01/2023 – 12/2025			
		Task 16. Holding a competition to fill judicial positions in appellate courts in accordance with new procedures		
	Stage 1: 06/2022 – 12/2022			
	Optimize procedures for appointing judges to positions	Task 17. Development of draft legislative acts on revision of procedures for appointing judges to positions		
	Stage 2: 01/2023 – 12/2025			
		Task 18. All judges are appointed based on the results of the competition (selection to be canceled)		
		Task 19. Judges with work experience should have a priority in career development and “horizontal transfer” (for example, appointment from a district court to a regional center)		0
		Task 20. Quotas (from 10% to 50%) are introduced for NON-JUDGES, while competitive procedures for them are conducted separately from judges (this will only apply to the appellate and cassation instances, since the first-		

		competition at the first instance is held only for NON-JUDGES)		
		Task 21. All exams within the competitions are held with minimum “human” interference		0
		Task 22. Adoption of relevant laws and their implementation		0
	Stage 1: 06/2022 – 12/2022			
	The High Court on Intellectual Property Issues started its operation	Task 23. Completion of competitions to fill judicial positions in the High Court on Intellectual Property and its Appeals Chamber		
	Stage 2: 01/2023 – 12/2025			
		Task 24. Organizational and financial conditions in place for the Court to start working		
	Stage 2: 01/2023 – 12/2025			
	Improving the operations of the High Anti-Corruption Court	Task 25. Adopt a decision on increasing the number of judges in the High Anti-Corruption Court and the Appeals Chamber of the High Anti-Corruption Court		
		Task 26. Hold selection to fill vacant judicial positions in the High Anti-Corruption Court and the Appeals Chamber of the High Anti-Corruption Court with the		0

		involcement of the Public Council of International Experts		
		Task 27. Develop and adopt a draft law, according to which the panel hearing of crimes at HACC in the first instance will be carried out by one judge, except for hearings of special serious crimes		0
	Stage 1: 06/2022 – 12/2022			
	Remapping the existing network of general courts in accordance with the new administrative and territorial structure and current challenges	Task 28. Conduct analysis of the existing network of local courts, prepare proposals for its optimization and bringing it in line with a new administrative-territorial system		
	.	Task 29. Eliminate courts in remote cities logistic support (restoration) of which is impractical from the financially standpoint. Premises to be transferred (for a fee/free of charge) to the balance of territorial communities for the formation of Transparent Offices, including with the service of remote participation in court hearings using electronic means of communication.		0
		Task 30. Development and		0

		adoption of relevant draft laws on the liquidation (reorganization) and creation of local general and specialized courts		
		Task 31. Legislative changes developed and adopted		0
	Stage 1: 06/2022 – 12/2022			
	Summarizing the scale of damage, calculating the required resources to rebuild the damaged property with due regard to the projected map of the courts. Carrying out a thorough inspection of all damaged buildings to establish financial indicators and estimate the attraction of funds and investments.	Task 32. Summarizing the scale of damage, calculating the necessary material resources for the restoration of damaged property, taking into account the projected map of courts	12.2022	Active hostilities in the relevant territories, temporary occupation of territories. Insufficient funding or limited financial resources. Change in the number of damaged/destroyed infrastructure objects, network equipment, facilities and resources.
		Task 33. Conduct a thorough inspection of damaged court buildings (where possible, taking into account the conditions of martial law, active hostilities, temporary occupation of territories, etc.) to form financial indicators and calculate the attraction of funds and investments.	12.2022	
		Task 34. Preparation of appropriate design and estimate documentation	12.2022	
		Task 35. Allocation of budget, attraction of funds and investments for restoration of the destroyed premises of courts and justice	12.2022	

		system bodies and institutions		
	Stage 2: 01/2023 – 12/2025			
	Rebuilding damaged court buildings / premises and reconstructing new appellate and local courts under international standards, ensuring, inter alia, barrier-free of court premises and court services	Task 36. The list of premises of courts and judicial institutions, which are impractical to restore, taking into account the projected map of courts, is drafted.	6.2023	Change in the number of damaged/destroyed infrastructure objects, network equipment, facilities and resources. Complicated logistics. Limited funding for restoration of damaged premises of courts and justice system bodies. Insufficient funding for the construction of new court buildings instead of destroyed ones.
		Task 37. Carrying out construction works and major repairs of buildings/premises, which are designated for the optimized judicial institutions in the future.	2023-2025	
		Task 38. Allocation of budget, attraction of funds and investments for restoration of court premises, network equipment, facilities and resources, with the aim of ensuring proper access to justice for citizens	2023-2025	
	Stage 3: 01/2026 – 12/2032			
	Providing newly created (optimized) district courts with staff-only premises. Analyzing the actual lay of land in the premises of	Task 39. Analysis of the real state of the premises of existing courts, taking into account the new map of courts, as to their compliance	12.2026	Lack of financial resources.

	existing courts with due regard to the new map of courts in terms of whether they meet construction and architectural standards.	with construction and architectural standards		
		Task 40. Development of typical projects of "houses of justice' taking into account best practices, including international ones. Construction of new buildings for the newly created district courts based on such projects	2026-2032	
	.	Task 41. Allocating budget, attracting funds and investments for the construction of new court buildings	2026-2032	
	Stage 1: 06/2022 – 12/2022			
	Ensuring a sufficient funding for the judiciary	Task 42. Making appropriate amendments to the Law of Ukraine "On the State Budget of Ukraine for 2022" and increasing budget allocations under budget program 0501020 "Ensuring the administration of justice by local and appellate courts and the functioning of the justice system bodies and institutions"	12.2022	Lack of financial resources.
		Task 43. Budget allocations	12.2022	

		amounting to 1,324.1 million UAH allocated to ensure the operation of appellate and local courts, and of other justice system institutions until the end of 2022.		
		Task 44. Ensuring 100 percent financing of courts and justice system bodies and institutions in 2022	12.2022	
	Stage 1: 06/2022 – 12/2022			
	Solving the issue of remuneration of court staff and creating appropriate conditions for court operations	Task 45. Draft law No. 6311 dated 16.11.2021 on amendments to the Law of Ukraine "On the Judiciary and the Status of Judges" regarding the regulation of the remuneration of court employees adopted	12.2022	
	Stage 2: 01/2023 – 12/2025			
		Task 46. Allocation of additional funds from the state budget for the specified purposes.	2023-2025	
	Stage 2: 01/2023 – 12/2025			
	Improving the procedures for administering court fee and sending it directly to the State Budget general fund	Task 47. Development and adoption of relevant legislative amendments		0
	Stage 1: 06/2022 – 12/2022			
	Ensuring information and	Task 48. Building the	12.2022	adequate funding from the state budget

	cybersecurity in the information and telecommunication systems and services of the judiciary	infrastructure of information security and cyber protection of courts and data centers of the judiciary; protection of endpoints (personal computers, laptops of users). Purchase of information security gateways for courts and data centers.		or donor assistance is needed
		Task 49. Legalization of virtualization infrastructure software and databases of distributed data centers	12.2022	adequate funding from the state budget or donor assistance is needed
		Task 50. Legalization of court software	12.2022	adequate funding from the state budget or donor assistance is needed
		Task 51. Provision of centralized secure storage of documents in the “court cloud” - distributed data centers, with the possibility of storing backup copies of information in public clouds	12.2022	
	Digitization of court proceedings, development of remote justice, building up UJITS	Task 52. Integration of the procedural document flow system of the Kyiv Court of Appeal with the electronic court	12.2022	adequate funding from the state budget or donor assistance is needed
		Task 53. Introduction of a centralized electronic general document flow system in the SJAof Ukrain eand its territorial units	12.2022	adequate funding from the state budget or donor assistance is needed
		Task 54. Development of the Unified State Register of	12.2022	adequate funding from the state budget or donor assistance is needed

		Writs of Executions taking into account architectural requirements for further application of "Big Data" analysis technologies		
		Task 55. Development of the Unified State Register of Court Decisions taking into account architectural requirements for the further application of "Big Data" analysis technologies	12.2022	adequate funding from the state budget or donor assistance is needed
		Task 56. Introduction of a centralized secure system for the automated creation, maintenance, and publication of judicial dossiers, personnel records of judges and court staff	12.2022	adequate funding from the state budget or donor assistance is needed
		Task 57. Provision of IT tools to courts (server and computer equipment) for proper functionning of the infrastructure of courts; work of judges and court staff in accordance with existing regulations	12.2022	adequate funding from the state budget or donor assistance is needed
		Task 58. Legislative consolidation of the judge's right to free access, when administering justice, to information contained in state registers, information systems, data banks, etc.	12.2022	

		using the means of the Unified Judicial Information and Telecommunication System (through the judge's electronic cabinet)		
		Task 59. Implementation of automated interaction (application programming interface) with the services of Ukrposhta and the print center to speed up and reduce the cost of sending documents to parties (receiving from parties)	12.2022	support of international donor organizations is needed
	Using artificial intelligence in the administration of justice	Task 60. Study of the best world practices and experience of implementing artificial intelligence in the administration of justice through cooperation with donor and other international organizations	12.2022	
	Ensuring barrier-free court proceedings	Task 61. Legislative consolidation of the categories of cases that can be heard online, as well as the possibility of access to information (in particular, public information) exclusively through the means of the Unified Judicial Information and Telecommunication System (in particular, the web portal	12.2022	

		of the judiciary); preventing the collection of personal data from online services (prohibition of publication of information about the participants in a case)		
		Task 62. Development of the Constitutional Justice

The large-scale armed aggression of the russian federation against Ukraine, in general, did not create new problems, but significantly exacerbated the existing ones, in the field of constitutional justice. The everlasting "need for reforming" was either postponed for an indefinite term or carried out hastily without proper public discussion and expert analysis. At the same time, under martial law, the operation of any state body becomes specific, and its timely regulation will ensure the proper functioning of the body itself and promote the rapid recovery and development of the whole country in the postwar period.

The society is interested, as never before, in the operation of the Constitutional Court of Ukraine which would ensure the supremacy of the Constitution of Ukraine; preserve the constitutional order in Ukraine; and reaffirm human rights and freedoms. However, today there are many problems around this body of constitutional jurisdiction, solving which would meet public demand for justice and demonstrate to the world high standards of the constitutional justice.

Definition of problems. The main reason and, at the same time, the catalyst for the reform of the constitutional justice is the lack of regulations and practical experience of the functioning of the Constitutional Court of Ukraine under martial law.

Thus, the following key problems have been identified and systematized in the area of the constitutional justice development:

- imperfect procedure for appointment to the judicial positions in the Constitutional Court of Ukraine;
- imperfect procedure for dismissal of justices of the Constitutional Court of Ukraine;
- imperfect procedure for disciplinary liability of justices of the Constitutional Court of Ukraine;
- insufficient effectiveness of the mechanism of compliance and monitoring of onbservance of the anti-corruption legislation by justices of the Constitutional Court of Ukraine;
- imperfect legal regulation of the organization of operation of the Constitutional Court of Ukraine and constitutional proceedings.

Definition of goals. Based on the outlined problems, the priority goals and deadlines have been agreed and established:

- updating the system of bodies and transparent procedures for forming the composition of the Constitutional Court of Ukraine;
- improvement of procedures for appointment to positions, dismissal, disciplinary actions against justices of the Constitutional Court of Ukraine;
- providing an effective mechanism for compliance and monitoring of observance of the anti-corruption legislation by justices of the Constitutional Court of Ukraine;
- improvement of legal regulation of the organization of operation of the Constitutional Court of Ukraine and constitutional proceedings.

Definition of tasks. In order to achieve goals, specific tasks have been agreed and defined; their completion would contribute to solving of the relevant problems in the field of constitutional justice.

The work to prepare strategic initiatives and compile proposals is currently underway which would facilitate the development of draft regulations, the adoption and implementation of which are necessary for the effective work of the Constitutional Court of Ukraine and the restoration of Ukraine in the war and postwar periods, including:

– development of the draft Law of Ukraine "On Amendments to the Law of Ukraine "On the Constitutional Court of Ukraine" as to the Operation of the Constitutional Court of Ukraine in Connection with Martial Law" in terms of entry into force of decisions issued by the Constitutional Court of Ukraine under martial law, if laws or other regulations governing issues that form the basis of the constitutional order of Ukraine are declared unconstitutional in such decisions. It is proposed to develop a mechanism under which such decisions will take effect no earlier than three months after the end of martial law. This will allow the parliament or other bodies whose acts would be declared unconstitutional to fill the gap in legal regulation and prevent problematic situations in the relevant area;

- development of a draft law on amendments to the Law of Ukraine "On the Constitutional Court of Ukraine" in terms of regulating the communication policy of the Constitutional Court of Ukraine and information to be published on the official website of the Court. It is proposed to provide obligatory daily updating of information on the website of the Constitutional Court of Ukraine, in particular on the results of sessions and plenary sessions of boards, senates, and the Grand Chamber.

Expected results. The goals set by the working group can be achieved in time solely in the case of well-coordinated and well-organized work of all parties involved in the reform. It is assumed that the implementation of the planned measures will affect not only the change of relevant legislation, but also the actual facilitation of proper and effective functioning of the Constitutional Court of Ukraine under martial law and in the postwar period.

Ensuring an effective communication policy of the Constitutional Court of Ukraine is espected to promote openness of this body; improvement of certain procedures (appointment, dismissal, disciplinary actions against judges); proper performance of judicial duties, provision of an effective mechanism for compliance and monitoring of observance of the anti-corruption legislation by the justices of the Constitutional Court of Ukraine – in other words, their integrity. Finally, the solution of all problems is aimed at improving the organization and operation of the body of constitutional jurisdiction, the existing constitutional proceedings, as well as the formation of the Constitutional Court of Ukraine with a high level of trust in the society.

Impact of war on the defined area of analysis:

The war showed the unwillingness of the Constitutional Court of Ukraine to work in wartime, and also exacerbated the problems that existed in the operation of the Constitutional Court of Ukraine before the war. This indicates the urgent need to improve legal regulation of the Constitutional Court of Ukraine both in peacetime and under martial law.

Key challenges (summarized for the defined area):

Lack of regulations and practical experience as to the operation of the Constitutional Court of Ukraine under martial law.

2	**Goals, objectives, stages of the Recovery Plan as per the area**			
2.1	**Description of problem No. 1 to be solved in this area of the analysis:**	Imperfect procedure for appointment to the judicial positions in the Constitutional Court of Ukraine

Improving the system of public prosecution

The prosecutorial reform, which has been going on in Ukraine since 2019, has had a comprehensive impact on the external and internal processes of the system in question. Despite the successful reform of certain areas, on the one hand, and a number of legislative, organizational and law enforcement issues, on the other hand, the system of public prosecution has now untapped potential to be actualized within the concept of balanced, consistent, and gradual strategic planning.

The implementation of the plan to improve the system of public prosecution will create preconditions for the implementation of the principles of professionalism, independence, responsibility and further development of the prosecutor's office, while taking into account the program-based method. As a result, we aim to increase the efficiency of the prosecutorial system, in particular to ensure the implementation of constitutional functions and powers; improve external and internal communications; implement a modern human capital management system; expand the resources of the prosecution, which is a necessary component of systemic transformation in the country, in particular in the context of European integration.

Thus, it is necessary to improve the exercise by prosecutors of their constitutional powers to uphold public prosecution; organize and administer pre-trial investigation; and represent the State in court, which is possible with the preparation and adoption of certain draft laws which will consolidate the prosecutors' functions of organizing a pre-trial investigation and will fill the gaps in regulatory acts the prosecutorial system abides by in its operation.

As one of the stages of the respective task, it is planned to improve the disciplinary procedure, which provides for transparency and objectivity when considering the applications on disciplinary misconduct of prosecutors; inevitability and proportionality of responsibility for them; consistency and uniformity of misdemeanors; as well as prevention of interference with the prosecutor's independence through disciplinary proceedings.

In addition, it is important to introduce systemic tools for the formation of criminal policy in order to coordinate the activities of law enforcement agencies in the fight against crimes and implement criminal policy in priority areas. Relevant changes can solve the problem of the over-bureaucratized criminal justice system in Ukraine and help recreating a comprehensive nation-wide strategy to combat crime.

Impact of the war on the defined area of analysis:

Before the war, there was a complete personnel reshuffling within the system of public prosecution with elimination, through the attestation procedure, of those prosecutors who failed to meet the requirements of integrity and professionalism; selection of external candidates for prosecutorial positions was conducted; a change in the system of selection to the prosecutors' offices was initiated; a system for assessing the quality of prosecutors' work and new approaches to the professional development and promotion of prosecutors have been introduced; prosecutorial self-government bodies and disciplinary bodies were established; the foundations for improving disciplinary procedures were laid, which in general became the ground for building a European-style prosecutorial system Ukraine. For the first time, the Strategy for the Development of the Prosecutor's Office for 2021–2023 and the Action Plan for its implementation were approved, which set out the strategic priorities of the prosecutor's office for the coming years in order to bring the prosecutor's office in line with European standards.

Key challenges (summarized for the defined area):

Regarding the improvement of the exercise of constitutional powers by prosecutors:

▪ inconsistency of the norms of the Law of Ukraine "On the Prosecutor's Office", the Criminal Procedure Code of Ukraine, and regulatory act acts with the norms of the Constitution of Ukraine;

▪ uncertainty of the procedural content of functions of the prosecutor's office in organizing a pre-trial investigation;

▪ lack of a unified procedure for setting priorities for the activities of the prosecutorial system and law enforcement agencies;

▪ lack of resources for high-quality investigation of criminal offenses;

▪ lack of real safeguards against abuse of procedural rights;

▪ need to introduce a system of specialization of prosecutors, alongside a mechanism for transparent and competitive (evidence-based) appointment thereof in order to effectively use available staff and resources;

Regarding the introduction of systemic tools for criminal policy-making:

▪ imperfection of the state strategy for combating crime;

▪ unsystematic and uncoordinated nature of the formation and implementation of criminal policy, which is carried out in the absence of proper organizational and coordination influence;

▪ overbureaucratized criminal justice system in Ukraine;

▪ limited role of criminal justice which consists in responding to criminal offenses that have already been committed (reactive law enforcement paradigm), low level of implementation of the preventive function in the today activities of criminal justice bodies;

▪ insufficient coordination of law enforcement activities in the field of crime prevention and implementation of criminal policy in priority areas;

Regarding transparent and objective consideration of a disciplinary complaint about a disciplinary misconduct by a prosecutor; inevitability and proportionality of a prosecutor's disciplinary liability:

▪ improving the disciplinary procedure against the criteria set out in the GRECO recommendations, and implementation of sub-clause 2.5.2.2 of clause 2.5.2 of the Strategy for the Development of the Prosecutor's Office for 2021–2023, approved by the Order of the Prosecutor General dated October 16, 2020 No. 489

Key opportunities (summarized for the defined area):

1. Stability and consistency of criminal policy formation. Strengthening the capacity of law enforcement agencies on the basis of integrity,

systemic approach, and coordination of their activities.
2. Clarity and efficiency of implementation of the constitutional functions by the prosecutorial system..
3. Transparent and objective consideration of disciplinary complaints about the commission of a disciplinary misconduct by a prosecutor; inevitability and proportionality of a prosecutor's disciplinary liability.

Key constraints (summarized for the defined area):
Lack of the state criminal doctrine, concept, and strategy for the implementation of criminal policy; the tendency to fragmentary, sometimes unsystematic, changes in legislation

2	**Goals, objectives, stages of the Recovery Plan as per the area**			
2.1	**Description of problem No. 1 to be solved in this area of the analysis:**	Inconsistency of the norms of the Law of Ukraine "On the Prosecutor's Office", the Criminal Procedure Code of Ukraine, and regulatory act acts with the norms of the Constitution of Ukraine		
2.1.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.1.2	Task to be achieved to solve the problem at each stage:	Bringing the Law of Ukraine "On the Prosecutor's Office", the Criminal Procedure Code of Ukraine, and other legislative acts in compliance with the Constitution of Ukraine in terms of ensuring the implementation of the functions of the prosecutor's office as to the organization and procedural guidance of pre-trial investigations and pressing charges within public prosecution		
2.1.3	Deadline within the stage:	July 2022 – end of 2022		

2.1.4	Risks related to achieving the objective:	lengthy consideration of the relevant draft laws in the Parliament		
2.1.5	Indicator measuring the achievement of an objective	agreed and coordinated activity of the prosecutorial system, effective performance of constitutional functions by the prosecutor's office		
2.1.6	Total amount financial resources required to achieve the objective:	No additional expenditures from the state budget of Ukraine needed	.	
2.1.7	Link of the objective with other areas:	"Development of the criminal justice bodies"		
2.2	**Description of problem No. 2 to be solved in this area of the analysis:**	Uncertainty of the procedural content of functions of the prosecutor's office in organizing a pre-trial investigation; its correlation with procedural guidance of a pre-trial investigation, as to the resolution of other issues in accordance with the law during criminal proceedings; supervision of covert and other investigative actions of law enforcement agencies		
2.2.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.2.2	Task to be achieved to solve the	Amendments to the Law of Ukraine "On the Prosecutor's Office", the Criminal Procedure Code of Ukraine that are aimed at the		

	problem at each stage:	regulation of the prosecutorial function of organizing a pre-trial investigation		
2.2.3	Deadline within the stage:	July 2022– end of 2022		
2.2.4	Risks related to achieving the objective:	lengthy consideration of relevant draft laws in the Parliament		
2.2.5	Indicator measuring the achievement of an objective	determined procedural content of the functions of the prosecutor's office in relation to the organization of a pre-trial investigation; delineated powers of the prosecutor and heads of a pre-trial investigation body and an inquiry body regarding the organization of a pre-trial investigation; established delineation of powers in this regard between the heads of the prosecutor's offices and prosecutors who carry out procedural guidance of pre-trial investigations		
2.2.6	Total amount financial resources required to achieve the objective:	No additional expenditures from the state budget of Ukraine needed		
2.2.7	Link of the objective with other areas:	"Development of the criminal justice bodies"		

2.3	**Description of problem No. 3 to be solved in this area of the analysis:**	Lack of a unified procedure for setting priorities for the activities of the prosecutorial system and law enforcement agencies		
2.3.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.3.2	Task to be achieved to solve the problem at each stage:		Determined priority areas of formation and implementation of criminal policy. Formation of policies regarding the prioritization of criminal proceedings and granting a prosecutor with appropriate powers to apply it	
2.3.3	Deadline within the stage:		IV trimester 2022 – December 2023	
2.3.4	Risks related to achieving the objective:		lengthy consideration of relevant draft laws in the Parliament	
2.3.5	Indicator measuring the achievement of an objective		ensured prompt identification of pressing problems in the criminal justice system and developed proposals to address them;	

			priorities of the prosecutor's office and law enforcement agencies coordinated with the help of coordination mechanisms; determined rational limits for the use of criminal justice resources	
2.3.6	Total amount financial resources required to achieve the objective:		No additional expenditures from the state budget of Ukraine needed	
2.3.7	Link of the objective with other areas:		"Development of the criminal justice bodies"	
2.4	**Description of problem No. 4 to be solved in this area of the analysis:**	Lack of resources for high-quality investigation of criminal offenses. Need to introduce a system of specialization of prosecutors in order to effectively use available personnel and resources.		
2.4.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.4.2	Task to be achieved to solve the problem at each stage:		Enshrined clear objective criteria for the distribution of workload among prosecutors, including the criterion of specialization.	

			Restorative justice mechanisms implemented at the pre-trial stage of criminal proceedings	
2.4.3	Deadline within the stage:		IV trimester 2022 – December 2023	
2.4.4	Risks related to achieving the objective:		lengthy consideration of relevant draft laws in the Parliament	
2.4.5	Indicator measuring the achievement of an objective		developed restorative justice and other alternative models of resolution of criminal conflicts; simplified procedure for carrying out criminal proceedings, ensuring the effectiveness of the implementation of the prosecutorial functions in the relevant (specialized) areas	
2.4.6	Total amount financial resources required to achieve the objective:		requires minor additional expenditures from the State Budget of Ukraine or coverage at the expense of donor aid for organizational and technical support of the mechanism	
2.4.7	Link of the		“Development of the	

	objective with other areas:		criminal justice bodies”	
2.5	**Description of problem No. 5 to be solved in this area of the analysis:**	Need to introduce a mechanism for transparent and competitive (evidence-based) appointment of prosecutors		
2.5.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.5.2	Task to be achieved to solve the problem at each stage:		Further development of the mechanism of transparent and competitive (evidence-based) selection and appointment of prosecutors	
2.5.3	Deadline within the stage:		January 2023 - December 2025	
2.5.4	Risks related to achieving the objective:		lengthy consideration of relevant draft laws in the Parliament	
2.5.5	Indicator measuring the achievement of an objective		The Council of Prosecutors of Ukraine the disciplinary body, and the corresponding system of proper selection and appointment of	

			prosecutors (taking into account international standards) effectively support independence of the system in general and of individual prosecutors in particular; contribute to increasing trust in them within the system and public confidence in the prosecutor's office	
2.5.6	Total amount financial resources required to achieve the objective:		No additional expenditures from the state budget of Ukraine needed	
2.5.7	Link of the objective with other areas:		"Development of the criminal justice bodies"	
2.6	**Description of problem No. 6 to be solved in this area of the analysis:**	Imperfection of the state strategy for combating crime; unsystematic and uncoordinated nature of the formation and implementation of criminal policy, which is carried out in the absence of proper organizational and coordination influence		
2.6.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.6.2	Task to be achieved to		Carried out an analysis of the current situation of the	

	solve the problem at each stage:		formation and implementation of state policy in the field of combating crime based on a problem-oriented approach. Comprehensive nation-wide strategy to combat crime prepared.	
2.6.3	Deadline within the stage:		January 2023 - December 2025	
2.6.4	Risks related to achieving the objective:		lengthy consideration of relevant draft laws in the Parliament	
2.6.5	Indicator measuring the achievement of an objective		systematic and coordinated nature of criminal policy formation and implementation (Criminal Policy Strategy); effective mechanisms of regular interaction with local self-government bodies and representatives of civil society.	
2.6.6	Total amount financial resources required to achieve the objective:		No additional expenditures from the state budget of Ukraine needed	

2.6.7	Link of the objective with other areas:		"Development of the criminal justice bodies"	
2.7	**Description of problem No. 7 to be solved in this area of the analysis:**	Ensuring transparent and objective consideration of a disciplinary complaint about a disciplinary misconduct by a prosecutor; inevitability and proportionality of a prosecutor's disciplinary liability		
2.7.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.7.2	Task to be achieved to solve the problem at each stage:		Digitized disciplinary procedures; increased level of awareness and enhanced external communications. Annual evaluation system of the prosecutor's performance in place.	
2.7.3	Deadline within the stage:		December 2023	
2.7.4	Risks related to achieving the objective:		Lack of adequate funding of ToR	
2.7.5	Indicator measuring the achievement of an		increased awareness among the public about the grounds and procedure for disciplinary liability of prosecutors;	

	objective		set of of moral, material, and career incentives for prosecutors in place	
2.7.6	Total amount financial resources required to achieve the objective:		requires minor additional expenditures from the State Budget of Ukraine or coverage at the expense of donor aid for organizational and technical support of the mechanism	
2.7.7	Link of the objective with other areas:		“Development of the criminal justice bodies”

Criminal Justice Institutional Development Framework

The specific war-affected areas under analysis:

Currently, criminal justice in Ukraine has faced new challenges. As a result of the war, the protracted armed conflict in the east of Ukraine and the temporary occupation of several territories of Ukraine, the criminogenic situation and the structure of crime have changed; the law enforcement practice shows endemic problems of a legal and institutional nature, causing failures in proper functional performance by criminal justice, and in particular by the law enforcement agencies. Legislative initiatives in the field of criminal justice are sometimes recognized as not compliant with the Constitution of Ukraine. They are proposed in the absence of a comprehensive approach, and they often lack either scientific or practical justification. The legal certainty across the provisions of the Criminal and Criminal Procedure Codes of Ukraine is insufficient, which causes gaps in legal regulation, complexity of legal qualification of a crime, creates obstacles to the protection of individuals, society and the state from criminal offenses, their expedite and complete investigation and trial, causes lack of unity of law enforcement practices.

In addition, deeper digitalization of law enforcement agencies' operations is planned in Ukraine. Implementation of full-fledged electronic criminal proceedings will solve the issue of incompatibility of ICT systems in courts, prosecutor's offices, law enforcement agencies, penitentiary and other criminal justice stakeholders.

The implementation of properly functioning security measures for parties to criminal proceedings will provide prosecutors with more tools to ensure compliance with the rights and interests of victims, witnesses, as well as the fundamental rights of suspects and accused persons, as well as other participants in the process in accordance with high standards of human rights protection. In addition, it will allow developing and implementing a tangible victims and witnesses protection programs with the definition of the state body responsible for their implementation and will establish better communication between investigators and prosecutors with victims and witnesses.

Equally important is the goal to implement an effective monitoring of criminogenic threats and preventing and detecting criminal offenses. By achieving the corresponding goal, this will help build a criminal offense prevention policy in the state instead of responding to criminal offenses that have already been committed.

Key challenges (summarized for the defined area):

Lack of the state's vision for criminal justice development that would meet today's legal, institutional and law-enforcement challenges.
Regarding the rules of criminal procedure in extraordinary circumstances, state of emergency and at wartime, the following issues are observed:

- lack of dedicated procedural arrangements for criminal proceedings in extraordinary circumstances, state of emergency and at wartime
- there is need to distinguish the specific rules of criminal proceedings in the conditions of martial law and state of emergency, as well as

the state of war.

Regarding the standardization of the investigative jurisdiction rules considering operational improvements across law enforcement agencies:

- there is need to develop a framework law on defining the legal status of law enforcement agencies, their place in the government system and clear split of the functions assigned to them
- insufficiently defined rules of substantive and territorial jurisdiction over criminal offenses, their compatibility with each other
- insufficient legislative consolidation of the powers of the prosecutor in changing the jurisdiction over criminal offenses.

Regarding the implementation of a full-fledged electronic criminal proceeding system:

- incompatibility of existing ICT systems in courts, prosecutor's offices, law enforcement agencies, penitentiary and other criminal justice stakeholders, their limited functionally (in particular, of the eCase Management System)
- poor operational information sharing between criminal justice institutions
- no proper mechanisms for lawyers to have access to electronic criminal proceedings.

Regarding the precautionary move institutional improvement:

- lack of appropriate unification in procuring evidence during a precautionary move
- poor procedural arrangements for applying a precautionary move (temporary access to things and documents, temporary confiscation of assets, seizure of assets, etc.)
- lack of legal regulation of the application of a measure of restraint in the form of supervision by a military unit commander
- need for further improvement of the regulatory framework on the detention procedure to have it aligned with the Constitution of Ukraine and the provisions of the ECHR to prevent unrecorded detention
- no effective enforcement actions on parties to criminal proceedings who abuse their procedural rights/obstruct the administration of justice, by imposing a fine, dismissing a motion, etc.
- rare practice of electronic recording of detainee actions – Custody Records.

Regarding additional institutional staffing to handle criminal misdemeanours:

- need to ensure promptness and efficiency in investigating criminal misdemeanours
- no pre-trial dispute resolution mechanism in criminal misdemeanour cases (penalty/fine under agreement between the parties, etc.).

Regarding the effective security measures for parties to criminal proceedings:

- no dedicated program for the protection of applicants, victims and witnesses with a responsible state body responsible assigned for its proper implementation
- no tools for proper communication of the inquirers, investigators and prosecutors with applicants, victims and witnesses
- insufficiency of security guarantees for whistle-blowers in any criminal (not only corruption) cases.

Regarding the improvement in law enforcement intelligence operations by law enforcement agencies:

- inconsistency of the current version of the Law of Ukraine 'On law enforcement intelligence operations' (*often found as 'Law of Ukraine on Operational Investigative Activity'*) to the current circumstances and needs
- malfunction of the system of operational information sharing between criminal justice institutions
- lack of proper Delineation of the institutions of covert investigative (search) activities and law enforcement intelligence operations.

Implementation of an effective monitoring of criminogenic threats, prevention and detection of criminal offenses:

- there is need to encourage more proactive activity of law enforcement agencies to detect and prevent crime.

Key capabilities (summarized for the defined area):

1. Focusing rather on prevention of criminal threats and use of a risk-based approach.
2. Standardization of law enforcement operations, their alignment with the judiciary and the prosecution.
3. Rational distribution of powers between law enforcement agencies based on clear mandate, avoiding duplications and overlaps in their operations.
4. Efficient and expedite exchange of information between criminal justice institutions, development of law enforcement databases.
5. Simplification of procedures in criminal matters, as well as rational use of criminal justice resources.

2	**Goals, Objectives, Recovery Plan Stages by Areas**	
2.1	**Description of Problem 1, which needs to be solved in the specified area of analysis:**	Lack of the state's vision for criminal justice development that would meet today's legal, institutional and law-enforcement challenges

2.1.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.1.2	The goal to be achieved to solve the problem at each stage:	Development, approval and implementation of the Criminal Justice Development Vision/Concept, which defines the scope and focus areas in criminal justice based on a problem-based approach and in accordance with the European integration process of Ukraine		
2.1.3	Deadline for the stage to be completed:	July 2022 – end of 2022		
2.1.4	Risks in trying to achieve the goal:	lengthy consideration of relevant draft laws by the Parliament		
2.1.5	Measurable indicators for the goal to be considered achieved	ensuring the criminal justice development based on the provisions of international treaties undersigned by Ukraine, standards and practices approved by democratic states; unification and focusing all the criminal justice components to achieve the goals defined by this Vision/Concept; maximum possible performance of criminal justice tasks with reasonable use of resources		
2.1.6	Financial resources needed to achieve the goal:	will not require additional costs from the State Budget of Ukraine		
2.1.7	How is the goal connected with other focus areas	“Holding the Russian Federation responsible under the international law for the armed aggression and violation of other provisions of the international law”, “Improving prosecutorial bodies, “Public safety and social adaptation of convicts and prisoners. Ensuring humane treatment of prisoners of war”		
2.2	**Description of Problem 2, which needs to be solved in the specified area of analysis:**	Lack of dedicated procedural arrangements for criminal proceedings in extraordinary circumstances, state of emergency and at wartime; need to distinguish the specific rules of criminal proceedings in the conditions of martial law and state of emergency, as well as the state of war		
2.2.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032

2.2.2	The goal to be achieved to solve the problem at each stage:	Determination of the procedure for carrying out criminal proceedings in an extraordinary situation, a state of emergency and a state of war; distinguishing between specific criminal proceedings under martial law and state of emergency, as well as a state of war		
2.2.3	Deadline for the stage to be completed:	July 2022 - December 2022		
2.2.4	Risks in trying to achieve the goal:	lengthy consideration of relevant draft laws by the Parliament		
2.2.5	Measurable indicators for the goal to be considered achieved	Settlement of specifics of criminal proceedings in the state of emergency; distinguishing the features of criminal proceedings in conditions of martial law and state of emergency, as well as a state of war		
2.2.6	Financial resources needed to achieve the goal:	will not require additional costs from the State Budget of Ukraine	.	
2.2.7	How is the goal connected with other focus areas	“Bringing the Russian Federation to international legal responsibility for the armed aggression and violation of other provisions of international law”		
2.3	**Description of problem 3, which needs to be solved in the specified area of analysis:**	The need to standardize the rules of jurisdiction, considering the improvements in the operation of law enforcement agencies, the rational distribution of powers between law enforcement agencies based on clearly defined responsibilities and mandate, avoiding duplications and overlaps in their work		
2.3.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.3.2	The goal to be achieved to solve the problem at each stage:		Delineation of law enforcement agencies from intelligence, counterintelligence, security and other related bodies and institutions based on the exclusive functional focus with pre-trial investigation and law-	

			enforcement intelligence	
2.3.3	Deadline for the stage to be completed:		January 2023 - December 2023	
2.3.4	Risks in trying to achieve the goal:		lengthy consideration of relevant draft laws by the Parliament	
2.3.5	Measurable indicators for the goal to be considered achieved		rational distribution of powers between law enforcement agencies on the basis of clear delineation of expertise, avoiding duplication and overlaps in their work; mutual agreement on the rules of territorial investigative and judicial jurisdiction; expanding the powers of the prosecutor to change investigative jurisdiction in case of expediency; standardization of the system, organizational structure and personnel of law enforcement agencies, their financial and logistical support based on uniform criteria determined by the scope and specificity of their work; overcoming departmental 'silos' and corporate disunity of law enforcement agencies	
2.3.6	Financial resources needed to achieve the goal:		will not require additional costs from the State Budget of Ukraine	
2.3.7	How is the goal connected		"Improving prosecutorial bodies"	

	with other focus areas			
2.4	**Description of problem 4, which needs to be solved in the specified area of analysis:**	Incompatibility of existing ICT systems of courts, prosecutor's office, law enforcement agencies, penitentiary and other criminal justice stakeholders, their limited functions		
2.4.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.4.2	The goal to be achieved to solve the problem at each stage:		Ensuring the interoperability of ITC systems in courts, the prosecutor's office, law enforcement agencies, the bar, the penitentiary service and other criminal justice stakeholders. Implementation of a full-fledged system of electronic criminal proceedings	
2.4.3	Deadline for the stage to be completed:		January 2023 - December 2023	
2.4.4	Risks in trying to achieve the goal:		lengthy consideration of relevant draft laws by the Parliament	
2.4.5	Measurable indicators for the goal to be considered achieved		completeness and efficiency of obtaining and exchanging information between criminal justice stakeholders;	
2.4.6	Financial resources needed to achieve the goal:		requires minor additional costs from the State Budget of Ukraine or coverage at the expense of donor aid for logistical and technical support of the mechanism	
2.4.7	How is the goal connected with other focus areas		“Improving prosecutorial bodies”	

2.5	**Description of problem 5, which needs to be solved in the specified area of analysis:**	The need for precautionary move institutional improvement		
2.5.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.5.2	The goal to be achieved to solve the problem at each stage:		Amendments to the Criminal Procedure Code of Ukraine aimed at optimizing the grounds and procedures for precautionary move. Full implementation of Custody Records for electronic recording of detainee actions	
2.5.3	Deadline for the stage to be completed:		July 2022 - end of 2023	
2.5.4	Risks in trying to achieve the goal:		lengthy consideration of relevant draft laws by the Parliament	
2.5.5	Measurable indicators for the goal to be considered achieved		unification of the process of proof during the application of precautionary move; ensuring the effectiveness and efficiency of precautionary move; the introduction of effective measures to strengthen responsibility for acts that constitute obstacles to the administration of justice in the field of criminal justice; providing video surveillance and developing an individual file for a person detained on suspicion of committing an offense from the moment of physical detention until the court applies a preventive	

			measure or decides to release the person	
2.5.6	Financial resources needed to achieve the goal:		requires minor additional costs from the State Budget of Ukraine or coverage at the expense of donor aid for logistical and technical support of the mechanism's activities .	
2.5.7	How is the goal connected with other focus areas		“Improving prosecutorial bodies”	
2.6	**Description of problem 6, which needs to be solved in the specified area of analysis:**	The need to ensure the efficiency and effectiveness of the investigation of criminal misdemeanours		
2.6.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.6.2	The goal to be achieved to solve the problem at each stage:	Ensuring the efficiency and effectiveness of the investigation of criminal misdemeanours. Establishment of a mechanism for pre-trial dispute resolution in criminal proceedings on criminal misdemeanours		
2.6.3	Deadline for the stage to be completed:	July 2022 - December 2022		
2.6.4	Risks in trying to achieve the goal:	lengthy consideration of relevant draft laws by the Parliament		
2.6.5	Measurable indicators for the goal to be considered achieved	simplified procedure for carrying out a pre-trial investigation through inquiry; implementation of alternative criminal liability mechanisms for resolving legal conflicts (diversionary measures, transactions), which will be applied at the pre-trial stage by the decision of the prosecutor		

2.6.6	Financial resources needed to achieve the goal:	will not require additional costs from the State Budget of Ukraine	.	
2.6.7	How is the goal connected with other focus areas	“Improving prosecutorial bodies”		
2.7	**Description of problem 7, which needs to be solved in the specified area of analysis:**	Implementation of proper security measures for parties to criminal proceedings		
2.7.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.7.2	The goal to be achieved to solve the problem at each stage:	Implementation of real programs for the protection of applicants, victims and witnesses with the determination of the state body responsible for its proper implementation. Implementation of additional guarantees of protection of vulnerable categories of applicants, victims and witnesses		
2.7.3	Deadline for the stage to be completed:	July 2022 - December 2022		
2.7.4	Risks in trying to achieve the goal:	lengthy consideration of relevant draft laws by the Parliament		
2.7.5	Measurable indicators for the goal to be considered achieved	safeguarding victims from secondary and repeated victimization; ensuring proper communication of the inquirer, investigator and prosecutor with the victim and witness; expanding opportunities to encourage parties to criminal proceedings to cooperate with law enforcement agencies and the prosecutor's office		
2.7.6	Financial resources needed to achieve the	requires minor additional costs from the State Budget of Ukraine or coverage at the expense of donor aid for logistical and technical support of the mechanism	.	

	goal:			
2.7.7	How is the goal connected with other focus areas	"Improving prosecutorial bodies"		
2.8	**Description of problem 8, which needs to be solved in the specified area of analysis:**	Improvement of the principles of law enforcement intelligence operations		
2.8.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.8.2	The goal to be achieved to solve the problem at each stage:	Clear definition of the scope and tasks of investigative activity, improvement of ways and procedures for utilizing the findings in criminal proceedings		
2.8.3	Deadline for the stage to be completed:	July 2022 - December 2022		
2.8.4	Risks in trying to achieve the goal:	lengthy consideration of relevant draft laws by the Parliament		
2.8.5	Measurable indicators for the goal to be considered achieved	split of intelligence and counter-intelligence activities from law enforcement intelligence and clearly defined powers of the responsible bodies; effectiveness and compliance with international standards in utilizing the outcomes of investigations for the better performance of criminal proceedings; compliance of measures, means, techniques and methods of investigations with modern circumstances and needs		
2.8.6	Financial resources needed to achieve the goal:	will not require additional costs from the State Budget of Ukraine	.	

2.8.7	How is the goal connected with other focus areas	"Improving prosecutorial bodies"		
2.9	**Description of problem 9, which needs to be solved in the specified area of analysis:**	Implementation of an effective monitoring of criminogenic threats, prevention and detection of criminal offenses		
2.9.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.9.2	The goal to be achieved to solve the problem at each stage:		Crime prevention by eliminating vulnerabilities that contribute to the commission of offenses (security risk management)	
2.9.3	Deadline for the stage to be completed:		January 2023 - December 2024	
2.9.4	Risks in trying to achieve the goal:		lengthy consideration of relevant draft laws by the Parliament	
2.9.5	Measurable indicators for the goal to be considered achieved		Focus on prevention of criminal threats and the use of a risk-based approach; expansion of the public-private partnership format in the field of combating crime; comprehensive implementation of modern systems of criminal analysis across law enforcement agencies	
2.9.6	Financial resources needed to achieve the goal:		requires minor additional costs from the State Budget of Ukraine or coverage at the expense of donor aid for logistical and technical support	

			of the mechanism	
2.9.7	How is the goal connected with other focus areas		missing	
3	**The current state of policy paper implementation in the selected area of analysis with an attempt to solve the problem defined**			
3.1	**Policy paper name**	**Background**		**Information submitted by:**
3.1.1.	The concept of criminal justice reform of Ukraine, approved by the Decree of the President of Ukraine dated April 8, 2008, No. 311/2008	Until now, most of the provisions of the Concept have been implemented in national legislation, others need to be updated in accordance with modern challenges considering endemic problems in sectoral legislation and its enforcement		0
4	**Definition of tasks to achieve goals from Paragraph 2 (for each defined goal)**			
	Stage 1: 06/2022 – 12/2022			
	Development, approval and implementation of the Criminal Justice Development Vision/Concept, which defines the scope and focus areas of criminal justice based on a problem-based approach and in accordance with the European integration process of Ukraine	Task 1. Development, approval and implementation of the Criminal Justice Development Concept	December 2022	"Holding the Russian Federation to international legal responsibility for armed aggression and violation of other provisions of international law", "Improving prosecutorial bodies", "Public safety and social adaptation of convicts and prisoners. Ensuring the maintenance of prisoners of war"
	Determination of the procedure for carrying out criminal proceedings in an extraordinary situation, a state of emergency and a state of war; distinguishing the features of criminal proceedings in conditions of martial law and state of emergency, as well as a state of war	Task 2. Amendments to the Criminal Procedure Code of Ukraine regarding the regulation of the rules of criminal proceedings in an extraordinary situation, a state of emergency and a state of war	December 2022	"Improving prosecutorial bodies"
	Ensuring the efficiency and effectiveness of the investigation of criminal misdemeanours. Establishment of a mechanism for pre-trial dispute resolution in criminal proceedings on criminal	Task 3. Amendments to the Criminal Procedure Code of Ukraine regarding the simplified procedure for conducting a pre-trial investigation through inquiry; implementation of alternative	December 2022	"Improving prosecutorial bodies"

	misdemeanours	criminal liability mechanisms for resolving legal disputes on criminal matters (diversionary measures, transactions), which will be applied at the pre-trial stage by the decision of the prosecutor		
	Implementation of real programs for the protection of applicants, victims and witnesses with the determination of the state body responsible for its proper implementation. Implementation of additional guarantees of protection of vulnerable categories of applicants, victims and witnesses	Task 4. Development and implementation of the state protection program for applicants, witnesses and victims	December 2022	"Improving prosecutorial bodies"
	Clear definition of the scope and tasks of investigative activity, improvement of ways and procedures for utilizing the findings in criminal proceedings	Task 5. Amendments to the legislation on law enforcement intelligence regarding scope and tasks of law enforcement intelligence, improvement of ways and procedures for utilizing the findings in criminal proceedings	December 2022	"Improving prosecutorial bodies"
	Stage 2: 01/2023 – 12/2025			
	Delineation of law enforcement agencies from intelligence, counterintelligence, security and other related bodies and institutes based on the exclusive functional orientation, which is the implementation of pre-trial investigation and operative-search activities	Task 6. Development of a framework law on determining the legal status of law enforcement agencies, determining their place in the system of state bodies, and delimiting the functions assigned to them	March 2023	"Improving prosecutorial bodies"
		Task 7. Proper regulation of the rules of subject and territorial jurisdiction of criminal offenses, their mutual consistency; expansion of the powers of the prosecutor regarding the change of jurisdiction in case of expediency (except for the exclusive jurisdiction of NABU)	December 2023	missing

	Ensuring the interoperability of ITC systems in courts, the prosecutor's office, law enforcement agencies, the bar, the penitentiary service and other criminal justice stakeholders. Implementation of a full-fledged system of electronic criminal proceedings	Task 8. Ensuring the interoperability of ITC systems in courts, the prosecutor's office, law enforcement agencies, the bar, the penitentiary service and other criminal justice stakeholders; providing prosecutors and authorized employees of law enforcement agencies with direct access to databases and state registers for the purpose of unhindered and prompt obtaining of the necessary information	December 2023	missing
	Amendments to the Criminal Procedure Code of Ukraine aimed at optimizing the grounds and procedure for applying precautionary move. Full implementation of Custody Records systems for electronic recording of actions on detained persons	Task 9. Amendments to the Code of Criminal Procedure of Ukraine aimed at optimizing the grounds and procedure for applying precautionary move	December 2023	"Improving prosecutorial bodies"
		Task 10. Full implementation of Custody Records systems for electronic recording of actions on detained persons	December 2023	"Improving prosecutorial bodies"
	Crime prevention by eliminating environmental vulnerabilities that contribute to the commission of offenses (security risk management)	Task 11. Expansion of the public-private partnership format in the field of combating crime. Creation at the Office of the Prosecutor General of the interdepartmental Coordinating Council on the Implementation of Crime Prevention Policy	April 2024	"Improving prosecutorial bodies"
		Task 12. Introduction of periodic anonymous victimology survey of the population (Victimology Survey)	December 2024	missing

5	**List of national projects to implement the objective from Paragraph 4 (for the corresponding task)**

	Subparagraph 4		**of the project**		**sible**	**financing (million UAH)**					
5.1	Program of state protection of applicants, witnesses, victims, in particular in conditions of armed conflict	The need to take special state protection measures aimed at protecting against illegal encroachments on the life, health, housing and/or property of persons who cooperate with law enforcement agencies in the prevention, detection, termination and investigation of criminal offenses, as well as during court proceedings	Ensuring the safety of applicants, witnesses, victims; effective cooperation of the specified persons with law enforcement agencies, in particular in conditions of armed conflict	Effective execution of tasks in criminal proceedings within a reasonable time	Office of the General Prosecutor (interagency commission); body that provides security	450	State budget of Ukraine, donor aid for logistical and technical support of the mechanism	Changes in legislation in the field of ensuring the safety of parties to criminal proceedings, in particular the Criminal Procedure Code of Ukraine, the Law of Ukraine "On Ensuring the Safety of Persons Taking Part in Criminal Proceedings"	Recommendations provided by the Committee of Ministers of the Council of Europe on the Protection of Crime Victims, Witnesses and Persons Cooperating with Justice		
5.2	"Custody Records" for recording actions of detainees	The "Custody Records" system began functioning as a pilot project in Ukraine in individual detention centres (since 2016) and police units (since 2020). It is aimed at	Increasing the standards of protection of the rights of detained persons, prevention of human rights violations;	Reducing the number of official investigations, criminal proceedings, appeals to the ECtHR on facts of violation of the rights of detained persons and, as a result, easing the budget burden	Office of the Prosecutor General; Ministry of Internal Affairs of Ukraine	150	State budget of Ukraine; funds of international technical assistance	Changes in the legislation in the field of ensuring the rights of detained persons, in particular, departmental regulatory and legal acts	Recommendations by the European Committee for the Prevention of Torture or Inhuman or Degrading Treatment or Punishment		

		ensuring the rights of detainees in accordance with European standards, recording all actions of the police in relation to detainees, monitoring the observance of human rights and the legality of detention, automatic notification of free secondary legal aid centres about the fact of a person's detention. Guaranteeing a safe environment, as well as detecting violations of procedural rights and guarantees both before and after placing a person in a temporary detention centre. Further implementation of the system, which is a combination of electronic	Modernization of the database and information about the detained persons, operational communication between the specified bodies and institutions; Obtaining objective factual data regarding the actions of the police and other persons in relation to the detained persons								

		documentation, 24-hour video surveillance, implementation of changes in detention procedures and the introduction of positions of persons responsible for the protection of human rights in the structural units of the National Police guarantees the protection of the rights of both detained persons and law enforcement officers									

6	**Needed regulatory and legal support**					
Item no. from Paragraph 4	**The name of the legal act(s) for the objective from Paragraph 4**	**Development scope / changes of the legal act(s)**	**The state authority responsible for the development/amendments of the legal act(s)**	**Time due**	**Deadline for entry into force**	**legal act(s) status**
Task 1	Decree of the President of Ukraine "On the decision of the National Security and Defence Council of Ukraine of __.___ 2022 "On the Concept of Criminal Justice Development"	Implementation of the decision of the National Security and Defence Council of Ukraine "On the Criminal Justice Development Vision/Concept" Approval of the Criminal Justice Development Vision/Concept Recognition of the Concept of Reforming the Criminal Justice of Ukraine, approved by the Decree of the President of Ukraine dated April 8,	Office of the President of Ukraine, Office of the Prosecutor General	December 2022		Decree of the President of Ukraine

		2008, No. 311/2008, as invalid				
Task 2	Draft Law "On Amendments to the Criminal Procedure Code of Ukraine (Regarding Criminal Proceedings in an extraordinary situation, State of Emergency and State of War)"	Regulation of the rules for carrying out criminal proceedings in conditions of a special period, a state of emergency and a state of war; distinguishing the features of criminal proceedings in conditions of martial law and state of emergency, as well as a state of war	Office of the President of Ukraine, Office of the Prosecutor General	December 2022		Law
Task 3	Draft Law "On Amendments to the Criminal Procedure Code of Ukraine (Regarding the Efficiency and Effectiveness of the Investigation of Criminal Misdemeanours)"	simplified procedure for carrying out a pre-trial investigation through inquiry, implementation of alternative criminal liability mechanisms for resolving legal disputes on criminal matters (diversionary measures, transactions), which will be applied at the pre-trial stage by the decision of the prosecutor	Office of the President of Ukraine, Office of the Prosecutor General	December 2022		Law
Task 4	Draft Law "On Amendments to the Criminal Procedure Code of Ukraine and other legislative acts on state protection of applicants, witnesses and victims"	Extending whistle-blower legal status to the applicant in relation to any criminal offences; expanding opportunities to encourage parties to criminal proceedings to cooperate with law enforcement agencies and the prosecutor's office; expanding cases of mandatory participation of the victim's representative within the framework of legal aid and introducing other additional guarantees of protection of vulnerable victims. Implementation of real victim and witness protection programs with identification of the state body responsible for their implementation	Office of the Prosecutor General, Ministry of Internal Affairs of Ukraine	December 2022		Law
Task 5	The draft Law of Ukraine "On law enforcement intelligence"	Regulation of law enforcement intelligence (new edition of the Law)	Office of the President of Ukraine, Office of the Prosecutor General	December 2022		Law
Task 6	Draft Law "On Law enforcement agencies"	Determining the place of law enforcement agencies in the system of state bodies and delimiting the functions assigned to them; separation of law enforcement agencies	Office of the Prosecutor General, Ministry of Internal Affairs of Ukraine	March 2023		Law

		from other related bodies and institutions based on exclusive functional focus; standardization of the system, organizational structure and personnel of law enforcement agencies, their financial and logistical support based on uniform criteria, taking into account the scope and specificity of work; unification of the legal status of law enforcement officers				
Task 7	Draft Law "On Amendments to the Criminal Procedure Code of Ukraine (Regarding Susceptibility of Criminal Offenses)"	Proper regulation of the rules of substantive and territorial jurisdiction of criminal offenses, their mutual consistency; expansion of the powers of the prosecutor regarding the change of jurisdiction in case of expediency (except for the exclusive jurisdiction of NABU)	Office of the President of Ukraine, Office of the Prosecutor General	December 2023		Law
Task 9	Draft Law "On Amendments to the Criminal Procedure Code of Ukraine (Regarding Improvement of the Institution of Precautionary move)"	Establishing the possibility of applying a preventive measure in the form of supervision by the commander of a military unit during martial law; simplification of the procedure for processing voluntarily provided materials that can be used as evidence in criminal proceedings; establishment of liability for abuse of rights by process participants by analogy with civil procedural, economic procedural and administrative legislation, etc.	Office of the President of Ukraine, Office of the Prosecutor General	December 2023		Law

Improvement of Legal Profession. Transformation of the Notary System

According to generally accepted standards, independent legal defence is a necessary condition for establishing the rule of law and democracy in society. Bar reform is a component of judicial reform, which cannot be successful without an institutionally developed independent bar. In the conditions of the post-war recovery of Ukraine, the legal profession is one of the important guarantees of ensuring the rights of citizens who suffered from the consequences of armed aggression. Public policy in the field of attorneyship and the legal profession itself is insufficiently effective. The Law of Ukraine "On Attorneyship and Legal Profession" (*sometimes can be found as Law on Legal Profession and Lawyer Activities, or Law on the Bar*) dated July 5, 2012, contains significant shortcomings that have a significant negative impact on the fulfilment by the bar of its special social role in society. Since 2016, this Law has not been aligned with the Constitution of Ukraine, after amendments were made regarding justice.

The purpose of the post-war reform is to bring the organization and performance of the bar to the best international standards, strengthen protection of human and citizen rights and freedoms, institutional independence of the bar, professional rights of the bar and safeguards for the bar activity, building of favourable environment for the delivery of effective and high-quality legal aid to persons affected by the war, ensuring their holistic access to justice both in Ukraine and abroad.

Since Ukraine has chosen the European development vector, the notarial profession deserves special attention, which plays a significant role as a body of undisputed civil jurisdiction and preventive justice.

However, as a result of hostilities, acts of terrorism, and sabotage caused by the military aggression of the Russian Federation on the territory of Ukraine, many notaries were forced to leave their place of residence, as a result of which they were deprived of the opportunity to engage in professional activities.

In addition, as of June 23, 2022, **34 (5%)** public notary offices and **103 (2%)** private notary offices were destroyed, **80 (12%)** public notary offices and **316 (6%)** offices of private notaries are in a territory that is temporarily not controlled, and any connection with them has been lost.

Currently, notary services in Ukraine are delivered offline. Notarial actions are performed on paper, recorded in paper registers for notarial actions. All notarial records and archives are stored in hard copies. Due to the military aggression of the Russian Federation, many notarial archives could not be evacuated, as the control was lost very quickly in the territories of harsh hostilities.

The lack of modern and innovative solutions for notaries holds back the development of this institution and slows down Ukraine's transition to the digital economy, while the majority of European Union countries have chosen this direction.

Being aware of the facts above and taking into account key opportunities, there is currently a need to introduce modern information and communication technologies into the notary practice and modernize the notary system by improving national legislation and aligning it with the European practices.

With the consolidated effort by the state at the legislative level to provide notaries with the right to establish notary offices/bureaus, this

will enable notaries to jointly deliver professional services with much lesser financial and technical costs, as well as tax burden.

The main task to achieve the goal of "Digitalization of Certain Types of Notarial Actions", in particular, this can be done through the development of the Unified State Electronic Notary System (hereinafter – the e-Notary) as an electronic platform with the upscaling possibility, which will integrally "transfer" all notarial activities to the electronic interface, automate this activity, ensure the efficiency of performing notarial actions, reduce the administrative burden for notaries and their clients, and also provide quick access to completed notarial actions.

Once this specific objective is fulfilled, notaries will be given the opportunity to perform all notarial actions on a one-stop electronic platform, with subsequent entry of the completed notarial actions into a unified and secure environment. In addition, the e-notary system, once built, will be integrated with registers and other state electronic information resources.

Building the electronic notary archive is currently a key priority, with a focus to not only reduce notarial paperwork, but also to protect and preserve the archives, which, in turn, will ensure the protection of the rights and interests of constituents – i.e., individuals who sought notarial actions – in the future.

The electronic notarial archive will secure reliable storage, confidentiality and help manage access by tracking the inquiry history for notarial documents, as well as enable their quick and convenient search.

The implementation of the specified goal will allow to reduce the storage costs for notary records and notary archives. Thus, the requirements to the notary's desk will also be eased; there will be much less cases of loss or damage of archived notarial documents; transfer of documents from operational storage to archives will be simplified.

It is worth adding that the goal of digitization of the notary is not to reduce the notary's functions to mechanical ones, but to make notary services available to citizens of Ukraine and to increase public trust in the notary.

In particular, an important advantage of the digitization of the notary is the introduction of the possibility of remote certification of deeds when the parties are in different cities, and notarial documents will be drawn up in electronic form, including with the use of electronic communications. This will ensure the convenience, accessibility and promptness of obtaining notary services for citizens, especially for those living in hard-to-reach and sparsely populated areas of the country.

At the same time, Ukraine can benefit from the successful experience of foreign countries, whose notaries have been providing some notarial services online for many years.

Summarizing the above, we note that the goal of electronic notary should be to ensure the legal security of civil transactions using various legal and technical means, including the use of modern technologies. This will make it possible to qualitatively update the notary process, make it more convenient and understandable, integrate the notary into transnational legal relations and provide an opportunity to strengthen the position of the profession.

The impact of the war on a specific area of analysis:

Unprecedented legal challenges in defence of the rights and freedoms of individuals by lawyers of Ukraine in cases related to the aggression of the Russian Federation and its consequences.

In connection with the military aggression of the Russian Federation against Ukraine, as a result of hostilities and the temporary occupation of certain territories of Ukraine, the archives of private notaries, public notary offices and state notarial archives were significantly damaged, and access to certain archives was lost.
Given that notarial records are currently conducted in paper form, it is impossible to restore lost and destroyed documents, as well as claim archives from the occupied territories. Currently, there is a need for digitalization of the notary, in particular, the transfer of the notarial archive to electronic form, and the introduction of modern information and communication technologies into the notarial practice. As a result of the current situation, a large number of notaries were forced to leave their place of residence, as a result of which they were deprived of the opportunity to engage in professional activities.

Key challenges (generalized for the defined area):
Incomplete compliance of the principles of attorneyship in Ukraine with the basic principles of the EU attorneyship profession. Strengthening of qualification requirements for persons who intend to gain access to the profession of lawyer. Introduction of a transparent procedure for conducting a qualification exam, improvement of the internship institute. Imperfectness of bringing the lawyer to disciplinary responsibility. Inconsistency of individual provisions of the rules of lawyer ethics with international standards of lawyer deontology. Inconsistency of the procedure for maintaining the Unified Register of Lawyers of Ukraine with the requirements of the Law of Ukraine “On Public Electronic Registers”. The need to expand the professional rights of advocates and guarantees of attorneyship. The need to take into account gender aspects in the practice of attorneyship. Imperfect self-governance of the attorneyship.
Digitization of the notary. Modernization of the organization of professional activity by notaries.

Key capabilities (generalized for a specific area):
Digitization of the notary operations:

- creation of the Unified state electronic system of e-notary;
- the possibility of creating an electronic notarial document, which has the same legal force as a paper one;
- digitization of the paper archive of the notary and the creation of the Electronic notary archive;
- organization of registration in foreign countries (countries - members of the European of the Union) of wills registered in Ukraine;
- execution of notarial acts without the use of special forms of notarial documents;
- the possibility of remote execution of notarial acts using means of communication.

Modernization of professional notary operations:

- improved procedure for termination of notarial activity and its subsequent registration;
- building and maintenance of electronic registration/personal files of notaries;
- introduction of an electronic certificate of the right to engage in notarial activities;

- granting the right to private notaries to create notary offices/bureaus that will operate according to the principle of a bar association, bureau.

Key limitations (generalized for the defined area):
The proposals are consistent with the EU and should not contradict them

2	**Goals, tasks, stages of the Recovery Plan by direction**			
2.1	**Description of Problem 1, which needs to be solved in the specified area of analysis:**	Incomplete compliance of the principles of attorneyship in Ukraine with the basic principles of the EU attorneyship profession.		
2.1.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.1.2	The goal to be achieved to solve the problem at each stage:	Bringing the principles of attorneyship in Ukraine in line with the basic principles of the EU attorneyship profession	Abolition of the attorney's monopoly on the provision of professional legal assistance	
2.1.3	Deadline for the stage to be completed:	2022	2025	
2.1.4	Risks in trying to achieve the goal:	Missing	Long -term consideration of the corresponding bill in the Parliament	
2.1.5	Measurable indicators for the goal to be considered achieved	Amendments to the Law of Ukraine “On the Bar and Legal Profession” regarding bringing the principles of attorneyship in Ukraine into line with the basic principles of the EU legal profession have been adopted and entered into force	Amendments to the Constitution of Ukraine were adopted and entered into force	
2.1.6	Financial resources needed to achieve the goal:	Does not require additional expenditures from the state budget	Does not require additional expenditures from the state budget	

2.1.7	How is the goal connected with other focus areas	Missing	Missing	
2.2	**Description of problem 2, which needs to be solved in the specified area of analysis:**	Strengthening of qualification requirements for persons who intend to gain access to the profession of lawyer. Introduction of a transparent procedure for conducting a qualification exam, improvement of the internship institute.		
2.2.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.2.2	The goal to be achieved to solve the problem at each stage:		A transparent procedure for access to the profession of a lawyer. Regulation of admission to legal practice in Ukraine, as lawyers of foreign countries, lawyers of aggressor countries (Russian Federation, Republic of Belarus)	
2.2.3	Deadline for the stage to be completed:		2023	
2.2.4	Risks in trying to achieve the goal:		Delay in bringing the regulatory framework in accordance with the Law (implementation in practice) Resistance of the National Bar Association and regional bodies of lawyers' self-government	
2.2.5	Measurable indicators for the goal to be considered achieved		Amendments to the Law of Ukraine "On the Bar and Legal Profession" regarding the transparent procedure of access to the profession of a lawyer were adopted and entered into force, as well as implemented in the regulatory framework of the regulator.	

2.2.6	Financial resources needed to achieve the goal:		Does not require additional expenditures from the state budget	
2.2.7	How is the goal connected with other focus areas		Missing	
2.3	**Description of problem 3, which needs to be solved in the specified area of analysis:**	Inconsistency of the procedure for maintaining the Unified Register of Lawyers of Ukraine with the requirements of the Law of Ukraine "On Public Electronic Registers".		
2.3.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.3.2	The goal to be achieved to solve the problem at each stage:	Bringing the order of keeping the Unified Register of Lawyers of Ukraine in line with the requirements of the Law of Ukraine "On Public Electronic Registers"		
2.3.3	Deadline for the stage to be completed:	2022		
2.3.4	Risks in trying to achieve the goal:	Missing		
2.3.5	Measurable indicators for the goal to be considered achieved	Amendments to the Law of Ukraine "On the Bar and Legal Profession" were adopted and entered into force, and the procedure for maintaining the Unified Register of Lawyers of Ukraine was brought into line		
2.3.6	Financial resources needed to achieve the goal:	Does not require additional expenditures from the state budget		
2.3.7	How is the goal connected	Missing		

	with other focus areas			
2.4	**Description of problem 4, which needs to be solved in the specified area of analysis:**	The need to expand the professional rights of lawyers and guarantees of attorneyship.		
2.4.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.4.2	The goal to be achieved to solve the problem at each stage:	Ensuring the implementation of the principle of competition in court proceedings, equality of procedural rights of the parties, in particular, providing lawyers with identified access to state registers. Increasing the level of protection of attorney confidentiality. Providing access to the work of a lawyer's assistant for persons who have acquired a higher legal education at the “Bachelor” educational level. Regulating the issue of success fees in certain categories of cases, in particular to facilitate access to legal aid for persons who have suffered damage as a result of war.		
2.4.3	Deadline for the stage to be completed:	2022		
2.4.4	Risks in trying to achieve the goal:	Missing		
2.4.5	Measurable indicators for the goal to be considered achieved	Amendments to the Law of Ukraine “On the Bar and Legal Profession” and procedural codes of Ukraine were adopted and entered into force.		
2.4.6	Financial resources needed to achieve the goal:	Does not require additional expenditures from the state budget		
2.4.7	How is the goal connected	Missing		

	with other focus areas			
2.5.1	**Description of problem 5, which needs to be solved in the specified area of analysis:**	Imperfection of self-governance of the bar.		
2.5.2	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.5.3	The goal to be achieved to solve the problem at each stage:		Decentralization of self-government of lawyers, change of status of the National Bar Association and creation of alternative professional organizations of lawyers. Ensuring the right to participate in the self- government of lawyers for all lawyers. Bringing the terms of tenure in the self-governing bodies of lawyers in line with the practice of EU countries. Restoration of the activities of the self-government bodies of lawyers in the temporarily occupied regions in the territories controlled by Ukraine.	
2.5.4	Deadline for the stage to be completed:		2023	
2.5.5	Risks in trying to achieve the goal:		Resistance of the National Bar Association	
2.5.6	Measurable indicators for the goal to be considered achieved		Amendments to the Law of Ukraine “On the Bar and Legal Profession” were adopted and entered into force, and the legal framework for the self-government of lawyers was	

			brought into line.	
2.5.7	Financial resources needed to achieve the goal:		Does not require additional expenditures from the state budget

	lawyer and the content of a decision in a disciplinary case. Creation of a single resource for collecting, storing, protecting, accounting and searching for disciplinary practice. Updating the rules of lawyer ethics in accordance with international standards of professional deontology and ensuring a uniform practice of their application. Provide for the disciplinary responsibility of lawyers for supporting the armed aggression of the Russian Federation and collaborationism.			
	Stage 1: 06/2022 – 12/2022			
	Updating the rules of lawyer ethics in accordance with the best international practices and ensuring a uniform practice of their application.	Task 11. Development and adoption of a new edition of the Rules of Advocate Ethics		0
	Stage 1: 06/2022 – 12/2022			
	Creation and implementation of separate subsystems of the Unified state electronic system of e-notary (electronic notary workplace, Electronic register of notarial acts)	Task 12: Create and implement updated electronic registers (Inheritance register, Unified register of powers of attorney, Unified register of special forms of notarial documents), electronic workplace of a notary public	"December 2022"	0
		Task 13: Form a notarial document with an electronic identifier and its verification by means of information technologies (QR code)	"July 2022"	
		Task 14: Connect notaries to the electronic workplace of the notary of the Unified State Electronic System of e-Notary	"December 2022"	

	Stage 2: 01/2023 – 12/2025			
		Task 15: Develop and implement the Unified register of notarial acts	"April 2023"	0
	Stage 2: 01/2023 – 12/2025			
	Notarial documents without the use of special notarial document forms	Task 16: Stop the use and circulation of special forms of notarial documents	"December 2025"	
	Creation and mechanism of electronic notarial document circulation in the Unified State Electronic System of e-Notary	Task 17: Establish requirements for an electronic notarial document	"June 2023"	
		Task 18: Develop software for creating an electronic notarial document, its signing and circulation	December 2023	
	Digitization of the notary's paper archive and creation of the Electronic notary archive	Task 19: Develop the software of the Electronic notarial archive	"December 2023"	0
		Task 20: Digitize paper archives of private notaries, public notary offices, public notary archives	"December 2024"	
	Performing notarial actions in real time using means of communication	Task 21: Develop software for making transactions in electronic form using qualified electronic trust services	December 2023	
		Task 22: Implementation of the possibility of performing notarial actions remotely (online) using the client's electronic account	December 2023	
	Stage 3: 01/2026 – 12/2032			
	Provision of registration in foreign countries (member countries of the European Union) of wills registered in Ukraine	Task 23: Connect to the European Network of Registers of Wills (ENRW)	December 2032	0
	Stage 1: 06/2022 – 12/2022			
	process of termination of notarial activity and its subsequent registration	Task 24: To provide an opportunity to terminate the notary activity of a notary with a delay in the transfer to the state notarial archive of all	July-September 2022	0

		documents of the notarial office and its archive		
	Stage 2: 01/2023 – 12/2025			
	Introduction of electronic registration/personal file of a notary, creation and implementation of a system of registration of certificates of the right to engage in notarial activities	Task 25: Development and implementation of the updated Unified Register of Notaries with the addition of a section for electronic registration/personal file of a notary, registration of certificates for the right to engage in notarial activities	"June 2023"	0
		Task 26: Digitize paper registration/personal files of notaries	"December 2023"	0
		Task 27: Digitize paper certificates on the right to engage in notarial activities	December 2025	
	Stage 3: 01/2026 – 12/2032			
	Creation of notary offices/bureaus	Task 28: Establishing requirements for organizational and legal forms of notary offices/bureaus	January 2026	

5	**List of national projects to implement the objective from Paragraph 4 (for the corresponding task)**										
5.1	**Project Description for Task No. 3 from Subparagraph 4**	**Project Justification**	**Quality performance indicators of the project**	**Economic effect (impact on GDP, budget, employment, etc.)**	**Key Institution Responsible**	**Estimated need for financing (million UAH)**	**Proposed sources of funding**	**Needed regulatory and legal support**	**Similar regulations in the EU acquis**	**Proposed by**	**Project status in the group**
5.2	The national project on digitization and modernization of notarial activity is	Today, the notary in Ukraine is an effective out-of-court protection of the rights of legal entities	1) increasing the protection of the rights and interests of legal entities and individuals; 2) introduction of the Unified State		Ministry of Justice of Ukraine	86	State budget of Ukraine; funds of international technical assistance	legislative changes in the field of notary, in particular the Civil Code of	?		

	being implemented with the aim of creating and implementing the Unified State Electronic System of e-Notary; consistency of the legislation of Ukraine in the field of notary with the legal norms of the European Union	and individuals. However, the organization and functioning of the notary office is carried out without taking into account the gains of international experience. In the conditions of modern society, technical progress is growing at a frantic pace, electronification and digitalization of all spheres of social life is taking place. Thus, in most countries of the European Union, the digitization of the notary office has been implemented, in particular, notarial documents can be drawn up in electronic form, including with the use of electronic communications	Electronic System of e-Notary; 3) certification of deeds takes place online in real time; 4) ensuring accessibility and transparency of notarial acts; 5) creation of an Electronic Archive of notarial documents; 6) registration of wills in the European Network of Wills Registers (ENRW); 7) optimization of management and organization of notarial activities through the implementation of digital technologies; 8) construction of the notary system of Ukraine, which will correspond to European legal systems; 9) enabling notaries to choose the organizational and legal form of their professional activities					Ukraine, the Law of Ukraine "On Notaries" and other laws			

		. Digitization of the national notary will ensure the convenience and accessibility of notary services for society. Modern challenges require the improvement of national legislation in the field of notary and its adaptation to European institutions. Notaries of the member states of the European Union are united and act on the basis of Latin civil legislation. In this way, the modernization of notary activity in Ukraine will provide an opportunity for the notary to integrate into European and transnational legal institutions.									

6	Needed regulatory and legal support

	Law of Ukraine “On Notaries”	Create a legislative basis for: - implementation of the Unified state electronic e-notary system (hereinafter - the e-Notary System), the components of which will be: the notary's electronic workplace; the client's electronic account; Electronic notarial archive; Electronic register of notarial acts; Unified register of powers of attorney; Unified register of notaries; Unified register of special forms of notarial documents; Inheritance register; - establishment of requirements for an electronic notarial document, its signing and circulation mechanism in the e-Notary System; - preservation of notarial records, which will be carried out exclusively in electronic form by scanning them, and approval of the procedure for filling the Electronic Notary Archive by the notary by digitizing the notary's paper archive; - settlement of the issue regarding the refusal to use special forms of notarial documents and the introduction of a notarial document with an electronic identifier and its verification by means of information technologies; - determination of the list of notarial actions that are proposed to be performed in real time using means of communication, establishment of mechanisms and requirements for	Ministry of Justice of Ukraine Ministry of Digital Transformation of Ukraine		December, 2025	

		remote signing of an electronic notarial document; - implementation of the system of registration of certificates of the right to engage in notarial activity, which will function with the help of the e-notary system, which will contain information about electronic and digitized paper certificates of the right to engage in notarial activity; - introduction of an electronic registration/personal file as an integral component of the Unified Register of Notaries operating in the e-Notary System, as well as filling in electronic registration/personal files by digitizing (scanning) paper registration/personal files ; - giving notaries the right to create notary offices/bureaus and establishing the organizational and legal form of such offices and bureaus.				
	The Civil Code of Ukraine	Create a legal basis for: - conclusion of transactions and their notarization in electronic form; - registration in foreign countries of wills registered in Ukraine	Ministry of Justice of Ukraine, Ministry of Digital Transformation of Ukraine		December, 2025	

Public safety and social adaptation of convicts and prisoners. Conditions of treatment of prisoners of war

Penitentiary system and probation protect society from crime, provides for a balance between executing penalties and correctional rehabilitation of criminals, facilitates their return to living in society without breaking laws.

Ukraine is striving to meet the high standards of a European constitutional state and ensure compliance to international conventions, namely the European Convention on Human Rights, European penitentiary regulations, the United Nations Standard Minimum Rules for Non-

custodial Measures (The Tokyo Rules), Standard Minimum Rules for the Treatment of Prisoners.

In recent years, the Ministry of Justice of Ukraine has managed to achieve progress in the reforms of the system, namely, in digitalisation, resocialisation and improvement of the conditions of convicts and prisoners, technical equipment of correctional facilities, and communication with society, international partners, which has significantly influenced the efficiency of penitentiary system, reduced negative political and legal consequences for the international image of Ukraine.

In order to solve systematic structural problems, establish an optimal model for execution of criminal sentences, and also taking into account the disastrous consequences of Russia's military aggression against Ukraine and the need to detain prisoners of war, the penitentiary system requires update and further reforms.

Within the framework of the national recovery plan, four key problems in the penitentiary sector have been defined. The implementation of these directly depends on adoption of prepared legislation and allocation of financial resources for the construction and renovation of the penitentiary and probation system infrastructure.

Problem Description

Prison system infrastructure even before the war did not meet international standards, and the conditions of detention in many detention centres and prisons do not meet the basic needs of convicts and persons in detention and are considered by the European court of human rights as equivalent to torture. Such a state of the infrastructure significantly obstructs accomplishment of the objectives of correction and resocialisation of convicts, reduction of reoffence, number of states of emergency etc.

ECHR has regularly stated that Article 2 of the Convention obliges countries not just to refrain from deliberate illegal deprivation of life, but also establishes positive commitment by the state to use proper measures to protect the lives of those under its jurisdiction. In the context of prisoners, persons in detention are in a vulnerable condition, and the state is obliged to protect them. National authorities are also obliged to protect the health and welfare of persons deprived of liberty.

The staff is also under protection, especially the security staff in correctional facilities, as they provide protection and defence of the facilities both during threats and specifically during shelling. Such persons must be provided with personal protective equipment and other needed things.

Hostilities that lead to destruction and damage to the facilities of penitentiary system, evacuation and relocation of convicts and prisoners have intensified this problem. Adherence to the norms of international humanitarian law makes it binding for Ukraine to provide the relevant conditions of the detention of prisoners of war.

Prevention of torture, cruel and/or humiliating treatment or punishment is the state's international commitment, that is why there is a need to create transparent and efficient measures aimed at ensuring that the rights of convicts and persons in detention are adhered to.

There is a need to improve the diagnostics and treatment of medical and socially dangerous conditions, namely HIV-infection, TB and viral hepatitis. It is necessary to update legal and organisational bases for providing psychiatric aid to people with psychiatric disorders, including implementation of Opioid Substitute Treatment medication. There is a need to provide proper detention conditions and rehabilitation measures aimed at the improvement of people's health.

Correction and resocialisation of convicts are among the main functions of penalty. When a person serves their sentence, they must be taught to prepare to live in society without committing new crimes. It has been scientifically proven and confirmed on the example of international experience that there are conditions in people's life and environment that increase risks of reoffending (so called criminogenic risks), for instance, addictions, pro-criminal thinking, antisocial environment etc. Consequently, reduction of such risks minimises the likelihood of reoffence.

The need to implement systematic changes, including those that were caused by the war, will facilitate the transit from punitive to rehabilitation orientation in approaches to the treatment of convicts and prisoners, which will provide an opportunity to apply more penalties and forms of deterrence that are alternative to prison sentences, and will thus decrease the number of prison population and, consequently, save budget costs.

Socially educational and psychological work with convicts and persons in detention requires expansion of the toolkit, improvement of educational services, beneficial employment of convicts, efficient use of the convicts' free time.

The efficiency of the penitentiary system directly depends on the quality of personnel, motivated and highly professional personnel of the penitentiary system can perform the functions of correction and resocialisation of convicts on the basis of modern approaches and methods, and also establishment of proper working conditions and social security of the personnel according to new standards.

For the efficient work, safety of the personnel and convicts and persons in detention, employees must go through proper training and must constantly maintain their professional level.

Proper training must be organised for all employees of the penitentiary system irrespective of whether they have or do not have military ranks.

A high level of society's digitalisation, the need to analyse large quantities of data to make reasonable managerial decisions challenges the penitentiary system to implement new methods and tools, develop digital infrastructure, improve digital and computer literacy of the personnel, allocate financial resources to implement information technologies and innovations.

Lacking or obsolete logistics, computer illiteracy of the employees, drawbacks in internet access significantly impede the implementation of information technologies and innovations, new working methods and tools, development of digital infrastructure of penitentiary authorities and institutions.

Expected outcome from recovery:

1. Convicts and prisoners are detained in proper conditions that correspond to the national and international standards. The number of detention places guarantees privacy, safety and sufficient personal space.

2. Torture and other forms of cruel treatment are forbidden; a system of regular internal and external penitentiary inspections is in place. Penitentiary institutions and detention centres are 100% equipped with video cameras and network video recorders (body-cameras), data storage option is provided. A system of regular internal and external penitentiary inspections is in place.

3. Innovation-based resocialisation practices are implemented, as a result of which convicts are provided with efficient social, psychological and other support for their correction and return to independent law-abiding life in society. Due to high-quality support and correction of behaviour such persons will less frequently reoffend.

4. Alternatives to imprisonment without isolation from society are extended, which will provide an opportunity to shift the focus of the sentencing system to resocialisation of the convict, correction of his/her behaviour without isolation from society. The implementation of this approach will also save budget money on detention in detention institutions.

5. Motivated and highly professional personnel capable of performing the functions of correction and resocialisation of convicts on the basis of modern approaches and methods works in the penitentiary system, and proper working conditions and social security of the personnel according to new standards are established.

Due to the advanced digital infrastructure, the process of managerial decision making is efficient. The improvement of technological processes facilitates transparency of the penitentiary system and reduction of corruption risks.

Impact of war on the focus area analysed:

Because of the war there is a direct threat to the health and life of convicts, prisoners and employees. There are obstructions to the function of executing criminal sentences, providing safety and enforcement of constitutional rights of the convicts, prisoners and employees, efficient management in detention facilities, probation offices on the territories of Ukraine, where hostilities have been taking or are taking place, in occupied territories. Interruption of reforms in penitentiary system. Increased cases of human rights violations, including tortures and violent behaviour, murders of convicts and prisoners in temporarily occupied territories of Ukraine. The logistics, food supply chains and basic commodities supply to detention facilities have been disrupted. Partially destroyed/damaged infrastructure of the penitentiary system.

Key challenges (summarised for the relevant sector):

Ensuring public safety by means of proper exercise of the sentencing function.
Preserving the life and health of personnel, convicts and prisoners.
Deteriorating conditions of detention for convicts and persons in detention.
The need for proper detention of prisoners of war.
Destruction and damage to the penitentiary infrastructure.
Inefficient resocialisation of convicts.
Lack of quick procedures for the release of convicts (pardon, amnesty, parole).
Lack of highly qualified staff.
Need to implement information technologies.

Key opportunities (summarised for the relevant sector):

Increased attention of the public to the problem of penitentiary system and employees. Political will to change the penitentiary system.
Attracting international aid for the recovery of infrastructure in order to ensure international standards in detention facilities.
Involvement of business in cooperation with detention authorities and institutions.

Key restrictions (summarised for the relevant sector):
Security (restricted activity due to hostilities and martial law).
Financial (restricted funding from the state budget).
Logistical (restricted capacity for supply of food products, personnel, equipment etc.)
Informational (restricted capacity to receive and provide information regarding facilities in temporarily occupied territories or areas of combat operations).

2	**Goals, tasks, and stages of the activity-specific Recovery plan**			
2.1	**Description of Problem 1 which requires resolution in the said assessment scope:**	As a result of combat operations there is a need for maintaining security of convicts and detainees, recovery of prison infrastructure damaged by war, enforcement of requirements of international humanitarian law on custody of prisoners of war. Because of the war, convicts and staff are in physical danger. Conditions in many pretrial detention centres and penitentiary facilities do not meet the basic needs of convicts and detainees and are equated by the European Court of Human Rights to torture. There are also no proper conditions for treatment, it is difficult to provide medicine, conduct regular and systematic check-up of patients with infectious diseases that present public health hazard. The penitentiary system needs to improve approaches to enforcement of law and security, changing the relationship between staff and convicts on the basis of mutual respect and legality.		
2.1.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.1.2	Goal to be achieved to resolve a problem on each stage:	Maintaining security of convicts and detainees by evacuation (from combat operations areas) and their 100% location (to a safer area). Ensuring a custody of 100% of prisoners of war according to the rules of international humanitarian law.	2000 places of detention have been built and 1000 places at penitentiary facilities that comply with national and international standards have been created, 100% of damaged infrastructure has been recovered (depending on the need). (subject to funding) 75% of medical equipment (depending on the need) has been recovered.	100% of penitentiary facilities and pretrial detention centres comply with international standards (28 pretrial detention centres and 29 penitentiary facilities have been built, active facilities have been renovated (depending on the need).
2.1.3	Deadline for the stage to be completed:	12.2022	12.2025	6.2032
2.1.4	Risks in trying	Insufficient number of places of	Damage and physical wear of infrastructure of the	Lack of funding.

	to achieve the goal:	detention according to international standards (overcrowding problem as a result of evacuation of convicts and detainees). Insufficient funding. Uncertainty in the number of prisoners of war. Change in the number of damaged/ruined infrastructure facilities.	penitentiary facilities and pretrial detention centres. Complications in logistic processes to ensure the maintenance of facilities and convicts, supply of medication and medical equipment. Security breach due to shelling or combat operations. Lack of funding for the construction of new facilities. Need to review cost estimates.	
2.1.5	Measurable goal achievement indicator	Proportion of located evacuated convicts and detainees. Proportion of detained prisoners of war.	Number of places at penitentiary facilities, detention conditions which comply with national and international standards. Number of places at pretrial detention centres, detention conditions which comply with national and international standards. Proportion of upgraded medical equipment depending on the need, according to the lists of equipment.	Proportion of penitentiary facilities and pretrial detention centres which comply with the Council of Europe standards.
2.1.6	Total amount of funds required to achieve the goal:	7,68 million UAH - recovery of damaged infrastructure.	6 600,00 million UAH – repair, reconstruction, construction of infrastructure facilities of the penitentiary system (2 pretrial detention centres and a model penitentiary facility). 735,62 million UAH - procurement of drugs and preparations, medical services and equipment, routine repairs at medical facilities, training of staff. 17,92 million UAH – recovery of damaged infrastructure. 124,25 million UAH (security equipment). 22,50 million UAH (model probation offices, 3)	3 000,00 x 28 PDC = 84 000 million UAH 2 0000,0 x 29 PF = 58 000 million UAH 41,25 million UAH x 7 years = 288,75 million UAH (security equipment). 3 offices x 2,5 million UAH x 7 years = 52,5 million UAH (model probation offices)
2.1.7	Connection of the goal with other activities:	No	No	No
2.2	**Description of Problem 2 which requires resolution in the said**	Re-socialization of convicts is not effective enough to correct them due to the imperfection of its tools. Legislative regulation of relations in the field of sentencing and execution of punishments has shortcomings that largely determine the further effectiveness of the penitentiary system.		

	assessment scope:			
2.2.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.2.2	Goal to be achieved to resolve a problem on each stage:	Alternatives to imprisonment have been expanded, additional incentives have been created to engage convicts in work as a means of resocialization.	Effective programs and tools are used for social, educational and psychological work with convicts (correction programs are used for up to 80% of convicts)	75% of individuals according to the final risk assessment are less prone to committing repeated criminal offences
2.2.3	Deadline for the stage to be completed:	12.2022	12.2025	6.2032
2.2.4	Risks in trying to achieve the goal:	Non-approval of regulatory acts by the Verkhovna Rada of Ukraine.	Non-approval of regulatory acts by the Verkhovna Rada of Ukraine. Lack of/insufficient funding.	Lack of/insufficient funding.
2.2.5	Measurable goal achievement indicator	Alternatives to imprisonment have been expanded, additional incentives have been created to engage convicts in work as a means of resocialization (Yes/No).	Percentage of administration of correction programs	Proportion of individuals who, according to the final risk assessment, are less prone to committing repeated criminal offences
2.2.6	Total amount of funds required to achieve the goal:	Does not require separate funding.	Does not require separate funding.	Does not require separate funding.
2.2.7	Connection of the goal with other activities:	No	No	No
2.3	**Description of Problem 3 which requires resolution in the said assessment scope:**	Decreased professional capacity and lack of proper training of the State Criminal Executive Service of Ukraine (SCES) staff to perform their duties in wartime and post-war conditions.		
2.3.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.3.2	Goal to be achieved to	Conditions for efficient training, in particular, for distance learning	Training of staff ensures the acquisition of the necessary knowledge and skills to perform their	

	resolve a problem on each stage:	have been created.	duties effectively.	
2.3.3	Deadline for the stage to be completed:	12.2022	12.2025	
2.3.4	Risks in trying to achieve the goal:	Insufficient funding. Uncertain / unpredictable (due to military reasons) dismissal of staff. The system of initial training of staff is disrupted. Extreme working conditions and increased workload.	Insufficient funding. Extreme working conditions and increased workload.	
2.3.5	Measurable goal achievement indicator	A distance learning platform has been created (Yes/No).	Proportion of staff which have been trained, undergone professional development.	
2.3.6	Total amount of funds required to achieve the goal:	Does not require separate funding.	Does not require separate funding.	
2.3.7	Connection of the goal with other activities:	No	No	
2.4	**Description of Problem 4 which requires resolution in the said assessment scope:**	Gaps in the information technology support hinder an efficient execution of criminal penalties		
2.4.1	Stages	Stage 1: 06/2022 - 12/2022	Stage 2: 01/2023 – 12/2025	Stage 3: 01/2026 - 12/2032
2.4.2	Goal to be achieved to resolve a problem on	Operation of information systems for the execution of penalties has been restored.	Digitization of the penitentiary system is at least 70%.	Digitization of the penitentiary system is at least 95%.

	each stage:			
2.4.3	Deadline for the stage to be completed:	12.2022	12.2025	12.2032
2.4.4	Risks in trying to achieve the goal:	Inability of contractors to execute their commitments in full. Risk of jeopardizing the operation of server equipment.	Insufficient funding. Inability of contractors to execute their commitments in full. Risk of jeopardizing the operation of server equipment.	Insufficient funding. Inability of contractors to execute their commitments in full. Risk of jeopardizing the operation of server equipment.
2.4.5	Measurable goal achievement indicator	Operation of information systems for the execution of penalties has been restored (Yes/No)	Digitization level of the penitentiary system.	Digitization level of the penitentiary system.
2.4.6	Total amount of funds required to achieve the goal:		32 720 ths. UAH	
2.4.7	Connection of the goal with other activities:	No	No	No
3	**Current status of implementation of policy papers in the chosen assessment scope regarding an identified problem**			
3.1	**Name of policy paper**	**Brief description of the current status**		**Name and surname of the group participant who submits this information**
3.1.1.	Government Action Plan	Bills have been drafted: - “On Amendments to Certain Legislative Acts Concerning the Development of the Probation System, Increasing Alternatives to Imprisonment and Creating Conditions for Reduction of Recidivism” (registration number 5359) and “On Amendments to the Criminal Code of Ukraine, Criminal Procedural Code of Ukraine on the Development of the Probation System, increase of the number of alternatives to imprisonment and the creation of conditions to reduce recidivism “(registration number 5360), in order to customize the system of punishment and expand the list of types of punishment alternative to imprisonment. - “On the penitentiary system” (registration number 5293), which will allow optimizing the structure of the penitentiary system, will introduce new approaches to incentivizing the staff, will introduce effective management of correctional facilities.		O. Vysotska

		- “On the Disciplinary Regulation of the Penitentiary System” (registration number 5294), which defines the essence of service discipline, the responsibilities of privates and officers in the penitentiary system regarding its observance, types of incentives and disciplinary sanctions, the procedure and powers of managers for their administration as well as a procedure of appeal against disciplinary sanctions. - “On Amendments to the Criminal Code of Ukraine Regarding Criminal Liability for Torture” (registration number 5336), which aims to bring the Criminal Code of Ukraine in line with the provisions of the UN Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment . - “On Amendments to Certain Legislative Acts of Ukraine Regarding the Application of Forced Feeding Measures to Convicts and Detainees” (registration number 4323) and “On Amendments to the Criminal Procedural Code of Ukraine Regarding the Application of Forced Feeding Measures to Convicts and Detainees” (registration number 4324). - “On Amendments to Certain Legislative Acts Regarding Measures Aimed at Restoring the Rights of Convicts and Detainees as a Result of Improper Conditions of Detention” (registration number 5652), “On Amendments to the Criminal Code of Ukraine and the Criminal Procedural Code of Ukraine on Measures aimed at Restoring the Rights of Convicts and Detainees as a Result of Improper Conditions of Detention “(registration number 5653). - “On the establishment of a dual system of regular penitentiary inspections” (registration number 5884). - “On Amendments to Certain Legislative Acts” (regarding the creation of highest security sections in pre-trial detention centres, the procedure and conditions of detention of prisoners of war). - Draft Law on Amendments to Certain Legislative Acts of Ukraine (concerning the peculiarities of engaging convicts in work and business activities in the penitentiary system). To create appropriate conditions of detention in penitentiary facilities and pretrial detention centres: - a pilot project on paid services for the provision of improved living conditions and catering to detainees was introduced in the pre-trial detention centres of the State Criminal Executive Service (Resolution of the Cabinet of Ministers of Ukraine of April 22, 2020 No. 305). The funds received from the project were used to improve detention	

		conditions of prisoners in free cells of pretrial detention centres. - The project “Individual space for convicted women” was introduced at all women's penitentiary facilities of the State Criminal Executive Service of Ukraine. Under the project, renovation of wards was carried out, separate bathrooms were equipped with shower cubicles and hot water, privacy walls between the beds were installed to create an individual space. - Living, sanitary and hygienic conditions of detention of convicts and detainees have been brought in line with international standards, in particular, a renovated building for detainees was commissioned at the state institution “Kyiv Pretrial Detention Centre”, which was repaired according to the Norwegian model. As a result, 18 cells were renovated: 14 double and 4 single. - the supply of high-quality food to penitentiary facilities and pre-trial detention centres was ensured, the lists of foodstuffs, basic necessities, and other items that convicts and detainees can receive in packages (care packages) and parcels, purchase at the shops of penitentiary facilities and pre-trial detention centres, and keep were reviewed and expanded. -12 inefficient penitentiary facilities have been temporarily closed down, which will allow to optimize the costs and attract them for the construction of new pretrial detention centres. - an auction of the project “Large privatization of prisons” was held, in the framework of which 496.2 million USD was received from the sale of the Lviv Penal Colony. - Convicts were granted permission to use a tablet computer to ensure the right of convicts to correspond, submit online appeals and access to socially significant information that promotes the development and resocialization of convicts (Order of the Ministry of Justice of Ukraine of March 27, 2020 No.1243/5). - convicts were granted access to the Internet, detainees - IT-telephony and the Internet. - the mechanism of direct control over the activities of penal colonies and pretrial detention centres, health care institutions and state enterprises of the State Criminal Executive Service of Ukraine has been established by assessing the effectiveness of their management and performance of their functions (order of the Ministry of Justice of October 7, 2020 No. 3474/5). In order to ensure the functioning of transparent and effective mechanisms of prevention and combatting torture and ill-treatment in	

		places of detention and pre-trial detention: - video monitoring centres have been established in all interregional offices and in each facility (for timely detection and prevention of violations of the rules of detention by convicts and increase the efficiency of performance of official duties by the staff of the facilities). - inspection of the effectiveness of penitentiary institutions and pre-trial detention centres was carried out. As a result, proposals were made to eliminate the identified violations and prevent them in the future, official investigations were conducted into violations of the law. In order to build IT infrastructure and digitize the penitentiary system: - the Unified Register of Convicts and Detainees has been improved and supplemented, which will ensure: prompt communication between agencies and institutions of the penitentiary system and probation, in particular the possibility of transferring registration files between the units of penitentiary facilities, authorized probation authorities; generation of analytical reports and electronic enquiries / replies as part of the interaction of penitentiary institutions with authorized probation authorities during the preparation for the release of convicts. - a tool for automated risk assessment of recidivism - Cassandra (more than 140 thousand risk assessments were conducted) was developed. - an interactive map for assessing the effectiveness of the penitentiary system was introduced. - a Unified Register of Persons Convicted of Crimes against Sexual Freedom and Sexual Inviolability of Minors was created. To ensure proper medical care in penitentiary facilities and pre-trial detention centres in accordance with national and international standards: - The Global Strategy for the Prevention and Control of AIDS has been successfully implemented, the first two goals of the Joint United Nations Program on HIV/AIDS (UNAIDS) (Fast Track 90-90-90) have been achieved at penitentiary facilities and pre-trial detention centres, which has made it possible to reduce the percentage of deaths caused by HIV/AIDS. - for the first time ever since the State Criminal Executive Service of Ukraine was founded, with the funds of the State Budget, the State Institution “Healthcare Centre of the State Criminal Executive Service	

		of Ukraine" started diagnosis and treatment of viral hepatitis. - 95% coverage by DNA-based method of tuberculosis diagnosis using GeneXpert devices was reached among persons taken into custody and convicts who were subject to examination, while 100% of convicts with tuberculosis which were referred for treatment to TB hospitals took a drug sensitivity test for effective selection of an anti-tuberculosis treatment regimen. - renovation of the medical building in the state institution "Kyiv Pre-trial Detention Centre" was carried out, which will facilitate the provision of high-quality medical services and first aid. - implementation of 5 pilot projects regarding the introduction of replacement supportive therapy for convicts has been started; legal settlement in terms of the expansion of medical devices (syringes and needles) is ensured. As regards the implementation of an effective toolkit for behavioural change, correction and resocialization of persons who have come into conflict with the law: - probation programs for working with adults and minor probation subjects have been developed and implemented; - "penitentiary probation" was introduced – provision of support and assistance in solving social and domestic problems to convicts who are preparing to be released from prison, to improve their social rehabilitation and prevent repeat offences; - 7 model probation offices were opened; - juvenile probation centres were established to better promote the interests of children who are in conflict with the law. - counselling offices which work with probation subjects suffering from HIV infection, tuberculosis and viral hepatitis C at probation units have been established and made operational.	
4	**Objectives to achieve goals from point 2 (for each defined goal)**			
Goals. Problem 1.		**Description of the objective to achieve the goal**	**Deadline for completing the objective**	**Dependence of the objective on other objectives, areas, problems**
Stage 1: 06/2022 – 12/2022				
	Ensuring the safety of convicts and prisoners by evacuation (from places of hostilities) and their 100% placement (in a safer area).	Task 1. Creating an effective evacuation system 1.1. Evacuation of convicts and	12.2022 12.2022	Deadline for completing the objective

	Ensuring that 100% of prisoners of war are held in accordance with the norms of international humanitarian law. The goal is to ensure the safety of personnel, convicts and prisoners, as well as the detention of prisoners of war.	prisoners (if necessary) 1.2. Development of a training program for convicts and prisoners on life safety issues 1.3. Provision of personnel with individual means of protection, etc. necessary means 1.4. Carrying out repairs, setting up proper communal and household conditions for keeping evacuated convicts and prisoners. 1.5. Creating a sufficient reserve of places for the evacuation of convicts, prisoners, including by reviewing the system of correctional institutions and the distribution of convicts	11.2022 12.2022 12.2022 12.2022	
		Task 2. Restoration of partially damaged institutions. 2.1. Carrying out examination (construction and technical) of damaged/destroyed facilities of penitentiary and probation institutions. 2.2. Development of design and estimate documentation for the reconstruction/repair of objects of penitentiary and probation institutions and obtaining permits. Conducting tender procedures 2.3. Carrying out construction and assembly works	12.2022 12.2022 12.2022 12.2022	
		Task 3. Conditions for keeping prisoners of war have been created. 3.1. Development of design and estimate documentation for the construction/reconstruction of a camp for prisoners of war (if necessary)	12.2022 11.2022 11.2022 12.2022	

		3.2. Obtaining financing and carrying out the necessary tender procedures and obtaining a construction permit (if necessary) 3.3. Carrying out construction/repair works in the camp for prisoners of war 3.4. Putting the camp into operation	12.2022	
Stage 2: 01/2023 – 12/2025				
	Facilities with the capacity of 2,000 places to hold people taken into custody are built and 1,000 places at correctional facilities that meet national and international standards, 100% of damaged infrastructure has been restored (depending on need). (subject to funding) Updated 75% of medical equipment (of need).	Task 4. Development of procedures, knowledge and skills of convicts, prisoners and staff that ensure their safety 4.1. Ensuring training of convicts, prisoners and staff of the National Security Service on issues of life safety 4.2. Provision of material conditions for the safety of convicts, prisoners and staff	12.2023 12.2023 12.2023	
		Task 5. Restoration of objects destroyed (partially or completely) as a result of hostilities.	2025	
	The goal is to ensure the rights of convicts and prisoners to proper conditions of detention, the right to health care and medical assistance, and the prevention of torture and ill-treatment.	Task 6. Creation of an effective system of prevention and countermeasures against torture (including creation and ensuring the functioning of a dual system of regular penitentiary inspections, modernization of the video surveillance at penitentiary institutions and pre-trial detention centres).	2024	
		Task 7. Development of a human-centric model of medical care for convicts and persons taken into custody	2024	0
		Task 8. Creation of a model penitentiary institution and two modern pre-trial detention centres.	2025	

		Task 9. Modernization of engineering and technical means of protection and supervision to ensure compliance with modern physical security requirements and guarantee the safety of personnel and convicts.	2025	
		Task 10. Preparation of design and estimate documentation for 28 modern detention centres and 29 penitentiary institutions.	2025	
		Task 11. Creation of modern model probation offices adapted to work for public safety.	2025	
Stage 3: 01/2026 – 12/2032				
	100% of penitentiary institutions and remand prisons meet international standards (28 remand prisons, 29 institutions were built, existing institutions were reconstructed (depending on the need). The goal is to create a humane environment, to bring the conditions of detention to the requirements of national legislation and international legal acts. The goal 100% of prisons and detention centres meet the standards of the Council of Europe.	Task 12. Construction/reconstruction of 28 new modern pre-trial detention centres and 29 model institutions	2032	
		Task 13. Dissemination of the models and approaches piloted in the model penitentiary to all penitentiary institutions	2032	
		Task 14. Creation of modern model probation offices adapted to work for public safety.	2032	
		Task 15. Integration of penitentiary medicine into the general medical space.	2027	
	Goals. Problem 2.	Description of the objective to achieve the goal	Deadline for completing the objective	Dependence of the objective on the other tasks, areas, problems
Stage 1: 06/2022 – 12/2022				
	Alternative types of punishment to deprivation of liberty have been expanded, additional incentives have been created to encourage convicts to work as a means of	Task 16. Increasing the use of punishments and preventive measures not related to isolation from society, and further development of probation bodies.	12.2022 12.2022	

	resocialization The goal is to increase alternatives to deprivation of liberty without isolation from society.	16.1. Support in the Verkhovna Rada of Ukraine of the draft Law of Ukraine “On Amendments to the Criminal Code of Ukraine, the Criminal Procedure Code of Ukraine regarding the development of the probation system, increasing alternatives to incarceration and creating conditions for reducing recidivism” (reg. No. 5360 dated 12.04.2021) 16.2. Support in the Verkhovna Rada of Ukraine of the draft Law of Ukraine “On Amendments to Certain Legislative Acts Regarding the Development of the Probation System, Increasing Alternatives to Imprisonment and Creating Conditions for Reducing Recidivism” (Reg. No. 5359 dated April 12, 2021) 16.3. Bringing bylaws into compliance with laws	12.2022 12.2022	
		Task 17. Creation of additional conditions, mechanisms to encourage convicts to work 17.1. Development and submission to the Cabinet of Ministers of Ukraine of a draft law on the introduction of amendments to some legislative acts of Ukraine (regarding the specifics of the involvement of convicts in labour and economic activity in the penitentiary system) 17.2. Support in the Verkhovna Rada of Ukraine of the draft Law on Amendments to Certain Legislative Acts of Ukraine (regarding the specifics of the involvement of convicts in work	12.2022 12.2022 12.2022	

		and conducting economic activities in the penitentiary system)		
		Task 18. Restoration of socio-educational and psychological work with convicts 18.1. Resume probation, correctional, etc. programs. DBB programs 18.2. An online course for convicts “Program for preparation for release” has been introduced	12.2022 12.2022 12.2022	
	Stage 2: 01/2023 – 12/2025			
	Effective programs and tools for social, educational and psychological work with convicts are used (correctional programs are applied to 80% of convicts) The implementation of this goal involves the implementation of the draft law on alternative punishments to deprivation of liberty, as well as the improvement of work on the criminogenic risks of convicts, in particular, the provision of support and assistance in overcoming addictions, involvement in gainful employment, raising the educational level and professional skills, solving social and everyday issues under time to prepare for release.	Task 19. Development and implementation of correctional and probation programs, including taking into account the addictions of convicts. 19.1. Development of correctional programs considering the needs of different categories of convicts 19.2. Piloting correctional programs for convicts 19.3. Staff training on the implementation of correctional programs and probation programs (including the development and implementation of online courses for staff) 19.4 Analysing programs for convicts in terms of their effectiveness and the need for revision (in particular, in the areas of work with PTSD, trauma, etc.)	12.2023 12.2023 12.2023 12.2023	
		Task 20. Changing the approaches to engaging in useful employment of convicts and persons taken into custody, creating additional incentives for engaging convicts in	12.2025	

		work as a means of resocialization. 21.1. Preparation and support of legal acts regulating gainful employment for convicts 21.2. Involvement of business, self-government bodies and associations of territorial communities in the process of useful employment of convicts 22.3. Employment of convicts	12.2023 12.2024 12.2025	
		Task 21. Expansion of opportunities for convicts to obtain formal (general secondary, professional (vocational and technical), vocational higher education), informal and informal education (including with the use of distance technologies). 21.1. The “Occupation” Program of has been updated and implemented, taking into consideration the expansion of the list of professions for convicts, necessary for the restoration of Ukraine	2024	
		Task 22. Development of a system of psychological assistance to convicts and persons taken into custody.	2024	
		Task 23. Implementation of resocialization projects.	2025	
		Task 24. Implementation of a new model of parole application. 24.1. Amendments to the Procedure for Interaction of Penitentiary Institutions, Probation Authorities, and Subjects of Social Patronage During Preparation for	12.2023 12.2023	

		the Release of Persons Serving Restraints or Imprisonment for a Specific Term, Approved by Order of the Ministry of Justice of Ukraine, the Ministry of Social Policy of Ukraine, Ministry of Health of Ukraine, Ministry of Internal Affairs of Ukraine dated April 3, 2018 No. 974/5/467/609/280 24.2. Implementation of monitoring regarding violation of obligations within the framework of parole	12.2023	
	Stage 3: 01/2026 – 12/2032			
	According to the results of the final risk assessment, 75% of people are less inclined to commit repeated criminal offenses The goal is to ensure the safety of society by shifting the focus of the system of execution of criminal punishments to the resocialization of convicts, correction of their behaviour	Task 25. Review and improvement of existing, development and implementation of new correctional programs considering the evaluation of their effectiveness of convicts	2029	
		Task 26. The system of providing social services for convicts after release, which provide all their needs, has been improved	2032	
	Goals. Problem 3.	Description of the objective to achieve the goal	Deadline for completing the objective	Dependence of the objective on the other tasks, areas, problems
	Stage 1: 06/2022 – 12/2022			
	Conditions have been created for effective learning, in particular for distance learning. The goal is aimed at training highly professional personnel of the penitentiary system, capable of performing the functions of correction and resocialization of convicts based on the most modern approaches and methods of work	Task 27. An informational and educational portal was created for the staff of the State Criminal Enforcement Service of Ukraine. 27.1. Creation of a layout of an electronic resource and its placement on the network. 27.2. Filling the electronic resource with the necessary information. 27.3. Providing staff with the opportunity to use the portal.	12.2022 09.2022 11.2022 12.2022	Deadline for completing the objective

		Task 28. Training programs for advanced training and initial professional training of the staff of the State Security Service were brought into line, taking into account the events related to the war in Ukraine. 28.1. Programs and educational materials for professional development and initial professional training of personnel have been developed and tested. 28.2. Standard training programs have been approved.	12.2022 10.2022 11.2022	0
	Stage 2: 01/2023 – 12/2025			
	Professional training of personnel ensures the necessary knowledge, skills and abilities for the effective performance of their duties. The goal is aimed at creating an effective system of training, retraining and advanced training of personnel.	Task 23. The informational and educational portal for State Criminal Enforcement Service of Ukraine's personnel has been updated. 23.1. Determining the effectiveness of the information and educational portal. 23.2. Filling the portal with updated information. 23.3. Improvement of portal tools and services.	2025	
		Task 24. Training programs for advanced training and initial professional training of the staff of the State Security Service were updated, in response the events related to the war in Ukraine. 24.1. The educational programs of professional development and initial professional training of the staff of the State Security Service have been brought into line, considering the events related to	2025 2023 2024	

		the war in Ukraine. 24.2. The latest tools and methods of professional training of personnel have been implemented.		
	Goals. Problem 4.	Description of the objective to achieve the goal	Deadline for completing the objective	Dependence of the objective on the other tasks, areas, problems
Stage 1: 06/2022 – 12/2022				
	Goal. The operation of information systems to ensure execution of punishments has been restored. The goal involves ensuring the restoration of stable operation of information systems.	Task 25. Resumption of work of the Unified Register of Convicts throughout the territory of Ukraine. 25.1. Employees of the Penitentiary Department and the State Probation Centre have been restored access to the Unified Register of Convicts in regions where the operation of unified registers is allowed. 25.2. The transfer of Registration files of convicted persons and persons taken into custody in accordance with their territorial movement during the war has been ensured. 25.3. The work on the entry of existing archive data into the Unified Register of Convicts has been resumed. 25.4. Processes of quality control of data entry into the Unified Register of Convicts have been restored.	12.2022 06.2022 07.2022 06.2022 08.2022	
		Task 26. The use of the tools of social and educational work (risk assessment, diary, individual work plans) with convicts and persons taken into custody in the detention centre has been resumed: 26.1. The work on conducting risk assessments of convicted persons	12.2022 07.2022 07.2022 07.2022	

		and persons taken into custody has been resumed 26.2. Data filling in the diaries of convicted persons has begun 26.3. Maintenance of individual plans of individuals on probation resumed 26.4. Processes of quality control of filling in relevant tools of social and educational work have been resumed	08.2022	
		Task 27. A data analytics system with a corresponding data store has been implemented. 27.1. Finalization of the software of the data analytics system and storage 27.2. A data analytics system and a data warehouse have been introduced	12.2022 12.2022 12.2022	
Stage 2: 01/2023 – 12/2025				
	Goal. The level of digitization of the penitentiary system reaches at least 70%. The goal is aimed at introducing new methods and tools of work, developing digital infrastructure, increasing the level of digital and computer literacy of the staff, allocating funding for the introduction of information technologies and innovations.	Task 28. Unified Register of Convicts is put into industrial operation: 28.1. Proposals to improve work have been introduced 28.2. A report on test operation was drafted; 28.3. Industrial operation has been launched	12.2023 09.2023 11.2023 12.2023	
		Task 29. Development of the “Regime of Penitentiary Institutions” subsystem: 29.1. Development and approval of the Terms of Reference 29.2. Subsystem development (creation of fields and data	10.2023 05.2023 07.2023 10.2023	

		structures) 29.3. Implementation of the subsystem and training of employees		
		Task 30. Modernization of the group of subsystems KASSANDRA and Analytics: 30.1. Development and approval of the Terms of Reference 30.2. Finalization of the software for checking and validating risks 30.3. Automation of filling the data structures of the Risk Assessment with the data of the Registration Card, cases 30.4. Modernization of the Analytics subsystem	10.2023 05.2023 08.2023 06.2023 10.2023	
		Task 31. Modernization of groups of subsystems of Unified Register of Convicts: 31.1. Development and approval of the Terms of Reference 31.2. Ensuring the modernization of groups of main subsystems 31.3. Development of opportunities for electronic digital signature of documents 31.4. Ensuring access to the Unified Register of Convicts of law enforcement agencies and courts	12.2023 07.2023 11.2023 12.2023 12.2023	
		Task 32. Integration of Unified Register of Convicts with other systems and Registers: 32.1. Development and approval of the Terms of Reference 32.2. Building integrations with information systems and Registers	2023 07.2023 11.2023	

		of the Ministry of Internal Affairs, State Judicial Administration etc.		
		Task 33. The measures of automated control over the supervision and safety of convicted persons have been modernized, in particular, through the implementation of the subsystem called “Regime” at penitentiary institutions and the main components of the Unified Register of Convicts	2024-2025	
		Task 34. Mechanisms of automatic distribution of convicts to penitentiary institutions have been implemented by means of the Unified Register of Convicts	2024-2025	
	Stage 3: 01/2026 – 12/2032			
	Goal. The level of digitization of the penitentiary system is at least 95% . The purpose of the implementation of the goal is to improve activities, speed up and increase the convenience of information exchange, its processing, systematization and analysis.	Task 35. The transition to paperless interaction between law enforcement, judicial and penitentiary agencies has been ensured.	2026	
		Task 36. Implementation of electronic monitoring of individuals on probation has been ensured.	2026	
		Task 37. Implementation of electronic services in the medical field.	2027	
		Task 38. Automated control solutions for operational activities, financial status and use of funds of penitentiary institutions and pretrial detention centres have been implemented.	2028	

5	**List of national projects to fulfil the objective from Paragraph 4 (for the corresponding objective)**

5.1	**Project Description for Task No. 3 from Subparagraph 4**	**Project Justification**	**Quality performance indicators of the project**	**Economic effect (impact on GDP, budget, employment, etc.)**	**Key Institution Responsible**	**Estimated need for financing (million UAH)**	**Proposed sources of funding**	**Needed regulatory and legal support**	**Similar regulations in the EU acquis**	**Proposed by**	**Project status in the group**
5.1	P. 1.6 - 1.12 The infrastructure of the system of execution of punishments ensures safety and proper conditions of detention of convicts and prisoners	The need for the project is to ensure the safety and proper conditions of detention of convicts and prisoners, in accordance with national and international standards, and to introduce innovative approaches to the resocialization of convicts while serving their sentences. The Committee of Ministers of the Council of Europe repeatedly in its resolutions strongly urged the state authorities to solve the structural problem	- Construction of 30 new modern detention centres; - Creation of 30 model penitentiary institutions; - Bringing the conditions of detention of convicts and prisoners to international standards; - Reducing the number of appeals to the ECtHR regarding improper conditions of detention.	Reduction of state budget expenditures for payment of ECtHR decisions regarding improper maintenance of convicts and prisoners; Creation of additional jobs for convicts; Reduction of expenses of law enforcement agencies and the judicial system due to a reduction in the number of crimes; Replenishment of local budgets due to taxes during construction; Creation of additional jobs during the construction of	Ministry of Justice	148,600.00	Loans from international financial organizations. International technical assistance, Funds raised from other sources not prohibited by law.	-	Recommendations by the European Committee for the Prevention of Torture or Inhuman or Degrading Treatment or Punishment.		

		regarding the conditions of detention in the penitentiary system, relying on the established recommendations of the European Committee on Prevention of Torture or Inhuman or Degrading Treatment or Punishment. In general, about 2.5 million euros were paid out of the State Budget of Ukraine for the implementation of the decisions of the European Court in this group of cases, and a growing trend is observed.		new facilities; Saving of budget funds due to the energy efficiency of new facilities.							
5.2	25-38 Expanding the possibilities of digitalization of the penitentiary system	The need for the project is to ensure effective collection, use and analysis of data in the penitentiary system for making informed	- Modernization of the Unified Register of Convicts and Persons Taken into Custody, including the expansion of its analytical functionality - Implementation of electronic	Additional receipt of budget funds due to the introduction of reintegration into society of persons taken into custody as full-fledged	Ministry of Justice	111.65	Funds of the national informatization program; International technical assistance				

		management decisions.	monitoring during probation - Creation and implementation of an automated accounting system for material resources - Implementation and ensuring the functioning of a data collection system for the purposes of comprehensive assessment of correctional facilities colonies, pretrial detention centres, penitentiary institutions, health care institutions and state enterprises of the State Criminal Enforcement Service of Ukraine - Implementation of electronic services in the medical field - Implementation of electronic accounting, personnel and statistical accounting systems (MIA) - Implementation of electronic document management in agencies and institutions of the	taxpayers, as well as savings of budget funds due to the minimization of the risks of repeated offenses and the corresponding costs for the processes of courts, law enforcement agencies and enforcement agencies							

			penitentiary system								

6	Regulatory and legal support required					
No. of sub-item from item 4	**The name of the legal act(s) to achieve the objective from Paragraph 4**	**Scope of development/changes of the legal act(s)**	**The state authority responsible for the development/amendments of the legal act(s)**	**Time due**	**Deadline for entry into force**	**legal act(s) status**
	On amendments to some legislative acts regarding the development of the probation system, encouraging alternatives to incarceration and creating conditions for reducing recidivism (registration number 5359).	The purpose of the draft law is to individualize the system of punishments and expand the list of types of punishments alternative to deprivation of liberty, which will contribute to the reduction of the number of people in places of deprivation of liberty, ensure the correction of offenders without isolation from society and save relevant budget funds, as well as the introduction of a system for assessing the risks of a person committing a repeat crime and risks violation of obligations within the limits of a preventive measure or parole, which is based on the use of machine learning and algorithms of automated conclusions (forecasts) based on the results of processing large structured data sets.	Ministry of Justice			Under consideration by the relevant state authority
	"On amendments to the Criminal Code of Ukraine, the Criminal Procedure Code of Ukraine regarding the development of the probation system, increasing alternatives to deprivation of liberty and creating conditions for reducing recidivism" (registration number 5360).	The purpose of the draft law is to individualize the system of punishments and expand the list of types of punishments alternative to deprivation of liberty, which will contribute to reducing the number of people in places of deprivation of liberty, ensure the correction of offenders without isolation from society and save the relevant budget funds.	Ministry of Justice			Under consideration by the relevant state authority
	"On the Penitentiary System" (registration number 5293).	The purpose of adopting the draft law is to optimize the structure of the	Ministry of Justice			Under consideration

		penitentiary system, to introduce new approaches to encouraging its staff, and to introduce effective management of enterprises of penitentiary institutions.				by the relevant state authority
	"On the Disciplinary Statute of the Penitentiary System" (registration number 5294)	The purpose of adopting the draft law is to approve the Disciplinary Statute of the penitentiary system, which will determine the grounds and procedure for bringing members of the rank and file of the penitentiary system to disciplinary responsibility, as well as applying incentives to them.	Ministry of Justice			Under consideration by the relevant state authority
	"On Amendments to the Criminal Code of Ukraine regarding criminal liability for torture" (registration number 5336).	The purpose of the draft law is to align the provisions of the Criminal Code of Ukraine with the provisions of the UN Convention against Torture and Other Cruel, Inhuman or Degrading Treatment and Punishment.	Ministry of Justice			Under consideration by the relevant state authority
	"On amendments to some legislative acts of Ukraine regarding the application of force-feeding measures to convicts and persons in custody" (registration number 4323).	The purpose of adopting the draft law is to determine the legal basis for approving the procedure and types of forced feeding, as well as the conditions of detention of convicts and persons taken into custody who refuse to take food (declare a hunger strike).	Ministry of Justice			Under consideration by the relevant state authority
	"On amendments to the Criminal Procedure Code of Ukraine regarding the application of force-feeding measures to convicts and persons in custody" (registration number 4324).	The purpose of the adoption of the draft law is to improve certain provisions of the criminal procedural legislation in terms of regulating the procedure for court consideration of the issue of force-feeding of convicts and persons in custody and those who refuse food (declare a hunger strike).	Ministry of Justice			Under consideration by the relevant state authority
	"On amendments to some legislative acts regarding measures aimed at restoring the rights of convicted persons and persons taken into custody due to improper conditions of detention" (registration number 5652).	The purpose of the draft law is to ensure compliance of Ukrainian legislation with the Convention on the Protection of Human Rights and Fundamental Freedoms, to create appropriate material and living conditions of detention, as well as to introduce effective preventive	Ministry of Justice			Under consideration by the relevant state authority

		and compensatory means of legal protection in the case of improper conditions of detention into national legislation.				
	"On amendments to the Criminal Code of Ukraine and the Criminal Procedure Code of Ukraine regarding measures aimed at restoring the rights of convicted persons and persons taken into custody due to improper conditions of detention" (registration number 5653).	The purpose of the draft law is to ensure the compliance of Ukrainian legislation with the Convention on the Protection of Human Rights and Fundamental Freedoms, to create appropriate material and living conditions for detention, as well as to introduce into national legislation effective preventive and compensatory means of legal protection in case of improper conditions of detention.	Ministry of Justice			Under consideration by the relevant state authority
	"On the establishment of regular penitentiary cross-inspections" (registration number 5884).	The purpose of adopting the draft law is to create a system of regular internal (administrative) and external penitentiary inspections to ensure control over the observance of the rights and freedoms of people and citizens who are in the places specified in Article 22 of this Law, the realization of the legal rights and interests of the staff of places of detention, points of temporary detention accommodation of refugees.	Ministry of Justice			Under consideration by the relevant state authority
	The draft law on amendments to some legislative acts of Ukraine (regarding the specifics of the involvement of convicts in labour and economic activity in the penitentiary system).	The draft law, in the case of its adoption, will allow creating additional incentives for the involvement of convicts in work as a means of resocialization and will regulate the issue of registration of labour relations, taking into account the features established by criminal law	Ministry of Justice			It is being prepared
	Draft law on amendments to some legislative acts.	The draft law is aimed at regulating the detention of convicts in sectors of the highest security level in detention facilities, specifying the order and conditions of detention of prisoners of war, ensuring the state of law and order				

		in detention facilities.					
	Order on bringing subordinate legal acts into compliance with the law on the restoration of the rights of convicted persons and persons taken into custody due to improper conditions of detention.		Ministry of Justice		After the adoption of the Law		
	Order on bringing subordinate legal acts into compliance with the law on the creation of a dual system of regular penitentiary inspections.		Ministry of Justice		After the adoption of the Law		
	Order on bringing subordinate legal acts into compliance with the Law of Ukraine "On Amendments to Certain Legislative Acts on the Development of the Probation System, Increasing Alternatives to Imprisonment and Creating Conditions for Reduction. recidivist crime". 	Amendments to the Procedure for Supervision and Conduct of Social-Educational Work with Those Convicted to Sentences Not Related to Imprisonment, Approved by Order of the Ministry of Justice of Ukraine dated January 29, 2019 No. 272/5.		Ministry of Justice		After the adoption of the Law		
	Amendments to the Procedure for execution by authorized bodies on probation of court decisions on the imposition of punishment in the form of a fine, approved by the order of the Ministry of Justice of Ukraine dated 04/27/2018 No. 1301/5.		Ministry of Justice		After the adoption of the Law		
	Amendments to the Procedure for Interaction of Penitentiary Institutions, Probation Authorities, and Subjects of Social Patronage During Preparation for the Release of Persons Serving Restraints or Imprisonment for a Specific Term, Approved by Order of the Ministry of Justice of Ukraine, the Ministry of Social Policy of Ukraine, Ministry of Health of Ukraine, Ministry of Internal Affairs of Ukraine dated April 3, 2018, No. 974/5/467/609/280		Ministry of Justice		After the adoption of the Law		

	Preparation and maintenance of legal acts regulating gainful employment of convicts.		Ministry of Justice, Department for Execution of Criminal Punishments		After the adoption of the Law		

The National Council for the Recovery of Ukraine from the Consequences of the War

Draft Ukraine Recovery Plan

Materials of the “New agrarian policy” working group

July 2022

1. Key issues to be solved within the framework of the Recovery Plan

Situation in the agri-business sector before the war: Agribusiness sector is one of the Ukraine's economic powerhouses: the industry had sustainably grown before the start of the full-scale war, showing 5–6% annual growth, with a share of agricultural production in GDP amounting to 10%, and taken together with processing of agricultural products, to 16%. Agriculture was one of the leaders of world production in terms of some types of food, ensuring trade equivalent to 6 percent of global calorie consumption. Ukraine was a leader in international trade in sunflower oil (world leader), rapeseed and barley (third and fourth respectively in the rating), and other products. Ukraine annually earned USD 22 billion from the trade in agricultural products and food products whose share was 41% of total exports.

The development of industrial agricultural production in Ukraine made it possible to offset the impact of disparities in the levels of state support and lending costs with the countries of North America and the EU, and to compete successfully in international markets;

Introduction of the maximum amount of agricultural land into agricultural circulation resulted in the end of extensive growth (by increasing the land bank) and has led to a gradual transition to intensive growth by improving production technologies, production of higher value-added goods, renewal of equipment and storage facilities, development of processing sector.

Adoption of the land reform package not only launched the land market, but also significantly improved land relations, reduced corruption and raiding; and the agricultural sector became more attractive for investment due to the reform. Moreover, the land reform has become a basis for long-term development, and for example, for laying out orchards and vineyards.

The launched land reclamation reform has opened opportunities for agricultural producers to invest independently in expanding the area of irrigated land and reducing water supply losses, which leads to an increase in gross agricultural production.

The new Law of Ukraine "On Cooperation" has created an opportunity to develop cooperatives that unite hundreds and thousands of small and medium-sized agricultural farms, rising their competitiveness to the level of large agricultural holdings.

State of implementation of programme documents:

The key documents that determine the programme principles of agricultural policy in Ukraine are: the National Economic Strategy until 2030, the Concept of the State Target Programme for the Development of the Agricultural Sector for the Period until 2022, the Ordinance of the Cabinet of Ministers of Ukraine No. 688-p of 14 August 2019 "On approval of the Irrigation and Drainage Strategy in Ukraine until 2030", Ordinance of the Cabinet of Ministers of Ukraine No. 995-p of 23 September 2015 "On approval of the Concept of Rural Development", Ordinance of the Cabinet of Ministers of Ukraine No. 489-p of 19 July 2017 "On approval of the Action Plan for the Implementation of the Concept of Rural Development".

Impact of the war on the defined analysis area: The sea ports blockade has led to a substantial reduction in exports: from 6 to 7 million tons per month to 1.5 tons per month. That has led to a fall in domestic selling prices of agricultural products below the cost level, which threatens the bankruptcy of agricultural enterprises. If sea ports remain blocked until the new harvest begins, Ukraine's grain storage shortage will be up to 15 million tons, and a lack of funds from agricultural sales will jeopardize the 2022 harvesting and sowing campaigns.

According to the FAO's primary assessment, direct losses of assets in the sector can amount to USD 6.5 billion. Currently around 5 percent of agricultural land is damaged. The loss of available cultivated areas is over 25 percent, the loss of irrigated land is over 70 percent, the loss of berry fields is around 25 percent and the loss of orchards is 20 percent. The production cost has increased due to an increase in prices for fertilisers, fuel and seeds. Large land areas are dangerous for production due to damage and mine threat. Agricultural, warehousing, transport, energy and processing infrastructure facilities have been significantly destroyed.

Due to physical destruction of agricultural enterprises in the combat zone, the expected potential loss estimate is up to 30 percent of livestock. Moreover, there are challenges that were not addressed before the war: the difficulty of connecting to utility networks, protective barriers to entry of agricultural products into other markets (including EU quotas), incomplete adaptation of legislation in the field of safety, veterinary and phytosanitary control to EU *acquis*, problems with blocking tax invoices, insufficient capacities for transhipment and delivery of agricultural products to satisfy the growing needs of agricultural producers.

Key challenges (in general, for the defined area)	▯ lifting the blockade and development of seaports, creation of alternative export routes ▯ transformation and full provision of the environment for sustainable economic activity of all entities engaged in the agribusiness sector; ▯ rapid recovery, creating new economic chains and supporting competitive processing industry; ▯ providing all entities engaged in the agribusiness sector with high-quality end-to-end infrastructure: land, irrigation and drainage systems, funding, transport and logistics, utility networks; ▯ restoration of safe physical and environmental condition of the lands; ▯ overcoming corrupt practices and the shadow market of land and agricultural products, improving the investment climate; ▯ balanced production of high- and low-margin products; ▯ improvement of energy efficiency in the sector through the development of bioenergy; ▯ achievement of the optimal level of physical and economic food security; ▯ ensuring sustainable growth in the context of implementation of measures aimed at climate neutrality under the Green Deal. ▯ Ukraine's timely compliance with its obligations regarding harmonisation of domestic legislation with the EU *acquis* under the Association Agreement
Key opportunities (in general, for the defined area)	▯ high level of support from the international community interested in the recovery of Ukraine as one of global guarantors of food security; ▯ the recovery of the sector will provide an impetus for the development of related economic sectors: machinery and equipment, tertiary sector, trade, transport, chemical industry, etc.; ▯ increase in crop yields by a factor of 2–3 due to the use of hydraulic land reclamation; ▯ the package of laws on land reform and other deregulation and anti-corruption initiatives adopted by the Verkhovna Rada of the 9th convocation significantly improves the business climate in the agricultural sector; ▯ the level of production per employed person can be increased by 6 times through increased processing and more intense implementation of digital technology; ▯ the launch of the land market will help attract investment in capital-intensive production: orchards, berry plantations, and gives impetus to the development of land reclamation, infrastructure, increasing soil fertility.
Key restrictions (in general, for the defined area)	▯ a sharp drop in demand due to limited logistics, reduction in the sector profitability, liquidity shortage; ▯ deterioration of the land quality; ▯ limited access to funding for all entities engaged in the agribusiness sector; ▯ reduced technical capacity of the sector; ▯ shortage of qualified human resources; ▯ lack of effective instruments for the improvement of competitiveness, structural transformation and economic sustainability of the entities engaged in the agribusiness sector in whole.

2. Goals, tasks and stages of the Recovery Plan within the direction "New agricultural policy"

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
PROBLEM 1			
Strategic goal	Economic transformation of the agribusiness sector		
Goal to be achieved to solve the issue during each stage	Maintaining the economic potential of the agribusiness sector	Restoration of the economic potential of the agribusiness sector	Rapid improvement of the economic performance of the agribusiness sector
Deadline within the stage	during the Stage	annually during the Stage	annually during the Stage
Risks related to the goal achievement	▯ escalation of the military conflict, its expansion to other areas; ▯ further destruction of supply chains; ▯ lack of available funding, unavailability of credit resources; ▯ bankruptcy of a large number of enterprises.	▯ insufficient funding, limited credit resources; ▯ unfavourable investment climate, inadequate investor protection legislation, persistence of corruption; ▯ lack of adequate state support; ▯ lack of investment opportunities for market operators; ▯ insufficient implementation of safeguard measures at the previous stage; ▯ slow opening of prospective markets.	▯ insufficient funding, limited credit resources; ▯ unfavourable investment climate, inadequate investor protection legislation, persistence of corruption; ▯ lack of adequate state support; ▯ lack of investment opportunities for market operators; ▯ insufficient implementation of rehabilitative measures at the previous stage; ▯ slow opening of prospective markets.
Measurable goal achievement indicator	Ensuring food security. Completion of harvesting and sowing campaigns in 90 percent of the controlled cultivated areas.	A strong start during the post-war period. Recovery of the sector to the pre-war level.	50% of grain export potential will be processed. Increase in commercial production of livestock products by 20 to 85 percent.
Total funding requirement for the goal achievement	UAH 3.4 billion (USD 113 million) for providing farmers with temporary crop storage facilities, given the lack of 15 million tons of storage capacities. UAH 84 billion (USD 2.8 billion) for crediting of the 2022 and 2023 harvesting and sowing campaigns based on the assumption that ports would remain blocked till the beginning of 2023.	UAH 728 billion (USD 24.2 billion). Projects 5.1, 5.2, 5.3, 5.4, 5.5, 5.8, 5.9, 5.13, 5.14, 5.15, 5.16	UAH 843.5 billion (USD 28.1 billion). Projects 5.1, 5.2, 5.3, 5.4, 5.5, 5.10, 5.13, 5.14, 5.15, 5.16

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Links between the goal and other directions	▯ State support and taxation ▯ Financing and lending ▯ European integration	▯ State support and taxation. ▯ Funding and lending. ▯ European integration. ▯ Environmental conservation.	▯ State support and taxation. ▯ Financing and lending ▯ European integration. ▯ Alternative energy development. ▯ Environmental conservation.
Tasks aimed at achieving goals	▯ Production crediting and allocation of current funds for farmers. ▯ Ensuring food security at a level not lower than the established threshold values of food security indicators ▯ Taxation: abolition of the fuel excise tax, the VAT reduction, imposition of the tax rate of 2 percent of turnover. ▯ Simplified regulation of the fuel sales, in particular, cancellation, for a period of martial law, of the fines for fuel sales by the entities engaged in the agribusiness sector, without the licenses for wholesale trade. ▯ Imposing restrictions on the percentage of grain carriers and fuel transport vehicles which may be taken from an agricultural enterprise for military purposes. ▯ Evacuation of national resources, collections, varieties, breeds, laboratory equipment, etc. from research institutions which were or are located in the active combat areas or in the areas where there is a risk of active combat. ▯ Reduction of administrative burden from the Risk Assessment Criteria Monitoring System.	▯ Inventory of lost production units, including commodity production and processing units (projects 5.1, 5.2, 5.3, 5.4, 5.5). ▯ Attraction of investment in the priority areas (projects 5.1, 5.2, 5.3, 5.4, 5.5). ▯ Maintaining the purchasing power of the population through reduction in the VAT rate for food to 0 percent or 7 percent (after the abolishment of the martial law). ▯ Restoring and setting out new orchards and berry fields (project 5.3). ▯ Inventory of the technological readiness for commodity processing, launching new commercial production of equipment (project 5.5) ▯ Localisation and production of agricultural machinery and equipment ▯ Lending and insurance as main elements of state support (projects 5.1, 5.2, 5.3, 5.4, 5.5). ▯ Development of the cooperative system, in particular the implementation of the taxation model for cooperatives applicable in the EU and the USA, i.e. “patronage dividends” (projects 5.3, 5.4). ▯ “Unshadowing” of agricultural production: registration of all producers as market operators, ensuring traceability of products “from the field to the table” (project 5.5) ▯ Implementation of a programme for return of qualified human resources to Ukraine and	▯ Launching production units for processing, including advanced processing, of grain and oleaginous crops (project 5.5). ▯ Construction of seed factories (project 5.15). ▯ Redirection of grain and oleaginous raw materials to the livestock sector (project 5.4). ▯ Development of organic production (projects 5.3, 5.4, 5.5) ▯ Opening new sales markets for fruit, livestock and processed products (projects 5.3, 5.4, 5.5). ▯ Localisation and production of agricultural machinery and equipment, including tractors (projects 5.3, 5.4, 5.5) ▯ Allocation of the main part of state support funds to finance lending and insurance programmes (projects 5.1, 5.2, 5.3, 5.4, 5.5). ▯ Opening new sales markets for fruit, livestock and processed products (projects 5.3, 5.4, 5.5). ▯ Implementation of world best practices of GMO control and distribution (project 5.13) ▯ Connection to the electronic phytosanitary certificate management system of the Food and Agriculture Organisation of the United Nations (ePhyto) to provide the opportunity to obtain electronic international phytosanitary certificates (project 5.13). ▯ Development of software to ensure full-fledged system operation in the format of an electronic

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
		development of up-to-date sectoral expertise (projects 5.3, 5.4, 5.5) - Development of a new normative monetary evaluation methodology, which correlates with real yield, and in particular, takes into account the current soil moisture level. - Provision of incentives for employment of internally displaced persons in horticulture (project 5.3) - Establishment of a ban on unfair trade practices in relations between enterprises in the supply chains of agricultural and food products (project 5.5) - Combating food fraud: making a definition of food fraud and liability for food fraud at the legislative level (project 5.5) - Introduction of access of Ukrainian agricultural producers to high-quality meteorological services - Improving the quality of agricultural education: introduction of the principle of financing universities depending on the wage rates of graduates of such universities and on the principle of setting up supervisory boards of universities, composed mainly from university graduates and employers of those graduates - Financial autonomy of research organisations and their subdivisions in terms of the use of funds - Modification of the financing model for scientific developments (co-financing by the State of the developments funded by the business). - Implementation of activities aimed at obtaining an indefinite quota and duty free treatment of Ukrainian products from our strategic partners — the EU, the USA, Canada, Japan (projects 5.3, 5.4, 5.5).	grain owner's account having features similar to the client-bank system. - Development of the bioenergy sector taking account of the REPowerEU Plan (projects 5.2, 5.10). - Full implementation of commitments in the field of agriculture, sanitary and phytosanitary measures provided for in the EU-Ukraine Association Agreement, conducting audits (projects 5.5, 5.13) - Development of a "Smart Green Agreement": gradual bringing of the requirements for Ukrainian agricultural producers in line with the EU Green Deal, with an account taken of Ukrainian national specifics (project 5.10) - Large-scale training of Ukrainian producers on the requirements of European *acquis* in the field of agriculture, sanitary and phytosanitary requirements, the EU Green Deal (projects 5.10, 5.13)

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
PROBLEM 2			
Strategic goal	Development of the agricultural infrastructure		
Goal to be achieved to solve the issue during each stage	Building new supply routes, exports enhancement, domestic logistics streamlining	Attracting investment in the agribusiness sector, in particular in the infrastructure. Engaging land areas in the economic circulation at the pre-war level	Diversification of export risks. Radical increase the efficiency of land use
Deadline within the stage	annually during the Stage	annually during the Stage	annually during the Stage
Risks related to the goal achievement	escalation of the military conflict, its expansion to other areas; further destruction of supply chains; lack of available funding, unavailability of credit resources;	remaining hotspots of the military conflict; limited regaining of control over the occupied territories; insufficient funding, limited credit resources; unfavourable investment climate, inadequate investor protection legislation; insufficient implementation of safeguard measures at the previous stage; lack of adequate state support;	insufficient funding, limited credit resources; unfavourable investment climate, inadequate investor protection legislation; lack of adequate state support; insufficient implementation of rehabilitative measures at the previous stage; lack of investment opportunities for market operators.
Measurable goal achievement indicator	Realisation of the export potential at the level of at least 60 percent of the potential capacity.	Diversification of logistics: increase in the export potential by ~12 million tons of cereal crops (1 million tons per month, 10 grain storages with a capacity of 100 thousand tons), foreign currency earnings of USD 3.5 billion per year. Land restoration: the economic effect of UAH 30 billion per year from the productive use of this land.	Development of the Danube River traffic: increase in the export potential by ~12 million tons of processed products, foreign currency earnings of USD 18 billion per year (at the price of USD 1,500 per ton). Commercialisation of scientific developments: +1 percent of the GDP.
Total funding requirement for the goal achievement	a 70% subsidy for the construction of grain and oil trans-loading terminals across the Ukraine-Poland border using oil pipelines and belt conveyors worth UAH 1.26 billion (USD 42 million). Total trans-loading capacity is 4 million tons grain and 1 million tons of oil per year.	UAH 111.7 billion (USD 3.7 billion). Projects 5.6, 5.7, 5.11, 5.12	UAH 2 billion (USD 60 million). Project 5.7

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
	a 50% co-financing for the construction of a new transport corridor to the ports of Poland and Lithuania on the basis of a broad gauge, worth UAH 15 billion (USD 500 million). The capacity is about 1 million tons per month.		
Links between the goal and other directions	- Financing and lending - European integration	- State support and taxation. - Funding and lending. - European integration.	- State support and taxation. - Financing and lending - European integration. - Environmental conservation.
Tasks aimed at achieving goals	- Implementation of the EU-Ukraine *Solidarity Lanes* Action Plan to improve Ukrainian agricultural exports and bilateral trade, including: optimisation of border crossing points, simplification of phytosanitary and customs clearance procedures for export cargoes containing agricultural products, and improvement of interaction between all transport participants by introducing an end-to-end trans-loading planning system and introducing electronic queues for vehicles in ports, etc. - Measures aimed at increasing storage capacities for cereal and oleaginous crops, in particular through the use of PET storage sleeves and temporary grain storage facilities. - Unblocking of sea ports. Active lobbying of "blue convoys" for ships entering Ukrainian ports for the purpose of export of agricultural products in international organisations. - Construction of a new transport corridor to the ports of Poland and Lithuania on the basis of a broad gauge.	- Building land infrastructure as an element of diversification of logistics supplies from Ukraine and as an alternative to sea ports (project 5.6), - creation of an alternate logistics corridor to the Baltic states through Poland (project 5.11). - Simplification of the utility connection procedures, in particular: allowing farmers to build infrastructure lines by themselves to connect to remote facilities and small distribution systems to connect household consumers (projects 5.2, 5.3, 5.5), OECD's obligation to publish on the Internet the data on the available capacities. - Introduction of the "smart microgrid" concept — small green energy producers will have the right to sell their own electric power in "their village" (projects 5.1, 5.2, 5.3, 5.4, 5.5, 5.6) - Development of land reclamation, in particular: rehabilitation and construction of new reclamation systems, establishment of state reclamation infrastructure operators (managed by water users), promotion of the establishment and development of water user organisations and attraction of private investment in the construction of new reclamation systems (project 5.1).	- Development of the Danube River traffic as an efficient way to access the Central and Western European markets (project 5.7). - Development of new approaches to improve the investment attractiveness of land resources in order to expand biodiversity and expand the list of export commodity items (project 5.10). - Applied research and development in the food industry with the main goal to break new ground and obtain new innovative product lines in the raw material processing segment (project 5.5).

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
	▯ Implementation of assistance programmes for emergency relocation or starting new production. ▯ Reallocation of the capacities of Ukrainian Railways and the capacity of road BCPs in favour of export of goods with higher value added and short shelf-life.	▯ Inventory of land resources and identification of land areas affected by warfare (projects 5.8, 5.9). ▯ Ensuring performance of land rehabilitation and remediation works (project 5.8). ▯ Applied research and development in the food industry with the main goal to break new ground and obtain innovative products in the raw material processing segment (projects 5.5, 5.12). ▯ Promotion of export of domestically produced seeds (projects 5.6, 5.7, 5.12).	

3. List of projects aimed at the completion of tasks (for the relevant task) with the purpose to achieve goals

No.	Project description	Rationale	Performance criteria/indicators (quantitative and qualitative)	Economic effects (impact on the GDP, budget, employment, etc.)	Main responsible public authority	Estimated funding needed (UAH million)	Proposed sources of funding	Legal and regulatory framework	Related areas of the EU law (general comment)

5.1	Development of reclamation systems	Due to reduction in irrigated areas from 2.3 million hectares in 1990 to 0.6 million hectares in 2021 and losses caused by the aggression and climate change, the agriculture does not generate the maximum value added in some areas and is at risk due to growing drought in other areas. Irrigation enables to increase yield by 100 percent, EBITDA, in average, increases by USD 500 per hectare, and the payback period is up to 5 years for investment of UAH 2,500 per hectare.	Restoration of 100 percent of the destroyed and damaged reclamation infrastructure. Construction of new irrigation systems and other support infrastructure on the area of 1 million hectares. Restoration and construction of water management (drainage) systems on the area of 500 thousand hectares.	Increase in production by 8 million tons of cereal crops per year. Increase in proceeds by USD 2.5 billion per year. Increase in employment by 25 thousand jobs (7 thousand in the sector and 18 thousand in related sectors). Energy modernisation.	Ministry of Agrarian Policy and Food	UAH 120 billion (USD 4 billion)	State Budget, international loans and the EU donor aid	Amending legislation on reclamation systems management, financing reclamation systems construction and reconstruction projects	

5.2	Bioenergy independence	Energy independence will enable to solve critical strategic, industrial and social issues: out of 26.8 billion cub. m of gas consumed in 2021, the share of imported gas was 2.6 billion cub. m, and it was 16 billion cub. m in 2020. Domestic biogas production in Ukraine can cover consumption of 2 billion cub. m at the minimum tariff of EUR 500 per 1 thousand cub. m, which is more than twice lower than the spot price at the European exchanges. Corn silage, straw, as well as waste and humus at the ratio of 20:50:30 will become raw materials for biogas production. In the case of biomethane production from organic waste with the addition of not more than 20% of the silage of energy crops on the European market, an additional premium is paid for it.	Partial energy independence, development of commercial production of biogas, construction of 333 plants for processing of agricultural crops and silage to biogas, provision of the market with 2 billion cub. m of domestically produced gas.	Improvement of the balance of payments; additional proceeds of up to 1.4 billion; prospective localisation of equipment production.	Ministry of Agrarian Policy and Food	UAH 108 billion (USD 3.6 billion)	State Budget, international loans and the EU donor aid	Introducing amendments to the legislation on alternative energy	REPowerEU, increase of bio-methane production in the EU from 18 to 35 billion cub. m in 2030
5.3	Fruit and vegetables in Ukraine	25 percent of berry fields and 20 percent of orchards were lost due to the war. Ukraine remains a net importer of vegetables, fruit and berries: the trade balance was -0.5 billion dollars in 2021. There is a lack of jobs in rural areas. It is necessary to provide raw materials for the processing sector.	Restoring/ setting out new berry fields on the area of 49.8 thousand hectares, new orchards on the area of 230.7 thousand hectares and nuts on the area of 8.4 thousand hectares.	1,117 thousand jobs, USD 5.6 billion in revenues per year.	Ministry of Agrarian Policy and Food, Ministry for Communities and Territories Development, Ministry of Economy	UAH 210 billion (USD 7 billion)	State Budget, international loans and the EU donor aid	Introducing amendments to the legislation on state support	

5.4	Meat and dairy independence	The continuing decline in the livestock production capacity, primarily in the beef and dairy cattle segment, led to growing import dependence (up to 30 percent) and created risks for the food security of Ukraine. Livestock development is an opportunity to diversify sales channels for agricultural producers of cereal and oleaginous crops. Livestock recovery is the guarantee for existence of the processing industry.	In order to ensure balanced sector recovery, the commodity supply segment in the livestock breeding sector should increase by 480 thousand tons of pork (64%), by 160 thousand tons of beef (59%), by 500 thousand tons of poultry (36%), by 7 billion eggs (50%), and by 1.8 million tons of milk (20%). Grain feed consumption will increase by 85 percent, up to 18 million tons.	Up to 50 thousand new permanent jobs. Improvement of balance of payments from livestock product sales by USD 2.7 million; +12 percent of value added per employed person.	Ministry of Agrarian Policy and Food, Ministry of Economy, State Service of Ukraine for Food Safety and Consumer Protection	UAH 229.9 billion (USD 7.66 billion): Capital investments in the amount of UAH 165.6 billion (USD 5.52 billion), and working capital investments in the amount of UAH 64.3 billion (USD 2.14 billion)	State Budget, international loans and the EU donor aid	Permanent abolition of quotas and customs duties for processed products by the EU, the USA, the United Kingdom, Japan and Canada	Tax legislation of the EU, the USA, the United Kingdom, Japan and Canada
5.5	Export-oriented food factory: promotion and development of processing of products of plant origin	Raw materials (over 55 percent) and primary processing products (35 percent) continue dominating in the export structure of agricultural products. This model is ill-balanced and leads to low production level in the sector in whole. Ukraine annually loses USD 50 to 250 per ton of raw materials sold due to the lack of extension of the value added chain to processing.	Increase in raw material processing by 85 percent, from the current level of 20.1 million tons per year to 38.8 million tons per year in 2030. The share of raw material processing is 50 percent of the export potential. Production of deep processing products: starch, fibre, lecithin, special fats, protein concentrates, isolates, etc.	Increase of export earnings per conditional ton of raw materials sold by 40 percent (it would be USD 21 billion vs. USD 15 billion at the year-end 2021)	Ministry of Agrarian Policy and Food, Ministry of Economy	UAH 474 billion (USD 15.8 billion): UAH 306 billion (USD 10.2 billion), and working capital in the amount of UAH 168 billion (USD 5.6 billion)	State Budget, international loans and the EU donor aid	Permanent abolition of quotas and customs duties for processed products by the EU, the USA, the United Kingdom, Japan and Canada	Tax legislation of the EU, the USA, the United Kingdom, Japan and Canada

5.6	Construction of transhipment facilities and cross-border terminals in Western Ukraine	The difference in Ukrainian and European rail gauges creates the need for transit hubs on the western border to reload agricultural products from Ukrainian cars to the European cars, and also, for the construction of grain and oil trans-loading terminals across the Ukraine-Poland border using oil pipelines and belt conveyors. The project is feasible in terms of diversification of logistics risks and increased exports to the EU.	Construction of: - trans-shipment facilities with a capacity of at least 1 million tons; - cross-border terminals with the capacity of 4 million tons of grain and 1 million tons of oil per year.	Increase in the export potential by ~12 million tons of processed products; 4 million tons of grain, 1 ton of oil, foreign currency earnings of USD 6.2 billion per year.	Ministry of Agrarian Policy and Food, Ministry of Infrastructure	UAH 7.3 billion (USD 242 million)	International loans and the EU donor aid	Judiciary and law-enforcement reform, deregulation of the connection to engineering networks	
5.7	Development of export of agricultural products by river	The EU cargo transport infrastructure makes substantial use of the Danube River Basin, including for the delivery of agricultural products. The use of Ukrainian ports on the Danube River will enable to reduce the cost of logistics, increase the logistics capacity of the Ukrainian exports, intensify the exports of fruit and vegetables from the south of Ukraine as well as the exports of finished products.	Modernisation of the port infrastructure: construction of terminals with a storage capacity of at least 1 million tons. Development of own merchant fleet: purchase, long-term charter or lending for the construction of at least 100 vessels.	Increase in the export potential by ~12 million tons of fruit and vegetable products and processed products; foreign currency earnings of USD 18 billion per year.	Ministry of Agrarian Policy and Food, Ministry of Infrastructure	UAH 8 billion (USD 267 million)	International loans and the EU donor aid	Judiciary and law-enforcement reform, deregulation of the connection to engineering networks	

5.8	Return of agricultural land to the economic circulation	Around 5 percent of agricultural and related land has been damaged due to warfare. In this regard, it is important to take measures at the national level to return it to the economic circulation. They include the inventory of such land, calculation of its total area, classification, analysis and assessment of damages and losses, measures for its return: de-mining, remediation, conservation, as well as monitoring.	Return of all land resources damaged and lost in the agricultural sector to the economic use.	The economic effect of UAH 30 billion per year from the productive use of this land	Ministry of Agrarian Policy and Food State Emergency Service	UAH 48.2 billion (USD 1.61 billion)	International loans and the EU donor aid	CMU Resolution "On the Procedure for return of agricultural land to the economic circulation"	
5.9	Mapping Ukraine and implementation of the National Geospatial Data Infrastructure	Without providing up-to-date cartographic data, restoration and development of areas is impossible. The implementation of the NGDI, including land monitoring, will ensure the effective adoption of managerial decisions by public authorities and local self-governments, meeting the public needs in all types of geographical information, integration into global and European geospatial data infrastructure	Surveying and creation of an actual cartographic basis of the whole area of Ukraine. Filling National Geoportal with content	Effective use of geospatial data will lead to annual GDP increase of up to 1%	Ministry of Agrarian Policy and Food Ministry for Communities and Territories Development State Geocadastre	UAH 3.3 billion (USD 110 million)	State Budget, international financial organisations	NGDI development plan	

5.10	Promoting the transition of the agri-food sector to Green Growth	Adaptation to climate change and mitigation of its consequences must be at the heart of the medium-term transformation of agriculture and preparation for accession to EU. Most agricultural emissions are currently due to soil misuse and inefficient use of fertilisers, that's why future government support programmes and policies should encourage farmers to implement technologies to reduce GHG emissions and adapt to climate change while maintaining farm profitability. Public policy and support should also focus on creating an enabling environment for attracting climate/carbon funds and creating "smart" climate services and information gathering.	Preparation of an action strategy and plan for the adaptation of the agri-food sector in accordance with the EU Green Deal; Agricultural receipts and other legislation have been adapted to reduce the costs of monitoring, reporting and verifying GHG emissions; At least 60% of farmers have access to the soil maps necessary for precision farming; climate-smart agriculture technologies (i.e. no-till or minimum tillage technologies, precision farming, organic fertilisers, etc.) will be introduced on 40% of arable land by 2030	The economic effect will be achieved by reducing the instability of agricultural production due to climate change, additional investment resources for farmers, and maintaining/expanding access to the market with increased environmental requirements	Ministry of Agrarian Policy and Food	UAH 167 billion (USD 5.6 billion).	International financial organisations		
5.11	Construction of a new transport corridor to the ports of Poland and Lithuania on the basis of a broad gauge.	The difference in Ukrainian and European rail gauges seriously limits the opportunities for exports of agricultural products via Polish and Lithuanian ports. The construction of a broad-gauge railway through the territory of Poland will make it possible to connect the Ukrainian and Baltic railways into a single network. The project is feasible in terms of diversification of logistics risks and increased exports to the EU.	Creation of a new transport corridor that makes possible unhindered transportation of at least 1 million tons of products per month by rail.	The economic effect is achieved through reducing logistics risks by diversifying exports. The additional route will enable increasing exports by 12 million tons of grain per year	Ministry of Agrarian Policy and Food Ministry of Infrastructure	Total need: UAH 15 billion (USD 500 million)	State Budget, donor aid		

5.12	Maintaining the agricultural sector in the context of the sea port blockade	The sea port blockade makes it impossible for farmers to sell their products, leaving them without funds required for the 2022 harvesting campaign and the 2022–2023 sowing campaign. It is also important to solve the issue of yield storage given the shortage of 10 million tons of grain storage capacities. Given the lack of domestic resources, it is important to establish a special fund to finance those measures.	Providing farmers with necessary resources for the completion of harvesting and sowing campaigns. Preservation of the 2022 harvest until ports are unlocked, by purchasing and/or building temporary storage facilities	The economic effect of UAH 600 billion from the 2022 yield preservation and provision for the 2022–2023 sowing campaign.	Ministry of Agrarian Policy and Food	UAH 87.4 billion (USD 2.91 billion)	International loans and the EU donor aid		
5.13	Facilitation of the implementation of key reforms under the Association Agreement and the EU-Ukraine Deep and Comprehensive Free Trade Area in terms of plant health, and improving phytosanitary control to ensure compliance with EU requirements.	Implementation of the Association Agreement and the EU-Ukraine Deep and Comprehensive Free Trade Area is a key reform aiming at unimpeded movement of agricultural products and foodstuffs within EU and in the major part of the world. To date, only 64% of the commitments made in terms of the implementation of EU *acquis* have been fulfilled	Establishing a system of requirements to, and control of, the products "from the field to the table", similar to EU requirements	The economic effect achieved through the creation of unimpeded movement of agri-food products between Ukraine and the EU, and through increasing other countries' confidence in the Ukrainian control system	Ministry of Agrarian Policy and Food	UAH 120 million (USD 4 million)	EU donor aid		
5.14	Comprehensive planning of spatial development	Transformations in the field of decentralisation, spatial development and land relations in Ukraine, provided by the laws on the land reform	Comprehensive plans for the spatial development of the territories of all 1469	Increase in the annual budget revenues of each community by at	Ministry of Agrarian Policy and Food Ministry for	UAH 5.4 billion (USD 180 million)	Local budgets, international financial organisations	Amending some land legislation as regards spatial	

	and land use in the communities	package, as adopted in recent years, should give impetus to the process of attracting investment to significantly improve living standards and improve the quality of life in the settlements, and preserve historical and natural environment, and maintain effective management of resources of territorial communities. Comprehensive plans will ensure sustainable development of territories, taking into account state's, public and private interests, and will become an effective practical tool for managing the restoration of communities, saving money and reducing the risks of corruption, and also, for attracting investment.	communities have been created	least UAH 1 million, saving money on planning work up to 30%, a significant reduction in time for the development of planning documentation, attracting investment to communities.	Communities and Territories Development State Geocadastre			planning, and amending state land cadastre	
5.15	Development of seed production: construction of factories for the production of hybrid seeds	Plant industry in Ukraine is highly dependent on imported seeds. About 40% of hybrid seed is imported, which shows the potential for localisation of seed production. The construction of new factories for the production of hybrid seeds will increase the food security of the country, reduce the logistical costs of seeds and enable the development of Ukrainian breeding	Factories with a capacity of about 4 million seed units have been built	Substitution of imports of grain seeds by 100% in the equivalent of USD 370 million.	Ministry of Agrarian Policy and Food	UAH 10.5 billion (USD 350 million)	Foreign direct investment	Amendments to the law in terms of strengthening of liability for fraud, and as regards compliance with copyright, with appropriate royalty payments	
5.16	Prompt recovery of agribusiness sector after the war	FAO experts estimate the potential direct damage to Ukraine's agricultural assets since the start of the war at USD 6.5 billion. This includes destroyed irrigation infrastructure, storage facilities, machinery and other agricultural equipment, port infrastructure, greenhouses, field crops, livestock and processing plants. In order to restore the condition of the	Restoration of working condition of ~10,500 enterprises in the agribusiness sector that had to suspend their activities because of the war.	Agribusiness sector's share in the country's GDP — 18%. Industry's foreign currency earnings — USD 27.7 billion Restoration of 150 thousand jobs lost	Ministry of Agrarian Policy and Food	UAH 195 billion (USD 6.5 billion)	State Budget, international loans and the EU donor aid		

		agricultural sector to the pre-war level, funding is needed, and first of all, for the reconstruction of the lost assets.							

4. Necessary legal framework

No.	Title of the legal and normative act for the task	Contents of the drafted/amended legal and normative act	Public authority responsible for the drafting / amending of the legal and normative act	Deadline for development	Final date of entry into force	Status of the legal and normative act
5.1	Law of Ukraine "On Amending Certain Legislative Acts As Regards Improvement of the Management System for Utility Infrastructure Facilities of State-Owned Reclamation Systems"	Modification of the ownership and operational management model for reclamation infrastructure facilities, including establishment of the institution of reclamation system operators. Those amendments will promote attraction of private investment in the reclamation system.	Ministry of Agrarian Policy and Food	Developed	31.12.2022	Under consideration of the relevant public authority
5.2	Law of Ukraine "On Amending the Legislation on Alternative Energy Sources"	Setting the minimum price per cubic metre of gas produced from biological raw materials. If the market price goes below EUR 700, the State will pay compensation to the producer.	Ministry of Agrarian Policy and Food	31.12.2022	31.12.2023	Under preparation
5.3–5.7	Law of Ukraine "On Amending the Law of Ukraine "On State Support for Agriculture in Ukraine"	Providing for the possibility of granting state support through the mechanism for advance of costs and reimbursement of funds on a competitive basis.	Ministry of Agrarian Policy and Food	31.12.2022	31.12.2023	Under preparation
5.4–5.7	Law of Ukraine "On Amending the Law of Ukraine "On State Portfolio Guarantees"	Increasing the maximum turnover of the entity eligible to obtain state portfolio guarantees.	Ministry of Economy	1.6.2023	31.12.2023	Under preparation
5.8	CMU Resolution "On approval of the State Soil Protection and Remediation Programme"	Establishing the procedure for inventory of the land affected by warfare, establishing the policy for its conservation, rehabilitation, remediation and return to the agricultural commodity circulation.	Ministry of Agrarian Policy and Food	1.6.2023	31.12.2023	Under preparation

5.9	Law of Ukraine "On the Specific Features of Construction and Reconstruction of Reclamation Systems"	Setting up mechanisms for attracting private and public investment in the construction and reconstruction of reclamation systems, including trunk canals of national significance.	Ministry of Agrarian Policy and Food	1.6.2023	1.6.2024	Under preparation
5.10	Law of Ukraine "On Amending the Regulation of Innovation Activity and the Activity of Technology Parks"	Establishing mechanisms for financing of scientific developments in the agricultural sector, regulation of the implementation of those developments based on real business models, and project scaling-up.	Ministry of Economy, Ministry of Agrarian Policy and Food	1.6.2023	31.12.2023	Under preparation
5.11	Resolution of the Cabinet of Ministers of Ukraine of 28 December 2000 No. 1921 "On approval of the Regulation on the military transport duty"	Imposing restrictions on the percentage of grain carriers and fuel transport vehicles which may be taken from an agricultural enterprise for military purposes.	Ministry of Economy, Ministry of Agrarian Policy and Food	1.6.2022	31.12.2022	Under preparation
5.12	Law of Ukraine "On State Regulation of Production and Marketing of Ethanol, Cognac and Fruit Spirits, Alcoholic Beverages, Tobacco Products, Liquids Used in Electronic Cigarettes, and Fuels"	Simplified regulation of the fuel sales, in particular cancellation of licences for fuel storage and sale for entities engaged in the agribusiness sector for the martial law period.	Ministry of Economy, Ministry of Agrarian Policy and Food	1.6.2022	31.12.2022	Under preparation
5.13	Tax Code of Ukraine and the CMU Resolution No. 1165 "On approval of the procedures for suspension of the registration of a tax invoice/ adjustment calculation in the Unified Tax Invoice Register"	Reduction of administrative burden from the Risk Assessment Criteria Monitoring System.	Ministry of Finance	1.6.2022	31.12.2022	Under preparation
5.14	Tax Code of Ukraine	On implementation of a new taxation model for agricultural cooperatives — patronage dividends	Ministry of Finance	1.6.2022	31.12.2022	Under preparation
5.15	Draft Law of Ukraine "On Amending Certain Legislative Acts of Ukraine As Regards Improvement of the Efficiency of Agricultural Land Use by Public Sector Entities"	On the effective use of lands in permanent use by state-owned enterprises.	Ministry of Agrarian Policy and Food	1.6.2022		
5.16	Draft Law of Ukraine "On Land Defragmentation"	Elimination of shortcomings of current land use. Formation of economically justified land tenures and land uses on lands of all categories.	Ministry of Agrarian Policy and Food	1.6.2022	31.12.2022	Under preparation
5.17	Draft Law of Ukraine "On Amendments to Certain Legislative Acts of Ukraine as Regards Improvement of the Mechanism of Free Privatisation of Land Plots"	Maximum reduction of free privatisation as the main source of corruption in the land sector	Ministry of Agrarian Policy and Food	1.6.2022	31.12.2023	Under preparation
5.18	Draft Law of Ukraine "On Amendments to Certain Legislative Acts of Ukraine as Regards	Ensuring soil fertility and agricultural production	Ministry of Agrarian Policy and Food	1.6.2022	31.12.2023	Under preparation

	Protection of Soils and Reproduction of Their Fertility”					
5.19	Draft Law of Ukraine “On Comprehensive Reformation of the Rights to Permanent Use of Land Plots”	Transition from post-Soviet to market forms of land use.	Ministry of Agrarian Policy and Food	1.6.2022	1.6.2023	Under preparation
5.20	Draft Law of Ukraine “On Improving the Turnover of Agricultural Land, Including Liberalisation Through the Establishment of the Right to Buy Back Plots of Land Under Household Yards, Structures and Orchards on the Lands Owned by the State and Communities”	Determination of mechanisms for the purchase of land plots under real estate assets and perennial plantations.	Ministry of Agrarian Policy and Food	1.6.2022	31.12.2023	Under preparation
5.21	Draft Law of Ukraine “On the Legal Status of Forestry Lands and Simplification of the Procedure for Entering Data on Those in the State Land Cadastre”	Determination of the legal regime and the procedure for the creation of private and communal forests, and entering data on those in the State Land Cadastre.	Ministry of Agrarian Policy and Food	1.6.2022	1.6.2023	Under preparation
5.22	Draft Law of Ukraine “On Land-Use Restrictions”	Expansion of the range of restrictions and facilities under special land tenure regime thereunder Integration of data on those with the data on other facilities in the State Land Cadastre, and in other public electronic registers.	Ministry of Agrarian Policy and Food	1.6.2022	1.6.2023	Under preparation
5.23	Draft Law of Ukraine “On Land Consolidation”	Optimisation of agricultural land use by forming areas convenient for agricultural production.	Ministry of Agrarian Policy and Food	1.6.2022	31.12.2023	Under preparation
5.24	Draft Law of Ukraine “On Amendments to Certain Legislative Acts of Ukraine as Regards Ensuring Rights of Employees of State-Owned Agricultural Enterprises, Institutions, and Organisations, to Receive a Land Plots (Shares)”	A mechanism for the privatisation of current state-owned agricultural enterprises (both assets and land) is hereby established	Ministry of Agrarian Policy and Food	1.6.2022	31.12.2022	Under preparation
5.25	Draft Law of Ukraine “On Amendments to Certain Legislative Acts of Ukraine as Regards Development of Area Spatial Planning, and State Land Cadastre”	The contents of the documentation on spatial planning will be adapted to the objectives of the restoration of community territories during military operations.	Ministry of Agrarian Policy and Food	1.6.2022	1.6.2023	Under preparation
5.26	Draft Law of Ukraine “On Amending the Tax Code of Ukraine”	The financial model of sustainable functioning and development of the State Land Cadastre and spatial planning is determined.	Ministry of Agrarian Policy and Food	1.6.2022	1.6.2023	Under preparation
5.27	Draft Law of Ukraine “On Amending the Budget Code of Ukraine”	The financial and budget model of sustainable functioning and development of the State Land Cadastre and spatial planning is determined.	Ministry of Agrarian Policy and Food	1.6.2022	1.6.2023	Under preparation

5.28	Draft Law of Ukraine “On Amendments to Certain Laws of Ukraine As Regards Streamlining of the Use of Lands in the Process of Restoration”	Restrictions on the use of lands affected by the hostilities are imposed, and stimulation of the rational use, investments and reclamation of these lands is introduced.	Ministry of Agrarian Policy and Food	1.6.2022	1.6.2023	Under preparation
5.29	Draft Law of Ukraine “On the Registration of Land Plots by Surveying Engineers”	Granting the right to certified land surveyors to register land plots based on the implementation of the pilot project (in order to reduce corruption risks).	Ministry of Agrarian Policy and Food	1.6.2022	1.6.2023	Under preparation
5.30	Resolution of the Cabinet of Ministers of Ukraine “On amendments to certain resolutions of the Cabinet of Ministers of Ukraine as regards development of the State Land Cadastre (No. 1051 et al.)	Expansion of the list of facilities and information in the State Land Cadastre.	Ministry of Agrarian Policy and Food	1.6.2022	1.6.2023	Under preparation
5.31	Resolution of the Cabinet of Ministers of Ukraine “On amendments to certain resolutions of the Cabinet of Ministers of Ukraine as regards development of the spatial planning (No. 926 et al.)”	Supplementing the procedure for developing documentation on spatial planning with norms regulating restoration of territories.	Ministry of Agrarian Policy and Food	1.6.2022	1.6.2023	Under preparation
5.32	Resolution of the Cabinet of Ministers of Ukraine “On drawing up the list of lands in need of restoration, and the Procedure for carrying out restoration works”	Determination of lands in need of restoration as a result of hostilities, and the Procedure for carrying out works on their restoration	Ministry of Agrarian Policy and Food	1.6.2022	1.6.2023	Under preparation
5.33	Resolution of the Cabinet of Ministers of Ukraine “On the Procedure for compensation for damage and losses caused to the land fund”	Determination of the Procedure for compensation for damage and losses caused to the land fund by the hostilities	Ministry of Agrarian Policy and Food	1.6.2022	31.12.2022	Under preparation
5.34	Draft Resolution of the Cabinet of Ministers of Ukraine “On amending the Procedure for Maintaining State Land Cadastre as approved by the Resolution of the Cabinet of Ministers of Ukraine No. 1051 of 17 October 2012”	Entering information on the land reclamation network and a component part of the land reclamation network in the State Land Cadastre.	Ministry of Agrarian Policy and Food	1.6.2022	31.12.2022	Under preparation
5.35	Draft Law of Ukraine “On Attracting Investments in the Development of Aquaculture"	The act determines the legal and organisational principles of management of state-owned assets that may become facilities attracting investment based on a concluded agreement on investments in the development of aquaculture, with a view to creating favourable conditions for, and increasing productivity, and development of, the aquaculture industry in Ukraine.	Ministry of Agrarian Policy and Food	1.6.2022	31.12.2022	Under preparation

5.36	Draft Law of Ukraine “On Amending the Tax Code of Ukraine in Terms of setting Reduced VAT for Foodstuffs”	Sets a reduced VAT on foodstuffs.	Ministry of Agrarian Policy and Food	1.10.2022	31.12.2022	under preparation
5.37	Draft Law of Ukraine “On Protection of Plants”	Revision, updating and bringing public regulation of quarantine and plant protection in line with EU acquis.	Ministry of Agrarian Policy and Food		31.12.2022	Registered with the Verkhovna Rada
5.38	Draft Law “On Amending Certain Laws of Ukraine as Regards Foodstuffs and Other Items Subject to Sanitary Measures”	Setting requirements as regards traceability of foodstuffs, making a definition of food fraud and establishing liability for food fraud.	Ministry of Agrarian Policy and Food	1.10.2022	1.3.2023	under preparation

The National Council for the Recovery of Ukraine from the Consequences of the War

Draft Ukraine Recovery Plan

Materials of the “Protection of children's rights and return of children temporarily displaced abroad” working group

July 2022

Introduction

Children make the future of Ukraine. We are committed to keep them all safe, and ensure their return to a safe Ukraine.

The large-scale war of the Russian Federation against Ukraine violated children's rights to safety, life and health, especially in the areas of active hostilities and on the temporarily occupied territories, and the State Policy for protecting children's rights shall address the following challenges :

- Complete loss of access or restricting children's access to basic rights to food, water, medical care, education and material support against the background of the inability of local authorities to ensure timely evacuation of the children to safe places and to ensure protection of their rights;
- Increase in number of the children who lost their parents, suffered health damage and need protection and assistance, medical treatment, rehabilitation, placement into a new family, meanwhile decrease in ability of local governments to respond in a timely manner: allocate and register affected children;
- Destruction of significant part of the material and technical base, loss of files from authorities, institutions and establishments ,authorized to register children, assist children, families, pregnant women in the territories where hostilities are / were being conducted and which were / are temporarily occupied;
- Quit/suspension of the work with children registered, loss of access to the personal files of orphans and children deprived of parental care (personal files remained in the occupied territories, or misplaced);
- Forced displacement, synch-emotional burnout of the experts who worked in children's institutions of various types.
- Impossibility to ensure the protection of children's rights on the temporarily occupied territories and in the zone of active hostilities;
- Forced displacement of children by the aggressor country from the temporarily occupied territories to Russian Federation, and granting them Russian citizenship there; Ukraine's loss of control over such children, and the inability to provide them with adequate protection;
- Loss of registration and control over the children displaced (evacuated) outside Ukraine unaccompanied by adults and, consequently, the inability of the state to provide them with adequate protection and prevent against possible offenses against children in host countries;
- Separation of families due to the relocation of women and children abroad and the mobilization of men;
- Mass emigration with the probability of non-return to Ukraine of some families (women) with children and potential parents (adoptive parents);
- Increase in demand for urgent professional psychological support / rehabilitation of children, parents and guardians affected by the war, which does not meet the capacity of the country against the background of lack of specialists with needed competences and practical skills to work with postwar traumas;
- Destruction of the infrastructure of social, educational, medical, rehabilitation and other services provided for children, families with children, future parents;
- The factors provoking the demographic crisis are deepening.

The war disclosed the vulnerability of Ukraine's child protection system in place in terms of its ability to protect children during crises and emergencies. The demand for improving the management of the child protection system has become obvious due to the lack of a single responsible state authority for child protection - the coordinating body for communication, decision-making and information exchange between all service providers for comprehensive care for children and their families, and system resource optimization.

The current state policy in the field of protection of children's rights has shortcomings related to unsystematic, fragmented family policy, which is formed without taking into account comprehensive, reliable, disaggregated data on the presence of families with children in difficult life circumstances, assessing the effectiveness of social services. Due to the lack of clear duties and responsibilities segregation between the central and local governments and related institutions, during the war time, it was not possible to fully protect the rights of every child, which is jeopardizing the demographic future of Ukraine.

Ukraine's potential EU candidate status creates both opportunities for close collaboration between Ukrainian and EU bodies in the field of children's rights, and challenges related to the likelihood of integration of Ukrainian children into the society of host countries and their non-return to Ukraine. This factor encourages the revision and modernization of the existing system of protection of children's rights in Ukraine with the help of powerful assistance and experience of EU member states. Such changes can be guided by the EU Council Recommendation of 9 June 2022 on the EU Strategy on the Rights of the Child, with a special focus on the protection of children's rights in crisis and emergency situations. These recommendations were developed in response to Russian aggression and promote Ukraine's cooperation with EU countries to protect Ukrainian children from recruitment to the armed forces, human trafficking, illegal adoption, sexual exploitation and separation from their families, emphasizing that "every child in Europe and the world must enjoy the same rights and live without any discrimination or intimidation.

The consequences of the war faced by Ukraine give impetus to the need to change the emphasis in the State Policy on the protection of children's rights, namely the transition from focusing on specific issues and groups of vulnerable children to a complex/integrated approach to child's protection that puts forward the rights and interests of the child, which should be taken into account when planning the development of the country and all speres of its activities.

Building a decent , promising future of the children in Ukraine requires interdepartmental coordination of all public authorities and local governments and the public. An integrated approach will ensure that all major actors and systems - social protection, education, health, justice, civil society, community and family - work together to prevent violence, exploitation, trafficking, neglect and other forms of violence against children. , and to protect and assist children and families in these situations. UNICEF recognizes that an integrated approach is embedded in the most defined child protection systems as a set of laws, policies, regulations and services needed in all social spheres, especially in the areas of social security, education, health, safety and justice, to preventing and responding to the risks associated with the likelihood of violations of children's rights.

With a strong political will, today, Ukraine has all chances to develop a robust, unified, integrated State Family Policy with a working effectively system for protecting children's rights , based on today's strong international support and by implementing the effective practices to support children and families developed before the war, which can be scaled, with consistent political will.

Goals, Objectives and Phases

	Phase 1: June 2022 - end of 2022	Phase 2: January 2023 - December 2025	Phase 3: January 2026 - December 2032
Goal 1. Ensure capacity of all local communities to allocate and register/ account for children, and use the information from the databases to make decisions on ensuring and protecting the children's rights			
The goal to be achieved to solve the problem at each stage	1.1. Allocation and registration of children from the most vulnerable categories who need state assistance during the war time		
		1.2. Achieving the level of provision of territorial communities with sufficient material, technical and human resources 1.3 Development and implementation of mechanisms for cross- sectoral cooperation of all subjects of identification, registration of children and exchange of information	
Deadline	12/31/2022	12/31/2025	
Risks of achieving the goal	Organizational: different points of view with Central Executive Authorities (CEAs) as for the list of categories of children, procedures for their allocation (lack of coordination), long-time approval procedure.	Financial: insufficient funding; Organizational: different views of the CEAs on the mechanisms of information exchange (lack of coherence; resistance); Technical insolvency of subjects Lack of clear delineation of powers between different levels and areas of activity Normative: delay in the adoption of relevant legislative changes.	
KPIs	• Percentage of legal acts that are aligned with a single approach to identifying and making decisions for each child; • Percentage of registered children; • Percentage of entities that are connected to the database and use it; • Percentage of territorial communities that are able to identify and keep records • Percentage of local communities that are connected to and use the child registration information system. • SSDs have been created in all TGs • All territorial communities identify responsible persons who are active users of the Unified Information and Analytical System "Children"		
The total amount of need for financial	-	Up to UAH 30 million at the rate on 15.06.22 State budget funds, international technical assistance (ITA) funds, charitable assistance	

	Phase 1: June 2022 - end of 2022	Phase 2: January 2023 - December 2025	Phase 3: January 2026 - December 2032
resources to achieve the goal			
Communication of the goal with other areas	Governance Return of citizens Modernization of security and defence Social policy		
Goal 2. Achieve the return of every child who had to leave Ukraine back to Ukraine to a safe place to meet his or her primary needs			
The goal to be achieved to solve the problem at each stage	2.1. Movement (evacuation) to safe places of children who are in the zone of active hostilities or adjacent areas, in areas under temporary occupation		
	2.2. Providing support and protection according to the needs of children who have been relocated (evacuated) abroad		
	2.3. Providing support and protection to children displaced (evacuated) within Ukraine as needed		
	2.4. Creating conditions for the return of every child and family with children to Ukraine, taking into account their best interests and needs		
Deadline	12/31/2022	Start of implementation - two months from the date of termination of martial law	
Risks of achieving the goal	• Lack of sufficient facilities for moving (evacuation) of children; • Opposition of parents / legal representatives of children, unwillingness to leave; • Insufficient capacity of responsible authorities to evacuate children; • Limited access to children who are in areas where there is active hostilities, under temporary occupation; • Impossibility to organize humanitarian corridors for evacuation;	• Discrepancies between the legislation of Ukraine and EU countries; • Inconsistency of the procedures adopted in Ukraine with the norms of the countries where the children are; • Insufficient number of trained personnel; • Reluctance of specialists to return to the territory; • The grounds for return will arise before the conditions for safe return are created; • Self-return before the conditions for a safe return are created.	

	Phase 1: June 2022 - end of 2022	Phase 2: January 2023 - December 2025	Phase 3: January 2026 - December 2032
	• Lack of criteria for launching an evacuation plan; • Limited resources to meet the needs of the child; • Staff turnover; • Lack of sufficient trained professionals in communities; • Heavy workload in areas with large numbers of evacuated children; • Features of national legislation of individual countries, different from Ukrainian legislation and / or international standards; • Impossibility to obtain information from Russia.		
KPIs	Quantitative: • Available register: Number of children affected by military children (physically, psychologically) disaggregated by sex, age, territory and needs; • % of children who received the necessary services and assistance in accordance with the identified needs (disaggregated by gender, age, territory); • Number of children who reconnected with parents / legal representatives; • Proportion of parents / other legal representatives who are aware of the possibility of receiving services for children in the host countries; • Proportion of children (by sex, age, territories of return, by status) who returned to Ukraine (in particular, children with status); • Proportion of communities where infrastructure for safe stay of children has been created / restored; • The share of subjects of the organization of protection of the rights of children who resumed work in places of return of the child Qualitative: The level of satisfaction of children with the level of support they have at the place of their relocation in Ukraine;		
The total amount of need for financial resources to achieve the goal			
Relations to other areas	Development of regions, Infrastructure restoration, Social policy,		

	Phase 1: June 2022 - end of 2022	Phase 2: January 2023 - December 2025	Phase 3: January 2026 - December 2032
	Digitization, Governance, Return of citizens		

	Phase 1: June 2022 - end of 2022	Phase 2: January 2023 - December 2025	Phase 3: January 2026 - December 2032
Goal 3. Ensuring smooth effective functioning of all levels of government institutions with the purpose protect the rights of the child, taking into account his or her views and best interests			
The goal to be achieved to solve the problem at each phase	3.1. Ensuring a clear vertical of management and coordination, defined functions and powers in the system of protection of children's rights.		
		3.2. Ensuring high personnel capacity of bodies and services for children in accordance with the norms of their staffing, with the necessary knowledge and skills to perform their duties	
		3.3. Achieving consideration of family cases exclusively by family courts	
		3.4. Existence and effective functioning of clear procedures for the protection of children's rights and supervision of their observance	
Deadline	3.1 01.08.2022- 31.12.2022	3.1. 01.01.2023- 31.12.2024	3.1. 01.01.2026 - 21.12.2026
		3.2. 01.01.2023-31.12.2025	
		3.3. 01.01.2023 - 31.12.2025	3.3. 01.01.2025 - 21.12.2028
		3.4. 1.5. 01.01.2023- 31.12.2024	
Risks of achieving the goal	3.1. Organizational: delays in the establishment of the State Service for Children (SSCh) and / or the transfer of cases from the Ministry of Social Policy and the National Social Service ;	3.1. Organizational: lack of understanding by the leaders of territorial communities of the need to create SSCh and staff them with a sufficient number of employees; Low prestige of work in SSCh , including due to insufficient wages.	3.1. Organizational: opposition to bodies, in particular officials, who take care of children Insufficient competence of civil society institutions

	Difficulties with the legal solution of the issue of subordination of the State Committee to the Prime Minister of Ukraine. Personnel: lack of highly qualified employees to work in the SSCh; Risk of lawsuits from employees of the Ministry of Social Policy , the National Social Service , who may lose their jobs due to staff reductions. Economic: lack of funds for the formation and logistics of the SSCh	3.2. Personnel: lack of available qualified human resources. Financial : lack of funds in state and local budgets. 3.3. Political : lack of political will; Opposition to the judiciary regarding the next reform of the system. 3.4. Political : lack of political will; Opposition of the prosecutor's office to give them supervisory powers. Staffing : low professional training of prosecutors to participate in family matters or in cases involving children.	3.3 Political: lack of political will. Financial : lack of funds for the establishment of courts.
KPIs	• Number of communities in which the service for children with the appropriate staff has been established; • Number of administrative cases considered by courts with a decision, on appeals against actions or omissions of guardianship and trusteeship bodies; • Proportion of child-related lawsuits heard by general courts with the participation of prosecutors; • Number of court decisions on deprivation of parental rights, removal of children from parents without deprivation of parental rights, restoration of parents' parental rights; • Percentage of children who benefited from free assistance		
The total amount of need for financial resources to achieve the goal (UAH)	* 160 634.3 - total, the approximate amount of expenditures to finance the staff of the State Committee 149714.3 - consumption expenditures; 110 438.6 - wages; 7,639.7 - utilities 10,920 - development expenditures State and local budgets (in case of creation of the central office and local bodies) * The amount of expenditures is approximate, and can be calculated only after approval of the structure, staff list, determination of the building where the state body will be located	* 160 634 , 3 - total, the approximate amount of expenditures to finance the staff of the " State Children " 149,714.3 - consumption expenditures; 110 438.6 - wages; 7,639.7 - utilities 10,920 - development expenditures State and local budgets (in case of creation of the central office and local bodies) * The amount of expenditures is approximate, and can be calculated only after approval of the structure, staffing, determination of the building where the state body will be located	* 16,282,436.3 - total, the approximate amount of expenditures to finance the staff of the State Committee 15,740,766.4 - consumption expenditures; 14,184,457.6 - wages; 14,184,457.6 - utilities 158 053.4 - development expenditures 541 669.9 General and special funds of the State Budget * The amount of expenses is approximate, and can be calculated only after approval of the structure,

			staffing, determination of the building where the court will be located
Communication of the goal with other areas	Governance, Social policy, Development of regions	Justice, Protection of human rights	Governance, Social policy, Protection of human rights
	Phase 1: **June 2022 - end of 2022**	**Phase 2:** **January 2023 - December 2025**	**Phase 3:** **January 2026 - December 2032**
Goal 4. Ensuring the rights of every child by the state, creating conditions for raising children in a family or conditions close to a family, in accordance with children's needs and best interests			
The goal to be achieved to solve the problem at each stage	4.1. Providing a timely response: identifying, taking measures to ensure and protect the rights of every child in need of protection		
	4.2. Ensuring the realization of the child's rights to adoption		
	4.3. Placement of children in family forms of education and forms of education with conditions close to family is carried out taking into account their needs and in accordance with the Guidelines for Alternative Care		
Deadline	2022	2025	2032
Risks of achieving the goal	Organizational : - lack of horizontal relations in government; Procrastination in making decisions about the child; Legal : different approaches to determining the categories of children affected by the war. Legal : not in all cases it is possible to collect the documents of the child necessary for adoption. Organizational : services or courts in the regions do not work; The presence of a queue for adoption; Inconsistency of age and other characteristics of children who can be adopted with the expectations of candidates for	Organizational: fear of tarnishing the reputation of parents; Adults put their interests above the interests of the child; Children do not know who to turn to in case of violation of their rights; Concealment of violations of children's rights by adults; Complex collection of evidence; Misunderstanding of the peculiarities of the protection of children's rights. Financial : unwillingness / opposition to change the system of financing of boarding schools; Lack of funds for the information campaign. Personnel : insufficiently trained staff; Bureaucratic risk: procrastination, resistance, etc .; Stereotypes of thinking and attitude to this category of cases.	Organizational : high level of poverty; Lack of institutional vision; Existing alternative care options are not needed. Political : opposition at the central and local levels to change the child placement system. Personnel: Low understanding of the interests of the child by employees of institutions; Misunderstanding the benefits of family upbringing for a child

	adoption ; Lack of enough people who want to adopt. Personnel : lack of specialists in children's services. Financial : lack of funds in local budgets to prepare candidates for family education	Legal : there is no right of representation of the child by the prosecutor's office. Organizational : opposition to local authorities; Preference for interstate adoption; high level of corruption risk; Bureaucratic component and human factor due to unwillingness to engage in adoption in Ukraine; Corruption component. Legislative : MPs may once again not support the ratification of the Convention on the Protection of Children and Co-operation in Respect of Intercountry Adoption; Procrastination of the implementation of the norms of the convention in the national legislation. Organizational : formalization of the concept of the best interests of the child; -Lack of appropriate services; Formalizing the concept of the best interests of the child. Personnel : lack of specialists who will conduct needs assessment; Insufficient level of skills, knowledge and abilities of specialists to conduct the assessment.	
KPIs	• Proportion of children in difficult life circumstances, among those identified, who received social protection services in accordance with their needs; • Number of children who suffer from violence and abuse; • Proportion of orphans, children deprived of parental care who are brought up in family forms of education or forms of education with conditions close to family; • Number of children who are accommodated / enrolled in institutions for round-the-clock stay.		
The total amount of need for financial	* 160 634.3 - total, the approximate amount of expenditures to finance the staff of the State Committee 149,714.3 - consumption expenditures;	* 160 634.3 - total, the approximate amount of expenditures to finance the devices 149,714.3 - consumption expenditures; 110 438.6 - wages;	* 160 634.3 - total, the approximate amount of expenditures to finance the devices 149,714.3 - consumption expenditures;

resources to achieve the goal (UAH)	110 438.6 - wages; 7,639.7 - utilities 10,920 - development expenditures State and local budgets (in case of creation of the central office and local bodies) * The amount of expenditures is approximate, and can be calculated only after approval of the structure, staff list, determination of the building where the state body will be located	7,639.7 - utilities 10,920 - development expenditures Local budget (State budget is possible in case of relevant intergovernmental transfers) * The amount of expenditures is approximate, and can be calculated only after approval of the structure, staffing, determination of the building where the government will be located	110 438.6 - wages; 7,639.7 - utilities 10,920 - development expenditures Local budget (State budget is possible in case of relevant intergovernmental transfers) * The amount of expenditures is approximate, and can be calculated only after approval of the structure, staffing, determination of the building where the government will be located

	Phase 1: **June 2022 - end of 2022**	**Phase 2:** **January 2023 - December 2025**	**Phase 3:** **January 2026 - December 2032**
Goal 5. To create favourable living conditions in Ukraine, which will allow families to have children, provide for their care and raising children within family			
The goal to be achieved to solve the problem at each phase		5.1. Introduction of mechanisms of state assistance and protection of the family, which stimulate the increase of the birth rate, development of the family's ability to provide proper care and upbringing of the child	
	5.2. Providing every child and family in the local community with access to universal services		
Deadline	*12/31/2022*	*12/31/2025*	*31.12.2026- 31.12.2032*

Risks of achieving the goal	5.1. • insufficient awareness of families about their rights and opportunities to receive services; • lack of political will to review the legislation; • ambiguous understanding in society of the terms development of the institution of the family or family values; • lack of "zero tolerance" in society to domestic violence
	5.2. • lack of resources (personnel, financial, logistical) needed to provide services; • constant change of the situation (service area, workload, provision, counting of families) due to military actions (liberation of territories, occupation, etc.); • imperfection of legal support (in particular, there is no clear list of powers of the head who will work in the field of organization of assistance to internally displaced persons / families); • limited service providers in access to the necessary resources (registers, databases, electronic systems, etc.) due to the lack of stable Internet and telephone communication; • shortage of specialists with the appropriate knowledge and skills to assess the effectiveness of service delivery according to existing standards; • lack of funds
KPIs	• Number of families who did not divorce within 5 (or 3) years after the marriage; • Number of newborns; • Number of large families; • The level of satisfaction of families with children in various aspects of life (well-being, living conditions, financial security, access to medical, educational, social services, etc.); • Number of court decisions to resolve disputes in family cases; • Number of court decisions on enforcement of child support; • The level of awareness of girls and boys, men and women about the equality of rights and responsibilities of women and men in family relations, responsible motherhood and fatherhood, the inadmissibility of domestic violence.
The total amount of need for financial resources to achieve the goal	As part of funding for the activities of authorities and local governments that implement policies to protect the rights of children

Communication of the goal with other areas	Social policy, Economic policy, Justice		
	Stage 1: **June 2022 - end of 2022**	**Stage 2:** **January 2023 - December 2025**	**Stage 3:** **January 2026 - December 2032**

Goal 6. Ensure that each child and his/her family receive the necessary services in accordance with their needs, which are aimed at ensuring the best interests of the child			
The goal to be achieved to solve the problem at each stage	6.1. Review and modernization of the content of social and other services, in accordance with the needs of children and on the basis of the principles of integration, consistency and accessibility of services		
		6.2. Ensuring the capacity of local communities to provide services to children and families with children	
	6.3. Ensuring access for every child with signs of vulnerability and / or restriction of access to services, according to their needs		
	6.4. Ensuring the ability of service providers to meet the needs of each child with services of appropriate quality through adequate human resources and professional competencies.		
Deadline	12/31/2022	12/31/2025	
Risks of achieving the goal	6.1. • limited time for working out new approaches, piloting them and harmonizing them with national practice; • insufficient number of trained specialists to provide services, especially in rural areas; • the risk of mental health medicalization , especially in the context of providing services to children affected by war.		
	6.2. • low level of knowledge of local authorities, service providers to plan the necessary services and ensure their provision; • opposition of communities regarding powers in the context of development of services for residents of the territorial community, perception of services provided by institutions at the level of the district, region, as those that meet the needs of the child; • lack of funding, logistics for the provision of services;		

	• lack of effective monitoring and quality control of service provision; • lack of desire to recognize the low level of service quality.	
	6.3. • lack of culture of receiving services at the place of residence; • low awareness of parents, lack of initiative in defending the rights of children and services for them; • lack of understanding of the content of social services, their purpose and the effect of their receipt; • lack and low professional level of specialists who provide services; • lack of sufficient funding for the development and provision of services; • low level of interdepartmental cooperation on identification, organization of necessary services; • lack of responsibility for late detection of children with vulnerabilities / life limitations; • inability to provide certain services due to the lack of specialists in the field; • lack of sufficient experience in providing educational services in an inclusive environment.	
	6.4. • lack of motivation of professionals who provide services, burnout; • lack of supervision system ; • lack of attractiveness of work in the field of providing services to children; • lack of state and regional orders for the training of specialists, in particular, speech therapists, psychologists, rehabilitation, social workers, etc.	
KPIs	• The share of territorial communities that have provided children with access to services in accordance with the lists of services defined by law; • Proportion of children covered by necessary services; • Proportion of children placed in institutions for round-the-clock stay; • Level of satisfaction with the quality of services received; • Level of satisfaction with the availability of services • Proportion of families with children who overcame SJO among families included in SJO; • Number of specialists who have improved their skills; • Level (share) of staffing in accordance with the needs of service recipients; • Proportion of pedagogical employees of special educational institutions that provide services in general secondary education institutions to children with special educational needs;	

	• Proportion of specialists who provide services to children and families with children who have mastered the skills to use the Classifier of Functioning, Restriction of Life and Health to identify needs.
The total amount of need for financial resources to achieve the goal	As part of funding for the activities of authorities and local governments that implement policies to protect the rights of children
Communication of the goal with other areas	Social policy

1	Human Development Strategy, approved by the Decree of the President of Ukraine dated 02.06.2021 № 225	The Strategy is a comprehensive document that defines the strategic goals and main objectives in the field of demographic development, health, education and science, culture and sports, improving living standards, employment, social support, ensuring equal rights and opportunities for women and men. Among others, this Strategy provides a separate operational goal "Formation and maintenance of family values."
2	National strategy for reforming the system of institutional care and upbringing of children for 2017–2026, approved by the order of the Cabinet of Ministers of Ukraine dated 09.08.2017 № 526	The strategy aims to change the existing system of institutional care and upbringing of children, which does not meet the real needs of children and families with children, and to create conditions for the full upbringing and development of the child in the family. Preserving the family for the child is the main condition for ensuring the best interests of the child and his or her well-being. The state encourages and supports responsible parenthood.

3	National economic strategy for the period up to 2030, approved by the resolution of the Cabinet of Ministers of Ukraine dated 03.03.2021 № 179	The strategy provides for the introduction of mechanisms in the social assistance system that encourage low-income families to self-sufficiency, ensuring measures to return to the labor market long-term unemployed members of low-income families who provide financial support for economic independence; reforming the system of ensuring children's rights in the context of decentralization to ensure the protection of children's rights to health care, sufficient living standards, protection from all forms of violence, contact with parents, housing and education, entrepreneurship; association in children's and youth organizations, as well as the implementation of a program of preparation for independent living of graduates of institutions of institutional care and upbringing of children, persons from among foster children and family-type orphanages. Among others, the task of the Strategy is to introduce special conditions for lending to young families with children to purchase housing; introduction of social assistance programs, soft loans for education for families with children.
4	National strategy for reforming the justice system for children for the period up to 2023, approved by the order of the Cabinet of Ministers of Ukraine dated 18.12.2018 № 1027	The strategy is aimed at solving the main systemic problems of justice for children, overcoming gaps in the system of interdepartmental cooperation, providing preventive, social and educational work and work aimed at resocialization of juveniles who are prone to wrongdoing and delinquency, as well as strengthening protection of rights children who have suffered from offenses, including violence, and children who have witnessed offenses. One of the principles of the Strategy implementation is to support families in raising children and ensuring their full development. Among the main tasks of the Strategy implementation is to take measures to ensure the activities of social work specialists in local communities as coordinators of the organization of work to identify individuals / families in difficult life circumstances, to respond in a timely manner to the risks of offenses by children living in such families. yah
5	State Social Program for Prevention and Counteraction to Domestic Violence and Gender-Based Violence for the Period up to 2025, approved by the Resolution of the Cabinet of Ministers of Ukraine of February 24, 2021 № 145	The program provides for the introduction of an effective mechanism of interaction between entities (specially authorized bodies implementing measures in the field of prevention and combating domestic violence; other bodies and institutions entrusted with the functions of implementing measures in the field of preventing and combating domestic violence; general and specialized support services victims, citizens of Ukraine, foreigners and stateless persons who are in Ukraine legally), who take measures to prevent and combat domestic violence and gender-based violence;

		providing comprehensive assistance to victims and establishing the non-violent nature of private relations; implementation of relevant world standards and experience.

Executive summary

Accountable and transparent public administration is an important precondition for the European integration of Ukraine. Without it, it would be impossible to build a powerful European democracy. Public administration reform is a comprehensive fundamental reform which enables the government to promote and implement all other reforms.

SIGMA Principles of Public Administration, building on the governance practices in the EU Member States and giving ground for the assessment of the public administration capacity of the EU candidate countries, are the cornerstone of the public administration reform in Ukraine. Each principle targets specific objectives and tasks that need to be addressed to modernise public administration and bring it in line with the European requirements. Implementation of the public administration reform that is expected to ensure adequate capacity and transparency of public institutions is a key milestone in the process of the European integration and a major factor of support of the post-war reconstruction and recovery.

Public administration is facing significant challenges of the wartime. Thus: 9,500 civil servants displaced abroad, 5,500 are staying in the occupied territories and in the areas of hostilities, almost 32 thousand civil servants are now idle. Funding of the civil service, including wages of civil servants, decreased by 10–15%. The situation is exacerbated by the change in the list and scope of the functions vested in civil servants due to heavy displacements of the population, restriction of their functions within the temporarily occupied territories and difficulties in accessing workplaces. Destruction of physical resources of public authorities and cyberthreats to public authorities, including public registers and personal data of citizens, add to the troubles.

Despite all that, thanks to the changes that have been introduced in this sector in the recent years, public administration remains operational now, during the wartime: most civil servants keep performing their duties, even remotely. The government keeps paying salaries to civil servants. Administrative service centres remain operational and provide services. The Verkhovna Rada of Ukraine holds meetings in the framework of the plenary session started on 24 February. In the first three months of the war, the Verkhovna Rada met 11 times and passed 112 laws. The Government continues its operation. Since the beginning of the invasion, it adopted 511 resolutions and 281 ordinances. Access to public registers that had been temporarily shut down for security reasons has been restored. People, in particular IDPs, receive e-services through Diia application.

The Recovery Plan in the area of public administration is premised on the practices and principles of the EU Member States and SIGMA and is aimed at building a capable public administration system as a basis for the resilient and efficient functioning of the state and Ukraine's integration into the EU. The purpose of the Recovery Plan in the area of public administration is:

> *Building a capable service and digital state in Ukraine with an efficient local self-government system ensuring the protection of the interests of citizens, the resilience and continuity of public authorities operation, the capacity and transparency of the implementation of activities aimed at Ukraine's recovery after the war, as well as the implementation of policies aimed at receiving the European Union membership.*

To achieve the set purpose, a set of tasks has been designed under four pillars: parliament, central executive authorities and approximation to the EU governance standards, local executive bodies and local self-government. Below are the expected effects of the Recovery Plan implementation during the recovery period in each of the areas:

parliamentary reform:

- rationalisation of legislative drafting, increasing its effectiveness and improving the quality of legislative acts adopted by the Verkhovna Rada of Ukraine;
- strengthening parliamentary control;
- shaping of procedures and mechanisms for ensuring the continuous work of the Verkhovna Rada of Ukraine in the context of martial law or state of emergency;
- strengthening the role of the Cabinet of Ministers of Ukraine within the law-making process;
- making the Verkhovna Rada of Ukraine more open to the public, improving public awareness of the parliamentary work;
- improving the support of activities of Ukrainian members of parliament and parliamentary activities in general.

reform of the system of central executive authorities and approximation to the EU governance standards:

- compact, result-oriented, efficient and accountable system of central executive authorities;
- transformation of the Secretariat of the Cabinet of Ministers of Ukraine into the Centre of Government providing support in coordination and management of ministries and ensuring effective management of national recovery and the EU integration programmes;
- civil service reform aimed at ensuring an efficient recruiting and hiring system, introduction of a unified remuneration system, improvement of the civil servant professional development system, strengthening the autonomy of the managerial staff and building capacity of human resources units, completion of the introduction of the information system for human resources management;
- consolidation of management of state-owned enterprises and state-owned property to ensure efficiency thereof;
- introduction of a single administrative procedure for all decisions, within which all public institutions use all available tools to ensure human rights and freedoms.

local executive bodies:

- updating the areas of work of oblasts and raion state administrations in line with the needs of the post-war time;
- establishing efficient cooperation between local executive bodies and local self-government bodies, territorial departments of central executive authorities;
- improving professional qualification of employees of local state administrations;

- defining the legal status of heads of local executive bodies;
- provision of high-quality services to people in the post-war and subsequent periods.

local self-government:

- introduction of a capable system of local self-government bodies at all levels of the administrative and territorial division of the state to properly perform the public functions vested in it, to be resilient to permanent crises and unpredictable threats, to adequately respond to challenges and enjoy trust among local communities;
- ensuring adequate funding to support the performance of public functions, reasonable distribution of powers between levels and subjects of public governance to allow for better quality of public services, efficient spending of limited funds and rapid development of territories;
- optimisation and digitalisation of civil service at the local level and making it result-oriented, and therefore aimed at achieving the key performance indicators;
- adapting the election procedures at the local level to the challenges of the post-war recovery, abolishing the size of the population as a factor determining the election system to allow for a more balanced reflection of the needs of the local population.

The public administration system in the wartime and post-war context determines the capacity of the state to efficiently respond to challenges and ensure development in various areas of recovery. Equally important is the ability to introduce changes to bring Ukraine closer to the EU standards and legislation, which is a key task in the context of Ukraine's EU candidate status and its EU integration processes. Implementation of complex measures in the area of parliamentarism, executive power and local self-government is aimed at ensuring efficient post-war development and consistent integration of all sectors in line with the EU standards and requirements.

I. Reform of the system of central executive authorities and approximation of governance to the EU standards

In general, the current system of executive authorities has ensured the implementation of its tasks in wartime – the continuous functioning of the state, decision-making, performing critical functions and providing services to citizens.

Since 2016 with the support of the EU Ukraine has been consistently implementing public administration reform. In 2021 the Government approved a new Strategy for Public Administration Reform until 2025 and an action plan for its implementation. The new Strategy is a continuation of the previous stage of public administration reform and is based on the results of the assessment of the state of public administration of Ukraine conducted by experts of the Support for Improvement in Government and Management Programme (SIGMA). Many tasks of the plan remain relevant at the moment.

Given that there is no strict acquis communautaire in the field of public administration, and there is no single model to follow in the reforms of horizontal governance structures, the SIGMA Principles are a tool for candidate countries to improve governance based on best practices of EU member states.

Therefore, taking into account the existing challenges, the main expectations for the candidate countries for EU accession, and the results of the consultations within the Working Group on Public Administration, the main directions of the reform are:

- optimization;
- efficiency;
- professionalization;
- human-centreedness;
- digitalization.

Problem description

In the context of a full-scale war, the system of executive authorities of Ukraine faced a number of challenges that exacerbated the existing ones and identified new problems in this area.

Due to the cessation of the implementation of a significant number of functions in the pre-war format and the reduction or renewal of those functions that are actually being performed, changes in workloads, there is an urgent need for appropriate redistribution/optimization of resources. The reduction in the number of employees actually involved in the performance of functions (due to dismissal, travel abroad, stay in the temporarily occupied territories, underemployment, downtime, unpaid leave, etc.), and the level of remuneration of civil servants are particularly painful issues. In this regard, there are risks

of losing the most qualified personnel, in particular those involved in policy-making, and levelling the achievements of public administration reform in this area.

Reduction of the time to complete tasks and need for quick results without losing quality has exacerbated the problem of obsolescence and bureaucratization of workflows and the need for their optimization and automation. In addition, according to the "Authorities processes efficiency: the position of civil servants" survey conducted in February 2022, there is virtually no customer orientation of the results of processes: only 4% of civil servants focus on consumer requirements, while 13% are governed by the established practice, 17% – by the instructions of the head, if such requirements are not defined by the regulatory document.

The issue of qualified personnel and efficient work processes has become especially relevant in terms of ensuring the capacity of the state apparatus to implement EU legislation.

The CEAs' lack of capacity to respond quickly to martial law challenges due to an overly complex system of subordination and approval at all levels, dispersal/duplication of functions, and responsibility for the quality of their implementation has also become obvious. Therefore, the insufficiently efficient and irrationally constructed system of CEAs, the lack of a clear division of functions and powers between CEAs, the redundant and duplicative functions remain problematic.

The ongoing process of reforming ministries to enhancing their institutional capacity to develop state policy needs to be completed. Therefore, the issue of removing the inappropriate functions from the ministries by gradually transferring them to other CEAs or entities, including in the framework of authority decentralization, is still relevant. The mechanism for directing and coordinating the CEA activities through the relevant ministers is imperfect and should be revised in the light of the principles of management accountability set out in SIGMA.

An important task is to improve the process of development and implementation of long-term decisions on state development, coordination of policy development and implementation, which are key elements of the executive branch in the system of public administration. At the same time, the planning process of the Cabinet of Ministers of Ukraine should be consistent with the long-term vision of the state development, the medium-term budget process, Ukraine's international obligations and the need to approximate the laws to the EU acquis.

There is a need to improve management accountability in accordance with European principles, taking into account the peculiarities of the public administration system of Ukraine, as well as increase the prestige of the state and its competitiveness as an employer, creating possibilities to attract and retain most qualified specialists in the civil service providing them with the opportunity for professional development in accordance with the needs and ensuring appropriate working conditions. At the same time, it is necessary to increase the capacity of civil servants in the field of European integration.

There have been positive changes caused by wartime: rapid acceleration of the government's use of modern approaches to the organization of work. This demonstrated the significant potential and professionalism of the civil service. The widespread introduction of remote work has demonstrated that it is effective in results-oriented public administration rather than public administration oriented on physical presence on the work place. Also, the use of IT tools in the preparation and processing of documents in electronic form instead of paper, is effective and convenient. Obviously, this approach must be maintained and developed in the future. After all, this is one of the ways to reduce overhead costs for the maintenance of the state apparatus.

An analysis of the European Commission's reports on the progress made in the implementation of reforms by the candidate countries for accession to the EU shows that main challenges for candidate states in public administration are:

- optimization of the organizational structure of authorities and ensuring their accountability and coordination;
- development of data and evidence-based policies through consultations with stakeholders;
- introduction of an administrative procedure and harmonization of relevant regulations;
- introduction of a merit-based and achievement-based system of selection of candidates for civil service.

Expected impact

Achieving the goals set in the Plan will contribute to the development of an effective system of public administration in Ukraine, which will provide for the implementation of other sectoral reforms and acceleration of European integration processes.

It is expected that the implementation of the goals will lead to rapid post-war recovery and development through the achievement of appropriate results, namely:

- building a stable CEA system that can ensure coherence and efficiency under such conditions that require rapid response/flexibility, high institutional capacity of CEAs which ensures the achievement of a result in accordance with the needs/requirements of consumers (citizens, institutions, etc.), using optimal resources;
- creation of a strong centre of the Government which will provide high-quality analytical and expert support and effective cooperation of CEAs in resolving cross-sectoral issues;
- consolidation of management of state-owned enterprises and state-owned property to ensure efficiency thereof;
- existence of reliable, qualified, motivated civil servants who receive fair pay and increase professional competence in accordance with their professional needs, have appropriate conditions and means for work;
- interaction between the state and citizens and business entities is based on clear and common administrative procedures principles ensuring the respect for the rights of individuals and legal persons.

1. **Key issues to be solved within the framework of the Recovery Plan within the direction "Executive Reform (CEAs) and Approximation to European Standards"**

Impact of the war on the defined analysis area:	
1) Key challenges (in general, for the defined area)	Ensuring the most comfortable conditions and creating a convenient system for women and men belonging to different groups with regard to issues related to the activities of authorities or the provision of state services The need to restructure State Budget expenditures for the state apparatus Ministries and central executive authorities lack practical experience of operation under the circumstances of martial law Optimization of the number of employees actually involved in the performance of functions Cessation of the implementation of a significant number of functions in the pre-war format and the reduction or renewal of those functions that are actually being performed Revision of the structure of executive bodies in view of the war and post-war period Time allocated for work processes is reduced, the demand to perform urgent tasks without loss of quality of their performance is increased The need for maximum digitalization of the public services product and hardware processes The need to ensure the capacity of the state apparatus to implement EU legislation Incomplete reforms, which are the cause of some elements of the public administration system working inefficiently Lack of confidence and motivation of the staff due to the dissemination of information about mass redundancies, including category B and C civil servants, most of whom are women. Lack of balanced representation of women and men belonging to category A positions in CEAs.
2) Key opportunities (in general, for the defined area)	Existence of political will for change and clear awareness of the need to make public administration human-centreed and as effective as possible

	The experience gained during the war will allow for the assessment and prioritization of reforms, as well as a more thorough review of the goals, functions, tasks, conditions and form of work of ministries and CEAs. The possibility of radical change if all interested parties reach a consensus
3) Key restrictions (in general, for the defined area)	Impossibility to change the Constitution of Ukraine before the end of martial law Rigid cost savings given the urgent need to secure protected budget items Lack of time to prepare quality decisions at all levels of government and, as a consequence, reduced quality of the adopted regulations and individual acts Impossibility of medium- and long-term planning The CEAs' lack of capacity to respond quickly to problems due to a complex system of subordination and approval at all levels Restrictions on the performance of functions in the temporarily occupied territories Mass internal movement of workers and outflow of professional staff Impossibility to ensure a quality selection of employees due to the simplified competitive procedure Danger associated with working in administrative buildings.

2. Goals, tasks and stages of the Recovery Plan within the direction "Executive Reform (CEAs) and Approximation to European Standards" for specific fields:

	Stage 1: June 2022 – end of 2022	**Stage 2: January 2023 – December 2025**	**Stage 3: January 2026 – December 2032**
OPTIMIZATION			
Problem 1: Shortage of financial resources call for optimization of the organizational and functional structure of the central executive authorities system. Fiscal conditions of wartime determine the need for public administration to work with significantly less resources. It is also likely that limited funding will remain an issue even after the war. This will be dictated by the need to direct all available resources to solve social, economic and other problems. The existing structure of public administration is the result of: - irregular functional audits and analyses of expenditures in institutions, lack of incentives for their performance;			

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
- lack of instructions and rules on what to do and at what level. As a result, there is no principle of functional subsidiarity, the system is too centralized; - all institutions, large or small, spend resources to perform the same support functions, the economy of scale through consolidation is not used; - managers do not have incentives to analyse and restructure work processes and make them *lean* (thrifty, optimized); - a significant number of civil servants are involved in providing information to citizens upon their requests and consideration of appeals; - the fact that many territorial units of central executive bodies still operate as legal entities, which increases costs; - the existence of various internal control systems with questionable benefits and effectiveness; - too many institutions still do not belong to the system of line ministries and report directly to the Cabinet of Ministers of Ukraine.			
Goal 1: Compact, result-oriented, efficient and accountable system of central executive authorities. The system of central executive bodies is becoming more compact, while its institutions are actively cooperating to effectively achieve the goals of Ukraine's recovery and EU integration. A new governance model is developed and implemented for each type of executive body (ministries and other CEAs, collegial CEAs and CEAs with special status, including national regulators). The model should promote results-oriented management, combining operational autonomy with strong accountability for results, gender-based governance, internal control system and audit. In addition, a system and culture of decentralized management using delegation is being created.			
Goal to be achieved to solve the issue during each stage	**Model a compact, accountable, result-oriented and rationally built system of central executive authorities.** Ensure continuous and efficient performance of state functions by each CEA in the process of optimization. Audit the functions and form proposals for optimizing the CEA functions based on the results of such audit. Prepare an updated model of institutional and organizational support for implementation of the EU acquis in accordance with EU recommendations.	**Introduce a culture of continuous improvement in government agencies** Carry out a comprehensive assessment of the public administration system and develop a plan for its approximation to the standards set by the OECD/SIGMA Introduce an updated model of institutional and organizational support for implementation of the EU acquis.	Make CEAs focus exclusively on their core activities, including EU integration.

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Deadline within the stage	12/2022	12/2025	
Risks related to the goal achievement	Extension of martial law. Lack of practical experience of CEAs operation under the circumstances of martial law. Lack of strong political leadership to coordinate the process of CEAs system optimization	Lack of political consensus on constitutional changes	
Measurable goal achievement indicator	**A new model of the institutional structure of the executive power at the central level and a step-by-step plan for its implementation have been prepared.** **A step-by-step plan to reduce the maximum number of CEAs employees is prepared.** **Control and supervisory functions are consolidated within a single body.** An audit of the functions of the CEAs was conducted, an optimized model of the institutional structure of the executive branch was formed using: - optimization and digitization of functions - consolidation and liquidation of CEAs A mechanism/procedure is developed to ensure a quality policy-making process	**CEAs regularly analyse and improve the processes of their activities.** **A new model of the institutional structure of the executive power at the central level has been gradually implemented.** **The number of ministries is reduced to approximately 12-16.** **The general salary fund was reduced by approximately 30% due to a reduction in the number of employees.** The number of CEAs (apart from ministries) whose activities are directed and coordinated directly by the Cabinet of Ministers is reduced. A result-oriented mechanism for directing and coordinating the CEAs activities through the relevant ministers is introduced.	CEAs system fully corresponds to the defined model of the institutional structure. 100% of adopted legislation complies with the EU acquis 100% of legislation is approximated to the EU acquis (% of implementation) At least 50% of draft laws adopted by the Verkhovna Rada have been drafted by the Cabinet of Ministers

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
	and meeting deadlines at all stages of the process. Amendments to the legislation on the conceptual vision of the planning and reporting system have been made. The procedure for coordinating European integration at the ministry level is developed and approved. Proposals for the use of international experience in creating a laboratory of innovation policy have been prepared. Proposals regarding the use of IT tools for policy making based on inventory findings have been prepared. Normative changes have been made to check the quality of draft acts of the Cabinet of Ministers.	Territorial bodies of the CEAs which functioned as legal entities were terminated by being reorganized into structural subdivisions of the CEAs apparatus. The directorate of the ministry responsible for each policy area is appointed. Proposals have been developed to improve the procedure for the formation and termination of CEAs. A system for exercise of the delegation is introduced. The processes of consideration of citizens' appeals have been optimized. Amendments to the legislation on consolidation of the policy areas for ministries have been made. 100% of policy documents are prepared in compliance with all policy analysis requirements. IT systems for the preparation and passing of acts are introduced and used, which includes, in particular, interdepartmental consultations and consultations with the public during policy making General guidelines for periodic policy reviews have been developed to determine the effectiveness of adopted legislation in specific areas.	

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Total funding requirement for the goal achievement		Reduction costs – approximately 100 thousand per 1 person, up to 10 billion UAH in total (compensation for unused leave, severance pay, unemployment benefits after dismissal, grants, retraining, etc.)	
Links between the goal and other directions			

Problem 2: Institutional fragmentation is not compensated by a strong management centre.

The implementation of the reconstruction and recovery agenda, as well as European integration, will require effective leadership and coordination of all central executive bodies at all levels, from policy making to the achievement of expected outcomes. In addition to the political aspect of such a system, the support of the Prime Minister requires an institution with a strong mandate for strategic leadership, coordination and quality control. Although elements of such an institutional structure are present, it still needs to be developed in terms of authority and capacity.

All CEAs are considered separate legal persons under public law but due to the lack of clearly defined legal status of a legal person under public law CEAs act as legal persons under private law, resulting in fragmentation of the system and attempts to resolve conflicts between CEAs in ways suitable for legal persons in private, in particular using lawsuits;

Accession to the EU will require Ukraine to fulfil a wide range of legislative, organizational and institutional tasks. Effective, efficient and fast implementation of European integration tasks is impossible without proper planning and coordination. Therefore, a fast and efficient (according to Ukraine's interests) accession process requires a strong and efficient coordinating administrative level body at the centre of the government. Unfortunately, the Government Office for the Coordination of European and Euro-Atlantic Integration has gaps in its capacity compared to its role and mission. This capacity needs to be strengthened, starting with additional staff (industry lawyers capable of working with EU law), strengthening the role of the Office, making it monitoring the compliance with EU law relevant, binding and heard by decision-makers. More than 130,000 pages of the EU acquis need to be enshrined in Ukrainian law. In addition, the EU acquis will need to be translated into Ukrainian and new will need to be terminology developed.

Goal 2: Implementation on the basis of the SCMU of the concept of Centre of Government (CoG) capable of supporting the Prime Minister in coordination and management of ministries, as well as for the effective management of national reconstruction and EU integration programmes

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Goal to be achieved to solve the issue during each stage	**Develop a regulatory and technical framework for the centralization of support functions** **Strengthen the strategic functions of the government centre:** - **preparation of draft laws,** - **preparation of consolidated strategies, plans and action programmes of the government** - **legal and strategic examination of draft legal and normative acts**	**Centralize the main functions related to supporting CEAs activities** **Prepare legal support for the creation of a single legal entity – the Cabinet of Ministers of Ukraine** **Implement an efficiency management system.** Ensure the efficient performance of the functions of the Government Centre by SCMU: 1) support of the Prime Minister/Deputy Prime Minister(s) in the planning, management and coordination of ministries, including those related to the EU integration; 2) control the quality of materials/proposals to the agenda of government committees, take part in the meetings of the Cabinet of Ministers; 3) ensure effective cooperation of CEAs in resolving cross-sectoral issues; 4) systematically monitor and assess the consequences of the implementation of state policy 5) become the centre of development of key draft laws, strategic and program documents	**Centralize the vast majority of CEAs support functions** **Increase the efficiency of ministries by depriving them of the status of a legal entity and creating a single legal entity – the Cabinet of Ministers.** The SCMU is transformed into a Government Centre, which has the appropriate status and high reputation for ministries and other central executive bodies.

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
		6) provide effective guidance to category A officials.	
Deadline within the stage	12/2022	12/2025	12/2032
Risks related to the goal achievement	Lack of political leadership and political will to change	Extension of martial law. Lack of political leadership and political will to change	Lack of political leadership and political will to change
Measurable goal achievement indicator	**The regulatory framework for centralization of functions ministries' provision is prepared** **The normative and technical (IT products) framework for centralization of provision functions is prepared.** **Amendments to the legislation on granting the appropriate status and powers to the CMU Secretariat is prepared.** The concept of the Government Centre and its implementation plan have been approved, which in particular envisages the development of the capacity of the unit responsible for coordinating EU integration and ensuring quality control in matters related to compliance with the EU acquis. A draft of the new structure of the CMU Secretariat is prepared. The function of examination of draft legal and normative acts by SCMU is strengthened.	**The main functions related to ensuring that CEAs' activities are consolidated in one institution (personnel, IT, business support, accounting, security) are centralized.** **SCMU has implemented the function of "talent management" – selection, professional development of category A personnel.** **An efficiency management system is introduced in the Cabinet of Ministers of Ukraine** SCMU was reorganized in accordance with the approved concept and implementation plan. A system for monitoring the implementation of state policy using quantitative and qualitative methods of data collection, processing and dissemination is created and functioning.	**The vast majority of the functions related to ensuring the CEAs activity in one institution have been centralized and the corresponding costs have been reduced due to this.** **Ministries were deprived of the status of legal entities and consolidated into a single legal entity.** A culture of continuous improvement is introduced in the SMU. Information on monitoring key aspects of reconstruction and integration in the EU is prepared regularly and at regular intervals.

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Total funding requirement for the goal achievement			
Links between the goal and other directions		Digitalisation European integration	Digitalisation European integration
EFFICIENCY			
Problem 3: Inefficient management of state-owned enterprises and state-owned property There are more than 3,000 state-owned enterprises under CEAs management. A significant proportion of them are unprofitable or do not function. Corporate governance standards are not implemented in most enterprises. The assets of government agencies (buildings, etc.) are managed in a decentralized manner, and economies of scale are not used. Property management takes CEAs resources from their core functions.			
Goal 3: Consolidation of management of state-owned enterprises and state-owned property to ensure efficiency thereof Create a single management centre for state-owned enterprises. Privatize or liquidate non-core and non-performing assets. Introduce centralized property management that ensures transparency and efficiency.			
Goal to be achieved to solve the issue during each stage	**Optimize the management system of state-owned enterprises and state-owned property.** **Establish an asset management company in accordance with OECD requirements** **Create a Real Estate Management Agency for centralized real estate management**	**Ensure rapid privatization of surplus property** **Liquidate unprofitable and "dead" enterprises**	
Deadline within the stage	12/2022	12/2025	
Risks related to the goal achievement			

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Measurable goal achievement indicator	**The list of enterprises that should remain and which should be privatized or liquidated is prepared.** **An asset management company is established in accordance with OECD requirements** **The Real Estate Management Agency is established** **Management of state-owned enterprises and state-owned property is no longer a function of CEAs** **Amendments to the legislation On Management of State Property Assets are introduced (draft law 5593-d)**	**Enterprises and surplus property have been privatized, enterprises that have no prospects have been liquidated or declared bankrupt** **Corporate governance of state-owned enterprises based on best international practices is introduced**	
Total funding requirement for the goal achievement		Budget expenditures for the an asset management company: 40 mln per year Budget expenditures for the Real Estate Management Agency: 40 mln per year	Budget expenditures for the an asset management company: 40 mln per year Budget expenditures for the Real Estate Management Agency: 40 mln per year
Links between the goal and other directions	digitalisation	digitalisation	digitalisation
PROFESSIONALISM			
Problem 4: The civil service is not unified which hinders common efforts for the country's rebuilding and recovery.			

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
The civil service is not unified, even if it operates under the same laws and procedures. In fact, the civil service reflects the current structure of the central executive authorities where ministries are independent and act almost as legal entities under private law. Senior civil servants are not managed or developed as a single team. There is no institution that has full authority to do so. Although the resolution of the Cabinet of Ministers of Ukraine establishes a single framework for basic salaries of civil servants, and the Law "On Civil Service" provides for several other standard requirements, the remuneration system is currently unbalanced. The solvency of institutions does not depend on the wage system, but on other, less formal factors. Executive bodies compete with each other when it comes to better salaries for potential employees. Also, various specialized laws fragmented the civil service even further.			
Goal 4: Single, balanced system of civil service based on the principles of equal rights and opportunities with management autonomy, accountability and unified system of remuneration			
Goal to be achieved to solve the issue during each stage	Addressing conceptual and practical bottlenecks for the introduction of the main pillars of unification in the civil service. Civil servants are instructed on the main aspects of wartime work.	All civil servants work within the same legal framework that ensures internal mobility. The following general systems apply to all institutions: 1) unification, digitization and exchange, monitoring, reporting and analysis of civil service data; **2) reform of the system of remuneration in the civil service;** 3) pre-selection, selection and development of senior officials as a group; 4) placement of advertisements for competitions for civil service positions on a single web portal of vacancies career.gov.ua; 5) formation of civil service branding, creation of an attractive image of the state as an employer	Civil service legislation and its application are well balanced between centrally established general systems, rules and guidelines on the one hand, and managerial autonomy and accountability in their application in each institution on the other. Professional groups within the civil service (specialists in law, finance, personnel management, political analysts, etc.) develop their own networks and cooperate. An effective system of communication with civil servants is fully operational, creating a sense of community among civil servants.

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Deadline within the stage			
Risks related to the goal achievement	Extension of martial law. Lack of political leadership and political will to change.	Extension of martial law. Lack of political leadership and political will to change.	Lack of political leadership and political will to change.
Measurable goal achievement indicator	Legal and normative acts necessary for the formation of a balanced system of public administration (human resources management system, new remuneration system, independent competitive selection, personnel reserve) have been developed and approved.	**a new system of remuneration for the civil service based on best international practices is introduced;** a unified personnel reserve system was created. The official NACS portal provides an opportunity for civil servants to promptly receive information on the main aspects of their activities and leave information on problematic issues related to the organization of their work (NACS Communication Centre)	HRMIS human resources management system allows tracking and analysing information on vacancies, salaries, specialists in various fields, etc. in all government agencies; remuneration in the civil service is clear (the size of all components is known), transparent (low influence of the head on the size of the head's salary) and fair (same work is remunerated equally); - all state bodies have access to the personnel reserve system and have the opportunity to find the necessary specialist in accordance with their requirements. The system of exchanging information with civil servants through the official NACS portal allows civil servants to address any issues related to the civil service.
Total funding requirement for the goal achievement			

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Links between the goal and other directions	digitalisation	digitalisation	digitalisation
Problem 5: Insufficient ability to attract highly qualified professionals and specialists to the public service. The state is one of the largest employers in Ukraine. Before the war total expenditures for civil service increased every year while the actual number of employees decreased. Therefore, it creates significant potential for the civil service to become an attractive and competitive employment opportunity. However, there is a strong opinion that the civil service does not attract a sufficient number of highly qualified professionals and talented specialists. There is also a view that existing competition procedures are a bureaucratic and inefficient obstacle. Therefore, there is a suggestion to simplify competition procedures. At the same time, the civil service is one of the few employment opportunities that is non-transparent regarding the expected level of wages and other employment conditions for potential employees. In the absence of a unified approach, each institution seeks to create its own employer brand.			
Goal 5. Civil service is an attractive, efficient and reliable employer for highly qualified professionals and young specialists.			
Goal to be achieved to solve the issue during each stage	Resume competitions for civil service positions as soon as security conditions allow.	Introduce a new system of selection and recruitment for the civil service based on the concept of "paths to civil service positions", at the same time ensuring the appropriate ratio: 1) centralized and decentralized recruitment and selection; 2) common rules and autonomy in case of a decentralized approach. 3) gender balance.	The system of selection and recruitment for the civil service is reliable and is based on the assessment of the professional suitability of candidates and equal rights and opportunities for women and men, not on the selection based on loyalty. As a result, the number of candidates for one vacancy is on a par with the high-reputation positions in the private sector.
Deadline within the stage	December 2022	December 2025	December 2032
Risks related to the goal achievement	Extension of martial law. Lack of political leadership and political will to change Recruitment of a large number of persons to civil service without proper verification	Extension of martial law. Lack of political leadership and political will to change The procedure for amending the legislation provides for conciliation	Lack of political leadership and political will to change Not all civil service positions can be fully compared to private sector

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
	of their professional competencies in the event of prolonged martial law.	procedures between interested parties. Finding a compromise solution can delay the adoption of the necessary laws and regulations.	positions, so there is a risk that using a private sector-oriented selection system will not have the expected outcome.
Measurable goal achievement indicator	Competitions held or announced for positions that have been filled under the simplified procedure. The characteristics of the competition to ensure the maximum safety of candidates, members of competition commissions and administrators in a state of emergency or martial law have been approved.	Legislation and regulations have been amended to ensure independent, transparent, fair selection of the most effective candidates for all job categories by automating the selection process, increasing the number of centrally assessed competency requirements, and technically improving the Single Civil Service Vacancy Portal.	The number of candidates for one civil service vacancy is not less than the average number of candidates for a similar position in the private sector.
Total funding requirement for the goal achievement			
Links between the goal and other directions	European integration (digitalisation)	European integration (digitalisation)	European integration
Problem 6: Low quality of personnel management in government agencies Nowadays most managers of state bodies think of the role of the personnel management service exclusively as personnel records management. There is no practice of preparing strategies for staff development, talent management in government agencies, for forming the internal culture within institutions. There is a formal approach to the use of such personnel management tools as selection, adaptation of newly appointed employees, annual evaluation, development of a motivation system, etc. The future major transformation of public administration and civil service will require an active and capable personnel management service which will become the support for senior management in each central executive body not only in making decisions on proper staffing but also in organizational development of the public body. Over the last few years the National Agency of Ukraine for Civil Service has supported the development of HR functions, however currently the role of personnel management services in public administration institutions remains insufficiently important compared to the private sector.			
Goal 6: Public authorities apply the advanced methods and tools of personnel management, develop their organisational and managerial culture.			

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Goal to be achieved to solve the issue during each stage	The personnel management function in central government institutions is primarily focused on facilitating the transformation of the civil service as a result of recovery planning.	The function of the civil service is being transformed with the introduction of a shared service centre and HRMIS. This means reorienting organizational personnel management services to performing tasks with higher added value.	The function of personnel management in the civil service is changing completely from personnel administration to modern personnel management based on non-discrimination and gender equality principles employed by large and successful private sector companies.
Deadline within the stage	December 2022	December 2025	December 2032
Risks related to the goal achievement	Extension of martial law. Lack of political leadership and political will to change	Extension of martial law. Lack of political leadership and political will to change	Lack of political leadership and political will to change
Measurable goal achievement indicator	Personnel record keeping, preparation of reporting documents take up to 50% of the working time of employees of the personnel management service.	Personnel record keeping, preparation of reporting documents take up to 30% of the working time of employees of the personnel management service. Public authorities have their own HR strategies and use HR analytics in their work.	The human resources management service efficiently uses the advanced methods and tools of personnel management for the proper organisational development of the public authority, taking into account its strategic objectives and tasks. Personnel record keeping and preparation of reporting and accounting documents are automated to the greatest possible extent.
Total funding requirement for the goal achievement			
Links between the goal and other directions	digitalisation	digitalisation	digitalisation

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Problem 7: The system of professional training of public servants is not effective enough. Continuous professional development of employees is part of every successful organization. Before the war training of civil servants within the framework of the educational and professional training master's programme "Public Policy and Management" in higher education institutions, as well as advanced training of civil servants in the Ukrainian School of Governance and other institutions providing educational services was financed from the state budget. At the same time, the system has a number of shortcomings: the civil service does not have a comprehensive profile of general and position-specific competencies necessary for planning and managing the professional training of civil servants, etc .; professional training of senior officials is not systemic; training programs do not cover all priorities of public administration reform despite the annual review of vocational training needs; some executive bodies provide neither regular training of employees nor funding of such training at the expense of funds within the approved budget allocations; there is no system of regular involvement of civil servants as trainers for trainings; the performance evaluation system of civil servants is excessively focused on achieving the "production" KPI but does not pay enough attention to the development of professional and personal competencies. In general, the transformation of tasks and functions of civil servants during the war has weakened the relationship between the real needs of civil servants for training, training content and public administration practices, which negatively affects the formation and development of professional competencies of civil servants as well as their ability to perform their duties in the new circumstances.			
Goal 7: Improving the system of advanced training of civil servants to ensure their professional development in order to meet the needs of civil service			
Goal to be achieved to solve the issue during each stage	Reliable and effective connection between the needs for advanced training of public servants, the content of advanced training programs and the level of application of acquired / improved professional competencies in practice (in the official capacity) during the martial law period	The system of advanced training of civil servants has changed so that their training at the expense of the state budget covers areas (topics) related to horizontal needs/gaps in management skills in general (e.g. law-making, EU integration, etc.), and the issue of adaptation of newly appointed civil servants of various categories. Public bodies provide additional training to their staff based on the results of performance evaluation of civil servants	Civil servants not only have access to professional training of appropriate quality, but also pro-actively participate in such training. Vocational training is financed from the state and local budgets, expenditures of state bodies and local self-government bodies.

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
		and professional development plans at the expense of their own expenditures.	
Deadline within the stage	December 2022	December 2025	December 2032
Risks related to the goal achievement	Extension of martial law. Lack of political leadership and political will to change Limited resources	Extension of martial law. Lack of political leadership and political will to change Limited funding.	Lack of political leadership and political will to change Limited funding.
Measurable goal achievement indicator	100% of civil servants have improved their skills based on the state order	The share of expenditures of state bodies allocated for advanced training of civil servants is 2% of the salary fund	70% of civil servants have improved their skills
Total funding requirement for the goal achievement	-	-	-
Links between the goal and other directions	-	-	-
HUMAN-CENTEREDNESS			
Problem 8: Excessive number of administrative procedures related to interaction between citizens and the state. The relations of citizens and business entities with the state, when the latter determines the rights and responsibilities of the former, are regulated by several hundred laws and numerous other legal acts. There is no single set of principles which all citizens could use in all cases of interaction with the state. This creates space for abuse of regulations and even corruption. Ukraine is one of the few countries in the entire European administrative space where there is no single administrative procedure established by law. Such a system is not optimal in terms of efficiency, as each institution invents its own rules of interaction with citizens and businesses. The issue of administrative procedures as well as improving the efficiency of administrative services to meet the needs of citizens using convenient and clear procedures are the most relevant to the daily needs of citizens related to public service administration. The adoption of the Law of Ukraine "On Administrative Procedure" requires a set of measures to be implemented so that for the citizens could actually use the opportunities and government officials comply with them.		
Goal 8: Introducing a single procedure for all decisions, within which all public institutions use all available tools to ensure human rights and freedoms.			

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Goal to be achieved to solve the issue during each stage	-	The Law "On Administrative Procedure" is in force and the necessary measures for its implementation have been taken to ensure the full functioning of the law after the end of the transition period.	Interaction between the state and citizens and business entities is based on clear and common administrative procedures principles ensuring the respect for the rights of individuals and legal persons.
Deadline within the stage	-	December 2025	December 2030
Risks related to the goal achievement	-	Extension of martial law. Lack of political leadership and political will to change	Lack of political leadership and political will to change
Measurable goal achievement indicator	-	50% of laws comply with the basic principles set out by the administrative procedure	100% of laws comply with the basic principles set out by the administrative procedure
Total funding requirement for the goal achievement	-	?	?
Links between the goal and other directions	-	European integration	European integration

DIGITALIZATION

Problem 9:

There are no tools for unification and digitalization of functions and work processes in ministries, CEAs and other government bodies.

The policy of consultations with stakeholders regarding the development of rules and regulations requires an appropriate digital tool that will directly affect the quality of preparation and approval of draft legal and normative acts. The lack of ability to effectively monitor the process of drafting legal and normative acts has a negative impact on the quality and compliance with deadlines. Fragmentation of the digitalization of legal and normative acts drafting by the executive authorities does not ensure compliance with the paperless principle at all stages — from the idea (task) regarding the development to publishing an adopted government act or transfer to the entity that adopts the act.

Ensuring data-driven policy development requires creating a data management system within the authorities. At present, the authorities have data on the development and implementation of policy (reporting and statistical information) is stored on non-consolidated media, including paper, the availability of which is limited to their owners, although the vast majority of information has no characteristics of data with limited access. The vast majority of reports are collected in forms that provide for their further manual processing.

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
The lack of a unified personnel data system makes operational management and civil service development planning impossible. Much of the data needed to develop personnel policy is collected manually and is not completely accurate.			
Goal 9: Developing unified digital systems to implement basic cross-sectoral workflows.			
Goal to be achieved to solve the issue during each stage	Development of a model of unified digitalization of the draft legal and normative acts preparation by executive bodies providing for a single platform for consultations with stakeholders. Ensuring the capacity of National Agency for Civil Service (NACS) to implement the HRMIS system and preparation of HRMIS components according to the measured indicators.	Development and implementation of IT support in accordance with the model of unified digitalization of the draft legal and normative acts preparation by executive bodies. Development and implementation of a single management platform (collection, processing, exchange) of reporting and statistical data of executive bodies. Ensuring the operation and implementation of HRMIS in accordance with the measured indicators.	Ensuring the functionality of the model of unified digitalization of the draft legal and normative acts preparation by executive bodies. Ensuring the functionality of a single management platform (collection, processing, exchange) of reporting and statistical data of executive bodies. Ensuring the operation and implementation of HRMIS in accordance with the measured indicators.

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Deadline within the stage	12/2022	12/2025	12/2032
Risks related to the goal achievement	Lack of funding; limited resources; martial law.	Lack of funding; limited resources; resistance from government agencies.	Lack of funding; limited resources; resistance from government agencies.
Measurable goal achievement indicator	A single system of training and control of knowledge of working in HRMIS is approved. The concept for contact centre operation is approved.	at least 50% of draft legal and normative acts (except those with restricted access) undergo a full cycle of development and implementation using the IT system. Time for drafting legal and normative acts is reduced. CEAs' statistics on policy development and implementation are consolidated on a single platform accessible to employees of all CEAs. Reporting information is collected by filling out electronic forms and is processed (summarized) automatically. The expert team for HRMIS implementation, administration and support consists of a certain number of specialists indicated in the Terms of Reference. A single system of training and control of knowledge of working in HRMIS is in place. The HRMIS contact centre is fully operational. HRMIS is fully operational and used as the main HRM IT system in at least: 50% of CEAs — 12/2023. 65% of CEAs — 12/2024. 80% of CEAs — 12/2025.	100% of draft legal and normative acts are developed following a paperless principle. The number of requests from one executive body to another regarding the provision of statistical information is reduced. Time for collecting and processing reporting and statistical information is reduced. The number of timely and high-quality implemented program documents, policies, strategies, measures, tasks is growing exponentially. Reporting on programme documents takes place as scheduled to demonstrate the progress (%) and give an update on expenditures, and passes efficiency verification. State budget funds are spent in the period planned and for the objectives set The expert team for HRMIS implementation, administration and support consists of a certain number of specialists indicated in the Terms of Reference.

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
			A single system of training and control of knowledge of working in HRMIS is in place. The HRMIS contact centre is fully operational. HRMIS is fully operational and used as the main HRM IT system.
Total funding requirement for the goal achievement	Need for state budget funds to ensure NACS capacity in accordance with Ukraine's commitments to maintain a team of specialists responsible for implementation, administration and support of HRMIS	Need for state budget funds or funding from other sources for technical support, maintenance and updating of HRMIS related to changes in legislation: 2023 — UAH 32 744 thousand 2024 — UAH 26 390 thousand 2025 — UAH 22 866 thousand	TBD
Links between the goal and other directions	European integration (digitalisation)	European integration (digitalisation)	European integration (digitalisation)

3. Current state of implementation of the programme documents relating to the relevant issue in the defined analysis area:

No.	Title of the programme document	Current situation
1.	Public Administration Reform Strategy for 2022–2025 and action plan for its implementation approved by the resolution of the Cabinet of Ministers No. 831-r of 21 July 2021 "Some issues of public administration reform in Ukraine"	Public administration reform is being implemented in accordance with the Public Administration Reform Strategy adopted in June 2016 and updated at the end of 2018 in accordance with short-term recommendations formulated by the SIGMA based on the results of the public administration system assessment in Ukraine. SIGMA's principles of public administration have been fundamental to the Strategy since its adoption in 2016. They are not just technical guidelines. Each principle is aimed at specific objectives and tasks that need to be addressed to modernise public administration and bring it in line with the European requirements. The Action Plan for the implementation of the Strategy contains

		69 measures, 60 of which (87%) have been implemented by the end of 2021. The Strategy also contains 21 performance indicators which have targets for each year of the Strategy implementation. Targets for 2021 were achieved for 12 indicators (57%). In July 2021 the Government approved a new Public Administration Reform Strategy of Ukraine for 2022–2025. The preparation and development of this document was the result of a broad discussion involving the maximum number of interested parties' representatives, including civil society and European partners.
2.	Concept of optimization of the system of central executive bodies approved by the CMU Regulation 1013-r of 27 December 2017	The action plan for the implementation of the Concept was not approved by the Government as the goals of the Concept were achieved within the framework of the action plan for the implementation of the Public Administration Reform Strategy of Ukraine. In particular, the reforms of ministries launched in the basis of the results of the pilot project with the participation of individual ministries. However in 2020-2021 this process was slowed down by restrictive measures put in place to prevent the spread of COVID-19 (restrictions on reform funding and the suspension of competitions affected the process of completing and staffing directorates in ministries).
3.	The concept of introducing the positions of reform specialists, approved by the Ordinance of the CMU No. 905-r of 11 November 2016	As of 31 December 2021, 74 directorates were established in 16 ministries, employing 722 reform specialists. Taking into account the positions of category A reform specialists, which include State Secretaries of Ministries, the Office of the President of Ukraine, the Secretariat of the Cabinet of Ministers of Ukraine and NACS, as of 31 December 2021 a total of 758 civil servants worked as reform specialists. In 2022 the number of directorates decreased slightly and as of 31 May there were 66 directorates where 702 civil servants worked as reform specialists. Taking into account the positions of category A reform specialists a total of 740 civil servants worked in these positions.
4	The concept of implementation of human resources information management system within the public authorities and the Action Plan	According to the Public Portal (https://public.nads.gov.ua/) as of 09.06.2022:

	for its implementation approved by the Ordinance of the CMU No. 844-r of 1 December 2017	– 87 state bodies (ministries, other central executive bodies and their territorial bodies / subdivisions) are connected to HRMIS. Among them 29 are CEAs, which is 36% of the total number of CEAs (according to the single web portal of the executive authorities of Ukraine (https://www.kmu.gov.ua/catalog), there are 80 CEAs in total); – information on 21,931 identity cards of civil servants and employees of state bodies is entered into HRMIS
5.	The concept of reforming the system of remuneration of civil servants, approved by the order of the Cabinet of Ministers No. 622-r of 27 May 2020	The reform of the remuneration system has been underway since 2020 which includes the classification of civil service positions, the development of a grading system and the approximation of the level of remuneration to the market level in order to attract highly qualified specialists to civil service. The main problems related to renumeration are: the imbalance of the system, the disparity in the wages for similar positions, the unevenness and non-transparency of wages, unreasonable incentive payments, etc. According to the preliminary plan for the reform implementation, starting from 2023 all civil servants had to switch to a new system of remuneration. In January-February 2022 the classification of civil service positions began, in particular, classification committees were set up in state bodies, and more than 10,000 civil servants received the relevant training. As of February 24 the classification process has been temporarily suspended due to hostilities on the territory of Ukraine. During the martial law the order and forms of work of state bodies changed. However, civil servants continue to perform their duties. A significant part of the total salary of civil servants are incentive payments, which, in accordance with the Law of Ukraine “On Civil Service” are applicable until 31 December 2022. Taking into account the reduction of expenditures, including wages, and the fact that the optimization of structures is being considered, there is a risk that in 2023 civil servants’ wages may remain at the level of salary, rank and

		seniority allowances. This will reduce the institutional capacity of public authorities, cause the outflow of staff and increase corruption risks.

4. Definition of tasks for the achievement of goals from paragraph 2 (for each defined goal)

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
		Stage 1: June 2022 – end of 2022		
1.	**Goal 1: Compact, result-oriented, efficient and accountable system of central executive authorities.**	Develop a methodology for performance-based functional audits, including crash tests (what happens if the result is no longer produced), a public interest test (what public benefit does this result help provide), delivery options/subsidiarity test (decentralisation/ deconcentration, outsourcing, consulting, delegation, transfer to the judiciary and agencification or production by ministries/CEAs)	09/2022	
2.		Develop a state program for support during the transition period (reorientation, retraining, social support, etc.) of the employees of state institutions during the optimization of their numbers.	12/2022	
3.		Develop a concept of institutional audit that will provide for an inventory of existing and described functions, hierarchical dependence, decision-making chains and interacting processes throughout the structure, including subordinate and subsidiary bodies and enterprises, based on international experience.	11/2022	
4.		Develop the vision (map) of the institutional system (according to policy areas) of the central executive authority	12/2022	
5.		Agree on the concept of the modernised organizational structure of ministries and prepare a legal basis for transformation.	12/2022	
6.		Improve the mechanism for directing and coordinating the CEAs activities through the relevant ministers, providing for a result-oriented relationship between the Minister and the CEAs and giving the heads of CEAs greater managerial autonomy	12/2022	

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
7.		Prepare a vision, institutional and functional model, legal framework for centralisation of work with citizens' appeals and requests in order to reduce the burden on government bodies.	12/2022	
8.		Develop a regulatory framework for the implementation of decentralised management through delegation	12/2022	
9.		Carry out a comparative analysis of the administrative structures recommended by the EU for the implementation of the EU acquis as well as the relevant organization of such structures in Ukraine; prepare proposals for updating the model of institutional and organisational support for the implementation of the EU acquis.	12/2022	
10.	**Goal 2: Implementation on the basis of the SCMU of the concept of Centre of Government (CoG) capable of supporting the Prime Minister in coordination and management of ministries, as well as for the effective management of national reconstruction and EU integration programmes**	Prepare and agree on the areas of competence of the SCMU as the main "centre of government" within the structure of the transformed central executive bodies. Prepare the implementation plan that will also include areas in need of capacity development.	12/2022	
11.		Identify areas where joint services related to the performance of CEA provision functions will be introduced. Develop an institutional model and plan to secure resources for it. Develop regulatory and technical framework (IT tools) to centralize support functions	12/2022	
12.		Create a capacity development plan for the SCMU unit responsible for coordinating EU integration and ensuring quality control in compliance with the EU acquis. Strengthen the role of this SCMU function in legal and normative acts.	12/2022	

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
13.	**Goal 3: Consolidation of management of state-owned enterprises and state-owned property**	Establish an asset management company in accordance with OECD requirements for effective strategic property management	12/2022	
14.		Create a Real Estate Management Agency for centralized real estate management	12/2022	
15.		Complete the audit of property and SoEs and determine the list of property and enterprises that will remain and those that are to be privatized, liquidated. Audit the premises used by central executive bodies	12/2022	
16.		Prepare amendments to the legislation on state property management to ensure the implementation of a centralized management model, in particular related to screening criteria, simplified privatization procedures, revision of moratoriums, etc.	12/2022	
17.	**Goal 4: Single, balanced system of civil service based on the principles of equal rights and opportunities with management autonomy, accountability and unified system of remuneration**	Develop and agree on the concept of a new, modern, user-friendly (through user engagement) vacancy portal with a data protection system, subscription and application tracking system.	12/2022	
18.		Agree on the parameters of the new remuneration system and the plan for its implementation, taking into account the transformation of the central executive bodies system and the civil service. Develop a remuneration system based on international standards set by the ILO, in particular	12/2022	
19.		Develop the concept of the Centre for the Selection and Development of Senior Civil Servants using the EU and OECD best practices.	12/2022	

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
20.		Provide easy-to-understand information and advice on key issues related to employment in the civil/public service during wartime to all civil servants	12/2022	
21.		Develop and agree on a proposal to include each civil servant to the common communication channel of the civil service.	12/2022	
22.	**Goal 5: Civil service is an attractive, efficient and reliable employer for highly qualified professionals and young specialists.**	Simplify selection procedures, if necessary, so that they can fully take place online.	12/2022	
23.		Develop a concept of "paths to civil service" which includes different ways of filling vacancies: internal relocation and promotion (within one institution), internal relocation, promotion and competition (within the civil service), as well as open competition for external candidates, including candidates from the reserve list, personnel reserve, etc.	12/2022	
24.		Establish data and reporting needs as part of the preparation of a new single vacancy portal.	12/2022	
25.	**Goal 6: Public authorities apply the advanced methods and tools of personnel management, develop their organisational and managerial culture.**	Carry out an informational and explanatory campaign on the functions and tasks of the personnel management service in the state body. Update regulations on personnel management services in state bodies.	12/2022	
26.		Develop methodology and ensure self-assessment of the capacity of personnel management services and of the time spent on keeping personnel records.	12/2022	

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
27.	**Goal 7: Improving the system of advanced training of civil servants to ensure their professional development in order to meet the needs of civil service**	Update the priority areas for advanced training and the content of advanced training programs for civil servants during the martial law period and the post-war period. Prepare and adopt the necessary legal framework.	12/2022	
28.	**Goal 8: Introducing a single procedure for all decisions, within which all public institutions use all available tools to ensure human rights and freedoms.**	Ensure the development of regulations to the Law of Ukraine "On Administrative Procedure".	12/2022	
29.	**Goal 9: Developing unified digital systems to implement basic cross-sectoral workflows.**	Audit the automation level of all stages of CEAs' legal and normative acts preparation and develop proposals on the model of full unified digitalisation of legal and normative acts preparation by executive bodies.	12/2022	
30.		Develop and approve the Concept of the system of training and control of knowledge of working in HRMIS and the plan of measures for its implementation.	12/2022	
31.		Develop and approve the concept of HRMIS contact centre.	12/2022	
		Stage 2: January 2023 – December 2025		

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
1.	**Goal 1: Compact, result-oriented, efficient and accountable system of central executive authorities.**	Introduce annual Workflow Optimization and Efficiency Projects as a key performance indicator for all senior civil servants. Link the variable component of heads' salary with productivity.	12/2023	
2.		Reform the territorial bodies of the CEAs which function as legal persons into structural subdivisions of the CEAs' apparatus.	12/2023	
5.		Improve the procedure for the creation and termination of CEAs (strengthening the requirements for the creation of new CEAs, simplification of the procedure for termination of CEAs).	12/2023	
3.		Introduce (through reorganisation) a new institutional map of the central executive authority — policy areas, ministerial portfolios and institutional systems (ministries, types of executive bodies).	12/2023	
4.		Ensure that the transformation of ministries and ministerial portfolios is consistent with the agreed model of senior ministry structure.	12/2023	
5.		Gradually implement and improve the updated mechanism for directing and coordinating the CEAs activities through the relevant ministers which facilitates results-oriented management, combining the operational autonomy of accountable bodies with clear monitoring of their results. This applies to, but is not limited to, the selection, rating, evaluation, promotion and dismissal of staff, budget implementation, structural changes, delegation rules, etc.	12/2023	
6.		Introduce a European system of internal audit and control in institutions.	12/2025	
7.		Reduce the functions of ministerial portfolios and individual institutions after functional audits thereof	12/2025	

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
8.		Conduct a gender audit of CEAs on a permanent basis.	12/2025	
9.		Organize the interaction of the state with citizens and businesses by conducting functional audits of customer-oriented functions of institutions.	12/2025	
10.		Develop criteria and methods for evaluating the effectiveness of executive bodies, taking into account gender approaches, best practices and experience of EU member states.	06/2023	
11.		Ensure the phased implementation of performance evaluations of the executive authorities in general and senior management in particular in order to achieve the stated political and strategic goals and improve the system of executive authorities.	12/2025	
12.		Develop general guidelines for policy-based reviews. Identify areas that need to be reviewed on an annual basis.	12/2023	
13.		Institutionalise / conduct regular policy reviews to determine the effectiveness of adopted legislation.	12/2025	
14.		Carry out a comprehensive assessment of the public administration system for compliance with SIGMA standards. Develop a plan to bring the public administration system closer to SIGMA standards	12/2023	
15.		Centralise and digitalise the systems of appeals and inquiries of citizens. Create an analytical function to identify appeal templates and formulate proposals for improving public administration.	12/2023	

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
16.		Develop and amend the regulatory framework, take measures to provide resources and organisational support for updating the model of institutional and organizational support for the implementation of the EU acquis.	12/2023	
17.	**Goal 2: Implementation on the basis of the SCMU of the concept of Centre of Government (CoG) capable of supporting the Prime Minister in coordination and management of ministries, as well as for the effective management of national reconstruction and EU integration programmes**	Develop a regulatory framework for the creation of a single legal entity — the Cabinet of Ministers of Ukraine.	12/2025	
18.		Reorganize the SCMU in accordance with the concept and develop the potential in the areas of competence.	12/2025	
19.		Create a centre of common services and gradually transfer the functions related to the support of CEAs and other central executive authorities of all levels to it.	12/2025	
20.		Create an easy-to-use digital mechanism for tracking the progress of European integration and adaptation of the legislation.	12/2025	
21.		Form an integral and effective system of monitoring and quality control of government decisions, implementation of laws, implementation of acts of the President of Ukraine (ensuring a quality result of management decisions with a high degree of compliance with the stated goal)	12/2025	
22.		Introduce a “talent management” function in the SCMU for the professional development of managers belonging to category A	12/2025	
23.	**Goal 3: Consolidation of management of state-**	Privatise/liquidate surplus property and enterprises. Transfer the management of office premises and other property of the Centre to the Real Estate Management Agency	12/2025	

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
24.	**owned enterprises and state-owned property**	Introduce corporate governance of state-owned enterprises based on best international practices is introduced, in particular, using the gender quota system	12/2025	
25.	**Goal 4: Single, balanced system of civil service based on the principles of equal rights and opportunities with management autonomy, accountability and unified system of remuneration**	Implement a unified remuneration system based on the best international practices which reflects the qualification of the person, his/her systematic work productivity, the complexity and responsibility of the tasks performed.		
26.		Create a Centre for the Selection and Development of Senior Civil Servants responsible for determination of the structure of leadership competencies (for the civil service in general and for specific positions in particular), pre-selection, evaluation and selection of (shortlisted) candidates for senior positions in the civil service (involving relevant branch specialists, if necessary), organisation of regular performance evaluations as well as of training and self-education for senior management independently and in collaboration with the private sector.		
27.		*Introduce a senior civil servant position (such as a central government secretary of state) to manage the development of senior civil service leaders who must work as a team to achieve our nation's strategic goals.*		
28.		Disseminate information about the mission and values of public authorities and civil servants, strengthen the brand of the state as an employer, strengthen positive public opinion and form a positive image of public service.		
29.		Promote the search, involvement and capacity development of professional and motivated young people to work in the public service.		
30.		Develop and create a *Bank of talents and experts* of the civil service (consisting of former civil servants, students and graduates of universities, independent		

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
		experts, etc.), as one of the sources of both applicants for civil service vacancies and the experts for outsourced work.		
31.		Provide easy-to-understand information and advice on key issues related to employment in the civil/public service during post-war period to all civil servants.		
32.	**Goal 5: Civil service is an attractive, efficient and reliable employer for highly qualified professionals and young specialists.**	Develop a new version of the Single Civil Service Vacancy Portal, taking into account the possibilities of its transformation into the Single Public Service Vacancy Portal (if draft law No. 6504 is adopted).		
33.		Implement a new recruitment and selection system, in particular: 1) establishing criteria for choosing ways of acting in a specific situation; 2) introducing requirements and instructions for filling various types of vacant civil service positions; 3) introducing transparency and integrity requirements.		
34.		Regularly publish comparative statistics using data disaggregated by gender and other gender-sensitive indicators regarding the recruitment, selection and appointment of civil servants (vacancies by institution, type of position, vacancy announcement period, candidates for vacancies, candidates at the competition stage, etc.)		
35.		ensure the existence of favourable working conditions to combine professional and personal life.		

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
36.		Provide leadership, training, and exchange best practices related to recruitment and selection of personnel for central executive bodies.		
37.		Create modern and user-friendly templates for job descriptions and job announcements to be used by institutions (compatible with a single job portal and HRMIS).		
38.		Ensure the possibility of involving experienced companies in the search for managers and evaluation during selection, exchange of experience between public administration institutions regarding the competition stage.		
39.	**Goal 6: Public authorities apply the advanced methods and tools of personnel management, develop their organisational and managerial culture.**	Analyse legal and normative acts with regard to the possibility of optimizing personnel management processes and their digitalization. Ensure the development and implementation of the relevant amendments.	12/2025	
40.		Ensure that informational and explanatory measures are taken regarding the use of HR-analytics tools in the work of personnel management services of state authorities.	12/2025	
41.		Ensure that best practices of personnel management are collected and analysed, adapted with the possibility of being used in the work of state authorities. Ensure the development of relevant legal and normative acts, methodologies and recommendations, if necessary.	12/2025	

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
42.		Create a methodology for the development and implementation of HR strategy in state bodies. Conduct an information campaign regarding the implementation of strategic management of human resources in state authorities.	12/2025	
43.		Create a platform for the exchange of best practices and innovations in the field of personnel management not only between public authorities, but also between private sector organizations. *(HR Workshop)*	12/2025	
44.		Strengthen the role of NACS as a competence centre responsible for establishing principles, providing recommendations to personnel management services, and disseminating best practices.	12/2025	
45.	**Goal 7: Improving the system of advanced training of civil servants to ensure their professional development in order to meet the needs of civil service**	Create a high school of public administration and its regional branches by reorganising the Ukrainian School of Governance Its functions are determined (upgrading the qualifications of: persons holding political positions; persons belonging to the personnel reserve of the high-level civil service positions; persons planning to join the civil service, members of local councils).	12/2025	
46.		Introduce a system of professional development in which training in the higher school of public administration at the expense of state budget is only possible for priority areas (topics) which are determined on an annual basis and are based mainly on the strategies of public administration reform, public finance management and the EU integration, as well as topics related to the adaptation of newly appointed civil servants.	12/2025	

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
47.		Create a pool of internal (in the civil service) and external trainers in key areas of public administration (based on groups of positions). Provide an opportunity for public servants to participate in training events (as trainers) during working hours and on a paid basis — outside of working hours at their main place of work.	12/2025	
48.		Ensure that the task of organizing the training of civil servants is included in the KPI of top managers and officials responsible for personnel management.	12/2023	
49.		Ensure the creation and training of a pool of experts from among public servants of Ukraine, the preparation of training programs and the organisation of appropriate training (within the Natolin4CapacityBuilding, Association4U and other projects) for analytical support of the EU membership process.	12/2025	
50.		Provide sufficient number of personnel and ensure their professional training to the level necessary for effective management of the EU accession process (including negotiations).	12/2025	
51.	**Goal 8: Introducing a single procedure for all decisions, within which all public institutions use all available tools to ensure**	Ensure that 50% of the current legislative acts are in line with the Law of Ukraine “On Administrative Procedure”	12/2025	
52.		Conduct training of civil servants and other public sector officials, including local self-government officials, on the application of the Law “On Administrative Procedure”.	12/2025	

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
53.	**human rights and freedoms.**	Hold an information campaign to increase citizens' awareness of new rights and obligations acquired as a result of the adoption of the Law of Ukraine "On Administrative Procedure".	12/2024	
54.	**Goal 9: Developing unified digital systems to implement basic cross-sectoral workflows.**	Ensure the development of IT components of the model of full unified digitalisation of legal and normative acts preparation by executive bodies.	12/2023	
55.		Implement a model of the model of full unified digitalisation of legal and normative acts preparation by executive bodies.	12/2025	
56.		Ensure the development of a single management platform (collection, processing, exchange) of reporting and statistical data of executive bodies.	12/2023	
57.		Implement a single management platform (collection, processing, exchange) of reporting and statistical data of executive bodies.	12/2025	
58.		All personnel management operations (for civil servants and other employees) are fully digital and are implemented within a unified HRMIS system, which also provides analytical reports to the heads of the civil service.		
59.		Ensure implementation bodies are connected to HRMIS, public authorities receive support in the process of HRMIS operation and HRMIS administration.	12/2025	
60.		Create a system of continuous training of HRMIS users.	12/2025	
61.		Launch the operation of a fully functional contact centre (consultations, support, technical support).	12/2023	

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
62.		Improve the variety and quality of analytical reports and introduce additional modules/functions as needed.		
63.		Link the HRMIS with the job posting portal and the platform for communicating with civil servants.		
64.		Introduce a mobile application for HRMIS.		
65.		Establish a common system of communication with each civil servant (PC/mobile application with authorization through DIIA, linked to HRMIS).		
		Stage 3: January 2026 – December 2032		
1.	**Goal 1: Compact, result-oriented, efficient and accountable system of central executive authorities.**	Limit the creation of new subjects within the central government system. Entrusting new functions to the existing institutional units (where possible). Reach a political consensus on limiting large-scale reorganizations.	2026	
2.		Continue to implement EU recommendations on internal audit and control.	2032	
3.		Introduce regular functional audits and cost analysis as part of the multi-year budget process.	2026	
4.		Institutionalize “customer feedback” in performance management and senior management evaluation.	2026	
5.		Introduce the practice of regular assessments of the effectiveness of executive authorities and take it into account during the annual assessment of the work of senior management, as well as in the process of planning the state budget.	2026	

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
6.		Promote policy reviews and the inclusion of results of such reviews in the policy-making process.	2027	
7.		Provide regular analysis of work results of administrative structures and prepare proposals for improving the model of institutional and organisational support for the EU acquis implementation process, if necessary.	2032	
8.	**Goal 2: Implementation on the basis of the SCMU of the concept of Centre of Government (CoG) capable of supporting the Prime Minister in coordination and management of ministries, as well as for the effective management of national reconstruction and EU integration programmes**	Deprive ministries of the status of a legal persons and make them function within the framework of the single legal personality of the CMU.	2032	
9.		Continue to develop SCMU functions and the scope of services provided by other executive authorities.	2032	
10.		Ensure effective coordination of the EU integration process and approximation of legislation, including by ensuring the qualitative verification of draft legal and normative acts of Ukraine for compliance with the EU acquis.	2026	
11.		Regularly provide decision-makers with accessible, high-quality information on monitoring key aspects of recovery and EU integration.	2026	
12.	**Goal 4: Single, balanced system of civil service based on the principles of equal rights and opportunities with management autonomy,**	Integrate the Single Civil (Public) Service Vacancy Portal with other job posting platforms. Ensure the use of artificial intelligence by the Portal to actively identify and notify potential candidates for specific vacancies, generate analytical data to inform the civil service in its capacity as an employer about trends, etc.		
13.		*The renumeration system encourages senior managers to pursue organizational efficiency rather than budget maximization strategy, as was the case in the past.*		

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
14.	**accountability and unified system of remuneration**	Create a Centre for the Selection and Development of Senior Civil Servants as a reliable recruiter that can attract high-level professionals to the highest civil service positions following the gender balance principle.		
15.		Prepare senior civil service managers for work in a team of professionals with common values.		
16.		Continue regular branding projects and announcement of civil service vacancies in accordance with the competitive position in the labour market.		
17.		Ensure further development of the Bank of talents and civil service experts. Launch a centralised internship program for university graduates.		
18.		Provide regular updates to public servants on issues related to employment in the public service, ensure the opportunity to provide feedback and ask questions through digital means. Take into account the information received from civil servants during such communication in the development of personnel policy.		
19.	**Goal 5: Civil service is an attractive, efficient and reliable employer for highly qualified professionals and young specialists.**	Ensure the Single Civil (Public) Service Vacancy Portal is updated in accordance with needs.		
20.		Improve the methodology of collecting statistical data on the candidates disaggregated by gender and other gender-sensitive indicators. Ensure that selection and hiring procedures are updated taking into account the situation on the labour market.		
21.		Ensure that existing recruitment and selection methods are updated and the new ones are implemented based on monitoring, feedback and analysis of data obtained during competitive selection taking into account SIGMA principles.		

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
22.		Provide continuous training on recruitment and selection best practices according to updated guidelines and methodologies.		
23.	**Goal 6: Public authorities apply the advanced methods and tools of personnel management, develop their organisational and managerial culture.**	Provide opportunities for continuous professional development of employees of personnel management services.		
24.		Continue to introduce innovations in HR and share best practices between institutions and the private sector.		
25.	**Goal 7: Improving the system of advanced training of civil servants to ensure their professional development in order to meet the needs of civil service**	Continue to provide advanced training of public servants at the expense of the state budget, budgetary appointments of state bodies, LSGB and organisations subject to the Laws of Ukraine "On Civil Service" and "On Service in Local Self-Government Bodies" according to public administration priority areas.		
26.		Continue engaging public servants as trainers and encouraging them to become trainers for professional development.		
27.		Continue to promote the professional and personal development of public servants as key element of public service productivity.		
28.	**Goal 8: Introducing a single procedure for all decisions, within which all public institutions use all available tools to ensure**	Complete the bringing the legal and normative acts regulating the relations between the state, citizens and business in line with the basic principles of the Law of Ukraine "On Administrative Procedure".	12/2030	

No.	Goal	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
29.	**human rights and freedoms.**	Improve the legislation based on the practice of implementing the Law of Ukraine "On Administrative Procedure", in particular, the implementation of the procedure for appealing against negative decisions of subjects of authority.		
30.		Provide a system of continuous training of civil servants and other public sector officials, including local self-government officials, on the application of the Law of Ukraine "On Administrative Procedure".		
31.	**Goal 9: Developing unified digital systems to implement basic cross-sectoral workflows.**	Ensure that all draft legal and normative acts at all stages are prepared by the executive authorities in accordance with the model of full unified digitalization.	12/2026	
32.		Ensure the collection, processing and exchange of reporting and statistical data of the executive authorities through a single platform.	12/2026	
33.		High-quality analytical reports across the civil service are available through HRMIS.		
34.		The number of personnel management departments are reviewed as a result of the implementation and expansion of the common services centre and the HRMIS system.		

5. List of national projects aimed at the completion of the task from paragraph 2.3 (for the corresponding task)

No.	Project description	Project rationale	Qualitative indicators of the project implementation	Economic effects (impact on the GDP, budget, employment, etc.)	Main responsible public authority	Estimated funding needed (UAH million)	Proposed sources of funding	Legal and regulatory framework	Related areas of the EU law (general comment)
1.	**The project for the optimisation of the system and organisational structure of central executive authorities**	Insufficiently effective CEAs system, lack of clear division of functions and policy areas, imperfect mechanism of direction and coordination of the CEAs.	An assessment (audit) of the current structure of the CEAs system was carried out. A new model of the institutional structure of the CEAs system is developed. The system of CEAs corresponds to the defined model of the institutional structure. Directorates of ministries ensure policy development in all area	Reduction of state budget expenditures for CEAs maintenance by optimizing their number and functions, streamlining the structure, and reducing the number of employees	Minister of the CMU ministries, other CEBs SCMU	10 billion (expenses for reducing the number of civil servants)	State Budget/ITA	Laws of Ukraine "On Cabinet of Ministers of Ukraine", "On Central Executive Bodies", resolutions of the CMU No. 179 of 12.03.2005 and No. 442 of 10.09.2014	

No.	Project description	Project rationale	Qualitative indicators of the project implementation	Economic effects (impact on the GDP, budget, employment, etc.)	Main responsible public authority	Estimated funding needed (UAH million)	Proposed sources of funding	Legal and regulatory framework	Related areas of the EU law (general comment)
2.	Project of institutional/ functional audit and re-engineering of work processes	Need to optimize functions (elimination of redundant/duplicated functions/ transfer of the functions to other entities, etc.) and create legal basis for their resource support. Performance of functions related to management of the executive authorities' productivity. The need to optimize outdated, bureaucratized processes	Reasonable reduction of the number of civil servants (other resources), authorities. Simplified, unified/automated processes oriented on the consumer's requests	Decreased State Budget expenditures for the state apparatus, in particular the expenses for the maintenance of executive bodies which are unjustified compared with the results of their activities	Minister of the CMU, SCMU, NACS, ministries, other CEAs		State Budget/ITA	To be developed	
3.	Project for the support of civil servants, dismissed as a result of a layoffs	A significant number of civil servants who may be dismissed as a result of optimization	Help with reorientation/finding new employment provided. Impact of layoffs on the loss of personnel potential is reduced. The most qualified civil servants who have been dismissed	Reduction of the number of unemployed as a result of optimization of the CEAs system	NACS Ministry of Social Policy Ministry of Economy State Employment Service		State Budget/ITA		

No.	Project description	Project rationale	Qualitative indicators of the project implementation	Economic effects (impact on the GDP, budget, employment, etc.)	Main responsible public authority	Estimated funding needed (UAH million)	Proposed sources of funding	Legal and regulatory framework	Related areas of the EU law (general comment)
			have been transferred to vacant positions in other public authorities.						
4.	**Centralization of support functions project**	A significant part of the CEAs' resources is spent on performing similar support functions.	Saving 25% of resources used for supporting functions; creation of a common services centre (personnel, IT, business support, accounting, security); centralisation of some support functions of CEAs in the ministries (documents flow, mass media and public relations)	Decreased State Budget expenditures for the state apparatus	Minister of the CMU ministries, other CEBs SCMU		State Budget/ITA	To be developed	

No.	Project description	Project rationale	Qualitative indicators of the project implementation	Economic effects (impact on the GDP, budget, employment, etc.)	Main responsible public authority	Estimated funding needed (UAH million)	Proposed sources of funding	Legal and regulatory framework	Related areas of the EU law (general comment)
5.	Project on citizens' electronic appeals (a single electronic personal account for sending and receiving responses)	Creation of a single window for receiving appeals and providing answers in electronic form using the Government contact centre Launching an information campaign regarding new opportunities for citizens to receive answers to all appeals using a single personal account	Simplification of the process of submitting electronic appeals by citizens and receiving answers in a single electronic personal account within the prescribed period. Shortening the terms of receiving answers.	Reduction of costs for processing the appeals of citizens	SCMU Government contact centre		State Budget/ITA	Law "On Appeals of Citizens", Resolution of the CMU No. 976 of 27 November 2019 "Certain Issues of the Single System for Processing Appeals"	
6.	**Project related to the centralisation of the management of state-owned enterprises, institutions, organizations, property, office premises**	The need to audit the property and the policy of use, reconstruction, privatisation, etc.	Typology of SeEs, centralisation of their management, privatisation, liquidation was developed	Improved results of the economic activity of SoEs. More efficient use of property	State Property Fund, Ministry of Economy	UAH 80 million annually starting from 2023. (National Recovery Foundation and Property Managem	State Budget/International technical assistance/Proceeds from privatization

II. Parliamentary Reform

The armed aggression and the imposition of martial law in Ukraine have significantly changed conditions of the state functioning. Public authorities work in the circumstances of the wartime, and the priorities of their activities are different now. Currently, to win against the aggressor and to fully de-occupy the territory of Ukraine are common priorities. This task raises the necessity to responsively make a significant number of management and legislative decisions.

Under the conditions of the war, the activities of all public authorities, including the parliament, are related to high risks. Hazard level depends on the course of military actions, but these risks will remain extant until the end of the war. Under such circumstances, it is important that the Verkhovna Rada of Ukraine continue working in Kyiv City and hold meetings in the parliamentary premises.

Despite the emergency circumstances, the Verkhovna Rada of Ukraine, in addition to fulfilling its legislative function, is active in enhancing the organisation of its activities. In this context, planning and taking actions which, in general, should ensure successful parliamentary reform in Ukraine are topical issues.

Description and characteristics of problems to be resolved

Emergency circumstance caused by the armed aggression and the imposition of marital law have resulted in new challenges triggering new problems in the work of the Verkhovna Rada of Ukraine and aggravating and increasing the actuality of existing problems. The work of the parliament is significantly affected by such factors as complicated movement within Ukraine, danger in holding long-lasting meetings where a significant number of people participates, impossibility of using traditional forms of communication between the People's Deputies of Ukraine and the electorate, and, in general, between the parliament and citizens. It has become evident that it is necessary to make certain legislative decisions, especially those related to defence and aid to people who have suffered from the military actions. The parliamentary reform which was recommended before, in peacetime, by our international partners, has become more topical under the imposed marital law.

Key problems resolution of which constitutes the parliamentary reform:

- low quality and excessive amount of legislative initiatives, which result in ineffective usage of parliamentary resources;
- discrepancy between the level of the institutional capacity of the support system for the work of the Verkhovna Rada of Ukraine and topical needs and challenges;
- low level of citizens' awareness of the work of the Verkhovna Rada of Ukraine;

• problems with the organisation of the work of the Verkhovna Rada of Ukraine caused by the inconsistency between the parliamentary law and the Constitution of Ukraine;

• inadequate parliamentary control level;

• defects of the constitutional structure of the authority triangle;

• necessity to enhance parliamentary procedures for increasing the quality of decisions;

Low quality and excessive amount of legislative initiatives submitted for consideration to the Verkhovna Rada of Ukraine is not a new problem. High amount of conceptually ill-considered, poorly structured and unreasoned draft laws makes the Verkhovna Rada of Ukraine, its bodies and services of the Apparatus of the Verkhovna Rada (hereinafter referred to as the Apparatus) waste a lot of time, efforts and funds to duly consider initiatives which, in the view of their content, have no potential to become laws. The majority of such draft laws are never considered by the end of the convocation. Therefore, the existing practice of submitting legislative initiatives results in ineffective use of parliamentary resources. It is worth noting that they are the People's Deputies of Ukraine who, in most cases, submit poorly drafted acts. These persons subject to the law of legislative initiative submit the highest amount of draft laws (compared to other persons) which exceeds the parliamentary capacity for considering them.

In order to resolve these problems, it is necessary to ensure higher quality of draft laws (including by determining clear and more regulated requirements for their content and structure and for content of supporting documents), lower number of legislative initiatives submitted by the People's Deputies of Ukraine by setting special requirements (collective initiatives or mandatory fraction support and etc.) and conditions under which the Cabinet of Ministers of Ukraine will be a key "supplier" of draft laws.

Discrepancy between the level of the institutional capacity of the support system for the work of the Verkhovna Rada of Ukraine and topical needs and challenges. Ensuring the work of the Verkhovna Rada of Ukraine is a key function of the Apparatus, thus in order to resolve the problem, it is primarily needed to improve the structure of the Apparatus and the work of its employees. It is, *inter alia*, needed to ensure the institutional independence of the Apparatus (as its dependence on decisions of executive authorities significantly complicates the process), to increase its hardware and software level and, in future, to align the structure of the Apparatus with modern needs and practices of the parliamentary work.

To replace, in the meeting room of the Verkhovna Rada of Ukraine, the obsolete electronic voting system "Rada-3" (produced in 2002) with a completely digital platform, in other words to create a new-generation electronic voting system ("Rada Tsyfrova" ("Digital Rada") to ensure that plenary meetings of the Verkhovna Rada of Ukraine be held on site (directly in the meeting room) and remotely (with video conference means) is a vital and strategic priority in ensuring uninterruptable parliamentary work. A new system will ensure adequate computer-based workplaces for the People's Deputies of Ukraine in the meeting room with 100% personal voting and paperless technologies of paperwork.

Low level of citizens' awareness of the work of the Verkhovna Rada of Ukraine is an important factor which influences the public opinion on the parliament, its work and results of its work. This problem also prevents from implementing legislative measures efficiently as citizens are not informed.

In order to resolve this problem, it is necessary to improve existing forms, means and channels of communication with citizens and establish new ones, to increase citizens' participation in the parliamentary work by submitting electronic petitions, participation in public discussions, public consultations and etc.

Problems with the organisation of the work of the Verkhovna Rada of Ukraine caused by inconsistency between the parliamentary law and the Constitution of Ukraine appeared in February 2014 when the 2004 version of the Constitution of Ukraine was renewed. The parliamentary law and the constitutional provisions have not been aligned yet. Therefore, to draft and adopt a law which will bring the provisions of the parliamentary law into compliance with the provisions of the Constitution of Ukraine is a task of immediate relevance.

Inadequate parliamentary control level is another important issue. A need to expand and strengthen parliamentary control over the activities of the Cabinet of Ministers of Ukraine and the entire system of executive authorities, the activities of law-enforcement bodies, the processes of forming and implementing the State Budget of Ukraine end etc. has been existing for a long period of time. Measures defined by the Plan intend to increase possibilities of parliamentary control, but some of them require making changes and amendments to the Constitution of Ukraine.

Defects of the constitutional structure of the authority triangle, in other words, power distribution and relations of the Verkhovna Rada of Ukraine, the President of Ukraine and the Cabinet of Ministers of Ukraine is also a problem impacting the efficiency of the work of the Verkhovna Rada of Ukraine. In the existing structure of the authority triangle, it is challenging for the Cabinet of Ministers of Ukraine to play more active role in shaping the agenda and, thus, in influencing the pace and content of the initiated reforms.

It is also proposed to reduce the constitutional composition of the Verkhovna Rada of Ukraine to 300 People's Deputies of Ukraine.

In order to ensure the sustainability of the legal system in the Constitution of Ukraine, it is necessary to classify laws as constitutional laws (the Law "On Amending the Constitution"), organic laws, ordinary laws and laws on treaty ratification determining the procedure for adopting the laws. A quorum which is required to hold a parliamentary meeting and should constitute a majority of its constitutional composition, should, inter alia, be defined. It is proposed to set different amounts of votes of the People's Deputies in order to adopt different types of laws.

Meanwhile, it is worth stressing that it is possible to redistribute power, change relations within the authority triangle and implement the mentioned proposals by making essential changes and amendments to the Constitution of Ukraine only.

Under the conditions of marital law, such a problem as a *necessity to enhance parliamentary procedures to increase the quality of decisions* has become evident and more acute. The provisions of the legislation, *inter alia*, stipulate for quite a complicated and long procedure for considering legislative initiatives by the Verkhovna Rada of Ukraine though a significant number of legislative decisions should be made in a very speedy manner. Meanwhile, thorough realisation of parliamentary procedures may result in late adoption of urgent decisions which would harm the interests of the state and society.

However, this problem is not limited to a necessity to define peculiarities of the realisation of parliamentary procedures under the conditions of marital law. Parliamentary procedures provided by the law should be comprehensively reviewed. Hence, some legislative acts, particularly the Rules of Procedure of

the Verkhovna Rada of Ukraine, require making changes so that parliamentary procedures be rationalised, their immediacy and efficiency be increased, possibilities for blocking or delaying parliamentary decisions be eliminated.

Expected impact of the implementation of measures stipulated by the Recovery Plan in the context of the parliamentary reform

The implementation of measures stipulated by the Recovery Plan in the context of the parliamentary reform will have positive effect in the form of the improved parliamentary work and ensure, *inter alia*:

- rationalised law drafting activities, higher efficiency of law drafting activities, higher quality of legislative acts adopted by the Verkhovna Rada of Ukraine;
- stronger parliamentary control;
- available procedures and mechanisms for ensuring the continuous work of the Verkhovna Rada of Ukraine in the context of martial law or state of emergency;
- a stronger role of the Cabinet of Ministers of Ukraine in the law-making process;
- improved openness of the Verkhovna Rada of Ukraine to society, higher citizens' awareness of the parliamentary work;
- better support for activities of the People's Deputies of Ukraine and parliamentary activities in general.

Point of view on future development of parliamentarism in Ukraine

Ukraine has always been and will always be a state where the parliament as a single legislative authority is extremely important. As parliamentarism is one of outstanding manifestations of democracy and freedom, the parliamentary reform should contribute to preserving and increasing the role of the parliament in the public life of Ukraine.

The parliamentary reform should ensure higher level of citizens' trust in the Verkhovna Rada of Ukraine. We have all reasons to expect that the reform will result in the increased work efficiency of and strong public support for the parliament. In addition, the parliamentary reform will, in future, contribute to higher level of political and legal culture of People's Deputies and society in general.

The proposed measures of the parliamentary reform will significantly align the work of the Ukrainian parliament with the standards of the best parliamentary practices in European countries.

Analysis area (of a specific component) within the direction:	Parliamentary reform	

1	**Key issues to be solved within the framework of the Recovery Plan within the direction**		
	Impact of the war on the defined analysis area:	Steadily functioning democratic parliament — a body which shapes and expresses people's will as regards issues of social and state interest, is absolutely trusted by the people and actively maintains social connections with the people — is one of the main features of the harmonious development of a society and state. The war and the imposition of martial law in Ukraine have significantly changed conditions of the functioning of a single Ukrainian law-making authority. Nowadays, to win against the aggressor and de-occupy the Ukrainian territories are the main priorities. This condition raises the necessity to responsively make a significant number of legislative and management decisions. Meanwhile, in view of unpredictable development of military actions, there is a risk that the Verkhovna Rada of Ukraine may hardly have or may have no opportunity to gather together to fulfil its constitutional functions. Despite emergency circumstances, the parliament must take actions to enhance its activities. In this context, planning and taking actions which, in general, should ensure successful parliamentary reform aiming to strengthen democracy development in Ukraine, increase the institutional capacity of the Verkhovna Rada of Ukraine and guarantee continuous law-making process, are topical issues. Recovery and European integration of Ukraine are not possible if the parliament does not work consistently and efficiently.
1.1	Key challenges (in general, for the defined area):	The work of the parliament is significantly affected by such factors as complicated movement within Ukraine, danger in holding long-lasting meetings where a significant number of people participates, impossibility of using traditional forms of communication between the People's Deputies of Ukraine and the electorate, and, in general, between the parliament and citizens. It has become evident that it is necessary to make certain legislative decisions, especially those related to defence and aid to people who have suffered from the military actions. The Verkhovna Rada of Ukraine has faced the following key challenges: 1) to ensure continuous law-making process under marital law;

		2) to establish and maintain high-quality communication channels between the Verkhovna Rada of Ukraine and citizens; 3) to ensure that the work of the parliament be planned and predictable; 4) to strengthen the role of the parliamentary control; 5) to ensure the institutional capacity of the Verkhovna Rada of Ukraine
1.2	Key opportunities (in general, for the defined area):	The implementation of measures stipulated by the Recovery Plan in the context of the parliamentary reform will open opportunities of: 1) shaping procedures and mechanisms for ensuring the continuous work of the Verkhovna Rada of Ukraine in the context of martial law or state of emergency; 2) strengthening the role of the Cabinet of Ministers of Ukraine within the law-making process; 3) improving the efficiency of expert and analytical assessment of draft laws; 4) strengthening parliamentary control; 5) expanding mechanisms for involving citizens in the activities of the Verkhovna Rada of Ukraine and establishing new high-quality communication channels with citizens
1.3	Key restrictions (in general, for the defined area):	The key obstacles for the parliamentary reform to be realised are as follows: 1) the ongoing armed aggression of the Russian Federation against Ukraine; 2) lack of political consensus to make necessary changes; 3) a long process of amending the Constitution of Ukraine; 4) the possibility of implementing certain measures of the parliamentary reform only after the end of the war and termination of the marital law

2	**Goals, tasks and stages of the Recovery Plan within the direction**

2.5.2	Goal to be achieved to solve the issue during each stage:	5.1. Improving the performance of the Accounting Chamber as an operationally, functionally and financially independent authority, including in terms of control over the formation of state budget revenues	5.2. Ensuring the implementation of control powers at the level of committees of the Verkhovna Rada of Ukraine	5.3. Formalizing at the constitutional level the control function of committees of the Verkhovna Rada of Ukraine, the committee responsible for ensuring control over the activities of the security and defence sector bodies and other control committees (hereinafter referred to as special control committees)	5.4. Increasing the efficiency of the parliamentary control in public finances by establishing the Budget Office of the Verkhovna Rada of Ukraine
2.5.3	Deadline within the stage:	12/2022	12/2023	12/2025	
2.5.4	Risks related to the goal achievement:	Lack of political consensus to implement relevant decisions	Lack of human resources in secretariats of committees in the Verkhovna Rada of Ukraine	Difficulties in forming professional teams of	Lack of political consensus to implement relevant decisions

			Established practice in prioritising draft law work	special control committees and secretariats thereof	
2.5.5	Measurable goal achievement indicator	Listening to reports of the Accounting Chamber on a regular basis and taking them into account in the work of the Verkhovna Rada of Ukraine, including in budget planning	Increased number of issues related to the fulfillment of control functions among the total number of issues considered by the committees of the Verkhovna Rada of Ukraine by 15% compared to the number of such issues within sessions 1 and 2 of the Verkhovna Rada of Ukraine of the 9th convocation	Established special control committee at the start of the work of the Verkhovna Rada of Ukraine of the 10th convocation Changes to the Constitution of Ukraine as regards the work of special control committees	Reduced number of registered legislative initiatives without adequate financial and economic rationale by 10% compared to the number within sessions 1 and 2 of the Verkhovna Rada of Ukraine of the 9th convocation
2.5.6	Total funding requirement for the goal achievement:				
2.5.7	Links between the goal and other directions:				
2.6	**Description of issue 6 to be solved in the defined analysis area:**	***6. Defects of the constitutional structure of the authority triangle***			
2.6.1	Stages	Stage 1: 06/2022–12/2022	Stage 2		Stage 3: 01/2026–12/2032
			01/2023–12/2023	01/2024–12/2025	
2.6.2	Goal to be achieved to solve the issue during each stage:				6.1. Revising the authority of the Verkhovna Rada of Ukraine, the President of Ukraine and the Cabinet of

					Ministers of Ukraine with the aim of creating an efficient checks and balances system
2.6.3	Deadline within the stage:				12/2032
2.6.4	Risks related to the goal achievement:				Lack of political consensus to implement relevant decisions
2.6.5	Measurable goal achievement indicator				Affirming the effectiveness of the enhanced checks and balances system (based on the results of surveys held among experts in the area of parliamentarism and constitutionalism)
2.6.6	Total funding requirement for the goal achievement:				
2.6.7	Links between the goal and other directions:				
2.7	**Description of issue 7 to be solved in the defined analysis area:**	***7. Necessity to enhance parliamentary procedures for increasing the quality of decisions***			
2.7.1	Stages	Stage 1: 06/2022–12/2022	Stage 2		Stage 3: 01/2026–12/2032
			01/2023–12/2023	01/2024–12/2025	

2.7.2	Goal to be achieved to solve the issue during each stage:	7.1. Ensuring the continuous work of the Verkhovna Rada of Ukraine in the context of martial law or state of emergency	7.2. Auditing the procedural rules, developing the relevant road map and preparing comprehensive amendments to the Rules of Procedure of the Verkhovna Rada of Ukraine 7.3. Ensuring that the work of the parliament be planned and predictable		
2.7.3	Deadline within the stage:	12/2022	12/2023		
2.7.4	Risks related to the goal achievement:	Possibility that crisis situations threatening the continuous work of the Verkhovna Rada of Ukraine and the Apparatus arise	Limited resources for comprehensive analysis		
2.7.5	Measurable goal achievement indicator	Approved parliamentary internal executive acts as regards ensuring the continuous work, relevant material and technical support, necessary changes and amendments to the Rules of Procedure of the Verkhovna Rada of Ukraine	Conceptual update of the Rules of Procedure of the Verkhovna Rada of Ukraine Higher planned development and predictability of the work of the Verkhovna Rada of Ukraine (based on the results of surveys held among the People's Deputies of Ukraine,		

			members of the Cabinet of Ministers of Ukraine, the employees of the Apparatus and field-specific civil society organisation)		
2.7.6	Total funding requirement for the goal achievement:				
2.7.7	Links between the goal and other directions:				

3	**Current state of implementation of the programme documents relating to the relevant issue in the defined analysis area**		
3.1	**Programme document**	**Implementation progress**	**Participant of a working group who has provided information**
3.1.1.	Recommendations of the Mission of the European Parliament on Internal Reform and Capacity-Building for the Verkhovna Rada of Ukraine specified in the Annex to the Resolution No. 1035-VIII of the Verkhovna Rada of Ukraine dated 17 March 2016	The recommendations of the Mission of the European Parliament are partially taken into account. Other topical recommendations will be realised within the implementation of the parliamentary reform.	
3.1.2.	Communication Strategy of the Verkhovna Rada of Ukraine for 2017–2021	The Communication Strategy of the Verkhovna Rada of Ukraine for 2017–2021 is almost fully implemented The Communication Strategy of the Verkhovna Rada of	

		Ukraine for 2023–2026 is being drafted and is planned to be approved by June 2023.	
3.1.3.	Electronic Parlamentarism Strategy for 2018–2020	The Electronic Parlamentarism Strategy for 2018–2020 is implemented, excluding the development of a new-generation electronic voting system in the meeting room of the Verkhovna Rada of Ukraine. The Strategy for Forming Innovative Digital Parliament for 2023–2026 is being drafted and is planned to be approved by the end of 2022.	
3.1.4.	Strategy for Building Human Resources Capacity of the Apparatus of the Verkhovna Rada of Ukraine until 2022	The Strategy for Building Human Resources Capacity of the Apparatus of the Verkhovna Rada of Ukraine until 2022 is at its final implementation stage.	

4	**Definition of tasks for the achievement of goals from paragraph 2 (for each defined goal)**			
	Goal (from paragraph 2)	**Description of the tasks for the achievement of the goal**	**Deadline for the task**	**Dependence of the task on the tasks within other directions, areas and issues**
4.1	Stage 1: 06/2022–12/2022			

4.1.1	1.1. Improving the quality of legislative initiatives of the People's Deputies of Ukraine	Task 1.1.1. Establishing the Research Service: 1.1.1.1. Preparing and approving the concept of the Research Service 1.1.1.2. Developing and approving the Regulations of the Research Service 1.1.1.3. Establishing the Research Service and providing material and technical support to the Research Service 1.1.1.4. Ensuring adequate staffing based on the results of competitive selection 1.1.1.5. Creating a digital expert and analytical research platform integrated into the databases of the Inter-Parliamentary Union		
4.1.2	2.1. Ensuring sustainable development of the human resources capacity of the Apparatus	Task 2.1.1. Implementing the Strategy for Building Human Resources Capacity of the Apparatus of the Verkhovna Rada of Ukraine until 2022 in full		
		Task 2.1.2. Developing and approving the Strategy for Building Human Resources Capacity of the Apparatus of the Verkhovna Rada of Ukraine until 2027		
4.1.3	2.3. Forming an innovative digital parliament	Task 2.3.1. Developing and approving the Strategy for Forming Innovative Digital Parliament for 2023–2026		
4.1.4	2.4. Ensuring a consistently high professional level of the Apparatus personnel	Task 2.4.1. Developing and approving the development concept for the Training Centre as a department of the Research Service of the Verkhovna Rada of Ukraine based on the assessment of the needs of the People's Deputies of Ukraine, their consulting assistants and the employees of the Apparatus		
		Task 2.4.2. Starting implementing the development concept for the Training Centre		
4.1.5	3.1. Establishing and maintaining high-quality communication channels between the Verkhovna Rada of Ukraine and citizens	Task 3.1.1. Developing the Strategy for Accounts of the Verkhovna Rada of Ukraine in Social Networks		
		Task 3.1.2. Developing the Comprehensive Programme for Parliamentary Enlightenment		

		Task 3.1.3. Developing the Brand Strategy of the Verkhovna Rada of Ukraine		
4.1.6	5.1. Improving the performance of the Accounting Chamber as an operationally, functionally and financially independent authority, including in terms of control over the formation of state budget revenues	Task 5.1.1. Developing the concept for increasing the efficiency of the Accounting Chamber in accordance with the best world practices		
		Task 5.1.2. Updating, based on the developed concept, relevant legislative acts in order to ensure operational, functional and financial independence of the Accounting Chamber and auditor occupational activity guarantees		
4.1.7	7.1. Ensuring the continuous work of the Verkhovna Rada of Ukraine in the context of martial law or state of emergency	Task 7.1.1. Ensuring, in a technical and regulatory way, the continuous work of the Verkhovna Rada of Ukraine (at the level of the Apparatus): developing protocols of actions for various types of external threats and ensuring continuous management of affairs (reserving and preserving information, determining and maintaining vital elements in the parliament functioning system, maintaining alternative premises, updating evacuation plans and etc.)		
		Task 7.1.2. Ensuring procedures, software and technologies for remote voting of the People's Deputies of Ukraine: adopting the Law of Ukraine "On Amending the Rules of Procedure of the Verkhovna Rada of Ukraine as regards meetings of the Verkhovna Rada of Ukraine to be held in the remote mode"		
4.2	Stage 2: 01/2023–12/2023			
4.2.1	1.1. Improving the quality of legislative initiatives of the People's Deputies of Ukraine	Task 1.1.2. Establishing the Legislative Drafting Office: 1.1.2.1. Preparing and approving the concept of the Legislative Drafting Office 1.1.2.2. Developing and approving the Regulation of the Legislative Drafting Office 1.1.2.3. Establishing the Legislative Drafting Office and providing material and		

		technical support for the Legislative Drafting Office 1.1.2.4. Ensuring adequate staffing based on the results of competitive selection		
		Task 1.1.3. Improving the requirements for drafting the explanatory notes and other supporting documents to draft laws, in particular those related to: 1) financial and economic rationale 2) special requirements to European integration-related draft laws 3) impact assessment 4) gender analysis 5) preparation of a post-legislative scrutiny plan 6) set of the list of secondary legal acts required to implement the law as well as organisational, technical and other measures required to implement the law		
		Task 1.1.4. Enhancing preregistration review of supporting documents		
4.2.2	2.2. Ensuring the institutional independence of the Apparatus	Task 2.2.1. Adopting the law of Ukraine on the parliamentary service which would regulate the status of parliamentary servants and set guarantees for the independence of the parliamentary service		
4.2.3	2.3. Forming an innovative digital parliament	Task 2.3.2. Implementing the Strategy for Forming Innovative Digital Parliament for 2023–2026		
		Task 2.3.3. Increasing the number of IT specialists in the Apparatus Introducing the best world practices in the implementation of innovative technologies in the field of electronic parliamentarism and cybersecurity to the employees of the Apparatus responsible for forming an innovative digital parliament		
		Task 2.3.4. Creating a new-generation electronic voting system (“Rada Tsyfrova”) to ensure the informational support for and automation of the law-making process during plenary meetings of the Verkhovna Rada of Ukraine held on site (directly in the meeting room) and remotely		

		Task 2.3.5. Developing modules for the software package “Technological Database of Normative and Legal Information — Zakonodavstvo (Law)”		
		Task 2.3.6. Developing modules and installing automation systems for the reporting of meetings of committees of the Verkhovna Rada of Ukraine based on technologies for recognizing continuous speech		
		Task 2.3.7. Procuring server hardware and software		
		Task 2.3.8. Procuring equipment to expand Wi-Fi 6 coverage		
		Task 2.3.9. Creating the detailed design of the system “Tsyfrovii comitet” (“Digital Committee”) for meeting rooms of committees of the Verkhovna Rada of Ukraine and other premises of parliamentary administrative buildings		
4.2.4	3.1. Establishing and maintaining high-quality communication channels between the Verkhovna Rada of Ukraine and citizens	Task 3.1.4. Developing and approving the Communication Strategy of the Verkhovna Rada of Ukraine for 2023–2026		
		Task 3.1.5. Approving and implementing the Strategy for Accounts of the Verkhovna Rada of Ukraine in Social Networks		
		Task 3.1.6. Approving and implementing the Comprehensive Programme for Parliamentary Enlightenment		
		Task 3.1.7. Approving and implementing the Brand Strategy of the Verkhovna Rada of Ukraine		
		Task 3.1.8.Creating an international congress hall to make an open space for the work of People’s Deputies with the electorate, for the activities in the field of parliamentary enlightenment and etc.		
		Task 3.1.9. Comprehensive (material, methodical, meaningful) support for developing “Rada”, the parliamentary TV channel		

		Task 3.1.10. Comprehensive (material, resources-related, methodical) support for developing the Educational Centre of the Verkhovna Rada of Ukraine		
		Task 3.1.11. Enhancing the operation of “Holos Ukrayiny” newspaper office which, as stipulated by the law, officially publishes laws of Ukraine and other legal acts for them to become effective		
		Task 3.1.12. Developing and promoting the Verkhovna Rada of Ukraine mobile application for the purposes of enlightenment and citizens’ feedback		
		Task 3.1.13. Comprehensive (material, resources-related, methodical) support for developing accounts of the Verkhovna Rada of Ukraine in social networks		
		Task 3.1.14. Material and technical support for the transparency of the work of committees of the Verkhovna Rada of Ukraine		
4.2.5	3.2. Expanding the mechanisms for involving citizens in the activities of the Verkhovna Rada of Ukraine	Task 3.2.1. Adopting the Law of Ukraine “On Public Procurement”		
4.2.6	4.1. Bringing the parliamentary law into compliance with the Constitution of Ukraine	Task 4.1.1. Bringing as follows into compliance with the Constitution of Ukraine: 1) the Rules of Procedure of the Verkhovna Rada of Ukraine (especially in terms of fraction structuring and standardisation of the work of fraction coalition, parliamentary opposition and etc.); 2) the Law of Ukraine “On Committees of the Verkhovna Rada of Ukraine”; 3) the Law of Ukraine “On the Status of the People's Deputy of Ukraine"; 4) other legislative acts		
4.2.7	5.2. Ensuring the implementation of control powers at the level of committees of the Verkhovna Rada of Ukraine	Task 5.2.1. Staffing secretariats of committees of the Verkhovna Rada of Ukraine taking into account their competences and average workload		

		Task 5.2.2. Ensuring, in a methodical way, the fulfilment of the control function (especially in the terms of post-legislative scrutiny and etc.)		
		Task 5.2.3. Training the People's Deputies of Ukraine and employees in secretariats of committees of the Verkhovna Rada of Ukraine in methods of the parliamentary control and communication with the representatives of executive authorities for these purposes.		
4.2.8	7.2. Auditing the procedural rules, developing the relevant road map and preparing comprehensive amendments to the Rules of Procedure of the Verkhovna Rada of Ukraine	Task 7.2.1. Auditing the procedural rules to determine topical and obsolete provisions		
		Task 7.2.2. Developing a road map for making comprehensive changes and amendments to the Rules of Procedure of the Verkhovna Rada of Ukraine		
		Task 7.2.3. Drafting and adopting the Law of Ukraine "On Amending the Rules of Procedure of the Verkhovna Rada of Ukraine"		
4.2.9	7.3. Ensuring that the work of the Verkhovna Rada of Ukraine be planned and predictable	Task 7.3.1. Adopting a systematic law of Ukraine on law-making activity		
		Task 7.3.2. Adopting the Law of Ukraine "On Amending the Rules of Procedure of the Verkhovna Rada of Ukraine as regards the Special Procedure for Considering Draft Laws at the Second Reading"		
		Task 7.3.3. Adopting the Law of Ukraine "On Amending Certain Laws of Ukraine to Improve the Process of Planning Law Drafting Activities of the Verkhovna Rada of Ukraine"		
	Stage 2: 01/2024–12/2025			

4.2.10	1.2. Reducing the number of legislative initiatives of the People's Deputies of Ukraine	Task 1.2.1. Setting special requirements to legislative initiatives of the People's Deputies of Ukraine (collective initiatives, mandatory fraction support and etc.)		
		Task 1.2.2. Ensuring that legislative initiatives of the People's Deputies of Ukraine be formulated in accordance with the requirements of legislative drafting techniques by establishing a legislative proposal institute (along with the launch of the Legislative Drafting Office)		
4.2.11	1.3. Ensuring the dominant role of the Cabinet of Ministers of Ukraine in the law-making process	Task 1.3.1. Prioritising European integration-related legislative initiatives submitted by the Cabinet of Ministers of Ukraine for the consideration of the Verkhovna Rada of Ukraine		
		Task 1.3.2. Resuming and establishing the practice of shaping a thematic agenda taking into account the priority of the consideration of draft laws submitted by the Cabinet of Ministers of Ukraine		
		Task 1.3.3. Conferring rights to define certain draft laws as urgent on the Cabinet of Ministers of Ukraine as a holder of the right of legislative initiative		
4.2.12	2.4. Ensuring a consistently high professional level of the Apparatus personnel	Task 2.4.3. Developing educational programmes on the enhancement and development of skills and knowledge, including digitals skills and knowledge, which the People's Deputies of Ukraine, their consulting assistants and the employees of the Apparatus need to fulfil their duties and professional tasks		
		Task 2.4.4. Involving, as a priority, the employees of the Apparatus and apparatuses of foreign parliaments in trainings and education activities, taking into account experts' subspecialties		
		Task 2.4.5. Making short training visits to parliaments of the EU Member-States and other democratic states for sharing the best parliamentary experience		
4.2.13	2.5. Adapting the organisational structure of the Apparatus to the current needs and operation	Task 2.5.1. Carrying out the qualitative functional analysis of the activities of the Apparatus taking into account current challenges		

	practices of the Verkhovna Rada of Ukraine and its bodies			
		Task 2.5.2. Developing the concept for reforming the Apparatus and a step-by-step concept implementation strategy		
		Task 2.5.3. Forming a new structure of the Apparatus		
4.2.14	2.6. Filling vacancies at the Apparatus by following the Human Resources Developing Strategy of the Apparatus and its new structure	Task 2.6.1. Organising and holding completive selection to fill vacancies at the Apparatus by following the Law on the Parliamentary Service, the Human Resources Developing Strategy of the Apparatus and its new structure		
4.2.15	3.2. Expanding the mechanisms for involving citizens in the activities of the Verkhovna Rada of Ukraine	Task 3.2.2. Improving organisational and legal aspects of the operation of the electronic resource “Public Discussion of Draft Laws” on the official website of the Verkhovna Rada of Ukraine		
4.2.16	5.3. Formalizing at the constitutional level the control function of committees of the Verkhovna Rada of Ukraine, the committee responsible for ensuring control over the activities of the security and defence sector bodies and other control committees (hereinafter referred to as special control committees)	Task 5.3.1. Making amendments to the Constitution of Ukraine on the standardisation of the procedure for implementing the control powers of the Verkhovna Rada of Ukraine.		
4.3	Stage 3: 01/2026–12/2032			
4.3.1	1.4. Improving the efficiency of expert and analytical assessment of the draft laws	Task 1.4.1. Establishing practice where the Cabinet of Ministers of Ukraine submits the White Book — an analytical document defining governmental actions in a certain area of the state policy — to the Verkhovna Rada of Ukraine		

		Task 1.4.2. Introducing preregistration budget, anti-corruption, European-integration review of draft laws, including draft laws recommended by committees to be adopted as a whole		
		Task 1.4.3. Improving the procedure for the European-integration review of draft laws by enhancing resources support for a steering committee and taking into account conclusions of the governmental European-integration reviews in its work		
4.3.2	5.4. Increasing the efficiency of the parliamentary control in public finances by establishing the Budget Office of the Verkhovna Rada of Ukraine	Task 5.4.1. Preparing and approving the concept of the Budget Office of the Verkhovna Rada of Ukraine		
		Task 5.4.2. Preparing and approving the Regulation of the Budget Office of the Verkhovna Rada of Ukraine		
		Task 5.4.3. Establishing the Budget Office of the Verkhovna Rada of Ukraine and providing material and technical support to the Budget Office		
		Task 5.4.4. Ensuring human resources for the Budget Office of the Verkhovna Rada of Ukraine		
4.3.3	6.1. Revising the authority of the Verkhovna Rada of Ukraine, the President of Ukraine and the Cabinet of Ministers of Ukraine with the aim of creating an efficient checks and balances system	Task 6.1.1. Elaborating the concept of changes and amendments to the Constitution of Ukraine in terms of the constituent and legislative function, especially as regards forming the government-centric model of the law-making process		
		Task 6.1.2. Developing and making changes and amendments to the Constitution of Ukraine and laws of Ukraine as regards forming the		

		government-centric model of the law-making process and creating an efficient checks and balances system		
		Task 6.1.3. Making changes and amendments to the Constitution of Ukraine as regards revising the number of the People's Deputies of Ukraine and related constitutional provisions		
		Task 6.1.4. Introducing ordinary and constitutional (organic and nominal) laws at the constitutional level		

5	List of national projects aimed at the completion of tasks from paragraph 4 (provided by Goal 2.3. Forming an innovative digital parliament)										
	Project description for task No. from paragraph 4	**Project rationale**	**Qualitative indicators of the project implementation**	**Economic effects (impact on the GDP, budget, employment, etc.)**	**Main responsible public authority**	**Estimated funding requirement (UAH million)**	**Proposed sources of funding**	**Necessary legal framework**	**Related areas of the EU law (general comment)**	**Surname and name of the person who submitted the proposal**	**Project status in the Group**
5.1	Developing and implementing a new-generation electronic voting system "Rada Tsyfrova" in the meeting room of	In order to hold plenary meetings of the Verkhovna Rada of Ukraine on a completely digital platform (on site and in the remote mode)		Implementation of the Project in 2023. The development, supply and implementation of the system will allow to replace the existing information and	Apparatus of the Verkhovna Rada of Ukraine	329.156	State Budget of Ukraine Possible				

	the Verkhovna Rada of Ukraine	replacing an obsolete system — “Rada-3”		telecommunication infrastructure of the meeting room in the Verkhovna Rada of Ukraine, the service life of which has expired, and to refuse from using paper documents at meetings of the Verkhovna Rada of Ukraine.			support from international donors				
5.2	Creating an international congress hall on 6–8 Bankova Street (by reconstructing a cinema hall and installing a multimedia congress system and a reserve Data Processing Centre of the Verkhovna Rada of Ukraine) for the People’s Deputies of Ukraine to communicate with their electorate, to organise and hold	Purpose of the facility: the congress hall is to be created as a multifunctional hall with 300 workplaces for the needs of the Verkhovna Rada of Ukraine, equipped with sound-amplifying, sound-recording, conferencing and simultaneous translation systems, a live TV system and video displays. The Committee of the Verkhovna Rada on Rules of Procedure, Parliamentary Ethics and Administration of Verkhovna Rada’s Work approved the		Implementation of the Project in 2023. Purpose of the Project: 1. Creating an open space within the work of the People’s Deputies of Ukraine with the electorate 2. Holding research, research-to-practice, educative events and conferences involving the People’s Deputies of Ukraine and citizens 3. Holding bilateral and trilateral meetings at the international level, forums and congresses 4. Holding extended meetings of committees	Apparatus of the Verkhovna Rada of Ukraine	350	State Budget of Ukraine Possible support from international donors				

	international events within the inter-parliament cooperation, to hold parliamentary and governmental events, to create an open space within the work of the People's Deputies of Ukraine with the electorate and a parliamentary enlightenment centre	performance of the abovementioned works in 2008 (Letter No. 04-32/7-461 dated 20.06.2008).		of the Verkhovna Rada of Ukraine and committee hearings, temporary special commissions of the Verkhovna Rada of Ukraine 5. Holding meetings of people's deputy fractions and groups, temporary commissions of investigation, temporary special commissions of the Verkhovna Rada of Ukraine 6. Holding sessions of inter-parliamentary assemblies (the NATO Parliamentary Assembly, the OSCE Parliamentary Assembly, the PACE, the PABSEC) 7. Holding ceremonial events and meetings 8. Holding meetings of the trade union committee 9. Screening educative films on the activities of the Verkhovna Rada of Ukraine							

				10. Holding seminars and trainings for the People's Deputies of Ukraine and the employees of the Apparatus 11. Holding symposiums, councils, presentations and etc. Events can, when needed, be held through live-stream video conferences							
5.3	Establishing the Budget Office of the Verkhovna Rada of Ukraine 1. Providing the Budget Office of the Verkhovna Rada of Ukraine with the State Budget Modelling System 2. Providing the Budget Office of the Verkhovna Rada of Ukraine with the Annual Budget Compliance	Establishing the Budget Office of the Verkhovna Rada of Ukraine and providing it with the State Budget Modelling System will allow ensure the assessment of the current budgetary policy and its effects in the mid-term perspective. Providing the Budget Office of the Verkhovna Rada of Ukraine with the Annual Budget Compliance Control System will allow to		Increasing the quality of assessment of the state budget revenue and expenses within the parliamentary supervision over the budget process. Shaping a high-quality budgetary policy aiming to increase the efficiency of expenses Increasing the efficiency and quality of financial and economic legislation drafted and adopted by the Verkhovna Rada of Ukraine, and expanding the usage of financial	Apparatus of the Verkhovna Rada of Ukraine	229.156	State Budget of Ukraine Possible support from international donors				

	Control System 3. Providing the Budget Office with the System of Financial and Economic Assessment of Programmes and Projects	increase the quality of the parliamentary supervision over the execution of the state budget The European-integration vector of the Ukrainian development and application of the international financial reporting standards require higher-quality assessment of budget programmes and projects. The comprehensive assessment of the implementation of budget programmes allows to get an idea of to what extent budget programmes and projects satisfy the conditions and needs of the social and economic development of the state, and to what extent budget programme management is efficient, reasonable		and economic information which is available in Ukraine for the purposes of efficient supervision and analysis. The implementation of the project in 2026 will allow to use budgetary funds as efficiently as possible if money allocation and actual results of money usage based on the defined development priorities are directly interconnected							

		and economically rational. The systematic assessment of budget programmes is an important tool to define the efficiency of the implementation of the state policy in a specific field of governmental activities									
5.4	Developing modules for the software package "Technological Database of Normative and Legal Information — Zakonodavstvo", changing the architecture of the Zakonodavstvo Database off-line	Developing and modernising the modules for "Technological Database of Normative and Legal Information — Zakonodavstvo" will ensure that a new system of the preparation, maintenance and editing of documents of primary and secondary legislation be created through the PostgreSQL database management system and using web-oriented database formation technologies, submitting documents in HTML/XML		Improving the technical condition. 2023: Stage 1: To develop modules for the system of the preparation, maintenance and editing of documents of primary and secondary legislation 2024: Stage 2: To develop modules for the system of the preparation, maintenance and editing of documents of primary and secondary legislation, to create protocols for changes in the software package databases 2024–2025: Stage 3: To modernise	Apparatus of the Verkhovna Rada of Ukraine	4.5	State Budget of Ukraine Possible support from international donors				

		formats and employing many years of experience in forming databases of normative and legal information in the Verkhovna Rada of Ukraine, modernising the Zaknodavsto system off-line in terms of changes in its own database and recovery system		the Zaknodavsto system off-line, to replace databases and an updating technology							
5.5	Developing the Planning Legislative Drafting Activities subsystem: 1) a technical specification for modernising the automated system "Electronic Draft Law" to make and monitor the implementation of the Legislative Drafting Activities Plan and its elements; 2) developing a	Introducing the Legislative Drafting Activities Plan of the Verkhovna Rada of Ukraine in 2019 by amending the Rules of Procedure of the Verkhovna Rada of Ukraine, and approving the Legislative Drafting Activities Plan of the Verkhovna Rada of Ukraine for 2020 were important steps for improving the then situation with legislative drafting activities planning. In order to fulfil the function of monitoring		Implementation in 2022–2023	Apparatus of the Verkhovna Rada of Ukraine	3.65	State Budget of Ukraine Possible support from international donors				

	software to modernise the automated system "Electronic Draft Law"	the progress in drafting/preparing proposals included in the Plan, it is necessary to modernise the current version of the automated system "Electronic Draft Law" and the respective sections of the official website of the Verkhovna Rada of Ukraine that will facilitate the achievement of the following key goals: 1) for the law-making process participants and interested parties to monitor the implementation of the Plan at all stages 2) to increase the openness and transparency of the planning process									
5.6	Mobile workplace of People's Deputies (a tablet/a laptop)	To ensure the People's Deputies of Ukraine with possibilities of exercising their powers in a single protected digital office within plenary meetings,		Implementation of the Project in 2024. Improving the technical condition. Quantity: 450 pieces	Apparatus of the Verkhovna Rada of Ukraine	12.15	State Budget of Ukraine Possible support from				

		meetings of committees and other bodies of the Verkhovna Rada of Ukraine, work with their electorate and work trips					international donors				
5.7	Powerful desktop PSc for the employees of the Apparatus	Scheduled replacement of the obsolete computer equipment of the Apparatus (the current equipment manufactured in 2015)		Implementation of the Project in 2025. Improving the technical condition. Quantity: 1000 pieces	Apparatus of the Verkhovna Rada of Ukraine	23	State Budget of Ukraine Possible support from international donors				
5.8	Modules with the installed automation system for the reporting of meetings of committees of the Verkhovna Rada of Ukraine (including those via video conference) based on technologies for recognizing continuous speech	The package will ensure that meetings of committees of the Verkhovna Rada of Ukraine be reported based on technologies for recognizing continuous speech directly in Ukrainian, English and Russian during the meetings (live reporting) Possibility of deploying the package in new facilities within three working days		Implementation of the Project in 2023. Automating computer-assisted reporting of all types of meetings of the Verkhovna Rada of Ukraine Informing the public of the activities of committees of the Verkhovna Rada of Ukraine including by publishing the reports of committee meetings and hearings	Apparatus of the Verkhovna Rada of Ukraine	4.9	State Budget of Ukraine Possible support from international donors				

5.9	Developing the automated system “Human Resources Management in the Apparatus of the Verkhovna Rada of Ukraine”	To ensure the creation of a single digital platform for arranging human resources for the Apparatus: additional recruitment, appointment, transfer, assessment, training, advanced training, incentives, penalties, network cooperation between the units of the Apparatus		Implementation of the Project in 2025. Automating means aiming to arrange and coordinate human resources in the Apparatus, including the structure and manning table, the civil service positions, individual files of civil servants	Apparatus of the Verkhovna Rada of Ukraine	12.75	State Budget of Ukraine Possible support from international donors

DRAFT

III. The local self-government bodies reform

Local self-government in Ukraine has been significantly reconsidered in Ukraine for the last 8 years. In 2020, Ukraine got a current administrative and territorial division, according to which more than 11,000 village, township, and city councils were substituted on the basic level with 1,470 competent territorial communities; and 136 districts were established on the subregional level based on the 490 optimized districts. Local self-government gained considerable powers, adopted responsibility, and increased financial resources in order to effectively address issues of local importance: local services are eventually closer to people, local self-government bodies became more accountable and democratic, intensive local development and wellbeing of population turned out to be our key priorities.

Such approach is based on the best European practices, and from now on, local self-governance framework in Ukraine will correspond to philosophy of the European Charter of Local Self-government. In February 2022, the European Parliament recognised decentralization reform as one of the best reforms in Ukraine. Along with that, local government reform has not been yet completed as of June 2022.

Despite a great progress, the system still has long-lasting problems that hinder its intensive development on the ground. What is more, some territorial communities and districts, as well as their configurations, were a result of the political compromise as an integral component of the political process. At that time, it was a completely right decision as benefits from a comprehensive optimization of the system far outweighed disadvantages caused by incorrectness of some configurations. At the same time, full-scale armed aggression against Ukraine has significantly exacerbated those problems that have existed in local self-government for years, and highlighted those structural flaws that were factitiously preserved in 2020.

Thus, 4 key directions were identified under the National Recovery Plan. Their implementation directly depends on completion and adoption of already developed legislation, as well as on the well coordinated work of all levels and branches of the government in order to effectively fulfill tasks at hand.

Description of problems

1. Insufficient capacity of some territorial communities and districts has exacerbated as a result of the full-scale war, in particular due to the large-scale internal displacement within the state, accompanied by significant destruction or damage of critical, social, and commercial infrastructure, critical level of migration to neighbouring countries, and relocation of businesses.

In order to address this problem, the administrative and territorial division of our state should be reviewed in view of the current challenges that local self-government and executive bodies face under conditions of martial law, as well as a real-time interactive information and analytical system should be introduced to monitor statistical and administrative indicators of the functioning of territorial communities, districts, and regions.

The mentioned scope of work partially intersects with the regional development issues, operations of local executive bodies, and issues of the legal regulation under land legislation.

2. Ill-defined division of powers between the local self-government bodies and the state, as well as lack of adequate financial resources, is a recurrent problem which has been prevailing at the operational system of state public authorities since the reclaiming of our independence.

For more than 20 years, the experts, officials of different levels, parliamentarians of different convocations, local elites, and donor organizations engaged into self-government issues have been of one mind regarding the need to ensure quality, comprehensive, and exhaustive division of powers between local self-government bodies at all levels of administrative and territorial structure, as well as between local self-government and executive bodies, providing sufficient funding for their implementation.

Lack of division of such powers and their vagueness along with their duplication amid local self-government bodies at different levels, as well as between local executive and self-government bodies, contribute to the misunderstanding of the very nature of "delegation" of such powers, their true "value" and expediency to properly fund such powers given the limited public funds. In its turn, it negatively impacts on quality of public service provision and leads to conflicts of competences between public authorities and inefficiency in exercise of powers.

Therefore, the working group suggests to identify by their nature an exhaustive list of powers, to divide them properly between public authorities, to approve state standards (requirements) and norms in a descriptive and cost way for each power per a statistically average administrative and territorial unit, as well as to carry out a range of activities aimed at descent funding of delegated powers (to improve a financial equalization formula, to change a crediting principle to local budgets for the personal income tax etc.).

3. Insufficient level of professional expertise on the ground, low attractiveness of civil service along with lack of citizens' trust in local self-government employees significantly impacts on capacity and development of a territorial community. Moreover, the pay scale is imperfect, including intense political nature and subjectivity of this process, and local self-government officials, as well as civil servants, primarily focus on a process rather than on outcomes, which should have been interrelated with incentives and motivation allowances/ All this exacerbates imbalances in the functioning system of local self-government bodies and worsen quality of the services provided to population, which affects both the attractiveness of the civil service and the credibility of a power institution as a whole.

Within the subgroup, it is suggested to gradually change system of professional development for local self-government employees, to introduce an effective and flexible system of personnel training and promotion (advanced training), to create attractive and favourable working conditions for civil servants, and to revive its prestige and trust. It could be achieved through introduction of the advanced personnel management tools into the system of local self-government employees, development of the open and fair competition procedure, creation of the flexible professional development system, formation of an enabling employer's brand for a local self-government body, and eventually to transfer to the concept of a public servant (that s to the seamless combination of public service and service in local self-government bodies).

Within this direction, activities directly intersect with the reform of central executive authorities and measures aimed at improving legal principles of the civil service functioning.

4. Although the electoral legislation in Ukraine (adoption of the Electoral Code) has been relatively recently drastically reviewed and first local elections were held throughout Ukraine at the end of 2020 based on a new territorial principle, an exercise of the election process shows imperfections in the legal regulation of local elections, which all the more aggravated given the war time challenges.

The mentioned challenges intersect in particular with increasing areas of the temporarily occupied territories of Ukraine, including many those with active hostilities, and massive displacement of population, which affects the socio-demographic characteristics of territorial communities; with underrepresentation of the remote areas (settlements) residents in representative bodies; with the discrepancies between certain electoral norms and post-war recovery conditions, in particular regarding the holding of early or mid-term local elections and digitalization of the electoral process as a whole.

Subsequently, it is planned to improve the electoral system of local elections, inter alia, in the following areas: grounds of failure to hold elections due to lack of a proper security level, procedures for calling early local elections, mechanisms for participation of Ukrainian citizens in local elections, improvement of the electoral system during local elections. It will ensure balanced representativity of all territories of a territorial community, systemic professional development and depoliticization of election commissions' members etc.

Moreover, the history of Ukrainian democracy is characterized by a negative practice of changing rules of the "game" (an electoral process) shortly before the election date. On the local level, this problem is aggravated by the following: people usually pay less attention to the local elections and are less familiar with nuances of the electoral system on the ground, while local authorities actually address major part of the routine issues and problems of population and satisfy their key (daily) needs.

In view of it and for the first time ever in the history of independent Ukraine, it is proposed to carry out improvement of the electoral system on the local level in advance: well ahead of the scheduled regular elections in 2025 in order to have time for proper preparations by all subjects of the electoral process, to conduct raising awareness campaigns for population, and to enhance proficiency of the election commissions' members at all levels.

Expected outcome

Introduction of a capable system of local self-government bodies at all levels of the administrative and territorial division of the state that properly fulfils the public functions vested in it, is resilient to permanent crises and unpredictable threats, adequately responds to challenges and enjoys trust among local communities.

Performance of the public functions is ensured with adequate funding, reasonable distribution of powers between levels and subjects of public governance to allow for better quality of public services, efficient spending of limited funds and rapid development of territories.

Public service at the local level is optimized, digitalized, and result-oriented, and therefore aimed at achieving the key performance indicators in the fastest way using the least possible scope of public resources.

The election procedures at the local level are adopted to the challenges of the post-war recovery, abolishing the size of the population as a factor determining the election system to allow for a more targeted and balanced reflection of the needs of the local population, including those from far-located areas, and members of the election commissions are professionals. In total, it allows to ensure high quality of local elections and prevalence of local democracy according to the best international standards.

1. Key issues to be solved within the framework of the Recovery Plan within the Local Self-Government direction

Key problems and objectives:

1) Problem: Insufficient capacities of some territorial communities and raions, made worse by the full-scale war
Goal: To review the administrative and territorial division given the current challenges faced by local self-government and executive bodies under conditions of martial law.

2) Problem: Ill-defined delineation of powers of the local self-government bodies and the state and lack of adequate financial resources

Goal: Ensuring the division of powers of the local self-government bodies at all levels of administrative and territorial organisation, as well as between the local self-government bodies and local executive authorities, providing sufficient funding for their implementation.

3) Problem: Insufficient level of professional expertise on the ground, low attractiveness of public service, and lack of citizens' trust in local self-government employees

Goal: Introducing an effective and flexible system of personnel training and promotion (advanced training), creating attractive and favourable working conditions for civil servants, and boosting its prestige.

4) Problem: Shortcomings of the electoral process at the local level in a time of perpetual crisises.

Goal: Improving the local elections system (grounds for non-holding due to inadequate security and grounds for calling early local elections)

Impact of the war on the defined analysis area:

All over Ukraine, local self-government has been unprecedentedly impacted by war and its aftermath: both in hostilities areas, under temporal occupation, in besieged settlements, and through accommodation of internally displaced persons, relocation of enterprises, destruction and renewal of infrastructure, construction of new logistical hubs and routes etc.

Regarding direct losses, one can pay attention to the revenue decrease of local government budgets (for the first quarter of 2022 compared to the first quarter of 2021), in particular in terms of land fees (land tax, tenancy) with the rate of -38%, or UAH 1.1 billion (land fee constitutes about 12% of the

local budgets (general fund) receipts); in terms of excise duty, the aggregated (tobacco, alcohol, fuel) figure is -32.2% or UAH -0.8 billion (including the fuel excise duty (UAH -0.6 billion), which generated about UAH 7.8 billion per year for local budgets).	
Key challenges (in general, for the defined area)	Partial imperfection of the administrative and territorial division (low level of capacity of some local self-government bodies at the basic level to ensure the implementation of statutory powers, non-compliance of certain subregional administrative and territorial units with the NUTS-3 criteria) Duplication of powers of local self-government bodies at different levels of administrative and territorial division with those of local executive bodies, as well as failure to ensure proper funds for the exercise of delegated powers by local self-government bodies. Insufficient efficiency and quality of public servants' work in the local self-government system, in particular their focus on processes rather than results, formal approach to implementation of the principle of political impartiality and low level of public trust in the local self-government servants. Shortcomings of the electoral system at the local level (failure to hold elections in areas close to hostilities (security criteria), the need to update the electoral system given the massive displacement of population, large-scale damage of critical infrastructure, insufficient consideration of interests of citizens from far-located settlement spread across big territories)
2) Key possibilities (in general, for the defined area)	To accumulate territory management experience in the crisis conditions along with practices of swift administrative decision-making in different security situations and at various governance levels. To scale-up the IT usage in community and region management, including remote management Opening of a "window of opportunity" for swift passing of difficult and "unpopular" decisions, which would require significant time and political compromises in time of peace. To decrease the political component share in a decision-making process and during development of acts at the regional and national levels. The need to clearly define responsibilities of all public authorities and local self-government bodies in order to ensure quality and efficiency of public functions exercise, as well as timeliness and quality of the public services provided to population To develop the quality pool of public servants at the local level, who are motivated, result-oriented, initiative, and virtuous.
3) Key limitations (in general, for the defined area)	Austerity in public funds given the need to ensure protected budget expense lines (social sphere and support of community-functioning) Reduced quality of the adopted regulations and individual acts at all levels of public governance

	Rapid deterioration of the demographic situation in the state Large-scale internal displacement of population (failure to understand communities' final configurations and demography, as well as the IDP numbers) A gap between the capacities and development of different territorial communities and regions depending on the threats caused by active hostilities Reduced economic activity of population AN abrupt increase in the burden on the social protection system, including budget expenditures for social purposes, in particular on IDP allowances An outflow of professional personnel, staff turnover within the system of local self-government bodies

2. Goals, tasks and stages of the Recovery Plan within the direction "Local Self-government" for specific fields

2.1. Goals aimed at resolving identified problems:

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
1) Problem: Insufficient capacities of some territorial communities and raions, made worse by the full-scale war Goal: Reviewing the administrative and territorial organisation in the context of current challenges faced by the local self-government bodies and local executive authorities			

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Goal to be achieved to solve the issue during each stage	To approve the updated capacity criteria for territorial communities (given the challenges caused by the armed aggression and emergency situations, in particular post-war recovery, changes in the separate approaches to regional development in terms of targeted support to the depressive and challenging conflict-affected territories, refusal from excessive resource concentration on these territories)	To ensure the development of territorial communities based on the updated capacity criteria for the functioning of local self-government bodies (* does not constitute a ground to hold early elections; local elections shall be held in 2025 according to the schedule) To introduce changes to the list of districts according to the measurable criteria for functioning efficiency of central executive authorities (CEA) and local state administrations (LSA)	To define the actual boundaries of administrative and territorial units of Ukraine To introduce an automated information and analysis system to monitor the statistical and administrative indicators of territorial communities, districts, and regions
Deadline within the stage	December 2022	December 2023	2030
Risks related to the goal achievement	Lack of similar operating experience of local self-government and state authorities on the ground under conditions of the full-scale armed aggression. An increasing gap between territorial communities in terms	Reluctance of local elites who have already settled on the ground within the “new” 2020 community configuration, split areas of their responsibility and will resist any changes. At the central and local levels, there is a misunderstanding of role and importance of the subregional	Lack of unity within the expert community regarding the monitoring “criteria” False information provided by local authorities

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
	of their infrastructure, resource, and manpower potential.	level within the public governance system.	
Measurable goal achievement indicator	Adoption of the Draft law No. 4664. Document approved by the Ministry for Communities and Territories Development of Ukraine.	Lack of enclaves at district level Minimum number of inhabitants: 150 thousand per district (NUTS-3) Approved acts on changes of territories and administrative centres of territorial communities, as well as dissolution of districts.	Addressed issues of shaping land plots through which boundaries of communities, districts, and regions go. In the Diia, there was a possibility introduced for any resident to keep track of monitoring over the functioning efficiency of communities, districts, and regions.
Total funding requirement for the goal achievement			
Links between the goal and other directions	Criteria should correlate with matters of regional development	The goal correlates with the matters of state building on the ground (LSA and Central executive authorities)	Defining of the actual boundaries of regions, districts, and territorial communities is related to the issues of land legislation
2) Problem: Ill-defined delineation of powers of the local self-government bodies and the state and lack of adequate financial resources Goal: Ensuring the division of powers of the local self-government bodies at all levels of administrative and territorial organisation, as well as between the local self-government bodies and local executive authorities, providing sufficient funding for their implementation			
Goal to be achieved to solve the issue during each stage	Developing criteria and methodology for delimitation of powers and identifying inconsistencies in their funding	To develop and approve state standards (requirements) and norms in descriptive and cost formats for each power delegated by the state to local self-	Removing restrictions on the regulation of the local self-government's own revenues

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
	To define criteria (principles) and guarantees of delegation of powers by the state to local self-government To approve a register of the powers of local self-government bodies (to mitigate the risk of misunderstanding the essence of power delegation). To finalize the Government Draft laws No.6281 and No.6282. To define (if not regulated) relevant state standards (requirements) for public services, in particular in the sectors of education, healthcare,	government bodies per a statistically average administrative and territorial unit for the purpose of descent funding of delegated powers. To align fiscal revenue sources with the nature of powers pf local self-government To improve a financial equalization system (formula) with the purpose of reducing imbalances and maintaining interest in the increase of fixed income Crediting a certain part of the personal income tax to local budgets at the place of home address registration of individual taxpayer	Establishing a methodology for direct calculation of expenditures on the entrusted powers To ensure a gradual transfer to the funding of delegated powers as per their value

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
	culture, social and administrative services that should be provided by local self-government bodies; to calculate the cost of such services.		
Deadline within the stage	December 2022	October 2023	2028
Risks related to the goal achievement	Reluctance (demotivation) of state (executive) authorities to clearly split powers due to the necessity to additionally fund delegated and entrusted powers, along with failure to understand the essence of power "delegation". Lack of unity in approaches to understanding of power "cost" and complicated calculations performed under uncertainty caused by the crisis	Change of political climate/beginning of the election process that substantially slows down the Parliament's/Government's activities The matter becomes out of priority given the critical limitation level of public resources Resistance of big cities to the initiative to transfer part of the Personal Income Tax at the place of residence or at the place of business due to loss of part of income	Ill-preparedness of the Ministry of Finance to introduce changes
Measurable goal achievement indicator	Approval of the Concept of changes and acts on powers delineation criteria, their costs and accounting along with defining of tasks specifically attributed to Central Executive	Introduction of changes to field-specific and sectoral legislation on the delineation of powers	Development of the State and local budgets with allocation of funds for the delegated powers at no less than 75% of their "cost"

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
	Authorities and deadlines to perform analytical work		
Total funding requirement for the goal achievement			
Links between the goal and other directions			
3) Problem: Insufficient level of professional expertise on the ground, low attractiveness of public service, and lack of citizens' trust in local self-government employees Goal: Introducing an effective and flexible system of personnel training and promotion, creating attractive and favourable working conditions for civil servants, and boosting its prestige.			
Goal to be achieved to solve the issue during each stage	Creating an effective and flexible system of professional training that meets the demands of civil servants and promptly responds to the development needs of territorial communities To change a professional development model for public servants	To introduce an integrated human resources management system in the system of civil service in local self-government bodies To introduce open and fair competition procedure	To ensure an easy transfer from local self-government bodies to state authorities and vice versa To initiate establishment of the public service To develop a favourable employer's brand of local self-government bodies
Deadline within the stage	December 2022	2024	2027

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Risks related to the goal achievement	Reluctance to participate in voluntarily assessments Resistance of local political players who loose their influence on the personnel policy Lack of motivation from the side of local self-government bodies to transfer to the united integrated hr management system	A formal approach to the introduction of workforce management tools Bias towards the "manual" decision-making on workforce matters	A low priority of the defined goal in comparison with others
Measurable goal achievement indicator	An analysis report (with a breakdown by regions and sectors) Approval of the Draft law No. 6504	Development of a separate module on local self-government servants in the integrated hr management system	Adoption of the Code on Public Service in Ukraine An increase of the number of candidates for the positions in local self-government bodies
Total funding requirement for the goal achievement			
Links between the goal and other directions	Improvement of the civil service		
4) Problem: Shortcomings of the electoral process at the local level in a time of perpetual crisises. Goal: Improving the local elections system (grounds for non-holding due to inadequate security and grounds for calling early local elections)			

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Goal to be achieved to solve the issue during each stage	To develop criteria for impossibility to hold local elections in particular territories because of hostilities or military threat To decrease election timeframe and extend grounds for calling early local elections	To detach local election system from the number of population in a territorial community (not later than a year before local elections) Establishing and ensuring the functioning of election commissions, in particular DECs and TECs (formation procedure, provision of premises, creation of temporary premises for voting, professionalization of the election commission members) To improve a funding procedure for interim local elections To develop an IDP participation mechanism for local elections	Analysing the practice of application of the new election legislation during local elections and further improving the Electoral Code and other relevant laws
Deadline within the stage	December 2022	2025	2028
Risks related to the goal achievement	Legal challenging of decisions on the impossibility to hold elections Local residents are dissatisfied with the impossibility to participate in elections	Problems for future candidates, election team, and voting public to use the new electoral system. Lack of sufficient logistical support Lack of funds in the State Budget of Ukraine	Backsliding of the electoral reform

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
	Politization of matters on calling early local elections	Significant influence of IDPs on the local policies	
Measurable goal achievement indicator	Necessary legislative acts are approved	Methodology for vocational trainings is introduced	Comprehensive study is carried out and relevant amendments to legislation are prepared
Total funding requirement for the goal achievement			
Links between the goal and other directions			

2.2. Current state of implementation of the programme documents relating to the relevant issue in the defined analysis area:

No.	Title of the programme document	Current situation
1	Concept of Reformation of the Local Self-Government and Territorial Organisation of Power in Ukraine approved by Ordinance of the Cabinet of Ministers of Ukraine No. 333-p of 1 April 2014	It needs to be updated since the condition of the local self-government and territorial organisation of power in Ukraine has changed dramatically (it is assumed that the Concept is fulfilled or even overfulfilled according to its stages); it must be brought into conformity with the present-day challenges (martial law, permanent hostilities, etc.)
2	Decision of the National Security and Defence Council of Ukraine of 15 April 2021 "On the Measures of the State Regional Policy for Supporting Decentralisation of Power" enacted by Decree of the President of Ukraine No. 180/2021 of 29 April 2021.	As of now, only one third is implemented, although topicality and relevancy for immediate adoption of the measures defined in the Decision are detailed in Section 2 of this document.

3	Public Administration Reform Strategy for 2022–2025 approved by the Ordinance of the Cabinet of Ministers of Ukraine No. 831-p of 21 July 2021	Despite the fact that the Strategy implementation has begun this year, it still needs to be updated. Along with this, a huge number of activities envisaged by the Strategy continues to be relevant despite of the changes caused by war.

4	Definition of tasks for the achievement of goals from paragraph 2 (for each defined goal)			
	Goal (from paragraph 2)	Description of the task for the goal achievement	Deadline for the task	Dependence of the task on the tasks within other directions, areas and issues
	4.1. Reviewing the administrative and territorial organisation in the context of current challenges faced by the local self-government bodies and local executive authorities			
	Stage 1: 06/2022–12/2022			
	4.1.1. To approve updated capacity criteria for territorial communities (given the challenges of martial law and post-war recovery)	To hold consultations with stakeholders regarding the procedure of engagement of responsible individuals into a study on assessment criteria for functioning capacity of local self-government (authority in charge: Ministry for Communities and Territories Development of Ukraine)	July 2022	
		To run an assessment of functioning capacity of local self-government (authority in charge: Ministry for Communities and Territories Development of Ukraine,)	August–September 2022	
		To develop a methodology for setting capacities of territorial communities (authority in charge: Ministry for Communities and Territories Development of Ukraine)	September 2022	

		To agree on a methodology for capacities of territorial communities with the Parliament and hold consultations with stakeholders (authority in charge: Ministry for Communities and Territories Development of Ukraine)	October 2022	
		To approve a methodology for setting capacities of territorial communities (authority in charge: Ministry for Communities and Territories Development of Ukraine)	November 2022	
		To complete works on the Draft law No.4664 within the Committee and submit it for I rereading (authority in charge: Ministry for Communities and Territories Development of Ukraine	October–November 2022	
		To adopt the Draft law No.4664 On the Procedure for Settlement of Issues of the Administrative and Territorial System as a basis in the first reading (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	December 2022	
	Stage 2: 01/2023–12/2025			
	4.1.2. To ensure the development of territorial communities based on the updated capacity criteria for the functioning of local self-government bodies	To run simulation of settings for territorial communities based on the updated capacity criteria (authority in charge: Ministry for Communities and Territories Development of Ukraine)	January–February 2023	
		To adopt the Draft law No.4664 On the Procedure for Settlement of Issues of the Administrative and Territorial System in the second reading and in the whole (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	March 2023	

		To conduct regional discussions about projects on updated territorial communities settings (authority in charge: Ministry for Communities and Territories Development of Ukraine)	March–April 2023	
		To suggest the updated administrative centres and territories of territories communities (authority in charge: to be specified as it depends on the final version of the Draft law No.4664)	May 2023	
		To approves changes of settings for territorial communities of Ukraine (* does not constitute a ground to hold early elections; local elections shall be held in 2025 according to the schedule) (authority in charge: to be specified as it depends on the final version of the Draft law No.4664)	July 2023	
	4.1.3. To introduce changes to the list of districts according to the measurable criteria for functioning efficiency of central executive authorities (CEA) and district state administrations (DSA)	To collect and analyse data regarding functioning efficiency of District State Administrations and Central Executive Authorities under the circumstances of martial law (authority in charge: Secretariat of the Cabinet of Ministers of Ukraine)	October–November 2022	Subgroup: Reforms of regional and district state administrations
		To develop a methodology of assessment of functioning efficiency of District State Administrations and Central Executive Authorities (Ministry for Communities and Territories Development of Ukraine)	January 2023	
		To run simulation of settings for the updated districts given the security threats and the need for effective exercise of executive power in the territory (authority in charge: Ministry for Communities and Territories Development of Ukraine)	March 2023	
		To coordinate the updated settings for districts of Ukraine with all stakeholders and submit it for consideration of the Verkhovna Rada of Ukraine (authority in charge: Ministry for Communities and Territories Development of Ukraine)	April 2023	

		To consider it at the meeting of the Line Parliament Committee taking account of the comments and proposals provided by members of Parliament of Ukraine (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	May–April 2023	
		To approve as a basis and as a whole the updated act on liquidation and establishment of new districts (authority in charge: Verkhovna Rada of Ukraine)	July 2023	
		To adopt secondary regulatory documents, in particular Ordinance on reorganisation and formation of district state administrations (authority in charge: Ministry for Communities and Territories Development of Ukraine)	December 2023	
	Stage 3: 01/2026–12/2032			
	4.1.4. To introduce an information and analysis system to monitor the statistical and administrative indicators of territorial communities, districts, and regions	To analyse the expediency of setting apart a separate system or of improving the "SOTA" information and analytical system of the Main National Situation Centre ("SOTA" IAS) (authority in charge: Secretariat of the National Security and Defence Council of Ukraine)	2026	
		To develop a concept for implementing an information and analytical system to monitor the capacity of communities, districts, and regions (authority in charge: Ministry for Communities and Territories Development of Ukraine)	2026	
		Adopt the relevant regulations (authority in charge: Cabinet of Ministers of Ukraine)	2026	
		To procure necessary software and data support for the monitoring system of community capacities (authority in charge: donors)	2027	

		To launch a pilot project on functioning of the monitoring system of community capacities (authority in charge: Ministry of Digital Transformation of Ukraine)	2028	
		To improve Diia system in order to introduce the options for citizens to monitor the functioning indicators of communities, districts, and regions in real-time mode (authority in charge: Ministry of Digital Transformation of Ukraine)	2028	
		To improve and scale-up capacities monitoring system taking account of users' feedback (authority in charge: Ministry of Digital Transformation of Ukraine)	2030	
	4.2. Ensuring the division of powers of the local self-government bodies at all levels of administrative and territorial organisation, as well as between the local self-government bodies and local executive authorities, providing sufficient funding for their implementation			
	Stage 1: 06/2022–12/2022			
	4.2.1. Developing criteria and methodology for delimitation of powers and identifying inconsistencies in their funding	To define criteria (principles), guarantees, methodology, delegation (delineation) of state powers to local self-government; to list the powers with the purpose of their enshrining in the law (authority in charge: Ministry for Communities and Territories Development of Ukraine)	July–November 2022	
		To improve further Draft laws Nos. 6281 and 6282 in order to identify exhaustive delineation of powers of the local self-government bodies at all levels of administrative and territorial system, as well as between local self-government and executive bodies; to submit a revised (joint) version for the first rereading (authority in charge: Ministry for Communities and Territories Development of Ukraine)	October 2022	
		To approve the revised Draft law (based on the Government Draft laws Nos. 6281 and 6282) on delineation of powers in the first reading	December 2022	

		(authority in charge: Ministry for Communities and Territories Development of Ukraine)		
		To develop methodological recommendations for control over State Budget expenditures on delegated powers (authority in charge: Ministry of Finance of Ukraine)	December 2022	
	Stage 2: 01/2023–12/2025			
	4.2.2. To align fiscal revenue sources with the nature of powers of local self-government	To approve state standards (requirements) and norms in descriptive and cost formats for each power delegated by the state to local self-government bodies per a statistically average administrative and territorial unit for the purpose of descent funding of delegated powers.	February 2023	
		To calculate the share of fixed income on the exercise of delegated powers (Ministry for Communities and Territories Development of Ukraine together with Ministry of Finance of Ukraine)	May 2023	
		To carry out the analysis of available funding per each power (authority in charge: Cabinet of Ministers of Ukraine)	June–July 2023	
		To hold consultations with all stakeholders regarding the Draft law On the Delineation of Powers (authority in charge: Ministry for Communities and Territories Development of Ukraine)	May–August 2023	
		To develop a methodology for calculation of powers costs (authority in charge: Cabinet of Ministers of Ukraine)	November 2023	
		To ensure adoption of the revised Draft law in the second reading (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	September–December 2023	
	4.2.3. Crediting a certain part of the personal income tax to local budgets	To ensure effective work of the Working Group on Personal Income Tax under auspices of the Budget Committee (authority in charge:	September 2022	

	at the place of home address registration of an individual taxpayer	Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)		
		To elaborate a model on the Personal Income Tax crediting to local self-government's budgets (authority in charge: Committee of the Verkhovna Rada of Ukraine on Finance, Taxation and Customs Policy)	November 2022–February 2023	
		To adopt the Draft law on changing the place of personal income tax crediting (authority in charge: Verkhovna Rada of Ukraine)	May–June 2023	
		Adopt the relevant regulations (authority in charge: Cabinet of Ministers of Ukraine)	August–October 2023	
	4.2.4. To improve a financial equalization system (formula) with the purpose of reducing imbalances and maintaining interest in the increase of fixed income	To study shortcomings of the current financial equalization system, in particular against the backdrop of crises (authority in charge: Ministry of Finance together with Ministry for Communities and Territories Development)	December 2023	
		To develop changes to the financial equalization formula (authority in charge: Ministry for Communities and Territories Development of Ukraine together with Ministry of Finance of Ukraine)	2024	
		To ensure consideration of the project by the Parliament Budget Committee (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	2024	
		To adopt the law (authority in charge: Verkhovna Rada of Ukraine)	2025	
		To adopt relevant secondary legislation (* does not constitute a ground to hold early elections; local elections shall be held in 2025 according to the schedule) (authority in charge: Cabinet of Ministers of Ukraine)	2025	

	Stage 3: 01/2026–12/2032			
	4.2.5. Removing restrictions on the regulation of the local self-government's own revenues	To develop a concept of gradual fostering of financial capacities and self-sufficiency of territorial communities (authority in charge: Ministry for Communities and Territories Development of Ukraine together with Ministry of Finance of Ukraine)	2026	
		To develop a draft law on liberalization of fiscal controls over the own revenues of local self-governments (authority in charge: Ministry for Communities and Territories Development of Ukraine)	2026	
		To agree the draft law with all stakeholders (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	2026	
		To adopt the draft law (authority in charge: Verkhovna Rada of Ukraine)	2027	
		Adopt the relevant regulations (authority in charge: Cabinet of Ministers of Ukraine)	2028	
	4.2.6. Establishing a methodology for direct calculation of expenditures on the entrusted powers	To develop a methodology for direct calculation of expenditures for delegated powers (authority in charge: Ministry of Finance of Ukraine)	2027	
		To agree the methodology with all stakeholders (authority in charge: Ministry of Finance of Ukraine)	2027	
		To adopt the methodology (authority in charge: Cabinet of Ministers of Ukraine)	2028	
	4.3. Introducing an effective and flexible system of personnel training and promotion, creating attractive and favourable working conditions for civil servants, and boosting its prestige.			

	Stage 1: 06/2022–12/2022			
	4.3.1. Changing a professional development model for public servants	To adopt the Draft law No. 2493-III "On Service in Local Self-Government Bodies" as a basis in the first reading (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	August 2022	
		To develop a road map for introduction of the efficiency management of employment activities (based on KPI) in local self-government bodies; to take into account the peculiarities of elective post assessment (authority in charge: National Agency of Ukraine for Civil Service)	September 2022	
		To update the 2022–2025 Strategy for Public Administration Reform in Ukraine (authority in charge: Cabinet of Ministers of Ukraine)	November 2022	
		To adopt the Draft law No. 6504 "On Service in Local Self-Government Bodies" as a whole in the second reading (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	December 2022	
	4.3.2. Formulation of the open and transparent data regarding public servants	To develop a data collection form and mechanism on quantity and quality profile of public servants with constant monitoring of changes (authority in charge: National Agency of Ukraine for Civil Service)	July–August 2022	
		To agree with stakeholders on the form and mechanism	September 2022	
		To make a decision on collection and publishing of results of such monitoring, as well as to choose a resource for the collected publicly available data	October–December 2022	
	Stage 2: 01/2023–12/2025			
		To develop and approve by the Cabinet of Ministers and central executive authorities of acts, which adoption is needed for	January–May 2023	

		implementation of the provisions of Draft law No. 6504 (authority in charge: National Agency of Ukraine for Civil Service)		
	4.3.3. Introducing an integrated human resources management system in the system of civil service in the local self-government bodies	To introduce an IT solution for monitoring over quantitative and qualitative changes in profile of public servants (authority in charge: National Agency of Ukraine for Civil Service)	May 2023	
		To develop a road map for implementation of the integrated human resources management system (authority in charge: National Agency of Ukraine for Civil Service)	September 2023	
		To create statutory conditions for development and implementation of the integrated human resources management system (authority in charge: National Agency of Ukraine for Civil Service)	2024	
		To carry out works on development a separate module for local self-government bodies within the integrated human resources management system (authority in charge: National Agency of Ukraine for Civil Service)	2024	
	4.3.4. Development of an open and fair competition procedure	To develop an operating concept for a Single Portal for Vacant Positions in the Public Service and a road map for its implementation (authority in charge: National Agency of Ukraine for Civil Service)	October 2023	
		To agree this approach with all stakeholders (authority in charge: National Agency of Ukraine for Civil Service)	December 2023	
		To develop a relevant IT solution (a separate module) for local self-government bodies on the Single Portal for Vacant Positions in the Public Service	2024	
		To promote the Portal and conduct trainings for its users	2024	
		To start using the Single Portal for Vacant Positions in the Public Service during the competitive selections for local self-government	2025	

		bodies (authority in charge: National Agency of Ukraine for Civil Service)		
	4.3.5. Introducing the advanced personnel management tools into the system of local self-government employees	To provide systematic support, to develop relevant methodology for implementation of the advanced personnel management tools	January–December 2023	
		To run a series of education and outreach activities for the leadership of local self-government bodies and employees, who are responsible for personnel management in local self-government bodies, regarding changes in the field of service in local self-government bodies	2024	
		To rebrand personnel services into human resources management services; to change values and approaches to human resources management in local self-government bodies	2024	
		To develop and implement HR strategies within local self-government bodies	2025	
		To increase the role and capacity of human resources management services, as well as their authority and influence on the functioning of local self-government bodies	2025	
	4.3.6. Creating an effective and flexible system of professional training that meets the demands of civil servants and promptly responds to the development needs of territorial communities	To develop a Concept on Development of the System of Vocational Trainings for Public Servants that shall contain options to align the current system with the existing challenges	March 2023	

		To develop the statutory instruments that shall regulate matters of changing the professional development model for public servants	December 2023	
		To build mutual engagement and interaction between all education providers in the field of vocational trainings for the employees of local self-government bodies, in particular the registration of providers and employees of local self-government bodies on the Knowledge Management Portal	2024	
		To develop a concept on promotion of systematic and permanent professional development of the employees of local self-government bodies and cultivate the culture of self-education within the public service	2024	
		To form a register of advanced training programmes for employees of local self-government bodies; to constantly update the lists of areas and topics (responding to the demand in new competences and knowledge needed for effective work and achievement of objectives) that should be included into curriculum for public servants	2025	
	Stage 3: 01/2026–12/2032			
	4.3.7. Ensuring an easy transfer from local self-government bodies to state authorities and vice versa	To develop a concept of the single “public servant” and an action plant on its implementation (authority in charge: National Agency of Ukraine for Civil Service)	2026	
		To develop a Draft law On the Principles of Public Service in Ukraine (Code on Public Service) (authority in charge: National Agency of Ukraine for Civil Service)	2026	
		To agree on the Draft law On the Principles of Public Service in Ukraine with key stakeholders (authority in charge: National Agency of Ukraine for Civil Service)	2027	

		To approve standards for the differentiated approach to human resource management within the public service (authority in charge: National Agency of Ukraine for Civil Service)	2027	
		To adopt the Draft law On the Principles of Public Service in Ukraine (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	2028	
		To develop and approve by the Cabinet of Ministers of Ukraine and central executive authorities of acts required for the implementation of the provisions of this Law On the Principles of Public Service in Ukraine (authority in charge: National Agency of Ukraine for Civil Service)	2029	
	4.3.8. Developing a favourable employer's brand of local self-government bodies	To develop a strategy on improvement of interaction with and fostering of trust to public servants (authority in charge: National Agency of Ukraine for Civil Service)	2027	
		To carry out a communication campaign on the positive image of a public servant (authority in charge: National Agency of Ukraine for Civil Service)	2027	
		To carry out a raising awareness campaign aimed at debunking of myths about the public service and public servants (authority in charge: National Agency of Ukraine for Civil Service)	2027	
		To publish all vacant positions in state authorities and local self-government bodies on the Single Portal for Vacant Positions in the Public Service; and to ensure interaction with candidates through the portal, as well as publication of the up-to-date information about the system of public service, its role, values, and objectives	2028	
	4.3.9. Introducing an integrated human resources management	To introduce the integrated human resources management system within the routine operations of local self-government bodies (authority in charge: National Agency of Ukraine for Civil Service)	2030	

	system in the system of civil service in the local self-government bodies			
	4.4. Improving the local elections system (grounds for non-holding due to inadequate security and grounds for calling early local elections)			
	Stage 1: 06/2022–12/2022			
		To develop a concept of gradual improvement of electoral legislation in the field of local elections (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	July–September 2022	
	4.4.1. To develop the criteria and procedure for impossibility to hold local elections in particular territories because of hostilities or military threats	To develop a draft law on the criteria and procedure for impossibility to hold local elections in particular territories because of hostilities or military threats (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	August 2022	
		To agree the draft law with all stakeholders (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	September 2022	
		To adopt the draft law (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	October 2022	
		Develop the relevant regulations (authority in charge: Central Election Commission)	December 2022	

	4.4.2. To review election timeframe and extend grounds for calling early local elections	To carry out a field study on the feasibility of holding local elections in the territories in which hostilities were conducted (authority in charge: Central Election Commission)	July 2022	
		To work on the alternative options regarding the timeframes for early local elections (authority in charge: Central Election Commission)	August 2022	
		To develop a draft law and agree it with stakeholders (authority in charge: Central Election Commission)	September–October 2022	
		Adopt a draft law (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	December 2022	
	4.4.3. Improvement of the election system during local elections ensuring descent representatively of the territories of territorial communities	To simulate usage of the election system taking account of profiles of the updated territorial communities (authority in charge: Central Election Commission)	January–March 2023	
		To develop the usage criteria for election systems during local elections (authority in charge: Central Election Commission)	April–May 2023	
		To develop a draft law on improvement of the local election system (beforehand the scheduled local elections) (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	June–August 2023	
		To agree the draft law with stakeholders (authority in charge: Central Election Commission)	September–October 2023	

		Adopt a draft law (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	November–December 2023	
		Develop the relevant regulations (authority in charge: Central Election Commission)	2024	
	4.4.4. Establishing and ensuring the functioning of election commissions, in particular DECs and TECs (formation procedure, provision of premises, creation of temporary premises for voting, professionalization of the election commission members)	To develop a concept of professional development (depoliticization) of members of the election commissions both on regional and subregional levels (authority in charge: Central Election Commission)	April–May 2023	
		To develop a draft law on improvement of the procedure for establishment of election commissions during local elections and professional development of members of the relevant commissions (authority in charge: Central Election Commission)	May-June 2023	
		Adopt a draft law (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	September 2023	
	4.4.5 To improve a funding procedure for interim local elections	To develop a draft law on improvement of the funding procedure for interim local elections (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	August 2023	
		To agree the draft law with stakeholders (authority in charge: Central Election Commission)	September 2023	

		Adopt a draft law (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	October 2023	
	4.4.6 Ensuring participation of citizens of Ukraine in local elections	To introduce the unified population accounting standards for territorial communities taking account of temporal internal displacement, residential qualification, circular migration etc. (authority in charge: Ministry for Communities and Territories Development of Ukraine)	July–September 2022	
		To develop a mechanism for determining the affiliation of a person to a particular territorial community for the purposes of their engagement in the local affairs management (authority in charge: Ministry for Communities and Territories Development of Ukraine)	October-December 2022	
		To conduct a study on situation with internally displaced population within the state (with breakdown by regions, possibility of return etc.) (authority in charge: Ministry for Communities and Territories Development of Ukraine)	January–March 2023	
		To agree with all stakeholders on the mechanism for determining the affiliation of a person to a particular territorial community for the purposes of their engagement in the local affairs management (authority in charge: Ministry for Communities and Territories Development of Ukraine)	February–May 2023	
		To adopt the draft law on the mechanism for determining the affiliation of a person to a particular territorial community for the purposes of their engagement in the local affairs management (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	November 2023	
		To develop a draft law on ensuring participation of citizens of Ukraine in local elections (authority in charge: Committee of the Verkhovna	December 2023	

		Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)		
		To agree the draft law on ensuring participation of citizens of Ukraine in local elections with all stakeholders (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	2024	
		To adopt the draft law on ensuring participation of citizens of Ukraine in local elections (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	2024	
	Stage 3: 01/2026–12/2032			
	4.4.7. Analysing the practice of application of the new election legislation during local elections and further improving the Electoral Code and other relevant laws	To run a study on efficiency of the election system during local elections (authority in charge: Central Election Commission)	2026	
		To carry out an analysis of application of the new election system in local elections and to unify such practices (authority in charge: Central Election Commission)	2026	
		To develop a draft law on improvement of election legislation based on the conducted studies (authority in charge: Central Election Commission)	2027	
		To agree the draft law with stakeholders (authority in charge: Central Election Commission)	2027	

		To adopt the draft law (authority in charge: Committee of the Verkhovna Rada of Ukraine on State Building, Local Governance, Regional and Urban Development)	2028

IV. Reform of oblast state administrations and raion state administrations

The armed aggression of the Russian Federation preconditions the need to find the most efficient forms and methods of public administration, continuity of operations of all the institutions at the local level, support and protection of human rights in the severe conditions of the martial law and post-war period.

The war in Ukraine has resulted in destruction of the transport, medical, social, utility and production infrastructure and housing, the energy and communication infrastructure, and has caused difficulties in implementation of the state and regional programmes for social, economic and cultural development, environmental protection programmes, etc. During the state of martial law, the constitutional system of the local executive bodies has been changed for the military state administrations in Ukraine.

In these conditions, the public authorities and local self-government bodies have to interact in order to ensure the efficient exercise of their authority during and after the war.

In the post-war period (recovery and modernisation of the country), improvement of public administration needs to be continued at the local level on a decentralisation basis, which preconditions the new “quality” and updated content of the joint actions of local public authorities and local self-government bodies. Consolidation of their efforts, i.e. their joint activity (interaction), is an important precondition and a means of democratic and decentralized management of territories, and a precondition of proper governance in the context of Ukraine’s European integration objectives and tasks.

It is important to harmonise the tendencies of centralisation and decentralisation during the state of martial law and post-war period and the challenges in national security and defence; to change the algorithm for performance of functions of the local executive bodies where new priorities are the functions associated with the national security and defence challenges, to improve the qualifications of the employees of the local state administrations, and to ensure conformity of salaries of the employees to the scope of their authority.

It is still necessary to optimise the mechanism for providing administrative services to citizens, including decentralisation (delegation) of the authority to provide administrative services to the local self-government bodies, and to furnish applicable resources.

Three key directions were identified under the National Recovery Plan. Their implementation directly depends on completion and adoption of new or already developed legislation, acts of the Cabinet of Ministers of Ukraine as well as on the well coordinated work of all levels and branches of the government in order to effectively fulfil tasks at hand.

Description of problems

1. The authority of the oblast and raion state administrations is imbalanced and imperfect for the post-war challenges.

This issues can be resolved by expanding and adjusting the authority of the local state administrations in the post-war period, in particular, having due regard to special characteristics of the territories where the relevant executive bodies operate (front-line, support, occupied, de-occupied and other ones).

Moreover, continuous training of employees of the local state administrations in the key fields (primarily, as related to defence) must be ensured in the post-war period.

The legal status of the heads, first deputy heads and deputy heads of the local state administrations needs to be regulated.

Practical implementation of this direction includes development of the amendments to the laws of Ukraine currently in force or use of the draft laws developed but not adopted by the Parliament of Ukraine. The legal status of the heads and deputy heads of the local state administrations needs to be changed gradually, after the hostilities are over.

2. The structure of the local state administrations and funding of the local executive bodies do not take the post-war challenges into consideration.

This issue can be resolved by optimising the structure of the local state administrations by means of the differentiated approach, with account of the type of the territories where respective executive bodies exercise their authority. The structure of the local state administrations must have the separate security direction with account of the experience of the military administrations during the state of martial law in 2022.

The salaries of the employees of the local state administrations have to conform to the scope of their authority.

It is also necessary to develop a system for evaluating the performance of local state administrations, which forms the basis of personnel policy. The performance of local state administrations must be measured exclusively by using specific evaluation system and methodology; the level of performance of their authority by the respective executive bodies must exceed 90%.

Practical implementation of this direction includes approval of the relevant acts of the Government of Ukraine or development of the amendments to the laws of Ukraine currently in force.

3. Imperfections of the system of interaction between the local self-government bodies and local executive bodies.

Ukraine currently has no mechanism ensuring a legal nature of activities undertaken by local self-government bodies and their officials, which materially affects the quality of the decisions made by the respective bodies and causes their negative effects. Ukraine needs to establish a multi-level system of public authorities responsible for ensuring a legal nature of activities undertaken by local self-government bodies and their officials, which will result in the coordinated work of local self-government bodies and local executive bodies.

Moreover, it is expedient to resolve the issue of coordination of the territorial bodies (departments) of the central executive authorities that exercise their authority in the respective territory by the local state administrations needs to be resolved.

Exercise of the applicable authority will help ensure effectiveness of the mechanism for interaction of the executive bodies and local self-government bodies.

Practical implementation of this direction includes development of the amendments to the laws of Ukraine currently in force or use of the draft laws developed but not adopted by the Parliament of Ukraine (for instance, Draft Law No. 4298 of 30.10.2020).

Expected outcome

Implementation of the proposed projects will enable:

to update the areas of work of oblast and raion state administrations in line with the needs of the post-war time;

to establish efficient cooperation between local executive bodies and local self-government bodies, territorial departments of central executive authorities;

to improve the qualifications of the employees of the local state administrations;

to define the legal status of heads of local executive bodies;

to ensure provision of high-quality services to people in the post-war and subsequent periods.

	Committee No.	
	Group	Public Administration
	Analysis area (of a specific component) within the direction:	Oblast and raion state administrations
	1)	Issue: the authority of the oblast and raion state administrations is imbalanced and imperfect for the post-war challenges.

		Goal: to adjust the main powers and authority of oblast and raion state administrations taking into account the needs of the post-war period, in particular those related to reconstruction, social support of citizens and defence capabilities of regions
	2)	Issue: the structure of the local state administrations and funding of the local executive bodies do not take the post-war challenges into consideration.
		Goal: to optimise the structure of oblast and raion state administrations, to ensure proper remuneration of personnel working at local state administrations
	3)	Issue: the martial law in Ukraine revealed the imperfections of the system of interaction between the local self-government bodies and local executive bodies. Territorial bodies of ministries and other central executive authorities are in the process of constant optimization, which entails the territorial inaccessibility of the state and its services.
		Goal: to ensure proper interaction of local executive bodies, local self-government bodies and territorial departments of central executive authorities for the effective management of territories in the post-war period.
	Impact of the war on the defined analysis area:	The armed aggression of the Russian Federation preconditions the need to find the most efficient forms and methods of public administration, continuity of operations of all the institutions at the local level, support and protection of human rights in the severe conditions of the martial law. In these conditions, the public authorities and local self-government bodies have to interact in order to ensure the efficient exercise of their authority during the war. Moreover, in the post-war period (recovery and modernisation of the country), improvement of public administration needs to be continued at the local level on a decentralisation basis, which preconditions the new "quality" and updated content of the joint actions of local public authorities and local self-government bodies. Consolidation of their efforts, i.e. their joint activity (interaction), is an important precondition and a means of democratic and decentralized management of territories, and a precondition of proper governance in the context of Ukraine's European integration objectives and tasks.
1.1	Key challenges (in general, for the defined area):	Hostilities in Ukraine. Destruction of the transport, medical, social, utility and production infrastructure and housing, the energy and communication infrastructure; difficulties in implementation of the state and regional programmes for social, economic and cultural development, environmental protection programmes, etc., and in the compact settlements of indigenous peoples and national minorities — their national and cultural development programmes as well. Transformation of the constitutional system of the local executive bodies into the military state administration. Enhancement of the centralisation connections and complication of the coordination connections in the executive authority system, harmonisation of the centralisation and decentralisation tendencies during the state of martial law and challenges in national security and defence.

		Changes in the algorithm for performance of functions of the local executive bodies where new priorities are the functions associated with the martial law and the national security and defence challenges. Exercise of the authority of the local state administrations granted by the state and delegated by relevant councils.
1.2	Key opportunities (in general, for the defined area):	Organisation and maintenance of continuous operations of all the institutions at the local level. Deeper interaction between the local executive bodies and local self-government bodies. Deeper vertical and horizontal interaction in the system of the executive authorities and bodies. Optimisation of the mechanism for providing administrative services to citizens, including decentralisation (delegation) of the authority to provide administrative services to the local self-government bodies, provision of applicable resources; introduction of the modern monitoring system, which has to include without limitation assessment of quality of the administrative services, including via the administrative services centres; digitalization of administrative services, which will make them closer to users. Simplification/optimisation of the administrative procedures, reduction of the administrative burden, improvement of the information systems, training of the civil servants of the local state administrations, regular assessment of such procedures and optimisation thereof. Improvement of information support of the activity of local executive bodies. Adjustment of the authority of the local state administrations with account of the post-war needs, optimisation of the structure of oblast and raion state administrations. Conformity of the salaries of the employees of the local state administrations to the scope of their authority.
1.3	Key restrictions (in general, for the defined area):	Difficulty exercising the authority of the public authorities at the local level (OSA, RSA) and local self-government bodies during the martial law, different types of territories (occupied, de-occupied, front-line ones, the ones located in the area of hostilities), limited financing and difficulty funding the authority.

2	**Goals, tasks and stages of the Recovery Plan within the direction**	Adjusting the main powers and authority of oblast and raion state administrations taking into account the needs of the post-war period, in particular those related to reconstruction, social support of citizens and defence capabilities of regions; optimising the structure of oblast and raion state administrations; ensuring adequate labour remuneration of the employees of the local state administrations; interaction of the local executive bodies, local self-government bodies and territorial units of the central executive authorities for efficient administration of the territories in the post-war period.		
2.1	**Description of issue 1 to be solved in the defined analysis area:**	*Issue: the authority of the oblast and raion state administrations is imbalanced and imperfect for the post-war challenges.*		
		Goal: to adjust the main powers and authority of oblast and raion state administrations taking into account the needs of the post-war period, in particular those related to reconstruction, social support of citizens and defence capabilities of regions		
2.1.1	Stages:	Stage 1: 06/2022–12/2022	Stage 2: 01/2023–12/2025	Stage 3: 01/2026–12/2032
2.1.2	Goal to be achieved to solve the issue during each stage:	Determining the powers of oblast and raion state administrations, which are subject to expansion and adjustment in the post-war period, in particular, having due regard to characteristics of regions where the relevant executive bodies operate. Developing the amendments to the laws of Ukraine currently in force or using the draft laws developed but not adopted by the Parliament of Ukraine, in particular, adopting the relevant law of Ukraine with the relevant provisions	Exercise of their authority by the local state administrations; ensuring the continuous training of employees of the local state administrations in the relevant fields (primarily, as related to defence).	The positions of heads of oblast and raion state administrations have been classified as civil service positions, and candidates are selected by their professional abilities. The sustainable process of professional selection of candidates to the personnel reserve (pool) for the positions of heads of OSAs and RSAs, followed by special training for the relevant positions, has been introduced. Special attention in training is paid to the security and legal matters for supervision over the legal nature of decisions of the local self-government bodies (LSGBs). The relations between the heads of the LSAs

		prepared on the basis of draft Law No. 4298.		and LSGBs are of a professional and unprejudiced nature, with no impact of party and political factors.
2.1.3	Deadline within the stage:	December 2022	December 2024	February 2026
2.1.5	Measurable goal achievement indicator	Adoption of the respective Law of Ukraine, development of adoption of subordinate acts arising out of the law	The authority of the local state administrations is exercised at the high level in the applicable fields, which satisfies the public needs. The professional qualifications of the employees of the local state administrations are high owing to regular advanced training and other forms of professional training.	Exercise of their authority by the local state administrations, which enables the respective executive bodies to maintain the appropriate quality of the services provided to the public, and support of the security element in each region. Development of proposals on adjustment of the authority where necessary.

2.1.4	Risks related to the goal achievement:	Lack of similar operating experience of local self-government and state authorities on the ground under conditions of the full-scale armed aggression.	Ongoing hostilities, impossibility of determining special characteristics of the territories where the local state administrations exercise their authority (occupied, de-occupied etc.), impossibility of implementation of their authority by the local state administrations in full	Need to adjust the authority
2.1.6	Total funding requirement for the goal achievement:	0	0	0
2.1.7	Links between the goal and other directions:	0	0	0
2.2	**Description of issue 2 to be solved in the defined analysis area:**	*Issue: the structure of the local state administrations and funding of the local executive bodies do not take the post-war challenges into consideration.*		
		Goal: to optimise the structure of oblast and raion state administrations, to ensure proper remuneration of personnel working at local state administrations		
	Stages:	Stage 1: 06/2022–12/2022	Stage 2: 01/2023–12/2023	Stage 3: 01/2026–12/2032

	Goal to be achieved to solve the issue during each stage:	Developing proposals regarding optimisation of the structure of the local state administrations by means of the differentiated approach, with account of the type of the territories (front-line, support, occupied, de-occupied and other ones) where respective executive bodies exercise their authority; developing proposals on how to achieve conformity of the salaries of the employees of the local state administrations to the scope of their authority; detaching the security sector in the structure of the local state administrations (with account of the experience of the military administrations during the martial law in 2022).	Amending the specialised laws of Ukraine; the system for evaluating the performance of local state administrations, which forms the basis of personnel policy, has been developed. The performance of local state administrations is measured exclusively by using specific evaluation system and methodology; performance level exceeds 90%	The local state administrations exercise their authority at the high level. Their authority is revised and adjusted where necessary.
	Deadline within the stage:	December 2022	December 2024	December 2026
	Risks related to the goal achievement:	Extension of martial law. Exercise of their authority by the military administrations established on the basis of the local state administrations	Lack of the sustainable element in determination of special characteristics of the regions (due to possible changes in the type of the territory etc.)	Lack of funding
	Measurable goal achievement indicator	The joint coordinated proposals have been developed on the legal and normative acts regarding changes in the structure of the local state administrations, on the legislative acts regarding changes in labour remuneration of the civil servants	Amendments to the specialised legislation	The local state administrations exercise their authority at the high level.

		of the local executive bodies etc., the system for evaluating the performance of local state administrations, which forms the basis of personnel policy, has been developed; new regional policy projects have been introduced, and the results of their implementation have been determined (based on the data analysis)		
	Total funding requirement for the goal achievement:	0	0	0
	Links between the goal and other directions:	0	0	0
2.3	**Description of issue 3 to be solved in the defined analysis area:**	Problem: The martial law in Ukraine revealed the imperfections of the system of interaction between the local self-government bodies and local executive authorities. Territorial bodies of ministries and other central executive authorities are in the process of constant optimization, which entails the territorial inaccessibility of the state and its services.		
		Goal: to ensure proper interaction of local executive bodies, local self-government bodies and territorial bodies of central executive authorities for the effective management of territories in the post-war period		
	Stages:	Stage 1: 06/2022–12/2022	Stage 2: 01/2023–12/2025	Stage 3: 01/2026–12/2032

	Goal to be achieved to solve the issue during each stage:	Developing the agreed proposals in the field of public authorities organisation at the local level, in particular in terms of changing the powers and tasks of the local state administrations related to coordination of territorial bodies (units) of central executive authorities, ensuring legal nature of the activities undertaken by the local self-government bodies and their officials. Ensuring ultimate transfer from the state to the local self-government bodies as to provision of administrative services to the public. Developing the corresponding draft law or adopting draft Law No. 4298, which contains provisions on the relevant powers and authority of the local state administrations.	Establishing a system of public authorities responsible for ensuring a legal nature of activities undertaken by local self-government bodies and their officials, and ensuring the coordinated work of local self-government bodies and local executive authorities. The state ensures its physical presence (accessibility) through inspection-type territorial divisions of CEA in each raion.	The mechanism of state supervision over the lawfulness of the activities of the local self-government bodies enjoys the public trust and allows to timely respond to all possible violations. Most potential violations of the law are remedied at the stage of consultation of the LSGBs and LSAa. Implementing the given powers, their adjustment (where necessary).
	Deadline within the stage:	end of 2022	end of 2024	December 2026
	Risks related to the goal achievement:	Opposition by the local self-government bodies	Lack of desire to resolve the issue	Opposition by the local self-government bodies, lack of desire to resolve the issue
	Measurable goal achievement indicator	Adoption of the applicable Law of Ukraine	Exercise of their authority by the local state administrations, local self-government bodies, territorial departments of the CEA at the high level within their powers.	The mechanism of state supervision over the lawfulness of the activities of the local self-government bodies enjoys the public trust and allows to timely respond to all possible violations. Sustainable interaction of the public authorities and local self-government bodies has been ensured.

	Total funding requirement for the goal achievement:	0	0	0
	Links between the goal and other directions:			0

3	**Current state of implementation of the programme documents relating to the relevant issue in the defined analysis area**		
3.1	**Title of the programme document**	**Brief description of the current state**	**Surname and name of the Group member providing the relevant information**
3.1.1.	Concept of Reformation of the Local Self-Government and Territorial Organisation of Power in Ukraine approved by Ordinance of the Cabinet of Ministers of Ukraine No. 333-p of 1 April 2014	It needs to be updated since the condition of the local self-government and territorial organisation of power in Ukraine has changed dramatically; it must be brought into conformity with the present-day challenges (martial law, permanent hostilities, etc.).	0
3.1.2.	Decision of the National Security and Defence Council of Ukraine of 15 April 2021 “On the Measures of the State Regional Policy for Supporting Decentralisation of Power” enacted by Decree of the President of Ukraine No. 180/2021 of 29 April 2021.	Implemented only by one third now	0

3.1.3.	Public Administration Reform Strategy for 2022–2025 approved by the Ordinance of the Cabinet of Ministers of Ukraine No. 831-p of 21 July 2021	Despite the fact that the Strategy implementation has begun this year, it still needs to be updated.	0

4	**Definition of tasks for the achievement of goals from paragraph 2 (for each defined goal)**				
0	**Goal (from paragraph 2)**		**Description of the task for the goal achievement**	**Deadline for the task**	**Dependence of the task on the tasks within other directions, areas and issues**
0	Stage 1: 06/2022–12/2022				
4.1	*[Describe the goal]*	*Adjusting the main powers and authority of oblast and raion state administrations taking into account the needs of the post-war period, in particular those related to reconstruction, social support of citizens and defence capabilities of regions*	Task 1. Determining the powers of oblast and raion state administrations, which are subject to expansion and adjustment in the post-war period, in particular, having due regard to characteristics of regions where the relevant executive bodies operate. Developing the amendments to the laws of Ukraine currently in force or using the draft laws developed but not adopted by the Parliament of Ukraine, in particular, adopting the relevant law of Ukraine with the relevant provisions prepared on the basis of draft Law No. 4298.	December 2022	Consistently associated with the tasks within goal 3 of this Subtitle

		Optimizing the structure of oblast and raion state administrations, ensuring proper remuneration of personnel working at local state administrations	Task 2. Developing proposals regarding optimisation of the structure of the local state administrations by means of the differentiated approach, with account of the type of the territories (front-line, support, occupied, de-occupied and other ones) where respective executive bodies exercise their authority; developing proposals on how to achieve conformity of the salaries of the employees of the local state administrations to the scope of their authority; detaching the security sector in the structure of the local state administrations (with account of the experience of the military administrations during the martial law in 2022).	December 2022	Consistently associated with the tasks within goals 1, 3 of this Subtitle
		Ensuring proper interaction of local executive authorities, local self-government bodies and territorial bodies of central executive authorities for the effective management of territories in the post-war period	Task 3. Developing the agreed proposals in the field of public authorities organisation at the local level, in particular in terms of changing the powers and tasks of the local state administrations related to coordination of territorial bodies (units) of central executive authorities, ensuring legal nature of the activities undertaken by the local self-government bodies and their officials. The National Council for the Recovery of Ukraine from the Consequences of the War

Draft Ukraine Recovery Plan

Materials of the “Recovery and development of infrastructure” working group

July 2022

Introduction

The armed aggression of the russian federation has radically changed the transport system of Ukraine. Thus, today due to hostilities on the territory of Ukraine and the imposed martial law, the airspace of Ukraine is closed for civil aviation flights. Also, the blockade of seaports on the southern coast of Ukraine has actually begun. The warships of the aggressor country block navigation in the Black and Azov Seas for ships bound for / from the seaports of Ukraine.

Due to the blockade of Ukraine's seaports, shippers and carriers are forced to change the logistics of export transportation, directing cargo to the western border crossings. Transportation of goods during the war is a difficult task due to the low capacity of border crossings in western Ukraine.

Thus, the most important challenge now is to create conditions for maintaining transport infrastructure in proper functional condition in the territories controlled by Ukraine, maintaining and increasing the capacity of checkpoints, reorientation of logistics to perform the most important functions of the country.

Also, in order to restore, rebuild, modernize transport infrastructure facilities, and gradually integrate Ukraine's transport network into the EU transport network, it is necessary to take appropriate measures and adopt a number of regulations.

The purpose of this plan is to ensure harmonization of regulations and organizational activities of the transport sector of Ukraine with EU countries to meet the needs of the population in transportation and ensure the development of the economy by changing approaches to the formation of transport and logistics solutions and modern transport infrastructure.

The recovery plan of the Working Group on Reconstruction and Development of Infrastructure is divided into areas, each of which has its own list of tasks, as follows:

- railway transport - development of passenger, cargo, luggage, baggage and mail transportation in domestic and international traffic, development of railway transport infrastructure, restoration and increase of capacity of railway border crossings on the western border of Ukraine, implementation of EU acquis to achieve organizational and technical compatibility of Ukrainian and European railways, development of competition and formation of a developed market of railway transport services;

- aviation transport - development of domestic and international passenger air transportation, as well as cargo and mail transportation, liberalization of international air transportation, restoration and development of airport infrastructure, communication, navigation and surveillance of the air traffic management system of Ukraine, implementation of the Common Aviation Area Agreement Ukraine and the EU;

- maritime and inland waterway transport - creating conditions for attracting private investment and improving the efficiency of existing capacity in Ukrainian seaports, modernizing the infrastructure of deep-sea ports, implementing joint procedures with the EU to ensure shipping safety, monitoring the movement of ships, assistance at sea, sea communication, response to pollution from ships and the creation of a national segment of the SafeSeaNet information exchange system on ship traffic and emergencies, development of port infrastructure and seaport capacity, improvement of legislation for the development of commercial seaports, transition to the European model of management “port -landlord”, development of cargo, passenger, mail and luggage transportation by sea vessels, development of passenger transportation by inland water transport, development, modernization of inland water transport and its infrastructure, expansion of the network of river ports and increasing the efficiency of existing capacity in river ports,

creating conditions for attracting private investment and stimulating the development of inland water transport;

● Road transport, urban electric transport, roads and road economy - establishing sources of financing for the construction and operation of roads; development of urban electric transport, public road transport and improvement of the control system; restoration of functioning and development of safe infrastructure of the national network of roads taking into account the inclusiveness; development of domestic and international transportation of passengers and cargo; formation of a modern market of services; introduction of the latest technologies and harmonization of legislation on road construction with EU legislation; development of a network of high-speed electric charging stations;

● provision of postal services - development and reconstruction of postal networks and facilities, provision of postal services of the established quality level;

● tourism and resorts – provision the restoration of inbound and domestic tourism, popularization of Ukraine's tourism potential in the world, ensuring the formation of tourism as a highly profitable sector of Ukraine's economy, promoting the attraction of national and foreign investments in the development of the tourism industry;

● strategic initiatives of transport infrastructure - development of multimodal transport, expansion of the network of transport corridors, attraction of investments to ensure the implementation of infrastructure development, construction, reconstruction and modernization projects, tariff policy on transport, development of information systems, modernization and construction of new border crossings.

Current status of the industry / sector:

The functioning of the transport sector, as well as the postal, tourism and resort sectors, has been significantly affected by the military aggression of the russian federation.

As of May 4, 2022 the largest ports with more than 85% of sea cargo turnover, remained under the control of Ukraine: Mykolaiv, Olviia, Odesa, Chornomorsk, Pivdennyi. To date, these seaports operate only to service railway and road rolling stock.

Three small ports at the mouth of the Danube - Izmail, Reni and Ust- Dunaisk - are fully operational and increasing cargo handling. In peacetime, they served just under 5% of exports. Now they can carry the same volumes as in peacetime, but the potential in the Danube direction is great regarding the situation with other ports.

In order to ensure stable foreign trade activities the Ministry of Infrastructure of Ukraine focuses on improving the efficiency of the Danube Maritime Cluster. Ports located in the Danube region (Reni, Izmail, Ust-Dunaisk) are operating normally, increasing the cargo base, increasing the handling of ships at berths.

PJSC "Ukrainian Danube Shipping Company" increases the involvement of its own fleet in export-import transportation and accelerates its repair to put into operation the maximum number of vessels on the Danube river in the nearest future.

At the same time, as a result of the blockade of parts of the Dnipro river in the Kherson and Zaporizhzhia regions by the terrorist troops of the russian federation, traffic on the Dnipro river was stopped, and the Kakhovka navigable lock was seized (the lock’s equipment was damaged).

There is a shortage of petroleum products as a result. The situation is complicated by the fact that a significant part of Ukraine's oil imports fell to the Republic of Belarus (from one-third to

two-thirds with the russian federation), with which, because of its support of the russian federation, Ukraine broke trade relations.

The closure of Ukrainian airspace for civil aviation flights makes it impossible for both Ukrainian and foreign airlines to operate and has led to the suspension of UkSATSE's air navigation services.

In this regard since the beginning of the martial law, road and railway infrastructure has performed vital functions - providing the possibility of evacuation and movement of the population, movement of military equipment and humanitarian goods, ensuring the functioning of the economy, social sphere and industries. At the same time because of amendments to the Tax Code of Ukraine and the Customs Code of Ukraine, the state road fund almost doesn't have sources of income, as the project amount of funds from the remaining sources is about 0.04% of the approved state budget.

Also, since the beginning of the military aggression of the russian federation, most postal operators have suffered significant losses due to significant destruction of postal facilities and postal infrastructure in areas where active hostilities were taking place. Some of the postal facilities remained in the temporarily occupied territories. Most market participants have experienced significant labor outflows in the North, East and South of Ukraine. There was a destruction of aviation and sea logistics routes for delivery of international mail and express items. Logistics in the middle of the country has become much more complicated, including due to fuel shortages.

According to Euromonitor International, global inbound tourism lost $ 6.9 billion in 2022 due to the war in Ukraine. The extent of the damage and the long-term consequences are difficult to assess for now as hostilities have been continuing all over the country till now.

Key numerical indicators, the impact of the war on the industry, the state of implementation of program documents, etc.

Since the beginning of the war of the russian federation against Ukraine there has been significant damage to the transport infrastructure. Thus, as of the beginning of May 2022: 6.3 thousand km of railway network were destroyed or significantly damaged, 41 railway bridges were destroyed, the operation of 21 railway stations was stopped, more than 23 thousand km of roads and 300 road bridges were destroyed, 4 seaports were occupied. Due to the continuation of hostilities in some areas of our country the total final number of destructions is currently impossible to determine.

In total since the beginning of russia's military aggression against Ukraine the total amount of direct documented infrastructure damage is more than $ 88 billion.

● rail transport:

JSC "Ukrzaliznytsia" entered the war period as the largest employer in the country with a staff of 231 thousand employees, a profit of 17 million dollars in 2021, the company provided 82% of freight and 50% of passenger traffic.

In January-April 2022 65.9 million tons of cargo were transported, which is only 69% of the level of the same period in 2021. At the same time, in January-April 2022 7.4 million passengers were transported by railway, which is 1.5 million passengers more than in the same period of 2021. The largest increase (64%) took place in March 2022 due to evacuation of people. Such transportation was free of charge. At the same time, after the reduction and gradual cancellation of evacuation trains, passenger traffic decreased significantly, as a result - in April 2022 were transported 19% less passengers than in the same period of 2021.

Since the first days of the war JSC Ukrzaliznytsia has transported more than 7 000 tons of humanitarian aid from west to east in passenger cars. The direction of freight transportation is also developing - it is more than 1400 cars (approximately 70 000 tons) per month with humanitarian aid, as well as the direction of container transportation, which provides transportation from neighbour countries to Kyiv, Kharkiv, Zaporizhzhia and Odesa.

JSC "Ukrzaliznytsia" provides evacuation of people: in average 3 million passengers per a month, including 40 thousand passengers - to neighbour countries. The necessary assistance is provided to passengers at all hub passenger stations as well as humanitarian aid is unloaded, food and equipment are provided.

At the same time, due to hostilities there was a significant decline in freight traffic (for 4 months of 2022 by 31% compared to the same period in 2021).

In fact, transit traffic on international corridors connecting Asia - Europe was interrupted. Transit traffic by railway during the war (March-April 2022) decreased against the level of the same period in 2021 by 88.4%.

The enemy is constantly launching targeted missile strikes on the railway infrastructure. As of May 5, 2022, the total value of losses caused to JSC "Ukrzaliznytsia" due to the destruction of the assets of the Company due to the aggression of the russian federation is UAH 6.8 billion.

Regarding the state of implementation of program documents it should be noted that the implementation of the railway transport reform was suspended with the beginning of martial law.

● aviation transport:

Today, the Ministry of Infrastructure includes UkSATSE, SE Boryspil International Airport and Lviv International Airport, of which UkSATSE and UB Boryspil have suffered losses caused by destruction and damage to state property. infrastructure facilities, equipment and vehicles) during the military aggression of the russian federation against Ukraine.

In total, of the 19 existing civilian airports, airfield complexes (runways, buildings, structures) at 12 airports were destroyed. The estimated loss from airports and air navigation equipment is about UAH 200 billion. Implementation of aerodrome infrastructure modernization projects, including within the framework of the State Target Program for Airport Development for the period up to 2023, approved by the Resolution of the Cabinet of Ministers of Ukraine of February 24, 2016 № 126, has been suspended.

● sea and inland water transport:

Seaports in Ukraine are not only the main way to export products of the agro-industrial complex, which brought $ 27.9 billion in 2021, but also a source of export of metallurgy ($ 16.0 billion), chemical industry ($ 2.7 billion), export of mineral fertilizers ($ 8.42 billion).

According to the order of the Ministry of Infrastructure of Ukraine dated April 28, 2022 № 256 "On the closure of seaports" registered in the Ministry of Justice of Ukraine on April 29, 2022 as № 470/37806 the seaports Berdiansk, Mariupol, Skadovsk, Kherson have been closed from the date of entry into force of this order till the restore of control over these seaports. The International Maritime Organization (IMO) was informed about this by a corresponding note of the Ministry of Foreign Affairs, which in turn brought the mentioned information to the governmental and non-governmental organizations of the member states.

Taking this measure is caused by the impossibility of servicing ships and passengers, carrying out cargo, transport and other related economic activities, ensuring the appropriate level

of shipping safety, compliance with international agreements of Ukraine, the consent of which was given by the Verkhovna Rada of Ukraine, and also ensuring the protection of the environment at a time when russia continues its active hostilities in these regions with a threat to human life and health.

These actions hit the economy of Ukraine as sea transport fulfilled about 70% of exports of Ukrainian producers (about $ 47.0 billion) and a significant part of import. According to current estimates Ukraine has been losing $ 170 million per day due to blocked ports, and the estimated direct damage caused from February 24, 2022 to the infrastructure of maritime and inland water transport of state ownership is about $ 622 million.

In 2021 the cargo turnover was 153.3 million tons, transportation by the Dnipro - 14.4 million tons. The expected forecast for cargo turnover for 2022 was 161.2 million tons, for river transportations – up to 15.8 million tons.

Regarding the status of implementation of program documents - the implementation of key program documents in the field of maritime and inland water transport (Maritime Doctrine and Strategy for the Development of Seaports of Ukraine) has been stopped, the tasks of the Action Plan for the implementation of the National Transport Strategy of Ukraine and the National Economic Strategy of Ukraine cannot be fulfilled.

● Road transport, urban electric transport, roads and road economy:

According to operative information, as of June 8, 2022, as a result of hostilities about 23.9 thousand km of public roads of state importance in Volyn, Dnipropetrovsk, Donetsk, Zhytomyr, Zaporizhzhia, Kyiv, Luhansk, Mykolaiv, Odesa, Sumy, Kharkiv, Kherson, Chernihiv regions were destroyed in different ways.

304 bridges and bridge crossings were also destroyed.

Due to the hostilities for now in some parts of our country the total final scope of the destruction of public roads is currently impossible to determine.

There is an issue of a comprehensive solution of the problems of stable operation of the network of urban and suburban transport. It is a result of the current state of passenger transportations in cities and places of Ukraine and its suburbs, the destruction of infrastructure and destruction or damage to buses, trolleybuses, trams, subway cars, etc. and blocking the operation of urban electric transport due to military aggression of the russian federation. Currently, approximately at 40% of cities and places the passenger transportations have stopped due to the military aggression of the russian federation against Ukraine, as well as road connection in the 50-kilometer zone.

Under martial law the transportation of goods by sea and air transport is not carried out temporarily, and by railway it is limited. That’s why the domestic market of transport services is transformed towards the priority use of road transport for goods transportation (both commercial and humanitarian cargoes). The logistics of international road transportations was affected by the impossibility of transit through the territory of the aggressor country and its ally Bilorus. Measures are also needed to diversify fuel supplies from Western countries. Currently, fuel is imported mainly from Poland, Romania, Slovakia, Moldova and Hungary, and its volume is constantly growing. Also for today as a result of russian aggression, Ukraine has experienced problems with the export of Ukrainian products, including agro-industrial products. To do this, it is necessary to develop alternative routes for delivery of goods to EU countries and other markets through Europe. It is necessary and important to ensure the intensification of economic processes, especially in

wartime, by means of cancellation of permits as an administrative barrier, which is a constraint for the free market.

Regarding the status of implementation of program documents - the State Targeted Economic Program for the Development of Public Roads of State Importance for 2018-2022, approved by the Cabinet of Ministers of Ukraine dated March 21, 2018 № 382. actions, with varying degrees of destruction of road sections and their components, which were built or repaired as part of the program.

● postal services

Since the beginning of the military aggression of the russian federation, most postal operators have suffered significant losses due to significant destruction of postal facilities and postal infrastructure in areas where active hostilities were taking place. Some of the postal facilities remained in the temporarily occupied territories. Most market participants have faced a significant outflow of labor in the North, East and South of Ukraine. There was a destruction of aviation and sea logistics routes for delivery of international mail and express items. Logistics within the country has become much more complicated, including due to fuel shortages.

Regarding the status of implementation of program documents - currently there are no program documents in the field of postal services. The key directions of development of the sphere are defined in the Program of activity of the Cabinet of Ministers of Ukraine approved by the resolution of the Cabinet of Ministers of Ukraine from June 12 not in 2020 № 471.

● tourism and resorts

Also, 2022 was another test for the tourism industry of Ukraine. In Kyiv, in the East and in the South of Ukraine the tourist sphere has completely stopped. It is still difficult to estimate the losses and they will depend on the number of destroyed cultural and historical monuments, tourist destinations and the duration of hostilities, the size of the occupied and mined areas. In the first four months of the year, representatives of the tourism industry of Ukraine paid 18% less taxes than in the same period in 2021 and the number of taxpayers decreased by 10%.

Key challenges in the field:

● Permanent purposeful destruction of objects of railway, aviation and air navigation, sea and inland water, postal, tourist, road infrastructure, the need for their restoration;

● Disruption of transport and logistics transport chains and forced reorientation of freight and passenger flows due to the blocking of seaports, closure of airspace, destruction of transport infrastructure (the need to redirect to the western road and rail border crossings);

● The need to lift the naval blockade of Ukrainian ports and unblock part of the Dnieper in Kherson and Zaporizhia regions, resume shipping, expand the capacity of the Danube Maritime Cluster, create infrastructure to increase cargo flow across the Danube, resolve difficult situations with Ukrainian sailors abroad and foreign members located in Ukrainian seaports;

● The need to provide priority free transportation for the state for military and humanitarian purposes (military transportation, evacuation of people, relocation of enterprises, transportation of humanitarian aid);

● Preservation of outdated procedures and processes of providing transport services that do not meet modern requirements;

● The need to resume the operational activities of Ukrainian airlines, airports and resume the provision of air navigation services in the airspace of Ukraine;

● Incomplete reform of the industry in accordance with European directives (and at the same time lack of implementation capacity for implementing a significant part of structural changes and reforms in wartime);

● Lack of tourist flows to Ukraine; danger of being in many regions of the country;

● Reduction of sources of funding and the need to ensure its minimum required and regulatory level. Increasing risks for investments in connection with hostilities, reducing the interest of private investors to participate in PPP investment projects in Ukraine due to security and financial risks;

● Deficit and increase in the cost of fuels and lubricants, which leads to an increase in the cost and reduction of traffic;

● Critical destruction of tourist infrastructure, historical monuments, museums, theaters, etc. Limited tourist information network;

● Low level of inclusion (accessibility for people with disabilities and other low mobility groups);

● Insufficient integration of Ukrainian transport networks into the European transport network TEN-T.

Key features:

● Restoration of roads and man-made structures to accelerate the reconstruction of defense, civil and critical infrastructure, ensuring the connection of settlements for the timely delivery of humanitarian aid and other goods;

● Restoration of air transportation and achievement of at least the pre-war level of passenger traffic (16.2 million passengers in 2021) and the transit potential of Ukrainian airspace;

● Increasing capacity, modernization and development of ports in the Danube region;

● Increasing and updating rolling stock to meet the full needs of Ukraine's economic recovery;

● Construction and reconstruction of western border crossings, development of their capacity and improvement of procedures for control and registration of vehicles (in order to establish the logistics of transportation and border crossing for freight and passenger transport);

● Taking into account modern standards in the process of infrastructure restoration (for example, for passenger infrastructure - taking into account the requirements for access of persons with disabilities);

● Improving the system of traffic flows (including the development and implementation of traffic management schemes using automated traffic management systems);

● Use of the international level information field, which is currently full of news about Ukraine, to cover the current situation, as well as to highlight the country's tourism potential in the postwar period. Orientation of the sphere of tourism and resorts to conditionally safe areas where there are no active hostilities;

● Further digitalization of processes;

● Deepening cooperation and improving coordination with EU countries on the organization of transportation and development of the TEN-T network.

Key constraints / framework:

● Russia's ongoing large-scale military aggression against Ukraine, the actual functioning of the industry during the war state for an indefinite period;

● Lack of objective information on the extent of destruction of transport infrastructure;

● Significant difficulties in the development, modernization, reconstruction of damaged infrastructure (lack of funding, security risks, the need for demining of relevant facilities and determine their actual technical condition);

● Incompatibility of railway infrastructure of Ukraine and EU countries;

● Closure of Ukrainian airspace in connection with the imposition of martial law;

● Limited number of ports in operation compared to the pre-war situation;

● Lack of sustainable financing of works on restoration / construction / modernization of transport and logistics (multimodal) terminals in accordance with the requirements of radical change of cargo flows;

● Different from the EU countries regulatory framework governing the activities of the transport sector (and in particular the conduct of control procedures when crossing the state border);

● Insufficient development of information systems and electronic registers.

I. Sphere of railway transport

1. The main issues to be addressed in the Recovery Plan

Current state of the industry / sector:

Key numerical indicators

In January-April 2022, 65.9 million tons of cargo were transported, which is only 69% of the level of the same period in 2021. At the same time, during the military aggression of the russian federation (during March-April 2022), 17.5 million tons were transported. The decline in traffic due to the war was 66.2% compared to the level of traffic for the same period in 2021.

Including by types of communication:

Tipe of comunication	**From the beginning of the year (million ton)**			**March-April (million ton)**		
	2022	**2021**	**% 2022 to 2021**	**2022**	**2021**	**% 2022 to 2021**
total	65,94	95,55	69,0	17,50	51,7	33,8
transit	2,43	3,69	65,9	0,23	1,98	11,6
import	7,89	12,78	61,7	1,10	6,67	16,5
export	26,29	33,59	78,3	6,95	17,56	39,6

internal communication	29,34	45,48	64,5	9,22	25,49	36,2

In January-April 2022, 7.4 million passengers were transported by rail, which is 1.5 million passengers more than in the same period of 2021. The largest increase (64%) occurred in March 2022 due to evacuation. At the same time, such transportation was free of charge. At the same time, after the reduction and gradual cancellation of evacuation trains, passenger traffic decreased significantly, as a result - in April 2022, passengers were transported 19% less than in the same period of 2021.

The impact of war on the industry

JSC "Ukrzaliznytsia" entered the war period the largest employer in the country with a staff of 231 thousand employees, with a profit of 17 million US dollars in 2021; the company provided 82% of freight and 50% of passenger traffic.

The direction of freight transportation is also developing - it is more than 1400 cars (approximately 70 000 tons) per month with humanitarian aid, as well as the direction of container transportation, which provides transportation from neighbour countries to Kyiv, Kharkiv, Zaporizhzhia and Odesa.

JSC "Ukrzaliznytsia" provides evacuation of people: in average 3 million passengers per a month, including 40 thousand passengers - to neighbour countries. The necessary assistance is provided to passengers at all hub passenger stations as well as humanitarian aid is unloaded, food and equipment are provided.

At the same time, due to hostilities there was a significant decline in freight traffic (for 4 months of 2022 by 31% compared to the same period in 2021).

In fact, transit traffic on international corridors connecting Asia - Europe was interrupted. Transit traffic by rail during the war (March-April 2022) decreased against the level of the same period in 2021 by 88.4%.

Due to the blockade of Ukrainian seaports, shippers and carriers are forced to change the logistics of export transportation, directing cargo to the western border crossings. Transportation of goods during the war is a difficult task due to the low capacity of border crossings in western Ukraine, not designed for transshipment of large volumes of grain and ore. The total capacity of, for example, "grain" routes is about a million tons per month, and in peacetime through the ports were exported about 4-5 million tons per month. This led to a significant drop in export traffic (by 60.4%).

The enemy is constantly launching targeted missile strikes on the railway infrastructure. As of 05.05.2022, the total value of losses caused by JSC Ukrzaliznytsia due to the destruction of the Company's assets due to the aggression of the russian federation is UAH 6.8 billion.

Status of implementation of program documents

The main program document in the field of railway transport is the National Transport Strategy of Ukraine for the period up to 2030, approved by the order of the Cabinet of Ministers of Ukraine dated 30.05.2018 № 430 (hereinafter - the Transport Strategy).

As of the beginning of the war, the Action Plan for the implementation of the National Transport Strategy of Ukraine for the period up to 2030, approved by the order of the Cabinet of Ministers of Ukraine dated April 7, 2021 № 321 was being implemented.

Measures to reform railway transport were also defined by the Action Plan for the implementation of the Association Agreement between Ukraine, on the one hand, and the European Union, the European Atomic Energy Community and their Member States, on the other hand, approved by the Cabinet of Ministers of 25.10.2017 № 1106, and the Plan of measures for the reform of railway transport, approved by the order of the Cabinet of Ministers of Ukraine dated December 30, 2019 № 1411.

Regarding the reform of railway transport - as of the beginning of 2022, measures were taken to ensure the legislative functioning of the European model of the railway transport market. Thus, the Committee of the Verkhovna Rada of Ukraine on Transport and Infrastructure, the Ministry of Infrastructure and JSC Ukrzaliznytsia jointly finalized the draft Law of Ukraine "On Railway Transport of Ukraine". At the same time, the Ministry of Infrastructure has been developing draft bylaws to implement the necessary rules and procedures for access to the rail transport market.

A gradual reform of the tariff system for railway transport services was carried out. Thus, in order to ensure free pricing in the competitive sectors of the transport services market, since19.02.2018 wagon component in the tariff for the carriage of goods by rail within Ukraine in the cars owned by JSC «Ukrzaliznytsia» was deregulated. On October 29, 2021, the Ministry of Infrastructure adopted Order № 586, the implementation of which provides for an additional reduction of the disproportion between the levels of tariff classes of goods, improvement of tariff policy on railway transport.

At the same time, it should be noted that the implementation of the railway transport reform was suspended with the beginning of martial law.

Regarding the implementation of infrastructure projects - in recent years in Ukraine began an active process of modernization and electrification of railway infrastructure, including from the state budget, JSC "Ukrzaliznytsia" own funds and funds attracted under state guarantees of international financial institutions. In 2021, 2 infrastructure projects were implemented and 4 large infrastructure projects were launched. A total of UAH 4.6 billion (EUR 153 million) was invested in the construction, modernization and reconstruction and electrification of railway infrastructure in 2021, including UAH 0.7 billion at the expense of the State Budget of Ukraine, UAH 3.9 billion. UAH - at the own expense of JSC Ukrzaliznytsia. Of these, UAH 0.5 billion was used for construction, UAH 0.2 billion for reconstruction with electrification and UAH 0.2 billion for modernization.

With the beginning of the war, the infrastructure of railway transport was subjected to constant and targeted shelling and destruction. Thus, the implementation of the infrastructure projects identified by the Transport Strategy was stopped.

Measures to ensure the accessibility of rail transport for people with disabilities are also defined by the National Strategy for the creation of barrier-free space in Ukraine until 2030, approved by the Cabinet of Ministers of Ukraine dated April 14, 2021 № 366.

As part of the implementation of this strategy, pilot stations, which were supposed to lead to standards for ensuring unimpeded access for people with disabilities, were identified.

After the end of martial law, accessibility for persons with disabilities and other low-mobility groups will be taken into account during the reconstruction of railway transport infrastructure facilities destroyed by hostilities.

Key challenges in the field:

● Permanent targeted destruction of railway infrastructure;

● The need to provide priority free transportation for the state for military and humanitarian purposes (military transportation, evacuation of people, relocation of enterprises, transportation of humanitarian aid);

● Forced change in the logistics of export rail transportation due to the blockade of seaports of Ukraine and change in the areas of formation of the cargo base (the need to redirect to the western border crossings);

● Today it is difficult to predict the process and geography of recovery of industrial enterprises that actually form freight flows for the railway industry;

● Outdated procedures and processes of providing transport services that do not meet modern requirements are preserved in some places;

● Incomplete reform of the railway sector in line with the EU acquis (at the same time, the implementation of any structural changes and basic reforms of the railway market in wartime is impractical).

Key features:

● As of the beginning of 2022, most of the railway infrastructure facilities needed to be repaired and modernized. When rebuilding the infrastructure, it is advisable to take into account modern standards (for example, for passenger infrastructure - taking into account the requirements for accessibility for people with disabilities);

● Diversification of export transportation logistics by developing the capacity of western border crossings;

● Improving the coordination of the transportation process with EU countries;

● Improvement of technological processes.

Key constraints / framework:

- Ongoing full-scale military aggression of the russian federation against Ukraine;

- Incompatibility of railway infrastructure of Ukraine and EU countries;

- The need for construction / modernization of transshipment complexes in accordance with the requirements of a radical change in cargo flows.

2. Goals, objectives, stages of the Recovery Plan in the direction of "restoration of the railway transport sector"

2.1. Stage economics and institutions of wartime (short-term) - "Everything to win!"

(Explanation: Expected planning dates: (June 2022 - end of 2022 *)

* In case of continuation of active hostilities, the plan will be adjusted in the 4th quarter of 2022, respectively, this phase (with the planning of major activities and their financing) will be extended to 2023.

Main priorities / accents:

At all stages of the implementation of infrastructure rehabilitation projects, the principles of integrity, transparency and accountability and other necessary measures aimed at minimizing corruption risks must be ensured. In addition, it is mandatory to comply with environmental and sanitary safety requirements when dismantling debris and reconstruction of buildings and engineering structures.

The main priorities for ensuring the efficient operation of railway transport in wartime are related to overcoming challenges to change logistics routes due to the blocking of Ukrainian seaports by the aggressor, and the need to increase the capacity of western border crossings, primarily due to the need to change track gauge. It should also be noted that this work should be coordinated with Western partners, in particular with Poland, Hungary, Romania, Slovakia on the modernization and increase of railway capacity of the respective countries to ensure the ability to accept all cargo offered by Ukraine.

To this end, on May 12, 2022, the Verkhovna Rada of Ukraine adopted the Law of Ukraine "On Amendments to Certain Legislative Acts of Ukraine on Peculiarities of Regulation of Land Relations in Martial Law", which provides, in particular, simplification of land allocation for construction of multimodal terminals and production facilities. reloading complexes in martial law. This will create favourable conditions for the development of transport and logistics infrastructure on the western borders of Ukraine.

Increasing logistics potential

Tasks for the period:

- development of a phased plan for the full transition to paperless technologies for the support of rail freight, including customs and border control procedures, including with EU countries;

- analysis of the potential to increase the interoperability of transportation, the use of infrastructure of tracks of the European model(1435 mm), located on the territory of Ukraine, and 1520 mm tracks, located on the territories of neighboring EU countries;

- analysis of the possibility of construction and use of innovative cars and specialized containers on the railways of Ukraine.

Acquisition of the status of a candidate for EU membership.

Tasks for the period:

- to resume work on the draft Law of Ukraine "On Railway Transport of Ukraine"; the optimal scenario is to adopt the Law by the end of 2022;

- to revise the Plan of measures for the reform of railway transport, approved by the order of the Cabinet of Ministers of 30.12.2019 № 1411, taking into account the new realities of wartime and postwar.

At the same time, it is expedient to "reasonably" postpone the introduction of new principles of the railway transportation market (at least 2 years after the end of martial law), as the implementation of any structural transformations and basic reforms of the railway transportation market during wartime is impractical.

2.2. Recovery phase (medium term) - "Recovery, restart of the economy and institutions"

(Explanation: Expected planning terms: (2023 - 2025, with separate details for 2023)

* In case of continuation of active hostilities, the plan will be adjusted in the 4th quarter of 2022, respectively, this phase (with the planning of major activities and their financing) will be postponed to 2024-2026.

Main priorities / accents:

Given the systematic and purposeful destruction of the railway infrastructure by the aggressor, the main task of the postwar period will be:

- restoration of railway infrastructure;

- adjustment and restoration of full-fledged operation of railway transport.

Restoration of the destroyed infrastructure of railway transport should take into account possible changes in the location of large industrial enterprises, and, accordingly, the places of origin of freight flows. It can be assumed that the location of extractive industries and agriculture will not change, but the question remains as to the enterprises that were destroyed, as well as the enterprises that used the relocation mechanism, and accordingly moved their production facilities to the western regions of Ukraine.

In addition, the extent of infrastructure recovery will depend on the number of destructions, which are increasing day by day. It is already possible to speak with confidence, for example, about the urgent need to rebuild the destroyed traction substations in order to restore the electrification of railways.

A preliminary list of investment projects for the restoration of railway infrastructure is contained in section 3 of the proposals to the Plan. At the same time, after the end of the martial law it is advisable to form an interdepartmental working group to analyze changes in the formation of cargo flows in the postwar period (which will be affected at least by the dynamics of industrial recovery and changes in the location of enterprises). The work of this group will also influence the addition of long-term (strategic) planning projects in the future.

The use of new standards in the restoration of railway infrastructure is mandatory, in particular in terms of ensuring the accessibility for passenger infrastructure for passengers with disabilities and other low-mobility groups.

Among the infrastructure projects for the medium term, the following should be noted:

- reconstruction of the destroyed railway infrastructure (with electrification) in the direction of seaports on the latest technologies;

- increasing the capacity of the railway with the EU countries by building and modernizing complexes for relocation of cars from 1520 mm to 1435 mm gauge tracks and transshipment capacity (logistics centers) within or outside the state border checkpoints at border crossings with the EU, taking into account the requirements of interoperable and efficient use of railway infrastructure of 1435 mm and 1520 mm systems;

- development of railway infrastructure in the direction of the ports of Reni and Izmail (in particular, construction of the second track, electrification (development in the direction of the EU railway corridor Rhine - Danube);

- modernization of existing and construction of new logistics multimodal terminals in the western and southern regions of Ukraine with the functions of integrated transport and logistics centres, customs services and the use of modern digital logistics management solutions (TMS, YMS, WMS);

- creation of modern standardized multimodal station centers in small cities of Ukraine (first of all, in those affected during the war) which will provide city residents with comfortable and convenient transfer to other modes of transport, recreational and trade zones and integrated security system population (network of bomb shelters) on the basis of railway stations (Pilot project in the planning process - the station in Trostyanets);

- complex reconstruction of key railway stations and adjacent territories with construction of multimodal passenger hubs in the main city conglomerates (Kyiv, Lviv, Kharkiv, Dnipro-Zaporizhzhya, Odesa), which will combine the railway with different types of public transport with convenient schedules and transfers, as well as cities with suburbs by modern suburban trains (City Express projects);

- providing high-speed and comfortable connections with modern interregional Intercity trains for residents of major regional centers, which provides for the purchase of new trains, modernization of railway infrastructure to increase speeds to 160 km / h (in the future 200 km / h), electrification of railway sections;

- implementation of the plan of full transition to paperless support of railway freight transportation.

- creation of a joint logistics company with Poland and, in the future, with Lithuania, Latvia and Estonia, to increase the volume of rail transportation of Ukrainian exports to the EU and world markets through Europe.

The establishment and restoration of passenger rail service should take place immediately after the restoration of control over the territories.

Restoration of freight rail service to the level of 2019 (before the war and before the coronavirus disease pandemic) will depend primarily on the scale and pace of recovery of Ukrainian industry. At the same time, large-scale reconstruction of Ukrainian cities will require the coordinated work of all modes of transport, including rail transport, in order to deliver construction materials.

Among the investment projects to restore the operation of railway transport in the medium term, it should be noted:

- acquisition of new passenger rolling stock (passenger cars, railcar rolling stock) taking into account the requirements of inclusiveness;

- acquisition of traction rolling stock;

- purchase of freight cars (taking into account EU standards and EU requirements for dimensions) on the basis of a needs analysis taking into account the losses of freight cars during hostilities;

- reconstruction of car and locomotive repair plants to provide maintenance of rolling stock.

Fulfillment of most of the requirements for EU membership (in terms of reforming the railway transport sector).

The first tasks of the postwar period will be:

- adoption by the Verkhovna Rada of Ukraine of the revised draft Law of Ukraine “On Railway Transport of Ukraine”;

- approval of the plan of implementation of the Law of Ukraine "On Railway Transport of Ukraine";

- approval of changes to the Railway Transport Reform Plan.

The main measures for the implementation of the Law of Ukraine "On Railway Transport of Ukraine" should include:

- development and adoption of necessary bylaws;

- creation of new state institutions (or reorganization of existing ones) to ensure the implementation of new tasks related to market opening (The National Commission, which carries out state regulation in the field of transport, railway transport safety authority, institution for investigation of railway transport events);

- introduction of new procedures for access to the railway market (licensing, safety certification, admission of railway subsystems to the market);

- training for potential carriers to ensure their readiness to participate in the rail market;

- introduction of technical specifications for interoperability of railway transport subsystems.

A separate measure to ensure the functioning of a competitive railway market is the structural reform of JSC "Ukrzaliznytsia" in accordance with the requirements of the EU acquis and its completion by the time when the new Law of Ukraine "On Railway Transport of Ukraine" will enter into force. The main tasks of the Company's structural reform are organizational and financial separation of the infrastructure and transportation operator, ensuring transparency of financial flows within the Company and preparation of JSC Ukrzaliznytsia for the opening of a competitive railway transportation market. This issue should be one of the main key indicators of the effectiveness of the Company's Supervisory Board. At the same time, it is important to obtain a positive compliance check of European experts on the compliance of the new structure of JSC "Ukrzaliznytsia" with the requirements of the EU acquis.

Modernization stage (strategic) - "Structural modernization and full integration into the EU"

(Explanation: Expected planning dates: (2026 - 2032 *)

The planning dates of the stage will be adjusted based on the results of 2022-2023.

Main priorities / accents:

At the stage of modernization of railway infrastructure, it is necessary to take into account the need to optimize the existing network of railway infrastructure, taking into account freight and passenger traffic in certain sections.

In addition, during this period and in the future, when considering new investment projects (including with the participation of the intergovernmental working group, the creation of which is planned) should consider the possibility of such projects in compliance with the European standard width (1435 mm).

Possible strategic investment projects include:

- development of a network of logistics multimodal terminals with the functions of integrated transport and logistics centres, customs services and the use of modern digital logistics management solutions (TMS, YMS, WMS);

- introduction of a system of automatic transition of rolling stock from a track of one width to a track of another width (from 1520 mm to 1435 mm) without stopping the train;

- construction of a 1435 mm wide track (parallel to the existing 1520 mm track) in the direction of Chop - Uzhhorod - Lviv (joining the EU Mediterranean railway corridor);

- ensuring compliance of the railway infrastructure in the main areas with the requirements of the core network TEN-T (EU Regulation № 1315/2013 of 11 December 2013 on the Union guidelines on the development of the trans-European transport network and repealing Decision № 661/2010 / EU);

- continuation of complex reconstruction of key railway stations and adjacent territories with construction of multimodal passenger hubs in the main city conglomerates (Kyiv, Lviv, Kharkiv, Dnipro-Zaporizhzhya, Odesa), which will combine the railway with different types of public transport with convenient schedules and transfers. connection of cities with suburbs by modern suburban trains (City Express projects);

- introduction of the mechanism "land value capture", with the transfer of railways within the cities underground, which will rebuild and develop the war-affected cities-satellites of Kiev (Bucha, Irpin, Brovary) and others, with the construction of affordable housing for Ukrainians who lost it as a result of the war;

- construction of a high-speed railway (HSR) on the route Kyiv-Warsaw (total length - 919 km, of which on the Ukrainian side - 585 km (Kyiv-Yagodyn-State Border). The implementation of this project will reduce travel time on this route from 17-19 hours to 5-6 hours, by reaching an average speed of 180 km / h The estimated cost of the Ukrainian part of the project, including the modernization of man-made structures and stations, will be EUR 1170 million (UAH 35 958.43 million at the official exchange rate of the NBU as of June 25, 2022), the cost of 1 km of track is approximately EUR 1.5 million, the cost of works on the Polish side will be subject to a separate assessment and will not be included in the Plan.

European integration

In the long run the introduction of a competitive market for rail transport, the involvement of private business to work in the market, as a result - an increase in investment in the industry, are planned.

The gradual implementation of the following packages of EU acts in the field of rail transport is envisaged, including Regulation (EU) 2016/796 of the European Parliament and of the Council of 11 May 2016 on the European Union Railway Agency, and Directive 2016/797 of the European Parliament and of the Council of 11 May 2016 on compatibility of the railway system (interoperability) in the European Union, including mutual recognition of documents with the European Railway Agency (ERA).

II. Sphere of aviation transport

1. The main problems that need to be addressed within Recovery plan (in this direction)

Current state of the industry / sector:

Today, the Ministry of Infrastructure manages UkSATSE, SE Boryspil International Airport and SE Lviv International Airport, of which UkSATSE and SE Boryspil International Airport have suffered losses caused by destruction and damage to state property. infrastructure facilities, equipment and vehicles) during the military aggression of the Russian Federation against Ukraine.

In total, of the 19 existing civilian airports, aerodrome complexes (runways, buildings, structures) at 12 airports were destroyed. The estimated loss from airports and air navigation equipment is about UAH 200 billion.

To date, due to hostilities on the territory of Ukraine and the imposed martial law, the airspace of Ukraine is closed to civil aviation, which made it impossible for both Ukrainian and foreign airlines to operate and led to the suspension of s air navigation services by UkSATSE.

An integral part of the aviation industry is aviation personnel, which losing their qualifications, skills and abilities due to forced downtime, and issued certificates are threatened with loss of legitimacy.

Implementation of aerodrome infrastructure modernization projects, including within the framework of the State Target Program for Airport Development for the period up to 2023, approved by the Resolution of the Cabinet of Ministers of Ukraine of February 24, 2016 № 126, has been suspended.

Key challenges in the field:

- the need to restore the objects of aviation and air navigation infrastructure, damaged or destroyed as a result of the military aggression of the Russian Federation against Ukraine, and the operational activities of Ukrainian airlines;

- resumption of air navigation services in the airspace of Ukraine;

- the need to fly-by the airspace of Belarus and Russia for Ukrainian airlines - additional time and costs of national airlines, and consequently the loss of competitiveness in flights to / from Northern Europe, the Caucasus, Central Asia and the Far East.

Key features:

- resumption of air transportation and achievement of at least the pre-war level of passenger traffic (16.2 million passengers in 2021);

- resumption of air cargo transportation;

- restoration of the transit potential of the airspace of Ukraine.

Key constraints / framework:

- the ongoing large-scale military aggression of the Russian Federation against Ukraine;

- lack of funding for the maintenance of the aviation industry during military aggression and works to restore damaged aviation and air navigation infrastructure;

- adaptation of national legislation to the EU legislation.

2. Goals, objectives, stages of the Recovery Plan (in this area)

2.1 Purpose - one or more generalized goals, proposed changes to solve problems in the area

Restoration and development of aviation mobility of the population and transit potential of the airspace of Ukraine. Restoration of air cargo transportation.

2.2 The main tasks indicating the necessary measures / steps for their implementation, divided into stages

1) Reconstruction and further development of the airport infrastructure of Ukraine

● modernization of regional airports and bringing their technical condition in line with current ICAO standards and recommendations in order to service the most widespread types of aircraft;

● prioritization in accordance with the defined criteria of airport reconstruction / construction projects;

● providing financing for the reconstruction of the network of airports of Ukraine on the basis of an audit of transport infrastructure losses;

● continuation of the development of the airport of SE Boryspil International Airport according to the nodal (hub) model;

● continuation of development of SE Lviv International Airport;

● creation of the Airport Development Fund as a special fund of the State Budget;

● creation of a management company or a state body for the management of aerodrome complexes, which are built at the expense of the state and are in state ownership.

2) Liberalization and non-discriminatory regulation of air transportation markets

● lifting restrictions on international scheduled air services;

● expansion of the network of international air connections with partner countries;

● increase in the share of low-budget airlines (low-cost);

● creation of a national air carrier;

● development of air cargo transportation.

3) Resumption of air navigation services in the airspace of Ukraine and development of its transit potential

● ensuring financing of stable operation of UkSATSE;

● restoration of aerodrome control towers, means of communication, navigation and surveillance of the air traffic management system (ATS);

● reorganization of UkSATSE taking into account the current circumstances;

● providing a set of measures to restore the transit potential of Ukrainian airspace.

4) Implementation of the Common Aviation Area Agreement

● adaptation of national legislation to the EU legislation.

5) Support for the air transport industry.

● support of airlines by the state (performance of public service obligations, reduction of excise duty on fuel, etc.);

● preservation of aviation personnel of Ukraine and their qualifications;

● support of the State Aviation Service in carrying out the functions of supervision and control over aviation entities located outside Ukraine under martial law;

● Improving the procedure for concluding property lease agreements and conducting public procurement.

I. STAGE WAR-WAY ECONOMY AND INSTITUTIONS (SHORT-TERM) - "EVERYTHING FOR VICTORY!"

June 2022 - end of 2022

* In the event of a delay in active hostilities, the plan will be adjusted in the 4th quarter of 2022, respectively, this phase (with the planning of major activities and their financing) will be extended to 2023.

Main priorities / accents:

1) creation of conditions for preservation in proper functional condition of aviation infrastructure objects in the territories controlled by Ukraine;

2) development of a draft of a new national strategy for the development of the civil aviation industry (primarily in the part concerning the optimal market positioning of airports), which should be taken into account in the preparation of the General Plans for the Restoration of Regional Activities. Attention should be paid to the following:

- the number of population in each region (including internally displaced, disabled persons and citizens that were injured during the war and, which would lead to limited movement and vital activities of people);

- production facilities (factories, plants, enterprises) that have not been damaged;

- production facilities (factories, plants, enterprises) that have been damaged and the estimated time required for recovery;

- tourist and business potential of the region.

3) implementation of the project "Action Plan of UkSATSE on the resumption of air navigation services in the airspace of Ukraine";

4) creation of conditions for preservation of qualification of aviation personnel of Ukraine;

5) adaptation of national aviation legislation to the EU legislation in the framework of the CAA Agreement.

II. RECOVERY STAGE (MEDIUM-TERM) - "RECONSTRUCTION, RESTART OF THE ECONOMY AND INSTITUTIONS"

2023 - 2025 *

* In case of protracted active hostilities, the plan will be adjusted in the 4th quarter of 2022, respectively, this phase (with the planning of major activities and their financing) will be postponed to 2024-2026.

Main priorities / accents:

1) restoration of the operation of airports of Ukraine, which were not damaged as a result of hostilities, to meet the needs of the population in air transportation;

2) assessment of the condition of damaged / destroyed property at aviation infrastructure facilities and decision-making on the feasibility of its restoration, taking into account the General plans for restoration of regions and plans for the development of transport by other modes of transport (high-speed rail, road, air);

3) modernization of regional airports (approximately 5-7) taking into account needs of disable persons and other groups of people with reduced mobility and bringing their technical condition in line with modern ICAO standards in order to service new types of aircraft;

4) resumption of air navigation services in the airspace of Ukraine;

5) creation of conditions for stimulation of restoration and development of air communication by, but not limited to:

a. provision of long-term loans by state banks to airlines, airports and UkSATSE at a minimum interest rate;

b. targeted subsidy for airports for the amount of land tax and rent payments or tax deferral;

c. improving the procedure for concluding property lease agreements and conducting public procurement;

d. introduction of compensation to Ukrainian airlines for expenses related to the need to fly-by the territory of Russia and Belarus.

6) deregulation of activities and creation of conditions for the development of general aviation;

7) establishment of requirements for unmanned aircraft, their operation and requirements for remote pilots;

8) development of a new State target program for the development of the air navigation system of Ukraine;

9) creation of a national air carrier;

10) creation of a management company or a state body for the management of aerodrome complexes, which are built at the expense of the state and which are in state ownership;

11) improvement of the financial model of support for the development of aviation infrastructure and implementation of strategic projects by regional airports, including through public-private partnerships and comprehensive international programs with preferential financing conditions;

12) streamlining of legal, operational and financial relations between aerodrome owners and their actual operators, including including in the framework of public-private partnership projects;

13) corporatization of Boryspil International Airport;

14) development of new security programme, which takes into account facts of life in the conditions of martial law.

III. STAGE OF MODERNIZATION (STRATEGIC) - "STRUCTURAL MODERNIZATION AND INTEGRATION INTO THE EU"

2026 - 2032 *

* The planning dates of the stage will be adjusted based on the results of 2022 - 2023.

Main priorities / accents:

1) transformation of SE Boryspil International Airport into main aviation hub of East Europe;

2) further modernization of regional airports taking into account needs of disable persons and other groups of people with reduced mobility and in order to ensure the suitability of their infrastructure for the maintenance of modern aircraft, based on the prospects of increasing demand for air transportation;

3) implementation of the State target program for the development of the air navigation system of Ukraine;

4) creation of the Airport Development Fund as a special fund of the State Budget;

5) development of a multimodal freight center in the format of public-private partnership;

6) development of new technologies aimed at the transition to sustainable aviation fuels (SAF), the adoption of global market measures for reducing carbon emissions (CO2) under the System of Compensation and Reduction of CO2 Emissions for International Aviation (CORSIA program).

III. Sphere of maritime and inland water transport

1. The main problems that need to be solved in the Recovery Plan (in this area)

Current state of sphere of maritime and inland water transport:

In 2021, the volume of cargo processing amounted to 153.3 million tons, transportation by the Dnipro - 14.4 million tons.

The volume of freight traffic, which was forecasted for 2022, was expected at 161.2 million tons, river traffic was to reach 15.8 million tons.

Beginning from February 24, 2022, the blockade of seaports on the southern coast of Ukraine actually began. The warships of the aggressor country block navigation in the Black and Azov Seas for ships bound for/from the seaports of Ukraine.

It is estimated that Ukraine loses $ 170 million per day due to blocked ports, and the estimated direct damage caused to state-owned maritime and inland water transport infrastructure since February 24, 2022 is about $ 622 million. However, the actual assessment of losses and resource needs for the restoration of port infrastructure can be carried out only after the end of hostilities in Ukraine and the return of the occupied territories. This also applies to the Autonomous Republic of Crimea, the consequences of the occupation of which and the damage to the infrastructure of five seaports on its territory will also have to be further assessed after regaining of Ukraine’s control over this territory. As of May 4, 2022, the largest ports, which accounted for more than 85% of maritimecargo turnover, remained under Ukrainian control: Mykolaiv, Olviia, Odesa, Chornomorsk, Pivdennyi. To date, these seaports operate only to service railway and road rolling stock.

According to the order of the Ministry of Infrastructure of Ukraine dated April 28, 2022 № 256 "On the closure of seaports" registered in the Ministry of Justice of Ukraine on April 29, 2022 as № 470/37806 the seaports Berdiansk, Mariupol, Skadovsk, Kherson have been closed from the date of entry into force of this order to regainangcontrol over these seaports. The International Maritime Organization (IMO) was informed about this by a corresponding note of the Ministry of Foreign Affairs, which in turn brought the mentioned information to the governmental and non-governmental organizations of the member states.

Taking this measure is caused by the impossibility of servicing ships and passengers, carrying out cargo, transport and other related economic activities, ensuring the appropriate level of shipping safety, compliance with international agreements of Ukraine, the consent of which was given by the Verkhovna Rada of Ukraine, and also ensuring the protection of the environment at a time when russia continues to wage active hostilities in these regions, which poses a threat to human life and health.

Seaports in Ukraine are not only the main way to export products of the agro-industrial complex, which brought 27.9 billion US dollars in 2021, but also a source of exports of metallurgy (16.0 billion US dollars), chemical industry (2.7 billion US dollars), export of mineral fertilizers (8.42 billion US dollars).

These actions dealt a blow to Ukraine's economy, as maritime transport accounted for about 70% of Ukrainian producers' exports (approximately 47.0 billion US dollars) and a significant part of imports.

Exports of agro-industrial complex (grain, oil), ferrous metallurgy, ore and slag were carried out in almost all cases by maritime transport

Three small ports at the mouth of the Danube - Izmail, Reni and Ust- Dunaisk - are fully operational and increasing cargo handling. In peacetime, they accounted for just under 5% of exports. Now they can carry the same volumes as in peacetime, but the potential in the Danube direction is great regarding the situation with other ports.

In order to ensure stable foreign trade activities, the Ministry of Infrastructure of Ukraine focuses on improving the efficiency of the Danube Maritime Cluster. Ports located in the Danube region (Reni, Izmail, Ust-Dunaisk) are operating normally, increasing the cargo base, increasing the handling of ships at berths.

PJSC "Ukrainian Danube Shipping Company" increases the involvement of its own fleet in export-import transportation, is accelerating its repair to put into operation in the near future the maximum number of vessels on the Danube.

At the same time, as a result of the blockade of parts of the Dnipro river by the terrorist troops of the russian federation in the Kherson and Zaporizhzhia regions, traffic on the Dnipro river was stopped, and the Kakhovka navigable lock was seized (the lock's equipment was damaged).

There were conditions of shortage of petroleum products used in maritime and inland water transport. The situation is complicated by the fact that a significant part of Ukraine's oil imports fell to the Republic of Belarus (from one third to two thirds with the russian federation), with which, due to its support of the russian federation, Ukraine terminated trade relations.

In Ukraine, there are a total of about 100 thousand working sailors, of which about 40 thousand are permanently on voyages (30 thousand officers and 10 thousand privates).

According to the International Chamber of Shipping (ICS), the share of Ukrainian seafarers in the world merchant fleet is about 4.5%.

As for the personnel of inland vessels with Ukrainian documents, the figure reaches 11 thousand, among which 1.8 thousand work on the Danube (at the same time, on vessels under EU flags - about 1 thousand).

Measures need to be taken to bring the system of training and obtaining documents of crew members of inland waterway vessels to the requirements of EU legislation.

Ukrainian sailors who work on ships on international voyages bring 3-4 billion US dollars into the Ukrainian economy every year.

At present, the process of certification of seafarers is suspended in the temporarily occupied territories of Ukraine. Due to the martial law, the possibility of sailors leaving for employment on ships under a foreign flag has been blocked.

Regarding the status of implementation of program documents - the implementation of key program documents in the field of maritime and inland water transport (Maritime Doctrine and Strategy for the Development of Seaports of Ukraine) has actually been stopped, the tasks of the Action Plan for the implementation of the National Transport Strategy of Ukraine and the National Economic Strategy of Ukraine cannot be fulfilled.

Key challenges in the field:

- the need to lift the sea blockade of Ukrainian ports and unblock part of the Dnipro in Kherson and Zaporizhia regions;

- resumption of navigation and development of the Ukrainian fleet;

● expansion of the capacity of the Danube Maritime Cluster, creation of infrastructure to increase the volume of cargo turnover across the Danube;

● reorientation of part of the freight flow from roads to water transport, inclusion of ports in multimodal transportation, including in universal containers and the connection "railway - water transport";

● increase of capacity and volumes of transportations by maritime and inland water transport;

● further digitalization of processes, modernization of software packages and access control systems in sea and river ports of Ukraine;

● development of “Schemes of development of sea and river ports of Ukraine” taking into account the urgent need, perspective cargo flows and development of capacities of port operators;

● transition to alternative energy sources, taking into account economic feasibility and efficiency, as well as the needs for the implementation of environmental safety programs;

● amendments to the legislation in order to implement infrastructure projects, restoration of destroyed infrastructure and development plans in sea and river ports of Ukraine;

● resolving difficult situations with Ukrainian seafarers abroad and foreign crew members stationed in Ukrainian seaports;

● creation of an effective mechanism for training and certification of seafarers, as well as members of the crews of inland waterway vessels;

● translation of the system of issuing qualification documents of seafarers into electronic form;

● digitalization of administrative services and state supervision (control) in the field of maritime and inland water transport.

Key features:

● ensuring the implementation of full-fledged export and import of goods through sea and river ports of Ukraine;

● maximum integration of the Ukrainian water transport system into the EU transport system;

● increase in capacity, modernization, development of ports in the Danube region, including modernization of approaches to them by water and land (electrification of railway tracks to reduce the total cost of logistics, construction of new railways).

Key limitations:

● russia's ongoing large-scale military aggression against Ukraine;

● limited number of ports in operation compared to the pre-war situation;

● refusal of insurers to cover shipping risks;

● lack of funding for development, modernization, reconstruction of damaged maritime and inland water transport infrastructure;

● significant downtime of vessels passing through the Sulina Canal;

● imperfection of investment legislation;

● location on the territory of Moldova of access railways and highways connecting Ukrainian ports of the Danube region, railway stations, logistics hubs;

● lack of information systems and electronic registers;

● the need for rapid adaptation of national legislation to EU legislation.

2. Goals, objectives, stages of the Recovery Plan (in this area)

2.1. The goal is one or more generalized goals, proposed changes to solve problems in the area

Creating conditions for the development and restoration of transportation by maritime and inland water transport, increase volume of transportation, restoration and development of maritime and inland water transport infrastructure.

2.2. The main tasks indicating the necessary measures / steps for their implementation, broken down from and in stages

1) Restoration and development of transportation by maritime and inland water transport:

● lifting the sea blockade of Ukrainian seaports and releasing seaports occupied by terrorist troops of the russian federation in the cities of Kherson, Skadovsk, Berdiansk and Mariupol, seaports of the Autonomous Republic of Crimea and Sevastopol, as well as the Lower Dnipro with the Kakhovka navigable lock;

● demining and trawling of seaports, access canals, sea and inland waterways;

● development and modernization of the ports of the Danube region - Reni, Izmail and Ust-Dunaisk;

● implementation of operational dredging (maintenance of the set depths and navigation dimensions provided by the passport of the port water area) of the water areas of the seaports of Reni and Izmail, as well as of the navigable channel on the inland waterways;

● inclusion of the Ukrainian part of the Danube in the TEN-T network;

● repair and modernization of vessels on the balance of PJSC "Ukrainian Danube Shipping Company" and the fleet of major state carriers for their maximum involvement in cargo transportation with EU countries;

● creation of a multimodal hub on the basis of one of the Danube ports (Reni or Izmail), as well as incentives for private investors to organize a multimodal terminal on the Dnipro River (Middle Dnipro);

● resumption of operation of the Kakhovka navigable lock (including repair work and installation of necessary equipment);

● implementation of the Danube-Black Sea GCC project for the possibility of entering the Danube ports on the Ukrainian ship's course of large-tonnage vessels;

● establishment of logistics along the Danube-Dnipro/ Southern Bug coastal corridor for inland waterway vessels;

● increasing the tonnage of merchant vessels under the Ukrainian flag to improve trade with other countries;

● development and launch of the Register of Inland Navigation Vessels and related registers and databases;

● development of an effective financial and economic mechanism for modernization and restoration of a competitive shipbuilding cluster with extensive use of tax and financial and credit policy instruments;

● further digitalization of processes, modernization of software packages and access control systems in sea and river ports of Ukraine;

● stimulating the development of liner shipping and shipping to river ports (terminals).

2) Restoration and modernization of maritime and inland water transport infrastructure:

● restoration of the priority facilities destroyed by the russian terrorist forces, necessary for the normal functioning ofmaritime and inland water transport;

● elimination of limiting areas on the Dnipro River;

● restoration and modernization of the lock farm on the Dnipro River, construction of the second Kakhovka lock with expanded characteristics;

● creation of an effective mechanism for attracting private investment in financing works on repair, modernization, reconstruction or construction of port infrastructure facilities and inland water transport infrastructure facilities;

● amendments to the legislation in order to implement infrastructure projects, restoration of destroyed infrastructure and development plans in sea and river ports of Ukraine;

● modernization of the River Information Service, creation of an information system for automated accounting of inland waterway transport and databases of the Shipping Administration;

● improvement of transport connections of seaports and river ports (terminals) on the territory of Ukraine.

3) Expansion of the network of river ports (terminals) and increase of efficiency of use of available capacities in river ports (terminals):

● creating conditions for attracting private investment;

● improvement of the investment climate in river ports (terminals) of Ukraine (simplification of the mechanism of construction on inland waterways, classified as navigable);

● construction of new terminals and storage places for the import of critical products for the defense and economy of Ukraine (refined products, mineral fertilizers);

● launch of the Register of inland water transport infrastructure facilities;

● incentives for private investors to build terminals for liquefied natural gas and other fuel and lubricant bases.

4) Development of port infrastructure (railways, highways, etc.) and capacity of seaports:

● construction of related infrastructure for seaports (railway access tracks and roads);

● electrification of the railway section from Bilhorod-Dnistrovskyi station to Izmail station to reduce the total cost of logistics;

● establishment of the Reni-Izmail railway connection;

● implementation of operational dredging (maintenance of the set depths and navigation dimensions provided by the passport of port water area) of water areas of seaports of Reni, Izmail, Bilhorod-Dnistrovskyi, Odesa, Pivdennyi, Chornomorsk, Olviia, Mykolaiv, Kherson, Skadovsk, Berdiansk;

● increasing the depth (adjustment of passports) of the seaports of Reni and Izmail;

● construction of LNG (liquefied natural gas) terminals in seaports;

● determination of the boundaries of water areas and territories of seaports, taking into account the requirements of the legislation and the interests of the owners of private terminals;

● simplification of established legislative procedures for urgent rehabilitation of seaport infrastructure;

● development of “Schemes of development of sea and river ports of Ukraine” taking into account the urgent need, perspective cargo flows and development of capacities of port operators;

● transition to alternative energy sources, taking into account economic feasibility and efficiency, as well as the needs for the implementation of environmental safety programs;

● improvement of legislation for the development of seaports, transition to the European model of management "Port Landlord", as well as consideration of the possibility of introducing other management models.

5) Creation of an effective mechanism for training and certification of seafarers, as well as crew members of inland waterway vessels:

● ensuring the possibility of departure of seafarers and personnel of inland waterway vessels for employment on vessels voyages a foreign flag;

● creation of a system for obtaining documents of members of inland navigation crews in accordance with the requirements of EU legislation;

● development and launch of a register of qualification certificates of crew members of inland waterway vessels and related databases, their integration with the relevant EU registers;

● ensuring compliance with the requirements of international agreements of Ukraine and creating an effective mechanism for training and certification of seafarers - members of the command staff of seagoing vessels;

● Improving the regulatory framework and digitizing the process of submitting applications and obtaining qualification documents for ship's crew members.

Projects envisaged by the Seaport Development Plans for the short-, medium- and long-term perspective, approved in the manner prescribed by the Law of Ukraine “On Seaports of Ukraine”, are subject to implementation within the timeframe specified in such plans and in the manner prescribed by current legislation of Ukraine. additionally not included in the list of projects for the implementation of the recovery plan.

STAGE OF WAR-WAY ECONOMY AND INSTITUTIONS (SHORT-TERM) - "EVERYTHING FOR VICTORY!"

June 2022 - end of 2022 *

** In the event of a delay in active hostilities, the plan will be adjusted in the 4th quarter of 2022, respectively, this phase (with the planning of major activities and their financing) will be extended to 2023.*

1. Restoration and development of maritime and inland water transport: lifting the sea blockade of Ukrainian seaports and liberation of seaports occupied by terrorist troops of the russian federation in Kherson, Skadovsk, Berdiansk and Mariupol, seaports of Crimea and Sevastopol Dni, as well as Sevastopol Dni, and with the Kakhovka navigable lock; demining and trawling of seaports and inland waterways;

3. Optimization, clarification of the existing boundaries of water areas, seaports of Mykolaiv, Olviia, Pivennyi, Odesa, Chornomorsk, Kherson, Ust-Dunaisk, Izmail to ensure their sustainable development, increase cargo flows, reduce costs and ensure the safety of navigation;

4. Adoption of a decision by the Cabinet of Ministers of Ukraine on allotment of land plots within the territory of seaports (within the width of hydraulic structures due to structural elements) and allotment of water fund land areas within seaports along the border line of hydraulic structures (moorings, protective, shore) 20 m wide;

5. Preservation and maintenance in satisfactory technical condition of infrastructure facilities of seaports of the Danube region (Izmail, Reni, Ust-Dunaisk), seaports of Big Odesa (Odesa, Pivdennyi, Chornomorsk) and Mykolaiv region.

6. Increasing the capacity of the seaports of Reni, Izmail and Ust-Dunaisk and inland waterways by:

implementation of operational dredging (maintenance of the set depths and navigational dimensions provided by the passport of the port waters) of the seaports of Reni, Izmail and Ust-Dunaisk, in order to ensure safe acceptance for loading and unloading of sea-class vessels with a draft of up to 7.0 m about 500 thousand m3 (volume can be adjusted depending on urgent needs and necessity), as well as navigation on inland waterways and operational waters of river port berths (terminals) (at the expense of users of such berths). Revision of plans of road works on inland waterways taking into account changes of reorientation of cargo flows;

implementation of the GSC Danube - Black Sea project for the possibility of entering the Danube ports on the Ukrainian ship's course of large-tonnage vessels;

organization of additional cargo handling places, including with the use of raid parking lots, construction of river ports (terminals);

electrification of the railway track section from the station Bilhorod-Dnistrovskyi to Izmail station to reduce the total cost of logistics;

organization of additional transhipment sites in ports;

providing ports with modern equipment for cargo handling, including mobile elevators for agro-industrial complex products, tippers, etc.

7. Restoration of seaports and inland waterways by:

- demining, trawling of seaports, access canals, sea and inland waterways; unlocking of seaports and river ports (terminals);

- amendments to the legislation in order to implement infrastructure projects, restoration of destroyed infrastructure and development plans in sea and river ports of Ukraine;

- restoration of navigation on the rivers Dnipro and Southern Bug, as well as the work of the Kakhovka navigable lock (including repair work and installation of necessary equipment).

8. Resumption of the process of employment of Ukrainian seafarers by ensuring the possibility of departure of seafarers and personnel of inland waterway vessels for employment on seagoing vessels and inland waterway vessels;

9. Providing state support for the development of inland water transport and attracting additional investment in the shipping business in order to effectively allocate the cost of maintaining logistics by reorienting the flow of goods from roads to IWT - ensuring the functioning and filling of the State fund of inland waterways;

10. Fair optimization of the port fee system, creation of favorable conditions for improving the efficiency of logistics routes involving water transport, in particular the release of inland waterway vessels with a maximum draft of up to 4.5 m from the port fee, exemption of certain categories of vessels from anchor fee in ports Danube region;

11. Rehabilitation of the railway track on the section "Berezine-Basarabeasca" to ensure the diversification of supply chains to the seaport of Reni.

RECOVERY STAGE (MEDIUM-TERM) - "RECONSTRUCTION, RESTART OF THE ECONOMY AND INSTITUTIONS"

2023 - 2025 *

** In case of protracted active hostilities, the plan will be adjusted in the 4th quarter of 2022, respectively, this phase (with the planning of major activities and their financing) will be postponed to 2024-2026.*

1. Creation of a multimodal hub on the basis of one of the ports of the Danube (Reni or Izmail) and creation of river ports (terminals) for activation of cargo communication both with the EU countries and with other countries, including transportation in containers, and also the organization on the Dnipro River (Middle Dnipro) of the multimodal terminal;

2. Organization of a simplified navigable connection between the seaports of the Danube and the ports of the Dnipro and the Southern Bug for inland waterway vessels, taking into account the necessary technical / design characteristics for safe passage;

3. Involvement in cargo transportation between EU ports and in the middle of the country of the fleet of Ukrainian carriers (including state: PJSC "Ukrainian Danube Shipping Company" (on the Danube), SE "River Ports Administration" (on the Dnipro) by its modernization (re-equipment)), as well as the construction of a new fleet at Ukrainian shipyards for these enterprises, including the use of alternative energy sources (electricity, hydrogen), the construction of appropriate gas stations;

4. Simplification of administrative procedures, formalities in ports, reduction of time for cargo handling and applications by modernization of the River Information Service in accordance with EU requirements and management of the logistics water corridor, creation and implementation of information system for automated accounting of transportation by inland waterways and databases of the Shipping Administration(Registered of inland water transport infrastructure facilities, database of qualification documents of ship personnel, ship documents);

5. Increasing the capacity of seaports of Ukraine, the creation of river ports (terminals) on inland waterways by increasing the depth of seaports and inland waterways, in comparison with the passport parameters;

6. Further digitalization of processes, modernization of software packages and access control systems in sea and river ports of Ukraine;

7. Development of "Schemes of development of sea and river ports of Ukraine" taking into account urgent needs, perspective cargo flows and development of capacities of port operators;

8. Transition to alternative sources of energy supply, taking into account economic feasibility and efficiency, as well as the needs for the implementation of environmental safety programs;

9. Establishment of an effective mechanism for the allocation of water fund lands occupied by the territorial sea, inland sea waters, including under the water area of seaports under water bodies, as well as inland waterways;

10. Establishment of an effective and transparent mechanism for training and certification of seafarers and crew members of inland waterway vessels in accordance with the requirements of international agreements of Ukraine and legislation in the EU;

12. Ensuring compliance with international requirements, including EU legislation on merchant shipping and inland waterways of Ukraine;

13. Ensuring the growth of tonnage under the Ukrainian flag;

14. Creation of an effective mechanism for attracting private investment in financing the repair, modernization, reconstruction or construction of port infrastructure. Optimization of work and management structure of enterprises of maritime and inland water transport, reduction of expenses of such enterprises;

15. Implementation of EU directives and regulations into Ukrainian legislation in accordance with, in particular, the Association Agreement;

16. Improving the transport connection of sea and river ports on the territory of Ukraine with railway stations by building an access railway to the port of Reni exclusively through the territory of Ukraine.

STAGE OF MODERNIZATION (STRATEGIC) -

"STRUCTURAL MODERNIZATION AND INTEGRATION INTO THE EU"

2026 - 2032 *

* The planning dates of the stage will be adjusted based on the results of 2022 - 2023.

1. Increasing the capacity of locks and minimizing interruptions in navigation (application of technologies that will allow locks to work in adverse weather conditions (at low temperatures) by modernizing the lock on the Dnipro River. Ensuring the reorientation of part of the cargo from road transport to inland water transport; construction of the second Kakhovsky lock with expanded characteristics (reduction of budget expenditures for road repairs, reduction of emissions into the atmosphere, the possibility of one-time transportation in large batches, cheaper logistics);

2. Improving the investment climate in seaports of Ukraine (simplification of the mechanism of construction on sea ways classified as navigable, within the waters of seaports, in the area of navigation equipment, avoidance of unauthorized construction in the water area and on the territory of seaport, the possibility of creating artificial territories in ports);

3. Ensuring sustainable development for the renewal of the infrastructure of seaports of Ukraine, in particular by updating and implementing the Development Plans of seaports of Ukraine;

4. Ensuring the sustainable development of the maritime industry, taking into account the European experience, attracting investment and the latest technologies;

5. Transition to the European model of management of strategic objects of port infrastructure, which are objects of state property - "port landlord", as well as consideration of the possibility of introducing other management models;

6. Increasing the tonnage of merchant ships under the Ukrainian flag to improve trade with other countries;

7. Implement joint procedures with the EU to ensure the safety of navigation, namely monitoring the movement of ships, providing assistance at sea, maritime communications, reaction in case of pollution from ships and the creation of a national segment of the information exchange system SafeSeaNet about movement of ships and accidents;

8. Construction of LNG (liquefied natural gas) terminals in seaports;

9. Development of liner shipping;

10. Adaptation of Ukrainian legislation in the field of water transport to EU legislation;

11. Encouragement of port operators to use high-performance transhipment equipment by introducing increasing coefficients to tariffs for access of the port operator to the berth in case of non-compliance with gross loading / unloading norms.

IV. Sphere of postal services

1. The main issues that need to be addressed in the framework of the Recovery Plan in the field of postal services

Current status of postal services

Since the beginning of the military aggression of the Russian Federation, most postal operators have suffered significant losses due to significant destruction of postal facilities and postal infrastructure in areas where active hostilities were taking place. Some of the postal facilities remained in the temporarily occupied territories. Most market participants have experienced significant labor outflows in the North, East and South of Ukraine. There was a destruction of air and sea logistics routes for delivery of international mail and express items. Logistics within the country has become much more complicated, including due to fuel shortages.

Regarding the state of implementation of program documents

There are currently no program documents in the field of postal services. The key areas of development of the sphere are defined in the Program of Activities of the Cabinet of Ministers of Ukraine, approved by the Resolution of the Cabinet of Ministers of Ukraine № 471 of June 12, 2020.

Key challenges in the field:

● The need to restore damaged or destroyed postal infrastructure, damaged or destroyed as a result of the military aggression of the Russian Federation against Ukraine;

● significant deterioration of logistics during domestic and international transportation;

● rising fuel prices in conditions of its deficit;

● closed airspace and blocked seaports.

Key features:

● Harmonization of Ukrainian legislation in accordance with EU legislation (bringing into line with the requirements of EU Directive 97/96) by adopting the draft Law of Ukraine "On Postal Services";

● liberalization of the sphere;

● creation of competitive conditions among current and future market players;

● attracting international investment.

Key limitations:

● The actual functioning of the sphere under martial law for an indefinite period;

● economic and social crisis caused by hostilities;

● partial or complete loss of property (property) in the temporarily occupied territory of Ukraine;

● destruction of air and sea logistics routes for delivery of international postal and express items;

● significant outflow of labor in the North, East and South of Ukraine;

● complication of logistics in the delivery of postal items within the country;

● over 30% of the population of Ukraine living in rural areas and remote settlements do not have access to financial services.

2. Goals, objectives, stages of the Recovery Plan in the field of postal services

2.1. The goal is one or more generalized goals, proposed changes to solve problems in the area.

Integration of the market of postal services of Ukraine into the market of postal services of the EU, by full harmonization of the legislation of Ukraine and the EU in the field of postal services and the relevant standards of service provision.

Objective 1. Modernization of the model of legal regulation of the provision of postal services

● Maximum simplification for consumers of postal services: simplified pricing and product range of universal services;

● Clear definition of the requirement to provide universal services;

● Full harmonization of Ukrainian legislation in the field of postal services with EU legislation;

● Integration of the Ukrainian postal services market into the EU postal services market.

Objective 2. Ensuring the sustainable functioning of the market for the provision of postal services in the context of the military aggression of the Russian Federation against Ukraine and its postwar recovery

● Arranging certain issues of organization of work of postal operators in martial law;

● Ensuring access of citizens to the full range of quality postal services and related services, including financial, throughout Ukraine;

● Modernization and development of the industry through the formation of a competitive environment and increasing the level of welfare of citizens;

● Partial privatization of JSC Ukrposhta.

2.2. The main tasks indicating the necessary measures / steps for their implementation, divided into stages

Ensuring the sustainable functioning of the market for the provision of postal services under martial law and its comprehensive development with a view to its further integration into the common EU postal market in the post-war period.

STAGE OF ECONOMICS AND INSTITUTIONS OF WAR (SHORT-TERM) - "EVERYTHING FOR VICTORY!"

June 2022 - end of 2022 *

* In the event of a delay in active hostilities, the plan will be adjusted in the 4th quarter of 2022, respectively, this phase (with the planning of major activities and their financing) will be extended to 2023.

Main priorities / accents:

1. Ensuring the use of the infrastructure of the national postal operator to ensure access of the population living in rural areas and remote settlements to financial services and the electronic market of goods and services;

2. Development and adoption of a draft resolution of the Cabinet of Ministers of Ukraine "On the peculiarities of the operator in postal service under martial law ";

3. Adoption of the draft Law of Ukraine “On Postal Services” (Reg. № 4353 of November 10, 2020).

RECOVERY STAGE (MEDIUM-TERM) - "RECONSTRUCTION, RESTART OF THE ECONOMY AND INSTITUTIONS"

2023 - 2025 *

* In case of protracted active hostilities, the plan will be adjusted in the 4th quarter of 2022, respectively, this phase (with the planning of major activities and their financing) will be postponed to 2024-2026.

Main priorities / accents:

1. Creating favorable conditions for the development of a network of mobile offices of postal operators.

2. Adoption of bylaws within 12 months after the adoption of the Law of Ukraine "On Postal Services", in particular:

a. Adoption of the Resolution of the Cabinet of Ministers of Ukraine "On Amendments to the Rules for the Provision of Postal Services".

b. Issuance of the order of the Ministry of Transport and Communications of Ukraine dated January 19, 2010 № 10 "On approval of the Procedure for determining and equipping places of international postal exchange".

3. Adoption of the draft Law of Ukraine “On the list of objects of state property that are not subject to privatization” (Reg. № 4020 of September 2, 2020);

4. Restoration of full-fledged work of the sphere and pre-war volumes of postal services. Increasing the pre-war number of postal service operators.

STAGE OF MODERNIZATION (STRATEGIC)

"STRUCTURAL MODERNIZATION AND INTEGRATION INTO THE EU"

2026 - 2032 *

* The planning dates of the stage will be adjusted based on the results of 2022 - 2023.

Main priorities / accents:

1. Full harmonization of Ukrainian legislation in the field of postal services with EU legislation.

2. Integration of the market of postal services of Ukraine into the market of postal services of the EU.

3. Modernization and development of the sphere due to the formation of a competitive environment and increasing the level of welfare. Increasing the number of postal service operators at the expense of foreign companies entering the Ukrainian market.

4. Partial privatization of JSC Ukrposhta.

V. Sphere of tourism and resorts

1. The main issues to be addressed in the framework of the Recovery Plan

Current state of tourism and resorts:

The situation in the industry until February 24, 2022

Tourism in Ukraine reflects its domestic socio-economic and political situation. Thus, the annexation of Crimea and Russia's military aggression sharply reduced the flow of foreign tourists. Inflation and the devaluation of the hryvnia in 2014-2015 led to a decrease in the number of outbound tourists. Territorial unrest, economic problems and political uncertainty have led Ukraine's tourism industry to a deplorable state: in 2014-2015, the tourism market fell by 40%. The World Tourism Organization (UNWTO) estimated the tourist flows of Ukraine in 2012 at $ 4.8 billion, and in 2014 - only $ 1.6 billion.

The World Economic Forum estimated the total income from tourism in Ukraine in 2012 at $ 3.2 billion, but in 2014-2015, due to the crisis and Russian aggression in the east, Ukraine was not included in the ranking. But according to the results of the World Economic Forum in Davos in 2016, Ukraine can boast of the following:

- 124th place in the ranking of investments in the tourism business in Ukraine;
- 88th place in terms of attractiveness for tourists. (Note that in 2019 Ukraine rose by 10 places to 78th place in the ranking of tourist attractions. Which means that the country is interesting for foreigners, but also important is the general systematic work to improve Ukraine's image in the international arena and attract target audiences tourists to Ukraine);
- 79th place in aviation infrastructure4
- 81st place in port and land infrastructure4
- 45th place in terms of prices4
- 78th place in the rating of international openness4
- 71st place in travel service and in the Expat Insider ranking, which was attended by more than 14 thousand people from 191 countries, Ukraine is proud of the following indicators:
- first place in terms of affordability;
- second place in terms of satisfaction of foreigners in Ukraine;
- 74% consider their income sufficient to live in Ukraine;
- 45% of respondents said that the cost of living in the country is affordable.

The tourism industry has been hit hardest by quarantine restrictions caused by the Covid-19 pandemic.

2020 has radically changed the current trends in tourism and the approach of tourists to choose countries for recreation.

Despite global trends, during 2020-2021, domestic tourism has become a springboard for the recovery of the industry. Despite the closed borders and the absence of foreign tourists, in 2020 it was possible to increase domestic tourism in Ukraine. In terms of the amount of tourist tax, we can assume that tourist flows continued to grow rapidly: during 2021 there was an increase of 24% compared to 2019.

In 2021, 4.2 million foreigners crossed the Ukrainian border. This is 26.3% more than during the 2020 pandemic. However, in the pre-pandemic period, Ukraine received 12-14 million foreigners. New tourist markets were opened, in particular the Arabian Gulf countries. In 2021, more than 56,000 Saudis came to Ukraine. Our country has become the TOP-1 tourist market for the citizens of Saudi Arabia, and their costs amounted to about $ 2,000 per tourist.

The situation in the industry after February 24, 2022

2022 has become another test for the sphere of tourism in Ukraine. In Kyiv, eastern and southern Ukraine, the tourism industry has come to a complete halt. At present, it is still difficult to estimate the losses and they will depend on the number of destroyed cultural and historical monuments, tourist destinations, the duration of hostilities, the size of the occupied and mined areas.

During the first month of the war, the losses of Ukrainian business exceeded the losses of two years of the pandemic. According to Euromonitor International, global inbound tourism lost $ 6.9 billion in 2022 due to the war in Ukraine. Hotel experts in Turkey and Egypt note a decrease in tourists from 60% to 70% for the 2022 season and note that the effects will be felt in at least three to four years. The extent of the damage and the long-term consequences are difficult to assess, as hostilities continue across the country.

Key challenges in the field:

● Lack of tourist flows to Ukraine;

● Outflow of investments from the sphere of tourism of Ukraine;

● High level of danger of staying in many regions of the country;

● Critical destruction of tourist infrastructure, historical monuments, museums, theaters, etc .;

● Lack of information on the condition of tourist facilities in different cities and regions of Ukraine;

● Limited tourist information network;

● Outdated classification system by categories of hotels and other accommodation establishments;

● Lack of an automated system for collecting tourism statistics to assess the state of the industry, the amount of income and losses in the industry, and the possibility of formulating public policy;

● Prohibition of flights in the airspace of Ukraine;

● Lack of an all-Ukrainian tourist portal for foreigners, which highlights the country's tourism potential in the postwar period.

Key features:

● Use of the international information field the level, which is currently full of news about Ukraine, to cover the current situation, as well as to highlight the country's tourism potential in the postwar period;

● Development of a communication strategy focused on the international market;

● Creating a new positive image of the country;

● Creation of mechanisms and conditions for attracting investments;

● Involvement of stakeholders in the development of digital tools in the field, in particular for operational data collection;

● Development and implementation of the project "War Routes", which in the initial stages involves the conservation of prominent sites affected by hostilities, or in some way played an important role in the war;

● Focus on conditionally safe areas where there is no active hostilities;

● Establishment of the Tourism Support Fund (particularly in Ukraine);

● Ability to increase the level of comfort, quality management and implementation of a classification system by category of hotels and other accommodation facilities in wartime.

Key constraints / framework:

● Martial law in the country;

● Lack of legal documents on guarantees of safety of potential tourists and compensation in case of emergency;

● Closure of Ukrainian airspace due to martial law.

2. Goals, objectives, stages of the Recovery Plan in the field of tourism and resorts

2.1. The goal is one or more generalized goals, proposed changes to solve problems in the area

● Carrying out an audit and digital collection of data on the state of destruction of tourist facilities in each region;

● Reconstruction of tourist infrastructure;

● Implementation of grant support for representatives of the tourism sector affected by hostilities on the territory of Ukraine;

● Restoration of tourist locations and objects of national, regional and local level;

● Support and stimulation of interest in Ukraine through promotional, tourist, cultural online and offline events;

● Improving service and quality of service, including - through training;

● State program of job creation;

● Creation of mechanisms to provide sustainable financial support to the tourism sector (including the National Tourism Fund, local tourism funds, investment hubs, accelerators, PPPs, etc.);

● Ensuring the formation of the regulatory framework, taking into account the current situation and market realities;

● Development of the Sphere-2040 Strategy taking into account realities;

● Introduction of normative-legal documents and attraction of foreign programs on economic assistance to Ukraine after the end of the war (by analogy with the Marshall Plan).

2.2. The main tasks indicating the necessary measures / steps for their implementation, divided into stages

1) Reconstruction of tourist infrastructure:

● Creating a register of destroyed tourist attractions;

● Search for stakeholders in reconstruction;

● Creating a memory archive and developing route projects that will be ready for implementation;

● Creation of the concept of restoration of light tourist infrastructure - during the reconstruction of the affected regions;

● Attracting investors to the process of restoring the tourist infrastructure and starting reconstruction work;

● Program for the development of tourist infrastructure in the National Natural Parks of Ukraine;

● Creation of "War Memory Routes";

● Creation of light tourist infrastructure for travels in Ukraine;

● Development and implementation of the concept of development of resort towns in the south of Ukraine and "roads of diversity";

● Development and implementation of a system of tourist orientation and navigation system;

● Preparation of a draft law "On special tourist areas";

● Completion and commissioning of all destroyed or partially damaged tourist sites, and restoration of historical monuments.

2) Development of domestic and inbound tourism. Implementation of the communication strategy to promote the tourism potential of Ukraine:

● Development of a marketing vision strategy for tourism until 2032;

● Information campaign Ukraine NOW and Travel Ukraine (online and offline);

● Carrying out a number of events in hotels and tourist facilities in Europe in order to promote Ukraine through the disclosure of tourism potential in the international arena and the formation of a lasting desire to visit Ukraine after the victory;

● Support of interest in Ukraine through promotional, tourist, cultural events;

● Creating a security strategy for the resumption of tourist travel, increasing the number of users covered;

● Implemented marketing strategy, regular promotions of tourism products for target segments;

● Production of promotional content (videos, photos, graphics, advertising texts, etc.) and advertising of promotional posts (social networks, television, specialized Internet sites, outdoor advertising, etc.);

● Participation in international tourism exhibitions, forums, etc. (including membership in international professional associations);

● Creation of an information portal and single content for tourists interested in places of active hostilities;

● Creation of a network of tourist information centers;

● Creation of national conference bureau to attract and support major international events in Ukraine;

● Conducting promotions along memory paths for foreign, Ukrainian media and opinion leaders;

● Travel support programs for children, youth and the elderly;

● Conducting annual surveys of domestic, inbound and outbound tourists in accordance with UNWTO recommendations;

● Getting tourist Big Data;

● Implementation of the strategy of promotion of Ukraine in the domestic and foreign markets as a safe tourist destination;

● Holding mass events of national and international level (festivals, concerts, sports events, conferences, symposia, forums, exhibitions, etc.).

3) Institutional support of tourism entities and further business development:

● Adoption of the Law of Ukraine "On Tourism" in the second reading, taking into account the provisions of the EU Directive;

● Preparation of a draft law "On the National Tourist Organization";

● Program for rehabilitation and rehabilitation of victims of hostilities in Ukraine (servicemen, their families, temporarily displaced persons, women and children from the occupied / deoccupied territories, etc.);

● Preferential / simplified lending for the reconstruction of destroyed infrastructure;

● Changing the criteria for categorization of hotels;

● Submission of an application to the Executive Board of the World Tourism Organization (UNWTO);

● Submission of an application for holding the European Meeting of the World Tourism Organization (UNWTO) in Ukraine;

● Creation of local tourism development programs and tourism trust funds at the local level, where the tourist tax will be redirected;

● Creation of mechanisms for financing the industry through tourism funds and other tools to attract investment;

● Launch of an effective National Tourism Organization and local organizations for management and marketing as a form of public-private partnership on the principle of co-financing;

● Development of quality educational programs in the field of tourism;

● Improvement and launch of the Unified Tourist Register in accordance with changes in legislation;

● State program of job creation and development;

● Creation of a satellite account in tourism and calculation of the contribution of tourism to the country's GDP;

● Regular collection of market statistics, data - in the public domain.

STAGE OF ECONOMICS AND INSTITUTIONS OF WAR (SHORT-TERM) - "EVERYTHING FOR VICTORY!"

June 2022 - end of 2022 *

* In the event of a delay in active hostilities, the plan will be adjusted in the 4th quarter of 2022, respectively, this phase (with the planning of major activities and their financing) will be extended to 2023.

● Carrying out a number of events in hotels and tourist facilities in Europe in order to promote Ukraine through the disclosure of tourism potential in the international arena and the formation of a lasting desire to visit Ukraine after the victory;

● Conducting an information campaign on the pages Ukraine NOW and Travel Ukraine;

● Adoption of the Law of Ukraine "On Tourism" in the second reading, taking into account the provisions of the EU Directive;

● Development of marketing vision strategy of tourism;

● Institutional support of tourism business in martial law;

● Establishment of a program of summer children's and family camps for temporarily displaced persons affected by hostilities in Ukraine;

● Creation of a single content and information portal for tourists interested in cities of active hostilities, for joint promotion with hotels and tour operators, including at international exhibitions;

● Creating a security strategy for the resumption of tourist travel;

● Reconstruction of destroyed tourist infrastructure;

● Creating an archive of war memory;

● Creation of light tourist infrastructure for travels in Ukraine.

RECOVERY STAGE (MEDIUM-TERM) - "RECONSTRUCTION, RESTART OF THE ECONOMY AND INSTITUTIONS"

2023 - 2025 *

* In case of protracted active hostilities, the plan will be adjusted in the 4th quarter of 2022, respectively, this phase (with the planning of major activities and their financing) will be postponed to 2024-2026.

● Development of a tourism development strategy taking into account international experience and European integration;

● Creation of an effective system of management of the tourism industry at the state and local levels with a system of co-financing of the state and business - launch of the National Tourism Organization and local organizations for management and marketing;

● Building mechanisms for financing the industry through tourism funds and tools to attract investment;

● Creation of tourism trust funds at the local level, where the tourist tax will be redirected;

● Creation of "War Memory Routes";

● Submission of an application to the Executive Board of the World Tourism Organization (UNWTO);

● Submission of an application for holding the European Meeting of the World Tourism Organization (UNWTO) in Ukraine;

● Development and implementation of the concept of development of resort towns in the south of Ukraine "Roads of Diversity";

● Program for the development of tourist infrastructure in the National Natural Parks of Ukraine;

● Creation and introduction of the Unified Tourist Register in accordance with the amendments to the Law of Ukraine nor "About tourism";

● Grant support for projects in the field of tourism;

● Creation of local tourism development programs, supported by local trust funds for tourism development;

● Creation of a satellite account in tourism and calculation of the contribution of tourism to the country's GDP;

● Application of European quality standards in tourism;

● Creation of new high-quality educational programs in the industry;

● Development of a program to support the restoration of tourist infrastructure in Ukraine;

● Formation of competitive tourist products in close cooperation of the state, local authorities and business (infrastructure + content + communication);

● Launch of a state support program for the sale and promotion of tourism products;

● Establishment of a national conference bureau to attract and support major international events in Ukraine;

● Launch of a travel support program for young people and the elderly;

● Implementation of the strategy for the promotion of tourism products and events at the international level;

● Launch of the State program of job creation;

● Creation of a network of tourist information centers.

STAGE OF MODERNIZATION (STRATEGIC)

"STRUCTURAL MODERNIZATION AND INTEGRATION INTO THE EU"

2026 - 2032 *

* The planning dates of the stage will be adjusted based on the results of 2022 - 2023.

● Regular collection of statistical data from the market, data - in the public domain;

● Providing conditions for the creation of competitive tourism products on the world market;

● Formation of a national tourist product, which will have its clear positioning and will be well known in the world;

● Supporting interest in Ukraine due to the high positions of Ukrainian cities in international rankings;

● Increasing investment due to constant and growing demand for tourism products at all levels;

● Implementation of marketing strategy, regular promotions of tourism products for target segments.

VI. Sphere of automobile, city electric transport, highways and road economy

1. The main issues to be addressed in the framework of the Recovery Plan

According to operative information, as of June 8, 2022, as a result of hostilities, about 23.9 thousand km of public roads of state importance in Volyn, Dnipropetrovsk, Donetsk, Zhytomyr, Zaporizhia, Kyiv, Luhansk, Mykolaiv, Odesa, and Sumy were destroyed. , Kharkiv, Kherson, Chernihiv regions. 304 bridges and overpasses were also destroyed.

Due to the continuation of hostilities in some parts of our country, the total final extent of the destruction of public roads is currently impossible to determine.

Since the beginning of the martial law, the road infrastructure has performed vital functions - providing the possibility of evacuation and movement of the population, movement of military equipment and humanitarian goods, ensuring the functioning of the economy, social sphere and industries. According to the Law of Ukraine of March 15, 2022 № 2120-IX "On Amendments to the Tax Code of Ukraine and other legislative acts of Ukraine on the application of norms for the period of martial law" temporarily, for the period of martial law, state of emergency, excise rate tax on gasoline, heavy distillates and liquefied gas in the amount of 0 euros per 1000 liters.

The Law of Ukraine "On the State Budget of Ukraine for 2022" provides for the receipt of the special fund of the state budget from the sources of the state road fund 86 092 109.7 thousand UAH, the estimated amount of funds from these sources is 11 926 506,67 thousand UAH, which is 74 165 603.0 thousand UAH less than expected.

Thus, there is a significant shortage of funds to meet debt obligations on borrowings raised by the state or under state guarantees for the development of the network of public roads, there are virtually no funds to pay for works and services for construction, reconstruction, repair and maintenance of roads. public use, which are necessary to ensure transport links and increase the defense capabilities of the state.

Given the current state of passenger traffic in the settlements of Ukraine, as well as in their suburbs, the destruction of infrastructure and destruction or damage to buses, trolleybuses, trams, subway cars, etc. and blocking the operation of urban electric transport due to military aggression by the Russian Federation. the need for a comprehensive solution to the problems of stable operation of the network of urban and suburban routes. Currently, due to the military aggression of the Russian Federation against Ukraine, approximately 40% of settlements have stopped passenger traffic, as well as settlements without a road connection in the 50-kilometer zone. This is primarily due to the destruction of the transport infrastructure of cities and rolling stock, which was used to transport / evacuate the population, as well as the road and bridges in the suburban area.

To ensure free trade between Ukraine and the EU, the permit system, which currently operates in the field of international transport, is a major factor that negatively affects the further development of freight transport. Given the growth of exports and imports to Western countries, the shortage of permits does not fully predict and ensure the implementation of long-term contracts for the supply of goods from / to Ukraine, and as a consequence affects economic performance.

Under martial law, the transportation of goods by sea and air is not carried out temporarily, and by rail - limited, in connection with which the domestic market of transport services is transformed in the direction of priority use of road transport for transportation of goods (both commercial and humanitarian). cargo). The impossibility of transit through the territory of the aggressor country and its ally Belarus has affected the logistics of road transport in international traffic. Measures are also needed to diversify fuel supplies from Western countries. Currently, fuel

is imported mainly from Poland, Romania, Slovakia, Moldova and Hungary, and its volume is constantly growing. Also, today, as a result of Russian aggression, Ukraine has experienced problems with the export of Ukrainian products, including agro-industrial products. To do this, it is necessary to develop alternative routes for delivery of goods to EU countries and other markets through Europe. The abolition of the administrative barrier in the form of permits, which is a deterrent to the free market, is necessary and important to ensure the intensification of economic processes, especially in wartime. In the future, it is necessary to continue cooperation in the direction of liberalization of freight transportation, the work on which was started before the war.

Regarding the state of implementation of program documents - State target economic program for the development of public roads of state importance for 2018-2022, approved by the Cabinet of Ministers of Ukraine from March 21, 2018 № 382. During 2018-2021, the program was implemented ahead of the approved targets for the relevant years. This was due to the gradual increase in funding for repair and construction work during the reporting years.

In order to implement the Strategy for Improving Road Safety in Ukraine until 2024 (Order of the Cabinet of Ministers of Ukraine of October 21, 2020 № 1360-r), the State Program for Improving Road Safety in Ukraine until 2023 was approved (Resolution of the Cabinet of Ministers of Ukraine of December 21, 2020 № 1287), which is currently not funded, which jeopardizes the implementation of the indicators specified in the Strategy.

At present, the implementation of the planned scope of work for 2022 is actually suspended due to hostilities, with varying degrees of destruction of road sections and their components, which were built or repaired as part of the program.

Based on this, there is a need to reconsider the approach to the current version of the program, and the new challenges facing the road industry require changes in approaches to the design and implementation of repair and construction works, changes in strategic plans for the development of individual routes, given their relevance.

According to the results of 2021, the effective indicators of the Program (as amended by the resolution of the Cabinet of Ministers of Ukraine dated 15.12.2021 № 1339) were fulfilled by 109%, respectively, the level of achieving the goal of the Program was assessed by the state customer as high.

An assessment of the effectiveness of the Program in 2018-2021 in accordance with M 42.1-37641918-769: 2018 "Methodology for assessing the effectiveness of the implementation of state target programs for the development of public roads" (hereinafter - the Methodology). The consolidated indicator of the effectiveness of the Program in 2018-2021 was 8.73, which is 14 times higher than the assessment of the effectiveness of the State Targeted Economic Program for the Development of Public Roads for 2013-2018, which according to the final report for the period 2013-2017 was 0 , 62. For 2022, in accordance with the resolutions of the Cabinet of Ministers of Ukraine dated 19.01.2022 №№ 64 and 65, a new version of the Program was approved.

In connection with the adoption of the Decree of the President of Ukraine of February 24, 2022 № 64/2022 "On the imposition of martial law in Ukraine" (as amended) the State Agency of Automobile Roads of Ukraine is implementing a plan to implement and ensure measures of martial law in Ukraine, approved by order of the Cabinet of Ministers of Ukraine of February 24, 2022 № 181-r (as amended). In order to implement the provisions of Regulation (EC) № 1370/2007, the Ministry of Infrastructure of Ukraine has developed and the Cabinet of Ministers of Ukraine has submitted to the Verkhovna Rada of Ukraine a draft Law of Ukraine “On Amendments to Certain Legislative Acts of Ukraine on Publicly Important Passenger Car transport ". The draft Law was registered on January 13, 2021 under number 4583.

Key challenges in the field:

● impossibility due to hostilities to determine the required full amount of work on new construction, reconstruction, current repairs and current average repairs and maintenance on the road network for unimpeded and safe traffic;

● abolition of sources of filling the road fund and the need to ensure the minimum necessary and regulatory level of funding for the road sector;

● the need to quickly restore the sections of roads or their components destroyed as a result of hostilities and to create conditions for safe passage;

● significant increase in the volume of freight transport by road due to blockage of ports and low capacity of transshipment railway stations in places of change of track width, which in turn leads to accelerated destruction of roads due to excessive load;

● shortage of road construction materials and structures, violation of logistics routes for their supply;

● increase in the number of fatalities during traffic accidents;

● the need to ensure the smooth operation of the road network and rapid response to changes in the operational situation;

● imperfect procedure for organizing commercial transportation;

● Insufficient number of trucks that meet the Euro-5, Euro-6 standard, in particular specialized vehicles for transportation of fuels and lubricants, agricultural products, etc.);

● reduction of traffic and emissions, as well as improvement of the quality of transport services;

● unprofitable activity of municipal electric transport, which is complicated by the lack of revenues to local budgets;

● increase in the cost of fuel oil materials, which leads to a decrease in the volume (increase in cost) of bus transportation;

● low level of inclusion (accessibility for people with disabilities and other low-mobility groups);

● Insufficient capacity of car checkpoints;

● shortage of permits for international road transport of goods.

Key features:

● rehabilitation of roads and man-made structures will accelerate the reconstruction of defense, civilian and critical infrastructure, as well as ensure the connection of deoccupied villages, towns and cities with district and regional centers for the timely delivery of humanitarian aid and other goods;

● changing approaches to the design and maintenance of highways will increase the emphasis on road safety, reduce the number of accidents, the severity of their consequences and, as a result, save lives and health;

● localization of road construction and fuel and lubricants (first of all, to establish the production of quality road bitumen in Ukraine, as well as to organize cost-effective supply of

bituminous binders), structures of transport facilities, inert materials to prepare for winter and work on logistics routes their supply;

● introduction of the best world practices in the design and construction of highways;

● improvement and simplification of procedures for designing roads and putting them into operation;

● revision and amendment of legislation, national standards and regulations to simplify procedures related to the implementation of road management projects, the application of world best practices; restoration and reform of urban and suburban passenger traffic will accelerate the reconstruction of civil and critical infrastructure of settlements of Ukraine, as well as ensure proper and high-quality passenger transport in cities and suburbs;

● stricter standards for pollutant emissions for vehicles with internal combustion engines (hereinafter - internal combustion engines), with a full transition in the future to electric vehicles within cities and other settlements;

● improvement of the system of transport flows (including development and implementation of the scheme of traffic organization with the help of automated traffic management systems), modernization of depots and technical services of public transport;

● increasing the cost of fuels and lubricants may increase the share of travel by public transport by reducing travel by private cars;

● development of infrastructure for electric cars, cyclists and users of personal electric transport, ensuring inclusiveness in cities;

● transition of urban and suburban public transport to payment for work performed (Public Service Contracts), which will allow to constantly improve the quality of transportation.

● the potential for integration of suburban bus and rail transport with urban (unified tariff systems, free transfer, single subscription, convenient transport interchanges, etc.);

● improvement of procedures for control and registration of commercial motor vehicles, construction and reconstruction of international road checkpoints, well-established logistics of border crossing will create conditions for rhythmic crossing of the state border and increase capacity at checkpoints for freight and passenger road transport;

● automation of information exchange between government databases at all levels;

● introduction of a modern system for collecting and exchanging information on road accidents with ensuring integration into the unified CADaS statistics system;

● introduction of intelligent transport systems, including geolocation of vehicles and automatic transmission of traffic accident notifications;

● increase and renewal of road freight rolling stock to meet the full needs of Ukraine's economic recovery

Key limitations:

● lack of financial resources for the restoration of destroyed road infrastructure, as well as the implementation of repair and construction works on other priority roads;

● lack of domestic production of quality road bitumen, vehicles, disruption of production and supply of other materials;

● the need to demine relevant facilities and determine their actual technical condition, including road safety requirements;

● lack of economically justified conditions for the purchase of trucks;

● lack of financial resources for the restoration or acquisition of new or used rolling stock of road carriers, as well as the restoration, repair or construction of material and technical bases of road carriers which must provide the technological process of providing safe services for the carriage of passengers and goods by road transport.

2. Purpose and, tasks, stages of the Recovery Plan

2.1. The goal is one or more generalized goals, proposed changes to solve problems in the area

Creating conditions for the development and restoration of road transport, increase traffic, restoration and development of infrastructure, road safety.

2.2. The main tasks indicating the necessary measures / steps for their implementation, divided into stages

1. Restoration and development of the road network with clear priorities for the state to ensure its defense capabilities, taking into account the development of regions, increasing traffic intensity and integration of the Ukrainian road network into the European, introduction of modern materials and technologies, management systems, road safety requirements promoting the development of Ukraine's economy;

2. Ensuring inclusiveness, infrastructure of urban electric transport, vehicles;

3. Harmonization of legislation with EU legislation on tolling in order to ensure sustainable funding for their maintenance and repair;

4. Identification of sources of financing for construction, current repairs, current average repairs and maintenance of roads;

5. Development of infrastructure and increasing the availability of facilities / devices for charging electric vehicles, taking into account the development of charging technologies, mobile communication with high-speed Internet access on public roads; development of a bicycle network on public highways, as well as the use of the right-of-way of the public highways;

6. Ensuring the safety of roads;

7. Analysis of the state of functioning of urban electric and suburban road transport in Ukraine;

8. Collect information on the damage to the infrastructure of settlements and in the suburbs, as well as on the number of destroyed / damaged rolling stock that was used to transport passengers;

9. Based on the results of the received information, generate a report on the needs of cities in the purchase or repair of rolling stock and restoration of transport infrastructure, identifying possible sources of funding;

10. Local executive bodies to develop regional programs for the restoration and development of transport infrastructure, including urban electric transport;

11. Increasing the capacity of road checkpoints;

12. Liberalization of international cargo transportation by road;

13. Reforming the system of state supervision and control over road safety;

14. Ensuring the full needs of the economy of Ukraine in road transport by restoring and reforming them.

STAGE OF ECONOMICS AND INSTITUTIONS OF WAR (SHORT-TERM) - "EVERYTHING FOR VICTORY!"

June 2022 - end of 2022 *

* In the event of a delay in active hostilities, the plan will be adjusted in the 4th quarter of 2022, respectively, this phase (with the planning of major activities and their financing) will be extended to 2023.

1. Survey and determination of the minimum required amount of work on new construction, reconstruction, current repairs, current average repairs and maintenance on highways (including areas damaged by hostilities) in order to ensure the smooth operation of the road network in 2022 year, as well as the implementation of the minimum required amount of such work on highways (including areas damaged by hostilities) and design work and the formation of plans for the implementation of medium-term (2023-2025) and long-term (2026- 2032) work plans;

2. Formation of the list of building norms which need to be developed, revised for the purpose of introduction of the internationally recognized principles of rationing in construction of highways;

3. Formation of the list of normative documents which need to be developed, revised for the purpose of introduction of leading requirements to technologies and materials at construction, repair and operational maintenance of highways of the general use, including concerning designing of designs of road clothes taking into account the internationally recognized principles of rationing of interrepair terms of their service;

4. Determining the sections of roads on which maintenance will be carried out under long-term contracts based on the final results (OPRC);

5. Development of a plan for digitalization of the road management system;

6. To form the list of highways of the general use (their components) concerning which new construction, reconstruction, capital repairs, current repairs, current average repairs taking into account requirements of DBN B.2.3-4: 2015 “Roads. Part I Design. Part II Construction” with Changes 1,2; DBN B.2.2-40: 2018 “Inclusiveness of buildings and structures. Basic provisions”, GBN B.2.3-37641918-549: 2018 “ Roads. Platforms for parking of vehicles and rest of road users. General design requirements”; GBN B.2.3-37641918-550: 2015 “Roads. Stops of route transport. General design requirements”, DSTU 8906: 2019 “Planning and design of bicycle infrastructure. General requirements”;

7. Introduction of the system of collecting tolls for the use of public roads by motor vehicles with a gross weight of 12 tons and more due to the adoption by the Verkhovna Rada of Ukraine of draft Laws of Ukraine 6087 "On Amendments to Certain Laws of Ukraine on Tolls for the Use of Public Roads"; 6088 "On Amendments to the Budget Code of Ukraine on Fees for the Use of Public Roads"; 6089 "On Amendments to the Code of Ukraine on Administrative Offenses to establish liability for violation of the legislation on tolls for the use of public roads" in order to implement Directive 1999/62 / EC of 17.06.1999 on fees for vehicles for the carriage of goods of large scales for the use of certain infrastructure;

8. Allocation of funds for the implementation of priority measures to ensure transport links by road;

9. Definition at the state level, taking into account the best world practices, of technical requirements for the placement of objects intended for charging electric vehicles on public roads;

10. Definition at the state level, taking into account the best world practices of technical requirements for the placement on public roads of facilities designed to provide cellular and Internet (primarily 4G) communication, the introduction of approaches "Vision Zero and Safety System";

11. Definition at the state level, taking into account the best world practices of technical requirements and recommendations for the placement on highways of facilities designed to provide bicycle traffic between large cities and within settlements, as well as for tourist and recreational cycling;

12. Definition at the state level, taking into account the best world practices of technical requirements for safe transport connections with public roads of road service facilities, prohibition of placement of advertising media and laying along the lane of public roads of utilities and networks, taking into account the need for mobile network development connection with access to high-speed Internet;

13. Adoption of bylaws on the procedure for determining the places of concentration of accidents and methods of determining economic losses due to death or injury (trauma) of people due to traffic accidents;

14. Development and adoption of the Law of Ukraine on reforming the system of passenger transport by road and urban electric transport in accordance with European Union standards in order to implement № 1370/2007 of the European Parliament and of the Council of 23 October 2007 on public passenger transport services by rail and road;

15. Transition to targeted financial assistance;

16. Adoption of bylaws on the practical implementation of the principle of procurement of transport services on urban and suburban routes;

17. Conclude an agreement with Poland on joint control on the Polish side at checkpoints, in particular Dorogusk, Khrebene, Korchova, Medica;

18. Carrying out an analysis of the route network, making changes to existing and opening new bus routes under a simplified procedure, as well as conducting the necessary number of tender committees and commissions to determine carriers that will provide transportation of passengers on such routes with the issuance of permits or contracts transportation;

19. Consultations and negotiations with the European Union on the conclusion of an agreement on road freight transport between Ukraine and the EU;

20. Amendments to the NPA aimed at adapting the legislation of Ukraine to the legislation of the European Union in terms of requirements for carriers of goods, in particular the licensing of carriers of goods;

21. Develop a mechanism for creating favorable conditions for the increase and renewal of road freight rolling stock in order to fully meet the needs of Ukraine's economic recovery;

22. Initiate a project for the restoration and development of domestic production of quality road bitumen (jointly with the Ministry of Energy and the Ministry of Economy).

RECOVERY STAGE (MEDIUM-TERM) -

"RECONSTRUCTION, RESTART OF THE ECONOMY AND INSTITUTIONS"

2023 - 2025 *

* In case of protracted active hostilities, the plan will be adjusted in the 4th quarter of 2022, respectively, this phase (with the planning of major activities and their financing) will be postponed to 2024-2026.

1. Execution of the required amount of work on new construction, reconstruction, current repairs and current average o repair and maintenance on highways (including areas damaged by hostilities) for the implementation of the medium-term work plan for 2023-2025, as well as project work for the implementation of the long-term work plan in 2026-2027;

2. Reducing the number of accidents and the severity of their consequences, which will increase the level of safety of public roads by 15% by auditing and checking the safety of public roads, the implementation of appropriate measures to improve road safety;

3. Development of building norms and normative documents that create conditions for the introduction of modern materials and technologies, scientific and technical support for the introduction of modern materials and technologies at road construction sites, design of 100% of new construction, reconstruction, overhaul, current average repairs, current repairs of public roads (their components) are performed taking into account the requirements of DBN B.2.3-4-2015 “Roads. Part I Design. Part II Construction” with Changes 1,2, in particular, in terms of stationary outdoor lighting, overground pedestrian crossings, planning and design of cycling infrastructure, parking lots for trucks and recreation of drivers, minimum thicknesses of layers of pavement, with subsequent provision of dimensional and weight control during operation;

4. Improving analytical and information work in the road sector;

5. Approval of new building norms or changes to the current ones, as well as normative documents or changes to the current ones according to the lists approved by the Ministry of Infrastructure in 2022;

6. Implementation of road maintenance under long-term contracts based on final results (OPRC): 2023 - 500 km, 2024 - 1000 km, 2025 - 2000 km;

7. Introduction of measurement of indicators of transport and operational condition of roads of state importance and planning of current repairs and current average repairs with the use of digital systems (HDM IV, SUSP, CYM, etc.);

8. Implementation in practice of the requirements of construction norms and normative documents that have been revised / developed according to the list approved by the Ministry of Infrastructure in 2022;

9. Achieving accident rates on the road network, which is typical of developed European countries;

10. Design of new construction, reconstruction, overhaul, current average repair of public roads (their components) taking into account the requirements of DBN B.2.3-4-2015 "Roads. Part I Design. Part II Construction "with Changes 1,2; DBN B.2.2-40: 2018 "Inclusiveness of buildings and structures. Basic provisions ", GBN B.2.3-37641918-549: 2018" Roads. Platforms for parking of vehicles and rest of road users. General design requirements "; GBN B.2.3-37641918-550: 2015 "Roads. Stops of route transport. General design requirements "DSTU 8906: 2019" Planning and

design of bicycle infrastructure. General requirements ", in accordance with the list of public highways approved by the Ministry of Infrastructure in 2022, as well as taking into account the requirements for the placement on public highways of facilities intended for charging electric vehicles, provided in 2022 updated to DBN B .2.2-12: 2019 "Planning and development of territories", taking into account the requirements for placement on public roads of facilities designed to provide cellular and Internet (primarily 4G) communication, taking into account the requirements for placement on highways facilities designed to provide bicycle traffic between large cities and within settlements or a network of bicycle paths laid separately from public roads;

11. Issuance of acts of the Cabinet of Ministers of Ukraine, orders of the Ministry of Infrastructure and the Ministry of Finance on regulation of the mechanism and introduction of the system of charging for the use of public roads by motor vehicles with a gross weight of 12 tons and more;

12. Attracting credit funds and grants from international financial organizations for the construction of roads;

13. Design of new construction, reconstruction, overhaul, current medium repair and current repair of public roads (their components) taking into account the requirements for placement on public roads of facilities intended for charging electric vehicles, provided for updated in 2022 to DBN B.2.2-12: 2019 "Planning and development of territories";

14. Design of new construction, reconstruction, overhaul, current average repair and current repair of public roads (their components) taking into account the requirements for placement on highways facilities for the provision of cellular and Internet (primarily 4G) communications;

15. Design of new construction, reconstruction, overhaul, current average and current repair of highways (their components) taking into account the requirements for placement on highways of facilities designed to provide bicycle traffic between large cities and within settlements; design of a network of bicycle paths laid separately from public roads;

16. Settlement in the legal field of issues of use of the lane of public roads by economic entities for the arrangement of entrances / exits and transition lanes to the objects of road service and / or for crossing the lane of public roads by utilities and networks, which will increase the level of road safety, comfort and efficiency of transportation of goods and passengers by road;

17. Formation of plans for auditing and checking the safety of roads, identifying places of concentration of accidents. Implementation of appropriate measures to improve road safety;

18. Ensure practical implementation of the principle of procurement of transport services on urban and suburban routes;

19. Transition completely to electric transport on urban and suburban routes;

20. Decrease in the share of private car travel and increase in the share of public transport, cycling and walking;

21. Updating the principles of development of urban planning documentation and documentation on spatial development, legislative implementation of the need to develop plans for sustainable urban mobility;

22. Gradual simplification of competitions and commissions with the transition to electronic form and the abolition of permits based on the results of such competitions and commissions;

23. Development of a draft Special Agreement in the field of international road transport, conciliation procedures and exchange of diplomatic notes;

24. Stimulating the use of industrial waste;

25. Reforming the system of organization of passenger traffic in settlements and suburbs by moving the introduction of socially important services;

26. Analysis of the network of interregional and international bus routes, development of measures to stimulate the opening of new international and interregional bus routes under the simplified procedure, approval of electronic registers of international and interregional bus routes and creation of software for maintaining such registers, introduction of GPS tracking on all buses , which will be used to carry passengers and appropriate control over their movement, as well as other systems of automation of control over compliance with the requirements of transport safety and other norms of current legislation;

27. Ensuring coverage of 85% of the network of international and national roads by mobile communication with access to high-speed Internet.

STAGE OF MODERNIZATION (STRATEGIC)

"STRUCTURAL MODERNIZATION AND INTEGRATION INTO THE EU"

2026 - 2032 *

* The planning dates of the stage will be adjusted based on the results of 2022 - 2023.

1. New construction, reconstruction, current average repair, current repair and maintenance of roads, implementation of the necessary design work for the implementation of the work plan in the coming years;

2. Implementation in practice of the requirements of construction norms and normative documents that have been revised / developed according to the list approved by the Ministry of Infrastructure in 2022;

3. Execution of construction and repair works according to the project documentation, developed taking into account the requirements of construction norms and normative documents, which were revised / developed according to the lists approved by the Ministry of Infrastructure in 2022;

4. Acquired the right to perform construction works according to the project documentation, developed taking into account the requirements of construction norms and normative documents, which were revised / developed according to the lists approved by the Ministry of Infrastructure in 2022;

5. Transition to the maintenance of 100% of international and national public roads under long-term contracts on final results (OPRC);

6. Improvement of digital control systems (HDM-4, SUSP, CYM, etc.), measurement of indicators of transport and operational condition of roads of state importance and optimization of current repairs and current average repairs;

7. Implementation in practice of the requirements for inclusiveness of public roads (their components) according to the list of objects of public roads approved by the Ministry of Infrastructure in 2022;

8. Receipt of additional revenues of up to UAH 9 billion to the state road fund depending on the established average tariff (1.0 - 3.0 UAH / km) and the length of roads for which the fee is charged;

9. Providing 95% of the general road network o the use of facilities intended for charging electric vehicles, located within 20 minutes of access to them by electric vehicle;

10. Ensuring coverage of 95% of the network of international and national highways by mobile communication with access to high-speed Internet;

11. Availability of a bicycle network for access to important tourist and natural objects located outside the settlements;

12. Ensuring the Euro-Velo-4 route within Ukraine outside the settlements on a separate network of bicycle paths;

13. Ensuring the preservation of road integrity, elimination of restraining factors for the development of roads, creating comfortable conditions and traffic safety;

14. Liberalization of international road transport (in particular, primarily in transit);

15. Liberalization of the market for the provision of passenger services in domestic and international traffic.

VII. Strategic transport infrastructure initiatives

1. The main issues to be addressed in the framework of the Recovery Plan

Current state of the industry / sector:

Since the beginning of the war of the Russian Federation against Ukraine, significant amounts of transport infrastructure have been damaged. Thus, as of the beginning of May 2022: 41 railway bridges were destroyed, 20 railway stations ceased to function, more than 25 thousand km of roads and 289 road bridges were destroyed. Due to the continuation of hostilities in some areas of our country, the total final number of destructions is currently impossible to establish.

Seaports located in the Black Sea are blocked. The order of the Ministry of Infrastructure of Ukraine dated April 28, 2022 № 256 "On closure of seaports", registered in the Ministry of Justice of Ukraine on April 29, 2022 for № 470/37806, closed seaports Berdiansk, Mariupol, Skadovsk, Kherson from the date of entry into force of the order to restore control over these seaports. Also closed 5 seaports of the Autonomous Republic of Crimea, the consequences of the occupation of which are not yet known. Only 3 ports (Reni, Izmail, Ust-Dunaisk) operate normally on the Danube River.

In 2021, the volume of cargo processing amounted to 153, 3 million tons, and the volume of cargo flow, which was projected for 2022, was expected at 161, 2 million tons.

Also, today the airspace of Ukraine is closed for civil aviation flights, which made it impossible for both Ukrainian and foreign airlines to operate, and led to the suspension of the provision of air navigation services by UkSATSE.

In January-April 2022, 65.9 million tons of cargo were transported by rail, which is only 69% of the level of the same period in 2021.

At the same time, since the beginning of the martial law, road and railway infrastructure has performed important functions - evacuation and movement of the population, movement of military equipment and humanitarian cargo, ensuring the functioning of the economy, social sphere and industries of the country.

At the same time, the challenges associated with the change of transport and logistics routes, the destruction of transport infrastructure necessitate an increase in the capacity of western border crossings and transport infrastructure, including the development of multimodal terminals.

This work should be coordinated with Western partners (Poland, Slovakia, Hungary, Romania and Moldova).

Currently, the railway infrastructure of JSC ‘Ukrzaliznytsia” has 13 existing railway border crossings with Western countries, 4 of which are on the TEN-T network, which directly connects with EU countries (3 more connect Ukraine and Moldova).

The actual average daily delivery of export goods is 1904 cars (about 124 thousand tons), or 55.8% of potential capacity. Including grain cargo - 314 cars (about 20 thousand tons), or 43%.

Today, up to 80,000 people and 20,000 vehicles a day cross the state border with EU countries.

The key problem of providing logistics by rail is the uneven distribution of freight traffic across the western border crossings on the state border of Ukraine (crossings with Poland are congested, with almost no traffic at checkpoints with Hungary).

There are currently about 60 checkpoints for road transport (except for closed checkpoints from Russia and Belarus), 18 of which are with EU countries (8 with Poland, 5 with Hungary, 3 with Romania, 2 with Slovakia).

Reorientation of cargo flows and increasing load on the western border crossings for road traffic has led to a long waiting time when crossing the state border (up to 3-5 days) due to inconsistency of control by the relevant services of Ukraine and neighboring countries, insufficient scanning customs control systems. One of the main tasks is to ensure unimpeded exports (granting appropriate permits to carriers) and the prompt import of humanitarian and defense cargo to the territory of Ukraine.

Key challenges in the field:

ensuring prompt response and fulfillment of state orders for transportation of passengers and cargo;

establishing clear coordination of work with friendly countries on the organization of the transportation process and the creation of a network of transport routes;

forced change in the approaches to the formation of transport logistics in connection with the closure of a number of seaports, the destruction of transport infrastructure and, as a consequence, the rupture of transport and logistics transport chains;

restoration of domestic and international accessibility of passengers and cargo owners to the market of transport services on the territory of Ukraine;

elimination of technical and technological backwardness in the organization of transportation, in particular the lack of effective interaction of different types of transport in the implementation of multimodal transportation, development of the necessary transport infrastructure and checkpoints across the state border (development transport and logistics terminals, increase in capacity, use of modern technologies of registration of transportations, etc.);

increasing risks for investments in connection with hostilities, lack of own financial resources and the need to attract new sources of their receipt, reducing the interest of private investors to participate in PPP investment projects in Ukraine due to security and financial risks;

insufficient integration of Ukrainian transport networks into the European transport network TEN-T;

the need to liberalize the pricing system in the construction, maintenance and operation of infrastructure, including public roads;

simplification of the mechanism of procurement procedures for works and services related to the restoration of destroyed property and infrastructure.

Key features:

increasing the technological capacity of the organization of multimodal transportation (including the development of transport and logistics terminals for passenger and freight transportation), ensuring the smooth functioning of all parts of the supply chain using several modes of transport;

establishing clear coordination of work with EU countries on the organization of transportation and development of the TEN-T network;

improving the efficiency of checkpoints across the state border, synchronizing work with customs and border authorities of EU countries and implementing projects to develop the infrastructure of checkpoints, increase their capacity, transition to paperless technology, use of modern equipment and reduce corruption risks;

upgrading of equipment and rolling stock to ensure effective interaction of different modes of transport;

transition to sustainable and smart mobility in line with the European Green Course;

attracting private investment, including foreign direct investment in infrastructure facilities of Ukraine by harmonizing sectoral legislation and standards with the EU;

opportunities to reform and improve the investment climate in the long run by introducing additional incentives, the possibility of using significant resources of donor countries to support Ukraine's development, the possibility of attracting retail (portfolio) investments or donations for the country's reconstruction;

implementation of European approaches in pricing, which will simplify the forms of reporting documentation to increase competition in the market of road works and services, reduce the pressure of regulatory authorities on business, stimulate innovation.

Key constraints / framework:

Russia's ongoing large-scale military aggression against Ukraine, lack of objective information on the extent of destruction of transport infrastructure;

lack of a single center at the Government level for operational analysis and solution of problematic issues of transport logistics;

lack of sustainable financing of works on restoration / construction / modernization of transport and logistics (multimodal) terminals in accordance with the requirements of radical change of cargo flows;

different from the EU countries regulatory framework governing the activities of the transport sector and the conduct of control procedures when crossing the state border;

technical and technological backwardness of checkpoints at the state border, limited capacity (in some - reaching the limit of its design capacity);

inconsistency of the development of checkpoints across the state border with the EU countries in terms of their construction sites and capacity;

lack of capacity and standards to create a list of investment infrastructure projects.

2. Goals, objectives, stages of the Recovery Plan

2.1 Purpose - one or more generalized goals, proposed changes to solve problems in the area

The goal is to harmonize the legal and organizational aspects of Ukraine's transport sector with EU countries to meet the needs of the population in transportation and ensure the development of the country's economy by changing approaches to the formation of transport and logistics solutions and development of modern transport infrastructure.

2.2 The main tasks indicating the necessary measures / steps for their implementation, divided into stages.

Development of multimodal transportation:

stimulating the reorientation of traffic to more environmentally friendly modes of transport, in particular the formation of a package of regulatory and incentive measures for the development of multimodal transport (in particular, state support, exclusion of dimensional and weight requirements for certain sections of the route). multimodal terminals;

modernization of existing and construction of new logistics multimodal terminals in the western and southern regions of Ukraine with the functions of integrated transport and logistics centers, customs services and the use of modern digital logistics management solutions (TMS, YMS, WMS);

development of the legal framework with partner countries to ensure harm technological issues of international multimodal transportation.

Expansion of the network of transport corridors:

implementation of joint projects and integration with EU transport and logistics networks by harmonizing organizational and legal aspects of activities;

improving cross-border cooperation and international cooperation;

development of a step-by-step plan for the full transition to paperless transportation support technologies, including customs and border control procedures, including with the EU countries, introduction on the territory of Ukraine of electronic document circulation of electronic consignment note (e-TTN);

taking into account the prioritization of infrastructure projects - preparation of proposals for the development of the TEN-T network within Ukraine and coordination with the TEN-T network in neighboring EU countries.

Attracting investments to ensure the implementation of infrastructure development, construction, reconstruction and modernization projects:

simplification of mechanisms for attracting investments (PPP and others), digitalization of procedures for interaction between investors and the state;

adoption of amendments to the legislation that simplify the procedures for attracting investments;

introduction of state investment support instruments;

compiling a list of priority projects for the state;

application of mechanisms for attracting and stimulating investments;

development and approval of the concept of the State Insurance Fund of Investments, creation of the State Insurance Fund of Investments.

Carrying out works related to construction, equipment, maintenance and repair at checkpoints across the state border of control rooms and office premises for the placement of relevant border units, customs and other institutions exercising control at the state border (except for engineering, technical means for border, customs and other types of control):

implementation of the project of electronic reservation of queues in front of checkpoints for automobile communication "Electronic queue";

conducting negotiations with partner countries to decide on the opening of new checkpoints for road transport (Adamchuky, Lopushanka, Varyazh, Belz, Mshanets, Boberka, Komarivtsi, Velyka Palad, Shepit, Khyzha);

overhaul and modernization of the infrastructure of checkpoints for road transport (Yagodyn, Ustyluh, Krakivets, Shehyni, Luzhanka, Uzhhorod, Chop, Vylok, Dzvinkove, Dyakove, Kosino, Porubne, Dyakivtsi, Krasnoilsk);

construction and opening of new checkpoints for road transport (Bila Tserkva, Dyida, Ruska).

attracting investments to ensure the implementation of projects for the development, construction, reconstruction and modernization of infrastructure.

Reforming the pricing system for construction, current repairs and maintenance of transport infrastructure:

Improving methodological approaches to compiling investor budget documentation by building an effective system for monitoring prices for construction materials, changing the methodology for determining cost components, taking into account the mechanism for determining the expected value for advanced forms of contracts "Design / Build", introduction of a new consolidated classifier of road works and databases of analogous objects;

introduction of a new pricing model in construction, which will provide for the compilation of information on the volume of work on international measurement systems, in particular CESMM4 and the use of internationally recognized forms of reporting on work performed.

Simplification of the mechanism of procurement procedures for works and services related to the restoration of destroyed property and infrastructure:

updating the Law of Ukraine “On Public Procurement” taking into account the best world practices, manuals on MFI procurement, etc .;

formation and implementation of model contracts for the performance of works and services.

Integration into the EU logistics network:

coordinated planning and organization of transportation between Ukrainian railways and EU railways, in particular the formation of agreed schedules of loading and unloading, the establishment of shippers of logistics chains in other countries;

increasing the capacity of the railway with the EU countries, taking into account the requirements of interoperability;

harmonization of project definition procedures and technical conditions;

harmonization of procurement rules with international standards;

harmonization of rules for budget evaluation, remuneration and supervision;

regulation at the secondary level of the procedure for determining the cost of construction, reconstruction, repair and maintenance of public roads and the practical application of the principles of market pricing and free prices.

STAGE OF ECONOMICS AND INSTITUTIONS OF WAR (SHORT-TERM) - "EVERYTHING FOR VICTORY!"

June 2022 - end of 2022 *

* In the event of a delay in active hostilities, the plan will be adjusted in the 4th quarter of 2022, respectively, this phase (with the planning of major activities and their financing) will be extended to 2023.

Issues that need to be addressed urgently: meeting the needs of transportation during the evacuation of people, delivery of humanitarian aid, equipment, requirements of the agricultural and energy markets of the country;

restoration of destroyed and development of modern transport and logistics infrastructure, in particular by attracting international financial institutions and private investment;

improving cross-border cooperation and international cooperation;

implementation of joint projects and integration with EU transport and logistics networks by harmonizing organizational and legal aspects of activities.

Main priorities / accents:

providing a systematic approach to transportation planning by all modes of transport;

improvement of the system of collection and analysis of the following data: registration of needs and available deliveries, in particular export / import transportation, delivery of humanitarian aid; determination of the main transportation routes; resource planning (containers, vehicles, fuel, drivers, etc.);

ensuring the necessary capacity of railways and highways on the basis of the analysis of "bottlenecks" on the main transport routes and preparation of proposals for their elimination and expansion of capacity;

coordinated planning and organization of transportation between Ukrainian railways and EU railways, in particular the formation of agreed schedules of loading and unloading, the establishment of shippers of logistics chains in other countries;

stimulation of containerization of transportations, development of measures on updating of container cars, development of new types of containers of the increased capacity and the nomenclature of freights (flour, oil, etc.) and railway cars for transportation of replaceable bodies;

increasing the capacity of checkpoints at the state border in coordination with friendly countries: modernization and development of checkpoints, their technical equipment (in particular, installation of scanning systems, etc.), implementation of joint projects to remove infrastructure constraints on transport, in particular, matching adjacent capacity checkpoints;

coordination with friendly countries on the division of freight and passenger traffic at individual checkpoints, the priority of the passage of humanitarian and defense goods;

creation of a reporting system for reports on destroyed / damaged transport infrastructure facilities, maintaining their register and prioritizing their restoration;

creation of the Logistics Coordination Committee at the level of members of the Government as an institutional mechanism with certain powers to improve coordination of work between public authorities and business, prompt resolution of logistics issues and the most effective satisfaction of demand for transportation;

stimulating the reorientation of transport to more environmentally friendly modes of transport, in particular the formation of a package of regulatory and incentive measures for the development of multimodal transport (including state support, exclusion of dimensional and

weight requirements for certain sections of the route ("last mile" and between terminals, etc.) terminals;

analysis of the potential for increasing the interoperability of transportation on technical and technological issues;

introduction of joint control at the state border:

coordination with neighboring countries of the list of checkpoints with the possibility of joint control;

coordination of technology of joint control operations;

determination of territories at checkpoints for joint control;

approval of the procedure for joint control of persons, vehicles and cargoes by signing the relevant regulations;

making changes to the relevant international agreements taking into account the requirements of the Schengen Code;

development of a step-by-step plan for the full transition to paperless transportation support technologies, including customs and border control procedures, including with the EU countries, introduction on the territory of Ukraine of electronic document circulation of electronic consignment note (e-TTN);

implementation of the project of electronic reservation of queues in front of checkpoints for automobile communication "Electronic queue";

conducting negotiations with partner countries to decide on the opening of new checkpoints for road transport (Adamchuky, Lopushanka, Varyazh, Belz, Mshanets, Boberka, Komarivtsi, Velyka Palad, Shepit, Khyzha);

taking into account the prioritization of infrastructure projects, preparation of proposals for the development of the TEN-T network within Ukraine and coordination with the TEN-T network in neighboring EU countries.

RECOVERY STAGE (MEDIUM-TERM) - "RECONSTRUCTION, RESTART OF THE ECONOMY AND INSTITUTIONS"

2023 - 2025 *

* In case of protracted active hostilities, the plan will be adjusted in the 4th quarter of 2022, respectively, this phase (with the planning of major activities and their financing) will be postponed to 2024-2026.

Main priorities / accents:

modernization of existing and construction of new logistics multimodal terminals in the western and southern regions of Ukraine with integrated functions their transport and logistics centers, the implementation of customs services and the use of modern digital logistics management solutions (TMS, YMS, WMS);

increasing the capacity of the railway with the EU countries, taking into account the requirements of interoperability;

construction of critical infrastructure using modern technologies (including underwater tunnels) taking into account the needs and objectives of defense (Ministry of Infrastructure);

implementation of the plan of full transition to paperless support of freight transportation;

introduction of technological solutions to increase the competitiveness of multimodal transport, in particular the introduction of a single freight transport document in electronic form for all areas of transport by different modes of transport, which meets the requirements and recommendations of the UNECE;

development of the legal framework with partner countries to ensure the settlement of technological issues of international multimodal transport;

overhaul and modernization of the infrastructure of checkpoints for road transport (Yagodyn, Ustyluh, Krakivets, Shehyni, Luzhanka, Uzhhorod, Chop, Vylok, Dzvinkove, Dyakove, Kosino, Porubne, Dyakivtsi, Krasnoilsk);

construction and opening of new checkpoints for road transport (Bila Tserkva, Dyida, Ruska);

attracting investments to ensure the implementation of projects for the development, construction, reconstruction and modernization of infrastructure;

simplification of mechanisms for attracting investments (PPP and others), digitalization of procedures for interaction between investors and the state;

adoption of amendments to the legislation that simplify the procedures for attracting investments;

introduction of state investment support instruments;

compiling a list of priority projects for the state;

application of mechanisms for attracting and stimulating investments;

development and approval of the concept of the State Insurance Fund, creation of the State Insurance Fund;

improvement of customs procedures and control procedures of vehicles at checkpoints, as well as the establishment of logistics for crossing the border by freight and passenger transport;

arrangement by state bodies of service zones for waiting (accumulation) of vehicles near checkpoints across the state border (first of all - construction of terminals (waiting zones) for sediment of freight vehicles);

viewing the TEN-T map and coordination with the EU TEN-T network.

STAGE OF MODERNIZATION (STRATEGIC)

"STRUCTURAL MODERNIZATION AND INTEGRATION INTO THE EU"

2026 - 2032 *

* The planning dates of the stage will be adjusted based on the results of 2022 - 2023.

Main priorities / accents:

development of a network of logistics multimodal terminals with the functions of integrated transport and logistics centers, the implementation of customs services and the use of modern digital logistics management solutions;

construction of critical infrastructure using modern technologies (including underwater tunnels) taking into account the needs and objectives of defense (Ministry of Infrastructure);

impact assessment of projects using the “Transport Model”;

attracting investment in transport infrastructure;

harmonization of project definition procedures and technical conditions;

harmonization of procurement rules with international standards;

harmonization of rules for budget evaluation, remuneration and supervision;

regulation at the secondary level of the procedure for determining the cost of construction, reconstruction, repair and maintenance of public roads and the practical application of the principles of market pricing and free prices;

deepening the integration of the national transport network with the EU transport network, expanding the list of routes included in the TEN-T transport network.

LIST OF PROJECTS AIMED AT THE IMPLEMENTATION OF THE RECOVERY PLAN
for the railway transport sector

No.	Project description	Rationale	Performance criteria/indicators (quantitative and qualitative)	Main responsible public authority	Estimated funding needed (UAH million, VAT exclusive)	Proposed sources of funding	Legal and regulatory framework
Infrastructure projects							
1.	**Projects aimed at the recovery of destroyed or damaged railway infrastructure** ***(to be implemented in 2022)***	The damages and destruction caused to the railway infrastructure on a day-to-day basis by the military aggression of the Russian Federation may lead to unstable freight and passenger traffic. A continuous trouble-free transportation requires undertaking timely railway infrastructure recovery works.	Overhaul repairs: - railway signalling arrangements; - traction substations; - transformer substations; - catenary systems; - engineering structures	Ministry of Infrastructure	2,485	State Budget, funds from the new special funds	
2.	**Railway infrastructure support projects to ensure**	Timely overhaul repairs of the railway infrastructure ensure continuous freight	Overhaul repairs 293 km of railway track;	Ministry of Infrastructure	3,327	Ukrainian Railway's own funds / State Budget, funds	

No.	Project description	Rationale	Performance criteria/indicators (quantitative and qualitative)	Main responsible public authority	Estimated funding needed (UAH million, VAT exclusive)	Proposed sources of funding	Legal and regulatory framework
	continuity of the transportation process ***(to be implemented in 2022)***	and passenger traffic. However, in the context of military aggression of the Russian Federation, the Company's financial capabilities are insufficient to timely overhaul the infrastructure, which in turn may lead to traffic restrictions.	95 sets of track switches			from the new special funds	
3.	**Modernisation projects for the infrastructure adjacent to the western junctions with the European countries** ***(to be implemented in 2022)***	Implementation of those projects will enable the increase in the traffic capacity, cargo traffic and passenger traffic between the EU and Ukraine. It requires the reconstruction of 1,435 mm Eurotrack, construction of 1,435 mm Eurotrack, reconstruction of 1,520 mm track and	**Laying 88 km of 1,435 mm track:** Rava-Ruska–State Border, 7 km Mostyska II–State Border, 81 km **Reconstructing 94 km of 1,520 mm track** on Kovel–Izov–State Border section (construction of 2 traction substations;	Ministry of Infrastructure	1,503	Ukrainian Railway's own funds / State Budget, funds from the new special funds	

No.	Project description	Rationale	Performance criteria/indicators (quantitative and qualitative)	Main responsible public authority	Estimated funding needed (UAH million, VAT exclusive)	Proposed sources of funding	Legal and regulatory framework
		repair of 750 mm track, construction and reconstruction of traction substations on sections: Mostyska II–State Border, Rava-Ruska–State Border (Hrebenne), Kovel–Izov–State Border, Haivoron–Rudnytsia, Berehovo–Vynohradovo, Antohivka–Zarichna.	reconstruction of transformer substations) **Repair of 750 mm track**				
4.	**Projects aimed at increasing the railway transport capacity between the EU and Ukraine** ***(to be implemented in 2023–2025)***	Implementation of those projects will enable the increase in the traffic capacity, cargo traffic and passenger traffic between the EU and Ukraine. It requires the reconstruction of 1,435 mm Eurotrack, construction of 1,435	**Laying 125.8 km of 1,435 mm track:** Kovel–Yahodyn–Polish Border, 65 km, Chop–Uzhhorod, 22 km, State Border–Starzhava–Khyriv–Nyzhankovychi–State Border, 38.8 km;	Ministry of Infrastructure	35,647	Ukrainian Railway's own funds / State Budget, funds from the new special funds	

No.	Project description	Rationale	Performance criteria/indicators (quantitative and qualitative)	Main responsible public authority	Estimated funding needed (UAH million, VAT exclusive)	Proposed sources of funding	Legal and regulatory framework
		mm Eurotrack, increasing the carrying capacity, reconstruction and construction of 1,520 mm track, modernisation of signalling arrangements and construction of a number of engineering structures on sections: Kovel–Yahodyn–Polish Border, Chop–Uzhhorod, State Border–Starzhava–Khyriv–Nyzhankovychi–State Border, Odesa–Izmail, Izmail–Reni, Berezyne–Basarabiaska.	**Reconstructing 192 km of 1,520 mm track:** Odesa–Izmail, 116 km (construction of 22 bridges, 102 track switches), Izmail–Reni, 55 km, Berezyne–Basarabiaska, 21 km (construction of 14 bridges and 3 level crossings, modernisation of signalling arrangements)				

No.	Project description	Rationale	Performance criteria/indicators (quantitative and qualitative)	Main responsible public authority	Estimated funding needed (UAH million, VAT exclusive)	Proposed sources of funding	Legal and regulatory framework
5.	**Project for construction of railway track to port station Kiliia, Ust-Danube Commercial Seaport SoE** ***(to be implemented in 2023–2025)***	At present, there is no railway service to Ust-Danube Commercial Seaport SoE, port station Kiliya, but given the increase in grain exports through the Danube ports, it will play a crucial role in the near future.	Laying 35 km of 1,520 mm track on section Artsyz–Dzinylor–Kiliia	Ministry of Infrastructure	3,200	State Budget, funds from the new special funds	
6.	**Project aimed at resumption of work and modernisation of key railway yards of Ukrzaliznytsia JSC, equipped with humps** ***(to be implemented in 2023–2025)***	Most of Ukrzaliznytsia JSC's humps were designed and built back in the 1950–1980s. Their inability to meet the modern demand for increase in transportation capacity became obvious in the pre-war period. Increase in the railway transportation (primarily export) in the post-war period is impossible without modernisation	Restoration of the damaged and modernisation of the existing railway yards and their humps, achieving an increase in capacity by more than 50%, savings of at least 40% on electricity consumption and at least 30% on maintenance costs.	Ministry of Infrastructure	5,000	Funds from IFO	

No.	Project description	Rationale	Performance criteria/indicators (quantitative and qualitative)	Main responsible public authority	Estimated funding needed (UAH million, VAT exclusive)	Proposed sources of funding	Legal and regulatory framework
		(mechanization and automation) of Ukrzaliznytsia JSC's key routes.					
Passenger transportation projects							
7.	**Projects aimed at ensuring continuity of passenger traffic during hostilities** ***(to be implemented in 2022)***	To ensure the continuity of passenger traffic and the effective evacuation of the population from the territories where active hostilities are taking place, it is necessary to overhaul the existing fleet of passenger cars and the motor-driven rolling stock, and purchase new units of passenger cars.	80 cars purchased; 15 units of motor-driven rolling stock overhauled; 370 cars overhauled; 740 cars depot repaired	Ministry of Infrastructure	2,700	Ukrainian Railway's own funds / State Budget, funds from the new special funds	

No.	Project description	Rationale	Performance criteria/indicators (quantitative and qualitative)	Main responsible public authority	Estimated funding needed (UAH million, VAT exclusive)	Proposed sources of funding	Legal and regulatory framework
8.	**Kyiv–Warsaw high-speed railway (HSR) construction project** ***(to be implemented in 2026–2032)***	The project implementation will help to reduce travel time on the route from 17–19 hours to 5–6 hours by achieving an average speed of 180 km/h.	Ukrainian component of the project involves reconstruction, modernisation and electrification of 585 km of tracks (Kyiv–Yahodyn–State Border), engineering structures and stations	Ministry of Infrastructure	35,958	Ukrainian Railway's own funds / State Budget, funds from the new special funds, funds from IFO	
Cargo transportation projects							
9.	**Increasing the capacity of change of gauge points** ***(to be implemented in 2022)***	In the context of the military aggression of the Russian Federation and hostilities in the south of Ukraine, and striving to preserve the volumes of exports and imports of goods, it is necessary to modernise the mechanisms for gauge changing from 1,520 mm to	Overhaul repairs of 23 units of equipment for rearrangement of wagons from 1,520 mm bogies on 1,435 mm bogies	Ministry of Infrastructure	7	Ukrainian Railway's own funds / State Budget, funds from the new special funds	

No.	Project description	Rationale	Performance criteria/indicators (quantitative and qualitative)	Main responsible public authority	Estimated funding needed (UAH million, VAT exclusive)	Proposed sources of funding	Legal and regulatory framework
		1,435 mm. This will allow increasing the capacity of cargo transportation westwards.					
10.	**Projects aimed to support an uninterrupted cargo transportation** ***(to be implemented in 2022)***	Increase in exports and imports with European countries through the western junctions necessitates overhaul repairs of freight wagons to ensure transportation of the needed amount and types of goods	Overhaul repairs of 5,766 wagons;	Ministry of Infrastructure	1,128	Ukrainian Railway's own funds / State Budget, funds from the new special funds	
11.	**Projects for restoration of damaged operational facilities** ***(to be implemented in 2022)***	The Russian military aggression caused damages to locomotive servicing depots. To ensure fulfilment of the locomotive repair schedules, it is	Restoration of 2 locomotive servicing depots	Ministry of Infrastructure	26	State Budget, funds from the new special funds	

No.	Project description	Rationale	Performance criteria/indicators (quantitative and qualitative)	Main responsible public authority	Estimated funding needed (UAH million, VAT exclusive)	Proposed sources of funding	Legal and regulatory framework
		necessary to restore the damaged depots.					
12.	**Locomotive fleet repair and refurbishment projects** ***(to be implemented in 2022)***	The performance of necessary modernisation and overhaul repairs of the existing locomotive fleet will allow ensuring the required traction capacity for transportation of freights and passengers.	Modernisation of 28 locomotives; Overhaul repairs of 160 locomotives.	Ministry of Infrastructure	980	Ukrainian Railway's own funds / State Budget, funds from the new special funds	
13.	**Wagons fleet renewal incentive programme** ***(to be implemented in 2023–2025)***	To renew the fleet of freight wagons — having due regard to the limitation of their service life in accordance with Order of the Ministry of Infrastructure No. 647 of 30.11.2021 — it is necessary to provide financial	Compensation for interest rate under the rolling stock lease agreements (up to 100 wagons per company) for up to 3,000 wagons per year	Ministry of Economy Ministry of Finance	5,000	State Budget, loans from international financial organisations	

No.	Project description	Rationale	Performance criteria/indicators (quantitative and qualitative)	Main responsible public authority	Estimated funding needed (UAH million, VAT exclusive)	Proposed sources of funding	Legal and regulatory framework
		support to the ordering entities (freight owners, transport companies, etc.) by compensating for financial obligations under the loan and leasing agreements in the engineering sector.					

LIST OF PROJECTS AIMED AT THE IMPLEMENTATION OF THE RECOVERY PLAN

for the air transport sector

No.	Project description	Rationale	Performance criteria/indicators (quantitative and qualitative)	Main responsible public authority	Estimated funding needed (UAH million)	Proposed sources of funding	Legal and regulatory framework
1.	**Establishment of the national air carrier** ***(to be implemented in 2023–2025)***	Ensuring the development of Boryspil Airport as a hub airport with simultaneous development of an extensive network of medium-haul flights from regions and within Ukraine, operation of socially important flights from territories where there is no alternative land transport.	Obtaining a license, air operator certificate, other permits required to start operations, lease/purchase of 2 aircraft.	Ministry of Infrastructure State Aviation Service	2,500	Funds from the State Budget	-
2.	**Establishing, opening and ensuring operation of the Permanent**	Implementation of a number of strategic issues, protection and defence of the national	Normalisation of air traffic flows in the airspace over the Black Sea.	Ministry of Foreign Affairs Ministry of Infrastructure	15 per year	Funds from the State Budget	Adoption of the Decree of the President of Ukraine

No.	Project description	Rationale	Performance criteria/indicators (quantitative and qualitative)	Main responsible public authority	Estimated funding needed (UAH million)	Proposed sources of funding	Legal and regulatory framework
	Mission of Ukraine to the International Civil Aviation Organization (ICAO) in Montreal (Canada) ***(to be implemented in 2023–2025)***	interests of Ukraine in the field of civil aviation given the existing political conditions, effective influence on the ICAO work and participation in making decisions that are binding on all ICAO member states require the constant presence in the organisation of the accredited representatives from Ukraine.	Promotion of Ukraine's membership in the ICAO Council. Coordination of Ukraine's actions at the regional level, their support and promotion at ICAO Headquarters. Representing the interests of the aviation industry of Ukraine. Preserving Ukraine's authority as an aviation state in the ICAO.	State Aviation Service			
3.	**Reconstruction/ construction of aviation infrastructure facilities** ***(to be implemented in 2023–2032)***	Recovery and development of the aviation mobility of the population.	5 to 7 international airports that meet the latest ICAO standards and are capable to serve operations of new types of aircraft (for example, A320/NEO and	Ministry of Infrastructure State Agency for Infrastructure Projects Local self-government bodies.	TBD after proper assessment of damaged/destroyed property, but not less than UAH 5,000 million per one airport	Funds from the State Budget, local budget funds, Destroyed Property and Infrastructure Recovery Fund	-

	(to be implemented in 2023–2025)					the IBRD, EBRD, EIB, KfW (Credit Institution for Reconstruction)	the necessary legislative acts in line with the requirements of the lending organisations
12.	**Overhaul repair of road No. 1 (Terminal D) and construction of an overground pedestrian crossing at Boryspil International Airport SoE** ***(to be implemented in 2023–2025)***	The construction of an overground pedestrian crossing will significantly increase the level of road safety and passenger comfort.		Ministry of Infrastructure	25	Funds from the State Budget, loans from international financial organisations, including the IBRD, EBRD, EIB, KfW (Credit Institution for Reconstruction)	Amending a set of articles of the Budget Code, adoption of the necessary legislative acts in line with the requirements of the lending organisations
13.	**Construction of a new road checkpoint at Boryspil International Airport SoE** ***(to be implemented***	The construction of a new checkpoint at the approach to the airport will significantly increase the level of security of the airport facilities.		Ministry of Infrastructure	15	Funds from the State Budget, loans from international financial organisations, including the IBRD, EBRD, EIB,	Amending a set of articles of the Budget Code, adoption of the necessary legislative acts

No.	Project description	Rationale	Performance criteria/indicators (quantitative and qualitative)	Main responsible public authority	Estimated funding needed (UAH million)	Proposed sources of funding	Legal and regulatory framework
	in 2023–2025)					KfW (Credit Institution for Reconstruction)	in line with the requirements of the lending organisations
14.	**Participation of Boryspil International Airport SoE in the operational management of airports abroad** ***(to be implemented in 2023–2025)***	Provision by Boryspil International Airport SoE of operational management services to airports (group of airports) abroad (following the example of Fraport).	Winning a tender for provision of airport management services abroad	Ministry of Infrastructure	30	Airport's own funds (for tendering)	
15.	**Restoration of the air navigation service in the air space of Ukraine in the minimum possible volumes, configurations and time intervals with observance of the flight safety requirements** ***(to be implemented***	The implementation of this project will allow Ukraine to ensure the operation of surviving air traffic and communications, navigation and surveillance equipment, to retain highly qualified personnel (ATS controllers, engineers, etc.) in the face of	Qualitative criterion demonstrating retention of highly competent, qualified personnel of the company (ATS controllers, engineers of communication, navigation and surveillance service, etc.) to prevent the personnel loss and	Ministry of Infrastructure Ukraerorukh SoE	714 (102 per month for the period from June till December this year) with further revision in Q4 of this year	Funds from the State Budget, Destroyed Property and Infrastructure Recovery Fund	-

No.	Project description	Rationale	Performance criteria/indicators (quantitative and qualitative)	Main responsible public authority	Estimated funding needed (UAH million)	Proposed sources of funding	Legal and regulatory framework
	in 2022)	military aggression of the Russian Federation, to avoid personnel loss in the air navigation sector and, as a result, to ensure the rapid resumption of flights in the air space of Ukraine after the end of hostilities. The loss of the company's personnel due to the lack of labour costs financing will lead to extremely difficult and almost irreparable consequences for the air navigation industry of Ukraine in terms of dismissal and personnel outflow to other sectors of the economy. This will result in Ukraine's inability to take measures to resume flights in the air space of Ukraine due to	further inability of the state to ensure the resumption of flights in the air space of Ukraine after the end of hostilities. For information: The training of one control or engineering specialist of the communication, navigation and surveillance service lasts for years — 5 to 7 years on average.				

No.	Project description	Rationale	Performance criteria/indicators (quantitative and qualitative)	Main responsible public authority	Estimated funding needed (UAH million)	Proposed sources of funding	Legal and regulatory framework
		lack of qualified personnel after the end of hostilities.					
16.	**Renewal of the air operator certificate and restoration of airworthiness of the Ukraerorukh SoE's aircraft** ***(to be implemented in 2022)***	Modernisation of AD-FIS airborne systems and overhaul of three engines to arrange flight inspections of ground-based radio technical communications and navigational equipment.	Producing the evidence base of compliance with the operating standards of ground-based radio technical communications and navigational equipment used by the units of Ukraerorukh SoE, at the airfields of Ukraine and at the request of foreign communication, navigation and surveillance equipment providers.	Ministry of Infrastructure State Aviation Service Ukraerorukh SoE	75	Funds from the State Budget, Destroyed Property and Infrastructure Recovery Fund	-
17.	**Mobile surveillance radars (MSR)**	The transition period of recovery and construction of a new air traffic surveillance infrastructure for ATFM,	Proper air traffic surveillance for the purpose of ATFM in a certain zone of air space during radars	Ministry of Infrastructure Ukraerorukh SoE	450	Funds from the State Budget. Destroyed Property and Infrastructure Recovery Fund	-

No.	Project description	Rationale	Performance criteria/indicators (quantitative and qualitative)	Main responsible public authority	Estimated funding needed (UAH million)	Proposed sources of funding	Legal and regulatory framework
	Mobile primary surveillance radars (PSR) (2 systems) **Mobile secondary surveillance radars (MSSR) (2 systems)** ***(to be implemented in 2022)***	primarily in the southern and eastern regions of the air space of Ukraine (FIR Odesa, FIR Dnipro and FIR Simferopol), including in the aerodrome zones of Odesa and Dnipro airfields, necessitates the use of both MSSRs and PSRs.	reconditioning or replacement.				
18.	**Aerodrome traffic control towers (ATCT)** **Aerodromes:** **Vinnytsia** **Dnipro** **Mykolaiv** **Kherson** ***(to be implemented in 2023–2025)***	Reestablishing the ATFM in the area of Dnipro, Vinnytsia, Mykolaiv and Kherson airfields. The existing ATCTs were destroyed by rocket attacks. Ensuring civil and military coordination at Dnipro and Vinnytsia airfields.	Ensuring technical infrastructure for the ATFM. Construction of ATCTs with civil controller working positions (CWP) at Dnipro and Vinnytsia airfields for the military flight control group to ensure surveillance and coordination of the joint air and ground traffic in the air space and on the airfield.	Ministry of Infrastructure Ukraerorukh SoE	1,000	Funds from the State Budget, Destroyed Property and Infrastructure Recovery Fund	-

wned and nd Plots and ocated ublic Needs sity" d Industry rban rnment in Offences	infrastructure by the state on instalment terms[1]. **The proposed mechanism is based on the following:** ● investor designs the object, constructs it, provides financing for construction works and maintains the object at the expense of its own and borrowed funds; ● investor may obtain a certain funding from the state/international fund during the construction period in the form of non-refundable grants. Such grants may cover 20 to 50 (or more) percent of the project's capital costs (depending on the project), and the source of such grants may be a fund already established by the EU/IMF for the recovery of Ukraine. This is how the idea of restoration of specific regions of Ukraine with the use of grants given by certain EU countries may be implemented; ● after the infrastructure object commissioning, investor starts receiving regular annual (quarterly) payments from the state/funds			

No.	Title of the legal and normative act	Contents of the drafted/amended legal and normative act	Public authority responsible for the drafting / amending of the legal and normative act	Deadline for development	Latest date of entry into force
		more than 10–15 years (the term of contracts is limited to avoid repeated capital investments, the calculation of which is quite complicated under uncertainty and may lead to an increase in the cost of projects for the state); ● payments made to the investor depend on its compliance with the quality requirements for infrastructure construction and maintenance and may be reduced by the amount of fines imposed for improper performance of the contract; ● investor ensures maintenance (minor repairs) of the infrastructure objects within 10–15 years; ● payments to the investor are made at the expense of special fund for the recovery of Ukraine (hereinafter referred to as the Recovery Fund) or donor funds. The expenditures of such special fund are the protected expenditure items of the State Budget of Ukraine. Payments for obligations are made in hryvnia, pegged to stable currency (USD, EUR), at the exchange rate as of the date of payment. To increase the level of guarantees for investors and			

No.	Title of the legal and normative act	Contents of the drafted/amended legal and normative act	Public authority responsible for the drafting / amending of the legal and normative act	Deadline for development	Latest date of entry into force
		prevent situations similar to those experiences with the green energy projects, the total amount of long-term obligations under PPP contracts should be limited to a certain amount (for instance, tied to a certain percentage of GDP) and covered at the expense of regular revenues so that the state does not assume long-term obligations that it will not be able to discharge; ● it is absolutely necessary to establish a separate fund to cover (insure) the risks of a possible repetition of military operations (following the example of Israel or other countries). This will give the investor an additional guarantee, since its investment will be insured; ● the majority of projects are structured as PPPs with payments made for operational readiness, where the private partner ensures infrastructure design, building, financing and maintenance (DBFM[2]). However, in certain areas, where investments may be partially or fully			

[2] In some cases, asset operation can also be included into the subject matter of contract (DBFOM). For small projects in the regions (up to UAH 250 million), it is possible to use contracts with a simplified subject matter, excluding maintenance and operation (DBF).

No.	Title of the legal and normative act	Contents of the drafted/amended legal and normative act	Public authority responsible for the drafting / amending of the legal and normative act	Deadline for development	Latest date of entry into force
		compensated by users (ports, airports, etc.), such projects can be structured as concessions with subsequent payment of concession fees to the Recovery Fund; ● it is proposed to hold the tenders for PPPs using the electronic trading system (ETS), which is already being developed by the MoEDT with the support of the EBRD for concessions (CMU Resolution No. 909 of 20.08.2021). This will significantly simplify the preparation and holding of tenders and will make them as transparent as possible. Thus, the proposed mechanism will provide and opportunity to simultaneously restore a huge number of infrastructure objects, spreading the payment of costs over 10–15 years. Investors will be motivated to properly fulfil their obligations, as their own capital will be at risk of not being returned, and the payments will depend on proper fulfilment of their obligations to build and maintain the infrastructure. Where the payments to be made under such contracts are guaranteed by the			

No.	Title of the legal and normative act	Contents of the drafted/amended legal and normative act	Public authority responsible for the drafting / amending of the legal and normative act	Deadline for development	Latest date of entry into force
		state, a certain part of the risks (due to allocation of significant grants) will be assumed by international donors, and the risks of property loss and lost profits in the event of the armed conflict recurrence will be covered by the War Risk Insurance Fund. This approach will allow attracting a significant amount of funding in the coming years. **1) Simplify the procedure for preparation and implementation of PPP projects for (1) the recovery of infrastructure objects destroyed by the war, and (2) the construction of new infrastructure objects for the purpose of the post-war reconstruction of the economy (hereinafter referred to as the Projects), in particular by ensuring the following:** 1.1 Making provision for the CMU's powers to approve the list of projects — submitted by the Ministry of Economy — for the recovery of the destroyed infrastructure objects and projects related to the post-war reconstruction of the economy, which can be implemented as PPPs under a simplified preparation procedure (hereinafter referred to as the List). The List also defines a public partner			

No.	Title of the legal and normative act	Contents of the drafted/amended legal and normative act	Public authority responsible for the drafting / amending of the legal and normative act	Deadline for development	Latest date of entry into force
		responsible for tendering, conclusion of contract and prioritization of the Projects; 1.2 Making provision for the MoE's powers to establish a commission for selection of projects to be included in the List. The management bodies will prepare proposals and submit them for consideration by the commission; 1.3 After the Project is included in the List, there will be no need in concept paper, feasibility study and efficiency analysis, which will made the project implementation period shorter by 9–10 months; 1.4 After the Project is included in the List, a construction feasibility study of the PPP project is developed with an approximate estimate of the project, calculated based on the estimates of similar objects. The procedure for maintaining a database of similar objects is approved by the CMU. All design works are carried out by the public partner at the expense of funds from the Recovery Fund/funds of donors; 1.5 In order to speed up the procedure, it is proposed to develop standard (advisory by nature) tender documentation packages for all types of projects depending on their subject matter (DBF,			

No.	Title of the legal and normative act	Contents of the drafted/amended legal and normative act	Public authority responsible for the drafting / amending of the legal and normative act	Deadline for development	Latest date of entry into force
		DBFM, DBFOM) and separate methodological recommendations for different industries (airports, ports, motor roads, railways, energy, medicine, social protection, etc.)[3]. 1.6 In order to speed up the implementation of Projects included in the List[4], it is proposed to create sectoral tender commissions (for transport, energy, medical and social projects) that will make key decisions in the process of project preparation. These commissions will be chaired by representatives of the CEAs being the public partners (consequently, the chairpersons will change depending on the project, but the commission composition will remain unchanged, allowing to concentrate expertise without excessive concentration of management decision-making); 1.7 The activities of the sectoral tender commissions will be ensured by the commissions' secretariat, which will be supported by experts of the PPP Agency;			

[3] These documents can be developed with the support of MFI in a fairly short period of time.

[4] This simplification will not apply to projects other than recovery projects.

No.	Title of the legal and normative act	Contents of the drafted/amended legal and normative act	Public authority responsible for the drafting / amending of the legal and normative act	Deadline for development	Latest date of entry into force
		1.8 Instead of conducting consultations with the market participants for each specific project, it is proposed to conduct sectoral consultations (on groups of projects), which will reduce the time for finalisation of documents and will allow unifying the approach to tender documentation; 1.9 It is proposed to hold all consultations with the market participants and tenders on the electronic platform (hereinafter referred to as the ETS), which is now being developed by the MoE with the support of the EBRD for concessions; 1.10 Based on the results of sectoral consultations in the ETS, potential participants can create their profile in the ETS, submit supporting documents and participate in pre-qualification procedure (similar to the ESPD in the EU procurement process). For the similar sectoral projects, typical qualification requirements for applicants, depending on the size of construction object, are developed. As a result, at this stage the applicants can be pre-qualified for participation in a certain group of future PPP projects;			

No.	Title of the legal and normative act	Contents of the drafted/amended legal and normative act	Public authority responsible for the drafting / amending of the legal and normative act	Deadline for development	Latest date of entry into force
		1.11 If three or more participants were pre-qualified based on the results of sectoral consultations, the public partner makes a decision to invite tenders; 1.12 After the decision on inviting tenders is made, a relevant announcement defining the date of inviting tenders (similar to the PIN notice in the EU procurement process) is made in the ETS. Thus, the entire market learns about the start date, and the remaining time before the tender is used by the tender commission to finalise the tender documentation, taking into account the proposals submitted in the ETS during sectoral consultations; 1.13 After the tenders are called for, the pre-qualification takes place (there is an opportunity for other participants to pre-qualify) and the tenders are submitted in the ETS. The tender process may be reduced from 6 to 3 months. **2) Simplify the procedure for preparation and implementation of all PPP projects at the communal level, in particular by ensuring the following:** 2.1 Making provision for the preparation of small projects (up to EUR 5.3 million) and simple projects (DBF, excluding object			

No.	Title of the legal and normative act	Contents of the drafted/amended legal and normative act	Public authority responsible for the drafting / amending of the legal and normative act	Deadline for development	Latest date of entry into force
		maintenance and operation) without feasibility study and efficiency analysis, if, based on the results of preparation of the concept paper, it has been concluded that it is not possible to implement the project through public procurement or to attract credit funds, and that the implementation of the project through PPP is the only available way to implement the project in the medium term; 2.2 Transfer of powers for the adoption of most management decisions to the executive committees of LSGB. The city or oblast council approves the list of PPP projects by one resolution and authorises the relevant official to sign the contracts. All other management decisions are adopted by the relevant resolution of the executive committee (approval of documentation developed by the commission, approval of results, etc.); 2.3 All projects in the city or oblast are prepared by one permanent tender commission; 2.4 All project procurements a made through ETS.			
8.	Introducing amendments to the Procedure for Engaging Advisers in the Preparation of	**Simplification of the procedure for selecting advisers for the purpose of**			

No.	Title of the legal and normative act	Contents of the drafted/amended legal and normative act	Public authority responsible for the drafting / amending of the legal and normative act	Deadline for development	Latest date of entry into force
	Concession Projects (CMU Resolution No. 950 of 09.10.2020).	**preparing the PPP projects included in the List, in particular by ensuring the following:** Selection of advisers in 2 stages. Both stages are temporarily implemented bypassing the provisions of the Law of Ukraine "On Public Procurement" until Prozorro SoE develops the necessary functionality in the system. At the first stage of selection, advisers are pre-qualified (shortlisted) for a whole group of projects to be implemented by the public partner. At the second stage of selection, advisers are selected with the application of one price criterion using the electronic procurement system of Prozorro SoE (analogue of simplified procurement). Thus, after pre-qualification for a group of projects, the advisers selection procedure is significantly reduced in time (from 3 months to 14 days). The conditions for selection of advisers should provide for a maximum number of projects on which one adviser can concurrently work. The payment for advisers' services is made from the Recovery Fund.

The National Council for the Recovery of Ukraine from the Consequences of the War

Draft Ukraine Recovery Plan

Materials of the “Social protection” working group

July 2022

Contents

SUMMARY

RECOVERY PLAN IN THE TRACK “SOCIAL PROTECTION”. GOALS AND OBJECTIVES

SUBGROUP “SOCIAL SUPPORT FOR THE POOR AND PEOPLE IN DIFFICULT LIFE CIRCUMSTANCES”

General Goal I: SOCIAL SERVICES ARE SUBJECT TO SYSTEMATIC ANALYSIS TO INCREASE THE EFFICIENCY OF THEIR PROVISION

General Goal II: RELOADING THE SOCIAL SUPPORT SYSTEM AS AN INTEGRATED AND UNIFIED MODEL OF THE SOCIAL PAYMENTS AND SERVICES PROVISION

SUBGROUP «PENSION AND SOCIAL INSURANCE»

General Goal III. TRANSPARENT AND EFFICIENT PENSION AND SOCIAL INSURANCE SYSTEM. STIMULATING THE POPULATION TO SAVINGS

SUBGROUP “FINANCIAL POLICY IN THE SOCIAL SPHERE”

General Goal IV. TRANSPARENCY AND COMPLETENESS OF FINANCIAL PLANNING AND REPORTING DOCUMENTS ARE SUFFICIENT FOR EFFECTIVE MAKING OF MANAGEMENT DECISIONS AND ANALYSIS OF THE EFFICIENCY OF VARIOUS INSTRUMENTS OF SOCIAL SPENDING/ASSISTANCE TO ACHIEVE POLICY GOALS

General Goal V. THE SOCIAL OBLIGATIONS OF THE STATE CORRESPOND TO ITS FINANCIAL CAPABILITIES

SUMMARY

Strategic Objective: A new model for social policy in Ukraine, which corresponds to the principles and standards of the social policy of the EU, improves the quality of human life, resists demographic changes, strengthens the level of social protection, contributes to the reduction of poverty, strengthens social unity, helps to overcome discrimination in all its forms and corresponds to the financial capabilities of the state.

1. The war caused and continues to cause irreparable damage to the social security of Ukraine. This resulted in:
   - growing load on the system of social support and social insurance of the population due to a constant increase in the number of citizens who need to receive social, rehabilitation services and payments while simultaneously reducing revenues to state and local budgets and the Compulsory Pension and Social Insurance Funds;
   - complication of information verification regarding the actual number of both adults and children who need social protection and support;
   - destruction of social infrastructure objects, loss of access to personal affairs of beneficiaries of social support;
   - specialists in the field of social support of the population also become forced migrants, which affects providing services to the population;
   - the social support system does not have time to adapt to significant migration movements of citizens, changing the active hostilities areas and changing the list of temporarily occupied territories, which, among other things, complicates the implementation of social, social insurance and pension payments to citizens;
   - emotional despair of citizens due to misunderstanding of their social rights and obligations during the war;
   - insufficient coverage of communities by the network of institutions that provide social and rehabilitation services during the war, especially in areas with a mass stay of displaced persons;
   - making it impossible for citizens of Ukraine who live in or near the zone of active hostilities, in temporarily uncontrolled territories of Ukraine, to receive their due payments and social services;
   - the deepening of the vulnerability of less mobile population groups since the beginning of the war.

2. The mentioned factors are the consequences of the extensive social policy, the practice which Ukraine inherited from the Soviet times: the more benefits, subsidies and social advantages are given to citizens, the better the manifestation of the state's concern for its citizens was considered. At the same time, the economic capabilities of the state, the expediency and the quality of ensuring the promised and calculated were not taken into account. As a result, there is a constantly growing number of unstructured, poorly understood benefits, subsidies and social benefits, which are not supported by the financial capacity of the state, especially under the conditions of martial law. This poses a threat to the economic stability of the state and the formation and implementation of an effective social policy. There is insufficient targeting and efficiency of the use of funds, and a lack of prioritization of expenditures, which scatters resources and does not allow solving the problems of the beneficiaries.
3. The course determined by the President of Ukraine to "reboot the country" in the post-war period provides a chance to review the components of the existing outdated, and as it turned out, vulnerable to a large-scale social crisis.
4. On the way to EU membership, Ukraine should follow the fundamental principles of the EU's functioning, namely the "inseparability of social and economic progress" when formulating a new social policy. This principle means the impossibility and inadmissibility of achieving one to the detriment of the other. Thus, the social policy of the state lays down the principles and culture of mutual respect both between people and between people and institutions, both public and private, which fully corresponds to the vision of the European Commission for supporting policies of member states in the field of social inclusion (barrier-free) and social protection.
5. The post-war period will require an integrated (complex) strategy of social protection, considering the features associated with the special legal status of individual beneficiaries (in particular, veterans, Chornobyl disaster victims, internally displaced persons, etc.), the implementation of which will be ensured thanks to interdepartmental and interdisciplinary

coordination. Therefore, there is a need to review the components of the existing social system to ensure opportunities for people to live a full and independent life. It is necessary to establish clear, transparent, and objective criteria for obtaining the right to social services and social benefits.

6. Social protection programs should help people in difficult life circumstances. It is also necessary to support the human dignity of both current and future pensioners so that upon reaching a respectable age, people continue to be patriotic and active members of society and pass on their life experiences to the next generations of Ukrainian citizens.
7. The pension system is based mainly on the principle of solidarity ("first pillar"). This does not allow pensioners upon retirement to receive a replacement level of even 40% of their previous income. Therefore, the introduction of mandatory funded pension («second pillar") is a strategic task to motivate the population to save for retirement. This, in turn, will stimulate legal employment, first for young people.
8. One of the tools for the implementation of such a comprehensive program of social protection should be the digital "Unified Information System of the Social Sphere" (hereinafter - UISSS), which is being implemented by the Ministry of Social Policy of Ukraine. The UISSS should ensure accessibility/inclusivity, transparency, ease of receiving social services and payments by beneficiaries, internally displaced persons, persons and families in difficult life circumstances, people with disabilities, military personnel, veterans, and pensioners, regardless of the place of registration throughout the territory of Ukraine. The key limitation of using such a system is insufficient digital literacy among beneficiaries of the social system, incomplete Internet coverage of the territory of Ukraine, and the economic inaccessibility of technical means for using this system.
9. The first step to achieving the goal of a comprehensive social protection program should be to conduct a comprehensive analysis of the current financial obligations of the state in the social sphere, the available volume of social and insurance services and payments and the conditions of access to them, and to forecast models of the effective functioning of the social support system in the post-war period.
10. It is necessary to establish clear, transparent, and objective criteria for obtaining the right to social services and social benefits. Social protection programs should help people in difficult life circumstances. At the same time, it is necessary not to forget about supporting the human dignity of both today and future pensioners, so that upon reaching a respectable age, people continue to be patriotic and active members of society and pass on their life experiences and family values to the next generations of Ukrainian citizens.
11. Under the principles of the EU, the beneficiary of the implementation of the social policy of Ukraine should be every citizen of the country, and, despite the branching of the directions of such activity, the priorities were, are and remain: social support that reveals the potential of a person and supports a decent standard of living for everyone, modernization spheres of social protection and pension provision, expansion of citizens' access to digital services in the social sphere, barrier-freeness and overcoming discrimination in all its manifestations.
12. Social policy should be people-centred, flexible, and able to provide services and payments regardless of the place of stay in Ukraine and be based on long-term goals following the EU social policy. Social policy cannot be formed separately from employment policy, which is developing in Ukraine as a component of economic policy.
13. Chapter 21 of Section V of the Association Agreement between Ukraine and the EU defines the objectives of cooperation in the field of employment, social policy, and equal opportunities, and contains clear guidelines on how social policy and employment and equal opportunity policies are interdependent. It is an axiom that the better the labour market is developed, the more resources the state receives to support and implement social and insurance programs for those who need them. The main task of providing social support to citizens is not to replace the "person-to-person" relationship with money, but to encourage people to independently earn income to support their families. A person can count on the state, but not transfer to it the care of oneself, which should become a general principle of social support for the population.
14. In the conditions of martial law, the state must make a difficult decision regarding the revision of the current social protection programs from the standpoint of their expediency and ability to perform, which requires firm political will and systematic control over its implementation.
15. The priority areas of Ukrainian social policy remain the following: increasing the level of pension provision, digital transformation of the social sphere, social support for the poor and people who have found themselves in difficult life circumstances, and barrier-free integration of all members of society, in particular people with disabilities, other low-mobility groups into the socio-economic community life
16. Taking into account the stability of political priorities in the social sphere, the new model of Ukraine's social policy, which meets the principles and standards of EU social policy and the financial capabilities of the state, will improve the quality of human life, resist demographic changes, strengthen the level of social protection, contribute to the reduction of poverty, strengthen social unity, will help overcome discrimination in all its forms and strengthen citizens' trust in the authorities.

17. When developing the components of a new social policy, it is worth taking advantage of the trust in Ukraine and the desire to help on the part of the EU member states, as well as their experience in implementing social reforms.

RECOVERY PLAN IN THE TRACK "SOCIAL PROTECTION". GOALS AND OBJECTIVES

SUBGROUP "SOCIAL SUPPORT FOR THE POOR AND PEOPLE IN DIFFICULT LIFE CIRCUMSTANCES"

	Stage I: June 2022– end of 2022	**Stage II: January 2023– December 2025**	**Stage III: January 2026– December 2032**
The problem, which needs a solution in the specified track of the analysis ● the extensive system of social payments, benefits and compensations is primarily categorical and does not provide an adequate level of support; ● insufficiently developed system of social services			
General Goal I: SOCIAL SERVICES ARE SUBJECT TO SYSTEMATIC ANALYSIS TO INCREASE THE EFFICIENCY OF THEIR PROVISION			
The goal to be achieved to solve the problem at each stage	Operational goal **Personalized social services contribute to overcoming the difficult life circumstances in which a person found themself because of the war**	Operational goal **1. Recipients of social services can independently integrate into social and economic life in a community after a temporary intervention** **2. Completion of the formation and launch of the Unified Information System of the Social Sphere (UISSS)**	Operational goal **The market of social services meets the needs of individuals/families in difficult life circumstances, considering the barrier-free principles**
Deadline within the stage	31.12.2022	31.12.2025	31.12.2032
Risks in achieving the goal	**Economic: Insufficient funding** **Political: Untimely adoption of changes to legislation** **Social: Society's resistance to change** **Political: Lack of political support for the adoption of changes to the legislation**		
Measurable indicator of goal achievement	The number of recipients of social services by each type The share of families removed from difficult life circumstances The number of local programs containing tasks for the development of social services Number of social services provided in each community Share of the population in the community covered by social services The share of persons who applied for social support, as a result of which social assistance was not assigned or the provision of social services was refused	The number of recipients of social services by each type Share ratio between different types of social services in the community The share of families relieved from difficult life circumstances A share of persons - members of families in difficult life circumstances, who were provided with active measures to promote employment The number of employed registered unemployed persons - family members in difficult life circumstances, thanks to active employment promotion programs, and the share of the total number of employed people in the community Duration of the employment period Number of employers who employ family members in difficult life circumstances	The ratio of social service providers of private and communal property, The share of non-state social service providers who provide social services at the expense of budget funds The number of territorial communities in which local programs provide for expenditures on the provision of social services by social service providers of the non-state sector The number of men and women who received social services from a non-state sector provider at the expense of budget funds The number of families with children (girls and boys separately) who received social services from a non-state sector provider at the expense of budget funds

	Stage I: June 2022– end of 2022	Stage II: January 2023– December 2025	Stage III: January 2026– December 2032
		Number of people - family members in difficult life circumstances who started their own business and did not close it within 2 years The number of persons - members of families in difficult life circumstances who received social services for adaptation to the labour market and independently found work The volume of state funding, which is directed to the payment of social services in communities	The number of economic entities that submitted a declaration of economic activity in the field of social services The number of registered declarations of economic activity in the field of social services and economic entities included in the Register of providers and recipients of social services The share of territorial communities where social services are provided and social work is carried out The number of social work specialists / social managers who work in territorial communities and systematically undergo training on the implementation of social work and the provision of social services The number of training programs for managers at the level of state bodies, regional institutions, districts, and communities, who have undergone training in the management, development and maintenance of personnel providing social services
The total financial need to achieve the goal	Requires additional financial resources, as well as the time burden on civil servants and experts		
Link of the goal with other tracks	Financial policy, human rights, development of regions, return of citizens, protection of children's rights, protection of veterans' rights	Economic policy	Economic policy, Regional development
The problem, which needs a solution in the specified track of the analysis: **there is no interconnection between the systems of social payments and services and the consolidation of efforts of different levels of government and local self-government bodies to create an integrated model of social support**			
General Goal II: RELOADING THE SOCIAL SUPPORT SYSTEM AS AN INTEGRATED AND UNIFIED MODEL OF THE SOCIAL PAYMENTS AND SERVICES PROVISION			
The goal to be achieved to solve the problem at each stage	Operational goal **Analysis and evaluation of the effectiveness of the provision of introduced social services and payments**	Operational goal **1. Preparation and adoption of the draft Social Code** **2. The reform of approaches to the application of the living wage in Ukraine ensured. The subsistence minimum determines the risk of a citizen falling below**	Operational goal **1. Provision of social support considering an integrated social approach, considering the features associated with the special legal status of individual beneficiaries (veterans, Chornobyl disaster victims, internally displaced persons, etc.)**

	Stage I: June 2022– end of 2022	Stage II: January 2023– December 2025	Stage III: January 2026– December 2032
		the poverty line, and is used to determine the amount of universal social assistance.	**2. The living wage in Ukraine reflects its economic content (living wage) and is used as a basic indicator to identify persons who need financial support from the state**
Deadline within the stage	31.12.2022	31.12.2024	31.12.2032
Risks in achieving the goal	The share of persons - members of families in difficult life circumstances, who got out of difficult life circumstances, after the provision of social services. The number, frequency, duration of provision of social services, the number of employees - the subject of the provision of social services, who are involved in the provision of social services, so that the person/family can overcome difficult life circumstances on their own. The number, frequency, duration of the provision of social services, the number of employees - subjects of the provision of social services, who are involved in the provision of social services to persons who, due to their health or personal development, cannot overcome difficult life circumstances Number and duration of payments	The number of identified profiles of recipients of social services and payments The number and list of social services and benefits provided at the state and local levels Amendments have been made to the legislation, which ensures the reform of the application of the subsistence minimum while simultaneously solving the problem of excessive pressure of related payments on the state budget	The share of persons - members of families in difficult life circumstances who got out of difficult life circumstances, after the provision of social services The share of people whose payments have been stopped due to getting out of difficult life circumstances The size of the subsistence minimum determined by legislation corresponds to the value expression of the actual minimum needs of a citizen; without at the same time creating an excessive burden on public finances
Measurable indicator of goal achievement	**Organizational: Lack of personnel who are supposed to assess needs, develop the register and their incompetence** **Political: Late introduction of registers** **Social: Society's resistance to introduced changes** **Financial: insufficient funding**		
The total financial need to achieve the goal	Economic policy, financial and tax policy, development of regions, return of citizens, protection of children's rights, protection of veterans' rights, digitalization		
Link of the goal with other tracks	Requires additional financial resources, as well as the time burden on civil servants and experts		

No	Name of the program document	Status
	Human development strategy National strategy in the field of human rights National economic strategy for the period up to 20230 State strategy of regional development for 2021-2027 Digital transformation of the social sphere strategy National strategy for creating a barrier-free space in Ukraine for the period up to 2030	Under implementation but require revisions

No	Description of the task to achieve the goal	Deadline within the stage	Dependence on goals from other directions, spheres, problems
General Goal I: SOCIAL SERVICES ARE SUBJECT TO SYSTEMATIC ANALYSIS TO INCREASE THE EFFICIENCY OF THEIR PROVISION			
	Stage I: June 2022 - end of 2022		
1.	Analysing recipients of social assistance, the grounds for receiving social benefits and services and determining new criteria for providing social, rehabilitation services and payments to families based on their needs, considering the financial and property status of all family members	December 2022	
2	Review and update state standards of social services according to priority policies (no more than five), considering the peculiarities of their provision during martial law	December 2022	
3.	Formation of a single register of providers and recipients of social services for the registration of persons/families in difficult life circumstances and need of social services: - software development - development of an online course for training specialists in working with the register - conducting training of specialists on working with the register - development of an algorithm for information exchange of data from the register	December 2022	
4.	Determination of the mechanism and levels of involvement of case management approaches for the provision of social services for internally displaced persons, persons with disabilities, and evacuated persons to support their barrier-free integration in the selected communities, regardless of whether they are in the new community for a certain period or decided about moving	December 2022	
5.	Improvement of vocational guidance programs of the State Employment Service with elements of psychological support, which will be aimed at forming positive motivation for work, adaptation to current labour market conditions, prevention of negative attitudes for persons with disabilities and persons in difficult life circumstances, which will be available both for the State Service system employment, as well as for other social service providers	December 2022	
6.	Completion of the development of a free educational base with training courses that will be adapted and take into account current professions and skills in the labour market and the peculiarities of the educational process for persons with disabilities and persons in difficult life circumstances	December 2022	
	Stage II: January 2023 - December 2025		
1.	Implementation of the stages of modernization of the Unified Information System of the Social Sphere (UISSS) for the provision of social payments and services following the schedule, for the implementation of the Strategy for the digital transformation of the social sphere, approved by the Order of the Cabinet of Ministers of Ukraine dated October 28, 2020 No. 1353-r	December 2023	
2.	Revision of the state standard of social support services at the time of employment to ensure the cooperation of social workers and specialized career counsellors of employment centres for persons with disabilities	December 2023	

3.	Strengthening the targeting of the provision of social support by increasing the efficiency of administration and provision of social benefits and services in communities, to ensure the integration of persons who are unable to overcome difficult life circumstances on their own, monitoring the effectiveness of the provision of such services, when changing communities of residence or returning to communities in which persons lived before the start of military actions	December 2023	
4.	Determination of the mechanism of cooperation of social service providers with employment centres, job portals, private employment agencies, entities providing consulting services in the HR management field, and entities providing educational services to assist in the employment of persons who are in difficult life circumstances, in particular persons with disability, taking into account the regional economic profile and the regional forecast of the need for workers, as well as taking into account the norm regarding the employment of persons with disabilities under the Council Directive 2000/78/EU of 27.11.2000 on the establishment of a general system of equal treatment in the field of employment and professional activity	December 2023	
5.	Updating training courses for people in difficult life circumstances, about opportunities to increase competitiveness in the labour market and self-realization, separately for each region and considering the regional specifics of the labour market	December 2023	
6.	Analysing the international experience and practices to improve and develop social services as a component of preparation for the development of the Social Code	December 2023	
7.	Implementation of an information campaign about rights in the field of social support (social benefits, social services) considering the list of available social services, their content, and the procedure for providing them, considering the features of receiving such services at the community level, in a form accessible to individuals with any type of health disorder	December 2023	
8.	Revision of the state standard of social support for families (persons) in difficult life circumstances, to introduce a personal family assistant	December 2023	
9.	Review and update the list of social services, considering the defined profiles of recipients of social services and social assistance	December 2023	
10.	Development of free remote and educational programs on access to professions, which, according to the analysis, are accessible to persons with disabilities in regions where these persons can conclude contracts on remote work	December 2025	
11.	Analysing the assessment of equality of rights regarding access to service recipients and financing by social service providers of all forms of ownership, and recipients of social services regardless of the place of residence and financial capacity of the community	December 2025	
12.	Creating conditions for the recipient to exercise the right to freely choose a provider of social services through the launch of the Register of Providers and Recipients of Social Services and ensuring that recipients of social services are informed in a way accessible to them about the list of providers of the required service by providing an extract from the Register of Providers and Recipients of Social Services	December 2025	

13.	Introduction of social services in communities that create conditions for the integration of persons in difficult life circumstances social rehabilitation and adaptation, support during employment and at the workplace, if such services cannot be consumed electronically by the recipient of social services	December 2025	
14	Conducting an information campaign on the involvement of persons with disabilities in the public sector (enterprises and public administration) as a reference point for private businesses to improve their corporate social responsibility programs	December 2025	
15	Creation of a single state customer of social services as a separate central body of executive power, which will conclude contracts for the purchase of social services with providers of all forms of ownership and will pay for the provided social services at the expense of the state budget within the framework of the relevant program	December 2025	
Stage III: January 2026 - December 2032			
1.	Implementation of training programs on personnel management for subjects of social service provision, local self-government bodies, which are adapted to the special requirements for skills and competencies of persons who provide specific social services for certain categories of the population	December 2027	
2	Introduction of the mechanism of personalized financing of the case of the recipient of social services by: development of the social development of communities' plans, which are based on the analysis of statistical data on the number of recipients and their needs for social services that have been submitted to the Register of Providers and Recipients of Social Services planning the amount of funding exclusively based on the cost of necessary expenses for conducting each case of providing social services; determination of the list of standards of social services, the financing of which is proportional to the cost of the implemented measures of the individual plan for each case according to the approved tariffs	December 2032	
General Goal II: RELOADING THE SOCIAL SUPPORT SYSTEM AS AN INTEGRATED AND UNIFIED MODEL OF THE SOCIAL PAYMENTS AND SERVICES PROVISION			
Stage I: June 2022 - end of 2022			
1.	Analysing the current state of satisfaction of persons/families with difficult life circumstances with the introduced payments and social services, as well as the results of monitoring the provision of social services and assessing their quality in the context of determining the burden on state and local budgets for their provision	December 2022	
2.	The formation of a new vision of the application of the subsistence minimum as an indicator of the minimum level of a citizen's financial needs to meet his basic needs (living wage), and therefore - as a basic value for determining the risk of a citizen falling below the poverty line, and determining the needs of citizens for social support, with simultaneous from the indicator of the subsistence minimum of all payments not characteristic of it to reduce the financial burden on the state budget	December 2022	
3.	Development of criteria for determining the needs of persons in difficult life circumstances for the individual formation of requested social services according to the list of social services available during martial law	December 2022	
4.	Bringing the legislation on the register of providers and recipients of social services as a source of collection, exchange, and analysis of needs in social services following the peculiarities of its filling and use in conditions	December 2022	

	of martial law		
Stage II: January 2023 - December 2025			
1.	Introduction of a system for identifying needs in social services	December 2023	
2.	Approbation of the developed profiles of recipients of social services within the framework of the pilot project of the integrated social approach	December 2023	
3.	Development and adoption of changes to the legislation on reforming the subsistence minimum, to convert it into a living wage indicator (the basic value for determining the risk of a citizen falling below the poverty line), with the simultaneous untying of all non-specific payments from the subsistence minimum indicator; determination of the duration of the transition period for the actual introduction of new approaches to the use of the subsistence minimum to avoid pressure on public finances	December 2023	
4.	Introduction of universal social assistance as the main means of overcoming poverty and responding to difficult life circumstances, taking into account the verification of the property and material condition (Means test) and coordination of the system of social services that are tied to such universal social assistance; ensuring consistency between the size of the reformed subsistence minimum and the amount of universal social assistance (as the difference between the actual income level of a citizen and the size of a fair subsistence minimum)	December 2023	
5.	Preparation of the principles of functioning of the integrated model of providing social benefits and social services for the withdrawal of people with difficult life circumstances	December 2023	
6.	Preparation of a project of the Social Code for restarting the social support system, which will be based on changes in the system and principles of providing social benefits and social services, considering changes in approaches to the social sphere financing model	July 2024	
Stage III: January 2026 - December 2032			
1.	Bringing the legislation of Ukraine into compliance with the requirements of the Social Code of Ukraine	December 2026	
2.	Conducting an information and clarification campaign regarding the rights and responsibilities of individuals in connection with the adoption of the Social Code of Ukraine	December 2026

10	Social Code	restarting the system of social support, which will be based on changes in the system and principles of providing social benefits and social services, considering changes in approaches to the social sphere financing model, taking into account the peculiarities related to the special legal status of individual beneficiaries (veterans, Chornobyl disaster victims, internally displaced persons, etc.)	Ministry of Social Policy	July 2024	December 2024

SUBGROUP «**PENSION AND SOCIAL INSURANCE**»

	Stage I: June 2022 - end of 2022	**Stage II: January 2023 - December 2025**	**Stage III: January 2026 - December 2032**
The problem, which needs a solution in the specified track of the analysis: low level of pension provision and overloading of the solidarity level of pension insurance			
General Goal III. TRANSPARENT AND EFFICIENT PENSION AND SOCIAL INSURANCE SYSTEM. STIMULATING THE POPULATION TO SAVINGS			
The goal to be achieved to solve the problem at each stage	Operational goal **The size of the insurance payment is related to the size of the contribution**	Operational goal **1. Normative regulation of the introduction of the second pillar of the pension system** **2. The public is informed about the advantages and ways of making their savings** **3. Preparation of financial institutions for the introduction of the second level of the pension insurance system** **4. Systematization of the architecture of pensions, state life support and other preferences in the pension insurance system** **6. Compensation in the amount of fair compensation for damage caused because of the war** **7. Introduction of the European model for calculating damage to life and health** **8. The second pillar of the pension system launched**	Operational goal **1. Social insurance payments are made on time, and a person receives an appropriate level of pension security during retirement.** **2. Introduction of new savings programs for individuals and enterprises.**
Deadline within the stage	December 2022	1. December 2025	1. From 2026 2,3. December 2032
Risks in achieving the goal	Legal - non-adoption of legal acts on time Social - non-acceptance of the second level of the pension insurance system Financial - insufficient development of the financial services market, the stock market Economic - it is impossible to form reserves for implementation Organizational – competence and technical support of employees of the Pension Fund of Ukraine		
Measurable indicator of goal achievement	The share of citizens who are informed about the benefits of social insurance and receiving benefits	Institutions were created, and the accumulative pension system implemented since 2025	At least 40% of the income replacement level ensured

	Stage I: June 2022 - end of 2022	Stage II: January 2023 - December 2025	Stage III: January 2026 - December 2032
The total financial need to achieve the goal	Does not require additional financial resources in advance, except for the time burden on civil servants and experts	From UAH 30 bn in the first year of implementation	
Link of the goal with other tracks	Economic policy, Financial policy		

No	Name of the program document	Status
	National strategy in the field of human rights Human development strategy National economic strategy for the period until 2030	Under implementation but require revisions

No	Description of the task to achieve the goal	Deadline within the stage	Dependence on goals from other directions, spheres, problems
General Goal III. TRANSPARENT AND EFFICIENT PENSION AND SOCIAL INSURANCE SYSTEM. STIMULATING THE POPULATION TO SAVINGS			
Stage I: June 2022 – December 2022			
1	Adoption of the draft Law of Ukraine On Amendments to the Law of Ukraine "On Mandatory State Social Insurance" (new version) (Register No. 3663)	December 2022	
2.	Amendments to the laws of Ukraine regarding the compliance of insurance payments with the amount of the paid social contribution	December 2022	
Stage II: January 2023 - December 2025			
1	Adoption of the draft Law of Ukraine On the second level of the pension system (reg. No. 2683)	December 2023	
2	Carrying out an active communication and information campaign regarding the introduction of accumulative pension provision and the need to plan the implementation of pension savings for young people as support for the intention to participate in the recovery of the country and in planning one's future in Ukraine	December 2023	
3	Determining the principles of changing the model of realization of citizens' rights to pension provision. Amendments to the laws of Ukraine regarding the unification of the conditions of pension provision, considering the peculiarities of labour activity and the payment of contributions.	December 2025	
4	Formation of the legal framework of the savings system under the Law of On the second level of the pension system	December 2025	

	Institutions for the second pillar of the pension system formed Information systems supporting the operation of the storage system developed and implemented Implementation of accumulative pension programs for various categories of persons		
5	Amendments to the legislation regarding the transition from the system of preferential pensions to the accumulative professional pension system Formation of the infrastructure for the introduction of the accumulative professional pension system Introduction of the accumulative professional pension system	December 2025

4	The draft Law of Ukraine on the conditions and procedure for calculating damage to insured persons and its compensation by the aggressor country and relevant by-laws	Formation of the material and financial basis for the fulfilment of financial obligations that arose before the system of mandatory state social insurance during the period of military operations	Ministry of Social Policy	2025	2026
5	Draft Law on the transition from the system of preferential pensions to the accumulative professional pension system	Introduction of the accumulative professional pension system	Ministry of Social Policy	2022	2024
6	Draft Law on the introduction of the treasury pension plan in Ukraine	Introduction of the treasury pension plan in Ukraine	Ministry of Social Policy	2022	2024

SUBGROUP "FINANCIAL POLICY IN THE SOCIAL SPHERE"

	Stage I: June 2022 - end of 2022	Stage II: January 2023 - December 2025	Stage III: January 2026 - December 2032
The problem, which needs a solution in the specified track of the analysis: **The information provided in the documents used in the budget process and the reports on the implementation of the budget does not disclose the content of the expenditures on social benefits and assistance by their types and groups of beneficiaries**			
General Goal IV. TRANSPARENCY AND COMPLETENESS OF FINANCIAL PLANNING AND REPORTING DOCUMENTS ARE SUFFICIENT FOR EFFECTIVE MAKING OF MANAGEMENT DECISIONS AND ANALYSIS OF THE EFFICIENCY OF VARIOUS INSTRUMENTS OF SOCIAL SPENDING/ASSISTANCE TO ACHIEVE POLICY GOALS			
The goal to be achieved to solve the problem at each stage	Operational goal: **Determination of priority policies for the state for efficient social support of citizens, for those who find themselves in difficult life circumstances (up to 5 key policies)**	Operational goal: **1. Formation of policies in the relevant areas of the social sphere, and optimization of the number of budget programs, reducing their number with a maximum tie to 1 strategic goal in social policy.** **2. An effective and transparent system of administration and distribution of humanitarian aid to the final consumer (last mile) created**	Operational goal: **All information on social expenditures, in terms of citizen support instruments, beneficiary groups, and funds spent by each instrument and by each type and group of beneficiaries, including Compulsory State Social and Pension Insurance Funds, is public and available.**
Deadline within the stage	December 2022	December 2025	December 2032
Risks in achieving the goal	The lack of sufficient information regarding the structure of recipients of social benefits may complicate/make impossible the analysis; Lack of political will to ensure transparency and publicity of information about the financial condition of the Compulsory State Pension and Social Insurance Funds; Low capacity of responsible executors in specialized authorities, social funds to introduce changes;		
Measurable indicator of goal achievement	A list of key policies in the social sphere was formed, with target indicators formed based on policy analysis	1. Budget programs reveal the content of the expenditures on social benefits and assistance by their types and groups of beneficiaries 2. Humanitarian aid reaches those who need it most and is complementary to social benefits and services.	Publication of information on the Compulsory State Social and Pension Insurance Funds
The total financial need to achieve the goal	Does not require additional financial resources in advance, except for the time burden on civil servants and experts		
Link of the goal with other tracks	Financial, budgetary and tax policy, Pension and insurance provision, Economic policy, Protection of veterans' rights, Protection of children's rights		

The problem, which needs a solution in the specified track of the analysis: **The social obligations of the state significantly exceed its financial capabilities**			
General Goal V. THE SOCIAL OBLIGATIONS OF THE STATE CORRESPOND TO ITS FINANCIAL CAPABILITIES			
The goal to be achieved to solve the problem at each stage	Operational goal **1. The Social Insurance funds have an effective management system** **2. The Social Insurance Funds have a clear understanding of the financial obligations that they fulfil, which are (i) the implementation of social insurance obligations guaranteed by the Constitution, (ii) formed because of additional obligations on the Funds regarding the provision of benefits, additional payments, benefits, etc**	Operational goal **1. Social expenditures have a clear classification, depending on the economic content of payments, as well as a clear source of financing for these expenditures, defined by legislation:** **- social guarantees;** **- social services;** **- social insurance;** **- social benefits/privileges.** **2. Funding of social services ensures a similar amount and quality of the social services provided to citizens in need of such services regardless of the region**	Operational goal **1. The State clearly understands the recipients of social support, and the scope and reasons/grounds for providing such support and can fully fulfil its social obligations defined by legislation. The Compulsory Social and Pension Insurance Funds are balanced and do not have expenditure obligations not covered by revenues**
Deadline within the stage	December 2022	December 2025	December 2032
Risks in achieving the goal	Political resistance from all stakeholder/beneficiary groups Low capacity of responsible executors to implement these goals; The lack of sufficient information regarding the structure of recipients of social benefits may complicate/impossibility a quick analysis; Lack of political will to limit the rights of legislators in taking on additional social obligations by the state; Dependence on the timeframe for the creation of the Unified Register		
Measurable indicator of goal achievement	1. An analytical report prepared with an assessment of the state's existing financial obligations in the social sphere 2. A report was prepared by each of the Social Insurance Funds regarding the structure and their financial obligations in terms of social insurance, and additional payments assigned to them by law	1. Adoption of the Social Code 2. A fair and adequate approach to the size of the social contribution determined, based on actuarial calculations; relevant changes made to the legislation 3. An institution created at the central level that provides centralized financing of social services based on the principle of "money goes to the recipient".	1. Budgets of social funds are balanced 2. The state has no uncovered financial and social obligations 3. Citizens who need support from the state receive it in a sufficient amount, depending on their needs, in a transparent and efficient manner
The total financial need to achieve the goal	Does not require additional financial resources in advance, except for the time burden on civil servants and experts		

Link of the goal with other tracks	Financial policy, Pension and insurance provision, Economic policy, Protection of veterans' rights, Protection of children's rights, Return of citizens, Regional development

No	Description of the task to achieve the goal	Deadline within the stage	Dependence on goals from other directions, spheres, problems	
General Goal IV. **TRANSPARENCY AND COMPLETENESS OF FINANCIAL PLANNING AND REPORTING DOCUMENTS ARE SUFFICIENT FOR EFFECTIVE MAKING OF MANAGEMENT DECISIONS AND ANALYSIS OF THE EFFICIENCY OF VARIOUS INSTRUMENTS OF SOCIAL SPENDING/ASSISTANCE TO ACHIEVE POLICY GOALS**				
Stage I: June 2022 - end of 2022				
1	Determination of priority state policies for efficient support of citizens (4-6 key policies).	December 2022		
2	Developing a methodology and performing the efficiency analysis of the various tools for supporting citizens (cost and benefit analysis) in achieving the goals defined by the key policies;	December 2022		
3	Analysing the efficiency of budget programs of the Ministry of Social Policy and the efficiency of achieving policy goals due to the expenditure of budget funds in this direction (cost and benefit analysis)	December 2022		
4	Amendments to the legislation on the provision of comprehensive information on the draft budget of the Compulsory State Social and Pension Insurance Funds for the relevant period, balance sheet, financial reports, etc., for the assessment of fiscal risks associated with these Funds, in the preparation of the state budget	December 2022		
5	Perform the efficiency assessment of the management system of the Compulsory Pension and Social Insurance Funds	December 2022		
Stage II: January 2023 - December 2025				
1	Amendments to regulations to ensure compliance of the Compulsory Social and Pension Insurance Fund reporting with international financial reporting standards	July 2023		
2	Formation of policy documents in the relevant areas of the social sphere	July 2023		
3	Restructuring of budget programs of the Ministry of Social Policy	July 2023		
4	Inclusion of information on fiscal risks related to the Compulsory Social and Pension Insurance Funds in the materials attached to the draft Law on the State Budget of Ukraine for 2024	September 2023		

5	A Humanitarian Agency established under the Ministry of Social Policy ensures the effective distribution of humanitarian aid to those who need it most and complements, rather than duplicates, the system of social benefits and services.	July 2024		
General Goal V. **THE SOCIAL OBLIGATIONS OF THE STATE CORRESPOND TO ITS FINANCIAL CAPABILITIES**				
Stage I: June 2022 - end of 2022				
1.	Inventory of information on the existing obligations of the state for social benefits	December 2022		
2.	Verification of all available payments to different categories of citizens, especially for excluding the duplication	December 2022		
3	Preparation of a report by each of the Social Insurance Funds regarding the structure of their financial obligations in terms of social insurance; and additional, legally defined, payments assigned to them	December 2022		
Stage II: January 2023 - December 2025				
1	Analysing the payables of the Social Insurance Funds for social payments; the state policy regarding further actions to solve the problem of this debt determined (principles of prioritization in debt repayment)	July 2023		
2	Analysing the optimal model of financing social services and the financial resources needed to provide a sufficient number of social services, regardless of the region	July 2023		
3	Social services provision system financing centralization and institutionalization	December 2025		
4	Codification of legislation in the field of social services and payments – the Social Code	December 2024		
5	Formation of a policy on solving the problem of indebtedness of the Social Insurance Funds to a single treasury account	December 2024		
6	Conducting an information and communication campaign for citizens regarding new approaches to accessing and receiving social support, social, insurance and other types of assistance from the state	December 2024		
7	Determining a fair and adequate approach to the size of the social contribution and its splitting between the Funds, based on actuarial calculations	December 2024		

The National Council for the Recovery of Ukraine from the Consequences of the War

Draft Ukraine Recovery Plan

Materials of “The return of citizens temporarily displaced, in particular abroad, and their integration into the socio-economic life” working group

July 2022

DRAFT

Introduction

1. Russia's military aggression against Ukraine has caused many negative actors that impacted all spheres of life in Ukraine, among them:
   - Increase in the number of citizens in need for state social assistance
   - Decrease in the economic activities of small and medium-sized businesses – prime employers in Ukraine, along with simultaneous increase in number of the citizens living below the poverty line
   - Deterioration of the country's demographic situation
   - Threat of loss of country's intellectual potential caused by a massive outflow from Ukraine of qualified specialists in all spheres of public life and economy
   - Destruction / damage of housing, civil, social, administrative and other infrastructure promises
   - Urgent need for temporary dwelling and employment for IDPs in host communities

2. Russia's military aggression since 2014 has forced a significant number of citizens displace to the territories controlled by Ukraine from the Autonomous Republic of Crimea, and Donbass. In 2014, the Law of Ukraine "On Ensuring the Rights and Freedoms of Internally Displaced Persons", the Law of Ukraine "On Ensuring the Rights and Freedoms of Citizens and the Legal Regime in the Temporarily Occupied Territory of Ukraine" were adopted, which need revision after the 2022 invasion.

3. The International Organization for Migration estimates that as of May 23, 2022, the number of internally displaced ppeople in Ukraine was 7,134,000. As of June 3, 2022, the Ministry of Social Policy confirms that 4,172,104 people are registered as IDPs. Whereas, before 24.02.2022, the Unified Information Database of IDPs registered 1,470,072 IDPs, of which approximately 745,000 IDPs permanently reside in the territories controlled by the Government of Ukraine, and the rest - in the territories not controlled by the Government.

4. According to UNHCR's estimates as of June 13, 2022, since February 24, 2022, 7,514,460 citizens have left Ukraine and 2,479,398 returned, and 3,206,642 Ukrainians have received temporary protection in the EU. In the EU, temporary protection status is mostly sought by women with children, who can be joined by their husbands after the war.

5. Ukraine is facing the threat of losing the intellectual potential for its development. Young people go to Western universities, which creates favorable conditions for their further employment in the EU. But their experience of studying and working in the EU will contribute to the positive transformation of the socio-economic life in communities upon return.

6. In 2021, the Cabinet of Ministers of Ukraine approved the Strategy for Integration of IDPs and implementation of the medium-term Decisions on internal displacement until 2024, which is the basis for the development of Ukraine's Integration Policy during the war and postwar period.

7. The first step towards its implementation will be a analysis of the support programs in place for IDPs, their families and children, which need revision and adaptation to the new challenges. It's necessary to develop unified criteria for assessing the individual needs of integration policy for targeted approaches (set of social, administrative, public services, etc.).

8. Despite the war, the status of internal displacement shall not be timeless, due to human's natural need to integrate into the host community and, according to preliminary estimates, this process should take no longer than six months. Based on the understanding of comprehensive state assistance to IDPs during the adaptation period, it is necessary to adhere to the principle of social justice and equal opportunities.

9. Achieving the political goal to return the citizens requires compliance of all state policies with human-centered approach, respect for human rights, which is ensured through the implementation of the integration policy. The means to achieve the goals is the government' will and determination to create comfortable and attractive conditions for living, working, doing business in perceived safe communities, individual administrative-territorial units of Ukraine.

10. It is the state that creates the conditions, and the citizens choose the time for returning to home communities from which they were forced to leave at the beginning of the war. This should be a voluntary movement supported by the state's interest. The state can only entice people to return voluntary, but not by coercion.

11. Making concrete and quick decisions should be based on the interests of citizens as end users, which are accumulated in the specific policy on housing reconstruction, restoration and development of social, educational, cultural, health, sports infrastructure and offers of barrier-free access to consumption in these areas, social services, insurance and recourse payments, entrepreneurial specialization in communities, forecasting the demand for labour and appropriate qualifications of employees, investment attractiveness of communities, job offers, etc.

12. The integration policy should be developed under conditions when Ukrainians' access to the freedoms, on which the EU internal market is built, becomes wider: freedom of people's movement, freedom of movement of workers, goods and capital. It must be taken into account when developing the integration policy, as Ukraine will compete with European countries for our qualified specialists, who have a choice of proposals and expand opportunities for self-realization in the EU.

13. The EU sees integration as a "multidimensional process", which means interaction at all levels of governmental institutions through a cross-sectoral approach. The means used in the development and implementation of the regional, socio-economic, migration policies of the state are tools to achieve the goals of the Integration Policy to return the citizens into the socio-economic life of the state, which is reflected in the Recovery Plan.

14. An integral part of the Integration Policy, development and implementation of which will be coordinated by the Ministry of Reintegration through a new position - the Commissioners for Integration, is management of the internal migration caused by socio-economic factors, while the security component of internal migration is a priority for Security and Defence Office.

15. Internal migration / movement of the citizens within the country is an outcome of citizens' perception of the state reform on the development of the regions. Based on the above, development of the integration policy will be carried out simultaneously with the development of a new- brand migration policy, assuming a growth in internal and external migration among the citizens of Ukraine, especially in the medium term.

16. The strategic goals set to ensure the integration of the IDPs before the war, are still relevant during the war time and will be in the post-war period. These are: the realization of housing and property rights of IDPs, their employment and education of internally, realization of the right to social protection, medical care, access to files and other documents.

1. Goals, objectives, phases of the Recovery Plan in the direction "Return of the Citizens Who are Temporarily Displaced, in Particular Abroad and Their Integration into the Socio-Economic Life of Ukraine":

	Phase 1: June 2022 - end of 2022	Phase 2: January 2023 - December 2025	Phase 3: January 2026 - December 2032
The issue that needs to be addressed: A significant increase in the number of internally displaced people, and a sharp change in the population structure in the communities they leave and their host communities compared to the pre-war period, and the emergence of a new society group who seeks for temporary protection in other countries for security reasons. All of them need rapid and comprehensive solution to make them remain in and/or return to Ukraine			
Goal I **Creation by the Government of Ukraine of attractive socio-economic and infrastructural conditions for citizens of Ukraine to return and stay in Ukraine**			
The goal to be achieved to solve the problem at each stage	1.1.Provision of citizens with temporary housing and restoration of destroyed / damaged housing (intersectoral cooperation in the framework of regional development) 1.2.Employment of people who change their community of residence, returns to the communities from which they left due to the war and security reasons (intersectoral cooperation in the framework of economic policy) 1.3.Social support (intersectoral cooperation in the framework of social policy) 1.4.Restoration of social, educational, cultural, health infrastructure and services in these areas (intersectoral cooperation in the development of regions, education, culture, sports)		
Deadline within the stage	2022-2032		
Risks that affect the achievement of the goal	On-going active hostilities and the continuation of the war Mobility of the line of demarcation with the front of active hostilities Extension of the list of temporarily occupied territories Limited funding for the infrastructure restoration		

	Phase 1: June 2022 - end of 2022	Phase 2: January 2023 - December 2025	Phase 3: January 2026 - December 2032
	Competition with the EU countries which granted temporary protection status to Ukrainian qualified specialists, and the conditions offered to the integration of Ukrainian migrants in EU countries		
KPIs	Number of internally displaced people registered in host communities Number of citizens who returned to the communities in the de-occupied territories Number of citizens participating in external labor migration according to the reports of private employment agencies Number of citizens who received temporary protection in the EU member states, permanent residence permit, employment permit in the EU member states Number of citizens for whom the readmission procedure with the EU was implemented Number of citizens employed in the host community Number of citizens who started their own business in the host community Number of enterprises that changed their place of registration after the relocation of the business, the number of employees who moved together with the employer, the number of employees who were fired due to disagreement with the change of significant working conditions Number of IDPs, people who have returned from abroad, booked through the project "E-Booking" Number of IDPs employed with the infrastructure reconstruction projects Number of citizens whose claim on damage / destruction of housing has been registered Number of internally displaced persons whose claim for need in temporary housing has been registered Number of registered internally displaced persons who participated in mortgage lending programs Percentage of social, cultural, educational and other civil infrastructure facilities that have been completely rebuilt, restored in accordance with the register and schedule The number of rebuilt square meters of destroyed housing in accordance with the register and schedule		

	Phase 1: June 2022 - end of 2022	Phase 2: January 2023 - December 2025	Phase 3: January 2026 - December 2032
The total amount of need for financial resources to achieve the goal	Will be determined after making the necessary calculations		
Communication of the goal with other areas	Audit of war losses Protection of human rights Infrastructure restoration Economic policy Financial policy Social policy Development of regions Education and science Culture and information policy European integration Modernization of security and defense		

Defining objectives to achieve Goal I

p / p	Objectives to achieve the goal	Deadline	Dependence on other areas, spheres, problems
Goal I. Creation by the Government of Ukraine of attractive socio-economic and infrastructural conditions for the citizens of Ukraine to return and stay in Ukraine			
Phase 1: June 2022 - end of 2022			
1.	Improving approaches to the formation and content of the Unified Information Database on IDPs, including for the systematic updating of registration data on internally displaced persons	December 2022	Social policy, Digitization
2.	Modernization of the Unified Information System of the Social Sphere, in particular in terms of the services for IDPs, access to social services through the DIA portal, ensuring the provision of social benefits and services in electronic form in accordance with the schedule of the Social Sphere Digitization Strategy	December 2022	Social policy, Digitization
3.	Improving the efficiency of the Social Community program for the registration of IDPs, taking into account the received feedback from specialists who IDPs	December 2022	Social policy, Digitization
4.	Conducting a series of surveys (by different areas of interest) to assess the needs of IDPs in new host communities, to identify priority needs for IDPs through the DIA portal / application and other tools available to IDPs	December 2022	Social policy, Digitization , Economic policy, Infrastructure restoration
5.	Conducting a series of surveys (by different areas of interest) in order to assess the needs and motivations of citizens who have received temporary protection status in the EU for their return to Ukraine, including through the DIA portal / application	December 2022	European integration, digitalization , Modernization of security and defense

p / p	Objectives to achieve the goal	Deadline	Dependence on other areas, spheres, problems
Goal I. Creation by the Government of Ukraine of attractive socio-economic and infrastructural conditions for the citizens of Ukraine to return and stay in Ukraine			
Phase 1: June 2022 - end of 2022			
6.	Analysis of active employment programs in place, and development of proposals of possible attractive employment mechanisms for employers to encourage hiring Ukrainians who have received temporary protection in the EU, to implement investment infrastructure and social projects for national reconstruction in Ukraine carried out in Ukraine by national business and Government.	December 2022	Economic policy
7.	Conducting an information campaign targeted at IDPs and Ukrainians displaced abroad about the algorithm of actions for self-realization and obtaining a decent income in Ukraine during the war, including through the DIA portal / application	December 2022	Economic policy, Digitization
8.	Assessing effectiveness of the socio-economic policy in place, on-going programmes and public spendings addressing IDPs, people with temporary protection status in the EU, those living in the temporarily occupied territories, those forcibly displaced, deported to Russia and Belarus	December 2022	Economic policy, Social policy, Protection of human rights, Development of regions, European integration, Education and science, Financial policy, Culture and information policy
9.	Conducting a survey to determine the basic statistical data on the people whoreceived temporary protection status in the EU with the assistance of UN agencies, including via the DIA portal / application	December 2022	European integration, Digitization ,

p / p	Objectives to achieve the goal	Deadline	Dependence on other areas, spheres, problems
Goal I. Creation by the Government of Ukraine of attractive socio-economic and infrastructural conditions for the citizens of Ukraine to return and stay in Ukraine			
Phase 1: June 2022 - end of 2022			
			Development of security and defense
11.	Development of amendments to bylaws to improve regestering process of IDPs and the needs assessment approach , including the need to create conditions for return Ukrainians to the place of residence	December 2022	Social policy, Development of regions, Governance
12.	Equipment of premises for temporary residence / stay of IDPs (cultural, social and administrative buildings, modular buildings and other prefabricated or mobile structures)	December 2022	Development of regions, Infrastructure restoration

Phase 2: January 2023 - December 2025			
1.	Assessing the coverage area and effectiveness of remote work for Ukrainian employers with the purpose to preserve employment relations with the Ukrainians who received temporary protection status in EU	December 2023	Economic policy, Digitization
2.	Analysis of the effectiveness of active employment programs, focuses of the state and local budgets, the budget of the Fund of Compulsory State Social Insurance in case of unemployment, the Fund for People with Disabilities to achieve the goals of such programs, reducing unemployment in the regions of Ukraine with the highest number of IDPs.	December 2023	Economic policy, Development of regions, Social policy, Financial policy

3.	Analysis and development of "the professional profile" of IDPs by the regions of Ukraine	December 2023	Economic policy, Social policy, Digitization
4.	Development and approval of a new methodology for re-skilling jobseekers, registered unemployed, by the institutions of the State Employment Service	December 2023	Economic policy, Social policy, Digitization
5.	Analysis of the effectiveness of providing social assistance to IDPs, those of them who find themselves in difficult life circumstances, in preparation for the development of the new Social Code	December 2023	Social policy, Financial policy
6.	Introduction of financial mechanisms aimed at supporting the rental of housing by IDPs in difficult life circumstances	December 2023	Financial policy, Social policy
7.	Analyzing and making proposals on availability, efficiency and security of employment for people who live in the temporarily occupied territories, but want to work in the territory controlled by the Government of Ukraine	December 2023	Social policy, Economic policy, Financial policy, Development of regions, Modernization of security and defense, Digitization , Protection of human rights
9.	Development of the cultural and educational campaign to target IDPs and migrants abroad with the purpose to encourage their return and stay in Ukraine, after assessing the psychological barriers for adaptation of migrants to life under new conditions, and their integration into the new communities in Ukraine and EU member states.	December 2024	Culture and information policy, European integration, Development of regions
10.	Improving the system of state standards for the provision of social services in order to integrate IDPs into life in the host community	December 2024	Social policy, Development of regions,

			Digitization
11.	Identification and development of professional (for employees) and business clusters (for business) at the community level to form a regional forecast of supply and demand in the labor market	December 2024	Economic policy, Development of regions, Social policy, Digitization
12.	Approval of the employment programme for IDPs and people who relocated to the territory controlled by the Government of Ukraine with the purpose to participate in the reconstruction of infrastructure (information campaign, education and training, corporate social responsibility of developers and contractors, temporary (official) housing)	December 2024	Development of regions, Economic policy, Social policy
13.	Approval of changes to the methodology for forming a regional forecast for supply and demand in the labor market	December 2025	Economic policy, Social policy, Development of regions, Digitization
14.	Approval of programmes of non-formal short-term training (reskilling) for IDPs to meet the needs of workers of certain qualifications for employment at enterprises registered in the region, in priority economic activities identified at the *oblast* level	December 2025	Development of regions, Economic policy, Social policy, Education and science
15.	Implementation/ improvement of existing mechanisms of filling the relevant funds and mechanisms of their use, in particular filling of Housing Funds, by means of: - purchasing housing; - re-equipping non-residential premises into residential ones; - available ownerless premises; - non-profit rent, etc.	December 2025	Infrastructure restoration, Development of regions

16.	Approval of the programe of involvement of the citizens who have received work experience in other countries, in realization of the state target programs of restoration of Ukraine, regional investment projects	December 2025	Economic policy, European integration , Development of regions, Infrastructure restoration
17.	Development of a unified integrational information interactive platform for communication and support of displaced people "Self-realization in Ukraine": - providing information on the development and implementation of the state integration policy - informing about the activities of the Ministry of Reintegration, the Commissioners for Integration, the National Agency of Ukraine for the Protection of the Rights and Freedoms of Citizens of Ukraine, who have received temporary shelter in the territory of EU member states and other states - communication channel of authorized persons on integration with beneficiaries and stakeholders - conducting online training and communication sessions for and among Commissioners for Integration - communication channel on the conditions created for the integration of beneficiaries in the selected regions - providing services to peopole targeted by the integration policy - exchange of information on the regional labor market, economic specialization of regional and local business, assessment of development potential, analytical information on the labor market in regions, communities, as well as job offers for beneficiaries of integration policy, personnel reserve from among those involved or wanting carry out internal migration, or have work experience in the EU, but want to return to Ukraine, their professional affiliation, qualifications, work experience, qualification requirements to perform the work in demand in the region	December 2025	Digitization , Economic policy, Social policy, Development of regions

18.	Approval of the personnel reserve programme for IDPs and displaced people wishing to return to Ukraine	December 2025	Economic policy, Social policy, Development of regions, Digitization
19.	Adoption of recommendations for the development in the communities of the housing rental market for IDPs, people returning from abroad	December 2025	Economic policy, Financial policy, Development of regions
20.	Reconstruction and restoration of social, educational, cultural, health infrastructure, taking into account the norms of barrier -free access to such facilities according to the schedules defined at the regional level	December 2025	Reconstruction of infrastructure, Development of regions
21.	Creation of jobs at the restored objects of social, educational, cultural, health infrastructure, planning and preparation of the registered unemployed for employment at such objects of state, communal property	December 2025	Economic policy, Development of regions
Phase 3: January 2026 - December 2032			
1.	Utilisation of the mechanisms to support family, social and veteran business for IDPs and people who received temporary protection in the EU, and their family members, to encourage return and stay in Ukraine	December 2026	Economic policy, Protection of veterans' rights, Social policy, European integration
2.	An infomational suppot of the IDPs on the situation with their abandoned place of residence, restoration and functioning of its social infrastructure, demining area and other information , which is to facilitate a balanced decision on return to the abandoned place of residence.	December, 2026	Security system modernization, Reconstruction and development of regions, The social protection

	Phase 1: June 2022 - end of 2022	Phase 2: January 2023 - December 2025	Phase 3: January 2026 - December 2032
An issue which needs to be addressed: *Before the war external migration of Ukrainians, particularly to the EU countries, was considers mainly though border-control security regulations. Today, this cooperation should be continued in deepening cooperation on integration, migration, asylum provision in connection with Ukraine's accession to the EU and a huge number of people seeking refuge in the EU, for the return of which Ukraine has the necessary socio-economic and infrastructural conditions.*			
Goal II **Development of a new partnership between Ukraine and the EU on the return of its citizens to Ukraine**			
The goal to be achieved to solve the problem at each stage	2.1.Analysis of data on people who received temporary protection in the EU	2.2.National bodies that formulate and implement state policy in the field of migration, asylum, integration, and border management act in coordination in solidarity and partnership with the EU and EU Member States.	
Deadline within the stage	4th quarter 2022	2023-2032 _ _	
Risks that affect the achievement of the goal	inefficient interaction between the authorities to establish cooperation with the authorities of the EU member states, EU agencies that own the data, UN agencies	continuation of hostilities, insufficient resources to restore socio-economic activity in communities, slow recovery of infrastructure, adoption by EU member states of programs for the integration of Ukrainians into education, the labor market, the simplification of doing business for enterprises relocated from Ukraine, the international agreement on Ukraine's commitment to EU membership (after granting EU candidate status) will not

The National Council for the Recovery of Ukraine from the Consequences of the War

Draft Ukraine Recovery Plan

Materials of the “Veterans' rights protection” working group

July 2022

Scope of analysis (individual component) within the direction: "Protection of veterans' rights"

Purpose: Veterans, thanks to the skills acquired during service and positive reputation in society, are a strategic resource for the reconstruction, development of the economy and security of Ukraine.

1. State policy to protect the rights of veterans due to the large-scale military invasion of the Russian Federation into Ukraine must find answers to the following challenges:
   - a rapid increase in the number of veterans and families of fallen defenders who need social support and payments;
   - lack of financial resources to meet all identified needs of veterans, their families and family members of fallen defenders;
   - the impossibility of predicting the number of veterans who will be eligible for government support after the end of the war;
   - progression of the scale of necessary social support and targeted needs in veterans' affairs, in particular in urgent psychological and medical assistance, rehabilitation of military personnel, veterans, family members of fallen defenders;
   - detection of numerous violations during the mobilization procedure (superficial examination of documents, formal passing of military medical commissions), as well as the absence or poor quality of training of mobilized persons without military experience, which increases the risk of being injured or killed;
   - lack of effective tools for the transition from military to civilian life;
   - forming a request in society to update the definition of the concept of "veteran" and its corresponding criteria, including for the acquisition and realization of the right to social protection
   - the need to recognize the contribution of civilians in countering the modern threat (volunteers, rescuers, etc.), with distinction from the contribution of veterans

2. The demand for the modernization of the veterans' policy has never sounded as acute as during the period of active hostilities. The prerequisites for this are a certain set of political and social factors that demonstrate an insufficiently coordinated understanding of the essence of veteran policy, which is now, for the most part, focused on a remunerative, rather than a motivating, function.

3. The need for political coordination of the role of the Ministry of Veterans and the development of its institutional capacity remains relevant. Lack of coordination by the Ministry of Veterans of the scope and list of social services and social support to which veterans and veteran family members are entitled, in accordance with the system of assessing their individual needs, imperfect interaction between the veteran body and the bodies of the security and defense forces, which provide social and legal protection of citizens, regional development, complicates the formation of a new veteran policy and the introduction of a transition system from a military career to civilian life.

4. Among other things, it should be taken into account that many active military personnel who defend the country in the war with the Russian Federation have at the same time the status of a veteran (participant in hostilities or even a person with a disability), which causes the need to improve such interdepartmental interaction in order to provide them with social support with taking into account dual status. The problem is also that the Ministry of Veterans Affairs does not have data on how many veterans continue military service. Using this inconsistency, there is political manipulation of the expectations of the veteran community by expanding declared social benefits, services, and preferences that are not financially supported.

5. There is an understanding that interaction with veterans based on the principle of equal and dignified treatment without emphasizing the vulnerability of this category of citizens will contribute to increasing both respect for veterans in society and their self-respect, as well as improving the veteran's active reintegration into peaceful life after completing military service.

6. Veterans, as a rule, are economically active people, members of civil society and leaders of public opinion who are able and aspire to be drivers of positive changes in the state. But veterans have different expectations regarding their state support, misunderstanding and, as a result, non-acceptance of changes in approaches to social support for veterans.

7. Therefore, when planning changes in the veteran policy, it is necessary to take into account that veterans have a heightened sense of dignity and justice, and the inability to independently integrate without professional support into the broad social, socio-economic life of the country, when veterans are more comfortable being among their "own", risks of possible radicalization may arise sentiments in the veteran community, which should be duly taken into account.

8. The system of state social support for veterans must be updated in accordance with the needs of today's veterans and unified for all persons entitled to veteran status. For this, it is necessary to carry out comprehensive research, analysis and forecasting of the needs of veterans, their families and the families of the deceased, which may also constantly change in connection with the social and political situation in the country. The current system of social support for veterans is not adapted to the need to motivate its recipients to find ways of self-sufficiency and gradually reduce veterans' dependence on state support.

9. In accordance with Article 17 of the Constitution of Ukraine, the state provides social protection for citizens of Ukraine who are serving in the Armed Forces of Ukraine and other military formations, as well as their family members. The Constitutional Court of Ukraine has repeatedly concluded that enhanced social protection of military personnel complies with the principles of equality and the rule of law, since military personnel "perform constitutionally significant functions; therefore, the state must grant them and their family members a special status and provide additional guarantees of social protection in accordance with the fifth part of Article 17 of the Constitution of Ukraine both during service and after it ends" (KSU decision of April 6, 2022 No. 1- p(II)/2022). That is, the state recognizes the obligation of enhanced social protection for both military personnel and veterans, and guarantees its implementation. This is primarily due to the significant risk to the life and health of military personnel who consciously perform their constitutional duty to protect the sovereignty of Ukraine, exposing themselves to danger.

10. The beneficiaries of the renewal of the foundations of the state veteran policy are not only veterans and their family members, family members of fallen defenders, but the entire Ukrainian society in general. The state veteran policy should be based on the principles of simplicity, clarity, barrier-freeness, respect for the veteran, expression of public gratitude for his contribution to the defense of Ukraine, provision of mechanisms and support for him to independently improve his well-being in civilian life after military service.

11. Reforming the veteran policy taking into account the standards and best experience of NATO member states, which most closely matches the conditions of Ukraine, in particular, the modernization of approaches to determining the legal status of veterans, their social support, the introduction of a system of transition from a military career to civilian life and the provision of services for their faster recovery and integration into the social and economic life of communities, will confirm the dignified attitude of the state to veterans. The transition from preferential life support for veterans to a system of motivation and self-realization in civilian life after the end of military service according to the experience and standards of NATO countries will ultimately have a positive impact on the development of civil society in general, strengthening the economic and entrepreneurial capacity of citizens.

The direction of the restoration of the country "Protection of the rights of veterans". Goals and objectives

	Phase 1: June 2022 - end of 2022	**Phase 2: January 2023 - December 2025**	**Stage 3: January 2026 - December 2032**
Goal 1: Providing a system of social support for veterans, which will not only alleviate their combat injuries and financial losses, but also help them to be implemented in the socio-economic life of the state after the end of the military service			
The goal that must be achieved to solve the problem at each stage	1) Carrying out a comprehensive review of the system of social support for veterans, family members of the deceased and developing a "needs map" of veterans, taking into account the priority needs of different categories of veterans. 2) Development of the principles of state veteran policy.	Unification by the Ministry of Veterans Affairs of Ukraine of all state programs of social support for veterans, families of fallen defenders as a component of the future Social Code	Provision of a transparent, understandable and user-friendly, motivating system of social support for veterans
The deadline is within the stage	until December 31, 2022	2023-2025 years	2026-2032 years
Risks of achieving the goal	Absence of a single coordination center on issues of veteran policy at the level of the Government and Verkhovna Rada of Ukraine. Different understanding and	Absence of a single coordination center on issues of veteran policy at the level of the Government and Verkhovna Rada of Ukraine.	Absence of a single coordination center on issues of veteran policy at the level of the Government and the Verkhovna Rada of Ukraine.

	Phase 1: June 2022 - end of 2022	Phase 2: January 2023 - December 2025	Stage 3: January 2026 - December 2032
	resistance in the search for consensus among authorities in the spheres of security, law enforcement, veterans, social policies.	Different understanding and resistance in the search for consensus among authorities in the spheres of security, law enforcement, veterans, social policies. Competition for sphere of influence. Struggle for spheres of influence	Inadequate coordination of the Ministry of Veterans Affairs with the central bodies of executive power, which form state social, medical, educational, economic policies, as well as policies in the sphere of security and defense, in the interests of veterans.
Measured indicator of goal achievement	There is a draft of the principles of veterans policy developed according to the development schedule, discussed and agreed with key ministries (Ministry of Defense, Ministry of Social Policy, Ministry of Economy, and other stakeholders, including the public) and registered in the parliament. The number of appeals, including to the government hotlines, on issues of granting statuses, medical and psychological assistance to the wounded and discharged from military service, families of the dead	The number of appeals and complaints of veterans and/or family members of the deceased regarding the difficulty of obtaining state services in the field of veteran affairs. The level of awareness and satisfaction of veterans and family members of the deceased with social support programs. There is a developed and adopted Social Code with a separate section on the features of veterans' support	The number of veterans (according to categories) and family members of the deceased who use the state support system and consider it effective; reducing the number of bodies and institutions that a veteran must visit in order to receive the right; reduction (liquidation) of the housing queue; increase in the number of economically active population due to working medical and psychological support, growth of economic and financial indicators due to active reintegration of veterans into peaceful life

	Phase 1: June 2022 - end of 2022	Phase 2: January 2023 - December 2025	Stage 3: January 2026 - December 2032
The total size of the need for financial resources to achieve the goal	State budget of Ukraine	State budget of Ukraine	State budget of Ukraine, local financing, donor support
Connection of the goal with other directions:			
Social policy, Economic policy and employment policy, Health care , Development of the security and defense system, Education and science, Information policy, Culture, Euro-Atlantic integration			
Goal 2: Providing the state with opportunities for veterans to realize their professional potential without barriers for their own development and the economic development of the state			
A goal to be achieved at each stage	Ensuring prompt and effective response to challenges in connection with the continuation of active hostilities (granting of statuses, medical and psychological assistance to the wounded and discharged from military service, families of the dead)	Development and implementation of the road map of the system of transition from military service to civilian life.	Implementation of conditions of equal access to state guarantees and services, in particular thanks to the new system of transition to civilian life, and specialized digital services
Deadline	December, 2022	2023 - 2025	2026 - 2032
Risks to achievement	Lack of funding. Time constraints that can prevent qualitative analysis	Lack of funding. Absence of a single coordination center on issues of veteran policy at the level of the government and parliament. Different understanding and resistance in the search for consensus among authorities in the spheres of security, law enforcement, veterans, social policies.	Lack of funding. Absence of a single coordination center on issues of veteran policy at the level of the government and parliament. Different understanding and resistance in the search for consensus among authorities in the spheres of security, law enforcement, veterans, social policies.

	Phase 1: June 2022 - end of 2022	Phase 2: January 2023 - December 2025	Stage 3: January 2026 - December 2032
Measured indicator of goal achievement	A report is available in electronic and paper form on the results of a comprehensive review of the system of social support for veterans, family members of the deceased , including those related to or affecting the employment opportunities of veterans, as well as the potential of veterans to meet the needs of the economy of the regions identified for the report in the context of their post-war recovery. There is a representative "needs map" of veterans and family members of the deceased. Presentation of the report at an interdepartmental meeting with the aim of developing further steps to apply the findings	There is a developed and agreed methodology for comprehensive work with the military (agreed on by all relevant departments and approved by the government) A method of training specialists to work according to the methodology has been developed and approved Developed and approved provisions on procedures for introduction and allocation of duties (Ministry of Defense, Ministry of Social Affairs, Ministry of Interior, Ministry of Economy and others)	Existing active in the "E-veteran" system a digital application of professional orientation and psychometric testing of military personnel, which enables specialists to work with the veteran community. Comparison of financial costs for service administration before and after the introduction of the system The number of veterans motivated to transition from public assistance to self-sufficiency through the transition system from a military career to civilian life. The number and level of satisfaction of veterans who have used the new transition to civilian life system and digital solutions. Indicator of the unemployment rate among veterans in each community and the number of jobs in which veterans are employed, by specified occupations

1.1. The current state of implementation of program documents in the selected area of analysis regarding the defined problem:

n/p	The name of the program document	Current state
	National economic strategy for the period until 2030, approved by the resolution of the Cabinet of Ministers of Ukraine dated March 3, 2021 No. 179	It is implemented
	State regional development strategy for 2021-2027, approved by Resolution of the Cabinet of Ministers of Ukraine dated August 5, 2020 No. 695	It is implemented
	Strategy of human development	It is implemented
	National strategy in the field of human rights	It is implemented
	Strategy of national and patriotic education	It is implemented
	National strategy for creating a barrier-free space in Ukraine for the period up to 2030	It is implemented
	Strategy of digital transformation of the social sphere	It is implemented
	National youth strategy until 2030	It is implemented
	Strategy for reforming the state administration of Ukraine for 2022-2025	It is implemented
	Communication strategy on issues of Euro-Atlantic integration of Ukraine for the period until 2025	It is implemented
	National security strategy of Ukraine	It is implemented

	National strategy for promoting the development of civil society in Ukraine for 2021-2026	It is implemented
	the period until 2028	It is implemented
	RNP Ukraine-NATO	It is implemented

n/p	Description of the task to achieve the goal	Deadline for completing the task	Dependence of the task on the tasks of other directions, areas, problems
Goal 1. Providing a system of social support for veterans, which will not only alleviate their combat injuries and financial losses, but also help them to be implemented in the socio-economic life of the state after the end of the service.			
Phase 1: June 2022 - end of 2022			
1	Development of the legislative basis for the formation and implementation of the state veterans' policy (*taking into account the practices of countries with experience of participating in hostilities);* *- analysis of current legislation and development of a road map for changes in legislation regarding the basics of veteran policy with a clear definition of terminology, statuses, formation of state policy and local self-government policy, a clear definition of institutions in policy formation, including the role of civil society.*	December 2022	European integration, social protection, modernization and development of the sphere of security and defense
2	Development of clear signs for each of the veteran statuses	December 2022	development of the sphere of security and defense, European integration
3	A comprehensive review of the system of social protection for veterans was conducted to meet the challenges of today	December 2022	social protection, health care, development of the sphere of security and defense
4	An analysis of the current state of the needs of veterans was carried out and those that arose due to participation in combat and/or military service and must be satisfied were identified	December 2022	protection of the rights of war veterans, social protection
5	A working group on the codification of legislation in the field of veteran affairs was created	December 2022	development of the sphere of security and defense, social protection

6	Principles of formation of Ukrainian civic identity: legislative regulation of concepts and principles .	December 2022	development of the sphere of security and defense, culture and information policy, education and science
7	Development of systemic measures at the national level to support public respect for veterans and families of the dead: creation of an online museum of the history of the Defenders of Ukraine	December 2022	development of the sphere of security and defense, culture and information policy
8	Development of a communication strategy, initiation of a cycle of dialogues with the veteran community regarding legislative changes	December 2022	social protection, European integration, culture and information policy, education and science, development of security and defense
Phase 2: January 2023 - December 2025			
1	Adoption of legislative principles for the formation and implementation of the state veteran policy (taking into account the practices of countries with experience of participating in combat operations)	February 2023	European integration, social protection, digitalization, development of security and defense
2	Implementation of a system for identifying the permanent needs analysis of veterans and taking them into account in policy formation by the Ministry of Veterans Affairs of Ukraine	December 2023	development of the security and defense system, digitalization
3	Creation of an interdepartmental working group on the unification of all state programs of social support for veterans and families of the dead	January 2023	social protection, digitalization, development of the security and defense system
4	Unification of the Ministry of Veterans of all state programs of social support for veterans, families of fallen defenders as a component of the preparation of the future Social Code in accordance with the results of the interdepartmental working group in the framework of the preparation of the Social Code	December 2023	social protection, development of the sphere of security and defense
5	Development and implementation of digital services based on the "single window" principle for veterans and families of the dead	June 2024	digitization
6	Development of recommendations for local self-government bodies on approaches to identifying the needs of veterans and cooperation with the veteran community	June 2024	development of regions, return of citizens, culture and information policy

4	Implementation of developed measures to support society's respect for veterans, in particular: - popularization of the image of the defender of Ukraine by creating and distributing documentaries, social videos, IT content (games, educational programs), production of polygraphic materials (comics, posters, banners, booklets), support of veteran literature and veteran art, organization of camps, gatherings, festivals and other events of a national-patriotic (military-patriotic) direction; - creation of a virtual museum of the identity of a war veteran; - implementation of the national project "Place of Honor and Gratitude". - creation of the National Military Memorial Cemetery; - creation of an interactive map of monuments and memorial plaques in honor of fallen defenders of Ukraine; - creation of the "Book of Heroic Deeds".	December 2025	digitization, culture and information policy, education and science
Stage 3: January 2026 - December 2032			
1	Assessment of the quality and convenience of digital services, the extension of online access to benefits/services/preferences to the entire system of social support for veterans and family members of the deceased	February 2026	digitization
2	Assessment of compliance of the state veteran policy with the needs of veterans	December 2026	social protection, modernization and development of the sphere of security and defense
3	Development of changes to legislation to update the system of special pension provision, taking into account changes to pension and social insurance within the framework of the reform of the system of social protection of the population	January 2030	social protection, digitalization, functioning of the financial system, its reform and development
n/p	**Description of the task to achieve the goal**	**Deadline for completing the task**	**Dependence of the task on the tasks of other directions, areas, problems**

	Goal 2: Providing the state with opportunities for veterans to realize their professional potential without barriers for their own development and the economic development of the state		
	Phase 1: December 2022		
1	Development of a mechanism for collecting and identifying the needs of veterans that arose in connection with combat experience or military service (during service, after discharge and during life)	September 2022	social protection, digitalization, modernization and development of the sphere of security and defense
2	Implementation of standards of psychological (and, if necessary, other) services for veterans and family members of the deceased (*standards or recommendations for improving the qualifications of specialists who provide services to veterans and their families have been developed*).	December 2022	health care
3.	Development of a road map of the transition system from military service to civilian life	December 2022	modernization and development of the sphere of security and defense
	Stage 2: 2023 - 2025		
1.	Development of a mechanism for accessible and individualized support in the field of education	December 2024	economic policy, social protection, education and science
2.	Introduction into national legislation of the system of transition from a military career to a civilian one, introduction of a career counseling system	December 2025	modernization and development of the sphere of security and defense
	Carrying out an analysis of the priority needs of veterans in the field of employment/entrepreneurship and education, as well as the state's needs for specialists for reconstruction, taking into account the needs of the national economy, economic profiles of communities and the needs of private business	December 2023	audit of war damage, economic policy, regional development, reconstruction and development of infrastructure
3.	Digitization of the services of a specialized career counselor of the employment service for veterans, an online cabinet based on the principle of "single window"	December 2025	economic policy, social protection, digitalization
4.	Cross-sectoral development and implementation of state support for veteran business and veteran employment	December 2025	economic policy, financial policy, anti-corruption policy,

5.	Intersectoral development and implementation of a system of state support in the educational sphere for veterans (assistance with preparation for exams, loans for studies, separate quotas, benefits for vocational training, possibly art schools, etc.)	December 2025	education and science, youth and sports
6.	Development of a package of medical guarantees for veterans depending on their needs in accordance with the requirements of the medical reform (the priority is to ensure active rehabilitation of the veteran).	December 2023	health care
	Stage 3: 2026 - 2032		
1	Implementation of a system of intersectoral interaction of state bodies, local self-government bodies, with the involvement of non-state initiatives to promote the employment of veterans, support of veteran business initiatives, taking into account the unique combat experience of veterans or experience of military service	December 2028	Economic policy, regional development, return of citizens
2	Development of an additional package of medical guarantees for veterans as part of the medical reform in view of received combat injuries	December 2028	health care

Necessary regulatory and legal support

n/p	The name of the NPA for task No. from subsection 2.3	The content of the development/changes of the NPA	The state authority responsible for the development/amendments of the NPA	Development term	Deadline for entry into force

1	Draft Law of Ukraine on the basic principles of the state veteran policy and protection of veterans' rights	A new adapted project on the main principles of the state veteran policy with modern terminology, an updated system of support for veterans in accordance with individualized needs	Ministry of Veterans Mo Ministry of Finance Ministry of Social Policy Ministry of Health	2022	2023
2	Draft amendments to the Law of Ukraine on military duty and military service	Determination of the system of transition from military career to civilian life of the system of transition, the place and role of each TSOV in this system, development of an action plan for the formation and implementation of the transition policy	Ministry of Veterans Mo Ministry of Internal Affairs Ministry of Social Affairs Ministry of Health	2023	2024

Required regulatory framework 52

ANNEX 2 69

National projects 69

INTRODUCTION

The main problems that are to be addressed under the Recovery Plan in the areas of youth policy, physical culture and sports, national and patriotic education

As a result of the war, 40% of young people in Ukraine have been affected: more than two million young people have become internally displaced persons and around two million young people have been forced to flee abroad**.**

Before the war, there were more than 300 youth centres and spaces operating in Ukraine. As of April 3, 2022, 93 youth centres have altered the format of their activities and are actively providing assistance to the civilian population, operating as humanitarian hubs, shelters for internally displaced persons, volunteer centres, and assistance centres for those who are in need. As of June 2022, 23 youth infrastructure facilities belonging to the youth centres and spaces have been damaged, completely destroyed or occupied, 59 - occupied.

68% of youth workers have been forced to leave their regions. To the question "Are you able to deliver your youth work?" 37.6% of respondents have answered that they are, 51% - are partly able to deliver it and 10.8% - fail to deliver it.

A great number of representatives of civil society institutions, youth councils, youth centres, youth workers and other youth policy stakeholders have lost the opportunity to work sustainably and harmoniously, and in many cases have changed their place of residence, and suspended or altered the format of their activities.

Young people are facing a lot of challenges, including anxiety disorders and mental instability experienced by young people, both those who have stayed in Ukraine and those who have gone abroad, low levels of independence and resilience, and disability to cope with the current situation. Moreover, the economic instability in the country, high unemployment and migration (internal and external) rates, destroyed youth infrastructure and the outflow of youth workers have a negative impact on the wellbeing of young people.

At the same time, one complex issue is in the spotlight: *the lack of a safe and favourable environment for living, working and realising the potential of young people in Ukraine.*

It includes the inability of young people to cope with the challenges they are facing as a result of russia's war against Ukraine, low basic needs, anxiety disorders and low levels of independence and resilience. As a result, young people do not have the opportunity and desire to devote their time to the development of their territorial community, village or city, the country in general. It can also be considered as a result of the limited access of young people to services, including those provided by youth centres and youth workers under the war and in the post-war period, a weak system of support for youth living and returning to Ukraine, unsustainable (institutionalised) youth communities, including civil society institutions, their networks, youth councils.

In 2021, 26 all-Ukrainian events of national and patriotic education were conducted, in which more than 300 000 people participated. Civil society institutions were provided with the financial support for the implementation of 34 projects of national and patriotic education with over 360,000 participants.

With the beginning of hostilities, the national and patriotic education projects were suspended and activists began to take an active part in volunteering.

According to a social survey, part of the population of Ukraine identifies with the citizens of the former USSR, namely 33.8% of citizens in the East and 34% - in the South. Only 55.9% of citizens in the South of Ukraine are proud of their citizenship. In addition to that, more young people aged between 14 and 34 have militaristic attitudes towards state defence in comparison with people aged between 35 and 65 and older (42.6% vs. 35.4%).

The insufficiently formed Ukrainian national and civic identity, defence consciousness and the integration of the population of the temporarily occupied territories in the post-war period present key pressing issues of national and patriotic education.

Moreover, the sphere of physical culture and sports was affected by Russia`s military aggression with the participation of the Republic of Belarus, and it resulted in limited opportunities for Ukrainian citizens to engage in selected physical activities and sports, disrupted education and training processes aimed at preparation of athletes for the most important competitions.

As a result of russia's large-scale military aggression against Ukraine, physical education classes, active breaks, physical culture activities, and operations of clubs and sections at educational institutions have been suspended. It is impossible to hold physical activities in places of mass recreation, residence and work and to implement the social project of the President “Active parks - locations of healthy Ukraine”. Some physical culture and sports facilities situated in locations with intense hostilities have been damaged and destroyed.

In addition, in the field of physical culture and sports a serious problem is the dependence of physical culture and health activities, development of reserve sports and sports of higher achievements on the capacity of local government budgets, attitude to physical culture and sports by local leaders and deputies. Also out of consideration are the issues of establishing the priority of Olympic and Paralympic sports in determining the amount of logistics, salaries and rewards from the results achieved, measured by quantitative and qualitative indicators. The solution of these problems requires priority in the restoration of the sphere.

Since the beginning of the year, physical culture and sports communities have held only 427 events out of 1 076 planned, which involved about 19 000 workers engaged in various types of production activities; 936 out of 3 924 planned activities have been carried out by the centres of physical health of the population, in which 45 105 people participated.

As of February 24, 2022, more than 2 400 athletes in Olympic and non-Olympic sports and sports for people with disabilities were in almost 40 countries around the

world, where they were partially given the opportunity to train and participate in international competitions; almost 3 000 athletes suspended the training process.

Athletes (especially the reserve ones) and coaches who have gone abroad have been provided with the proper conditions for training and work. There are cases when foreign clubs and teams offer long-term contracts to athletes and coaches, and young people graduating from general secondary education institutions get the opportunity to continue their studies. This situation can reduce the number of promising and talented young people in national teams.

Many athletes and coaches of conscription age have joined the Armed Forces of Ukraine, the National Guard and the Territorial Defence Forces and today are out of the education and training processes.

61 athletes and coaches have died or have been killed in hostilities on the territory of Ukraine, 7 people are taken prisoner (indicative data).

More than 300 planned all-Ukrainian competitions and 8 international competitions on the territory of Ukraine have been cancelled and not held.

The number of training camps and international competitions in which athletes of national teams has taken part has decreased by more than a third, namely:

in Olympic sports, 45 national training camps were conducted in Ukraine and 150 - abroad out of 440 planned; Ukrainian athletes participated in 116 international competitions out of 367 planned;

in non-Olympic sports, 15 national training camps were held in Ukraine and 38 – abroad out of 231 planned; Ukrainian athletes took part in 52 international competitions;

in sports for people with disabilities, 81 national training camps were conducted in Ukraine and 51 - abroad out of 362 planned; Ukrainian athletes participated in 18 international competitions out of 67 planned.

According to the preliminary information, 70% of physical culture and sports institutions work full-time, and 25% - have temporarily suspended their activities. 44 institutions have been partially damaged, 14 – have been completely destroyed.

Only 35% of athletes continue their training on premises of children's and youth sports institutions and institutions for reserve sports (162 thousand people), almost 44 thousand – continue their training outside the institutions, 28 thousand athletes train abroad. More than 120,000 athletes are unable to play their sport and do not have the opportunity to train.

50% of coaches and teachers go on working in children's and youth sports institutions and institutions for reserve sports (6 thousand people out of 11.8): 4.3 thousand coaches are working full-time, 221 of them are abroad; 3.5 thousand coaches and teachers are working remotely, 292 of them are abroad; there are four thousand coaches and-teachers who are not working, 479 of them are abroad.

The condition of 55% of sports facilities of children's and youth sports institutions and institutions for reserve sports is satisfactory (1450 facilities out of 2532), 6 facilities have been completely destroyed, 22 - have been partially damaged.

According to the program of the President of Ukraine "25 sports facilities-magnets", four facilities were built and put into operation in 2021 (with funds managed

by the Ministry of Youth and Sports), one of them was destroyed (Mariupol), one - is located in the occupied territory (Melitopol). By the end of 2022, sports palaces, sports complexes and swimming pools were to be built in seven cities of Ukraine, such as Rivne, Uman, Khmelnytskyi, Kryvyi Rih, Trostyanets, Nova Kakhovka, Ternopil.

One of the essential issues in the development of high-achievement sports is the availability and continuous development of modern institutions of physical culture and sports with the status of the base for Olympic, Paralympic and Deaflympic training. At the beginning of the military aggression of the Russian Federation, there were more than 70 institutions in Ukraine with the corresponding status (including such bases in the occupied territories). Under martial law, due to the allocation of funds to the needs of the state, there is a challenge of maintaining, gradually reconstructing and developing the bases for Olympic, Paralympic and Deaflympic training, as a prerequisite for the development of high-achievement sports.

After the war in Ukraine, the number of people with disabilities, including children, will increase, so it is necessary to set all the conditions for their speedy recovery and adaptation to a full life in society.

Pertaining to the implementation of programme documents: the implementation of key programme documents has been suspended - the State Targeted Social Program "Youth of Ukraine" for 2021-2025, the State Targeted Social Program of National and Patriotic Education until 2025, the State Targeted Social Program for the Development of Physical Culture and Sports until 2024, the implementation of the Action Plan for 2021-2022 on the implementation of the first stage of the Strategy of Development of Physical Culture and Sports of Ukraine until 2028, the fulfilment of tasks defined by the Regulations on the social project "Active parks - locations of healthy Ukraine" has been partially suspended.

Key challenges in the following areas: (youth policy, physical culture and sports, national and patriotic education):

- creating a safe environment for living, working and realising the potential of young people in Ukraine;
- ensuring the mental stability and reducing the level of anxiety among young people;
- increasing the level of independence, resilience and ability of young people to participate in public life;
- meeting basic needs of young people, in particular those who have become internally displaced persons and those who have been forced to stay abroad;
- reconstructing destroyed or damaged youth centres and spaces, as well as restoring their activities in order to ensure their provision of relevant services and implementation of programs for reintegration, socialisation and adaptation and development of youth under the war and in the post-war period;
- resuming work of specialists engaged in work with young people and training new ones, including youth workers (68% of whom are not working with young people now because they have been forced to leave their place of residence and move to safer places);

• limited possibilities of conducting organised physical education classes, physical culture and sports rehabilitation activities, lack of accessible modern sports and health infrastructure to all segments of the population and motivation of the population to engage in diverse physical activities;

• suspension of the implementation of the all-Ukrainian social project to involve the population in physical activities "Active parks - locations of healthy Ukraine";

• lost opportunities for children and youth to engage in selected physical activities on the premises of children's and youth sports institutions and institutions for reserve sports and in places of forced migration; unbalanced or suspended operations of physical education institutions;

• different level of financial and logistical support of the sports sphere in different regions and communities, which is not provided uniformly by the state depending on quantitative and qualitative indicators, but depends on the capacity of local budgets and the mood of local leaders and deputies;

• forced migration of coaches and teachers of physical education institutions, in particular abroad, and their temporary employment under better conditions;

• disrupted education and training processes of athletes of national teams, the impossibility of holding all-Ukrainian competitions as the main component of the selection procedure for the participation in international competitions, termination of competitions on the territory of Ukraine;

• lack of a clear position in legislation and regulations on the priority of physical culture and health activities and Olympic and Paralympic sports;

• the international sports community statements on the sports` being beyond politics complicates the process of encouraging international sports organisations to ban the Russian Federation and the Republic of Belarus from the world sports events;

• suspended testing of athletes in Ukraine for doping, reduction of institutional capacity and outflow of employees of the national anti-doping system;

• destroyed or damaged sports infrastructure and technical facilities of physical education institutions in locations with intense hostilities, loss of sports equipment and inventory;

• increased costs of projects for the reconstruction, construction and major maintenance of sports facilities due to the termination of work;

• work with the population of the temporarily occupied territories, especially with the citizens who have been under occupation for 8 years, their integration into Ukrainian society.

Key opportunities:

• young people who have been forced to stay abroad have gained experience of living in the EU countries and can apply it in Ukraine;

• the possibility of establishing modern youth centres and spaces that will provide relevant and quality services in accordance with the needs of young people through using innovative technologies and without being tied to outdated buildings;

• new opportunities for young people related to Ukraine's full membership in European youth programs;

• the opportunity to comprehend the potential of young people and their role in hastening the victory day, recovery and development of the country as a whole (including at the local level);

• involvement of institutions, organisations, physical education institutions, private sector and volunteers in arranging and conducting accessible physical activities and rehabilitation in all the regions of Ukraine;

• recovering sports facilities situated in areas of public recreation and at the place of residence, parks, squares for physical activities, including regional sports locations of the social project "Active parks - locations of healthy Ukraine";

• ensuring the priority of physical culture and health activities, Olympic and Paralympic sports;

• introduction of a fair system of state support in the sports sphere - financing of physical culture and sports institutions (regardless of the form of ownership) depending on quantitative and qualitative indicators in priority areas for the state;

• development of new forms of organisation of physical activities offline and online for different population groups, school leagues, challenges, online sports trainings;

• restoration of full-fledged and effective work of existing ones and assistance in opening new institutions of physical culture and sports, providing them with high-quality and accessible for all segments of the population services for selected sports;

• resuming educational and training processes of athletes of national teams, holding all-Ukrainian and international sports events in Ukraine;

• adaptation of the Ukrainian legislation on the anti-doping control to the international and European laws; recovering activities of the National Anti-Doping Centre under the war and reinstating the doping test program for athletes; establishment of the National Anti-Doping Laboratory as an independent organisation in the sports anti-doping system of Ukraine;

• optimised youth policy and sports management with the use of digital tools, creation of a mechanism for effective interaction between service providers and users;

• modernization of sports facilities, including Olympic, Paralympic and Deaflympic training bases; involvement of the European experts into their activities;

• promotion of national consciousness in society, formation of patriotism based on spirituality and morality, popularisation of the Ukrainian cultural heritage, social activity and responsibility for entrusted state and public affairs, readiness to perform the duty to protect Ukraine's independence and territorial integrity, promotion of European values.

Key limitations:

• high rates of both internal and external migration of young people (according to the IOM survey dated 23.05.2022, there are 7,134,000 internally displaced persons in Ukraine, 35% of whom are young people);

• insufficient number of specialists that the state will need to rebuild Ukraine;

• scarce resources to provide assistance and support to young people, including those who are on the occupied territories of Ukraine and those who are forced to stay abroad;

• limited number of professionals engaged in work with young people, including youth workers;

• limited number of youth centres and spaces that provide services to young people, and the need of their reorientation to today's challenges;

• insufficient number of available mechanisms for youth participation in public life, including decision-making processes at the local level;

• Insufficient funding and current restrictions on the recovery of physical education institutions, organisation and conducting of physical and sports activities and rehabilitation, anti-doping control activities due to the martial law in Ukraine;

• дack of a system for providing financial and logistical support to institutions of physical culture and sports of various forms of ownership - depending on quantitative and qualitative indicators in the priority areas of activity;

• Athletes and parents are offered long-term lucrative employment contracts in places of forced migration which hinder their return to Ukraine;

• Lack of proper logistics and security conditions for the modernization and development of sports infrastructure, collection and transportation of doping samples by doping officers to WADA-accredited laboratories;

• insufficient human and financial resources; weak interdepartmental cooperation in the field of national and patriotic education.

Goals, tasks, stages of the Recovery plan

Strategic goals

Goal 1. Participation of young people, women and men (different categories) in public life to hasten the victory day, rebuild Ukraine and ensure the European integration (including through the activities of the Ukrainian Youth Foundation, All-Ukrainian Youth Centre, civil society institutions, youth centres and spaces, youth councils and volunteering).

Goal 2. The formation of a physically active and healthy nation is a priority of the state's humanitarian policy.

Goal 3. Recovery and development of reserve sports and high-achievement sports, including the priority of Olympic sports.

Goal 4. Restoration and development of sports infrastructure**.**

Goal 5. Increase in the level of Ukrainian national and civic identity up to 85%.

Goal 1. Participation of young people, women and men (different categories) in public life to hasten the victory day, rebuild Ukraine and ensure the European integration (including through the activities of the Ukrainian Youth Foundation, All-Ukrainian Youth Centre, civil society institutions, youth centres and spaces, youth councils and volunteering).

Operational goals aimed at solving a certain problem

	Stage 1: June 2022 – end of 2022	**Stage 2: January 2023 – December 2025**	**Stage 3: January 2026 – December 2032**
Problem. Lack of a safe and favourable environment for living, working and realising the potential of young people in Ukraine. *(the inability of young people to cope with the challenges they are facing as a result of Russia's war against Ukraine, low basic needs, anxiety disorders and low levels of independence and resilience. As a result, young people do not have the opportunity and desire to devote their time to the development of their territorial community, village or city, the country in general. The limited access of young people to services, including those provided by youth centres and youth workers under the war and in the post-war period. A weak system of support for youth living and returning to Ukraine, unsustainable (institutionalised) youth communities, including civil society institutions, their networks, youth councils).*			
Goal to be achieved to solve the problem at each stage	Young women and men (different categories) participate in hastening the victory day, including through volunteering and activities of youth centres and spaces.	Young women and men (different categories) participate in the rebuilding of the country and have opportunities for their reintegration, adaptation, socialisation and development given the current conditions (through access to relevant programs and services provided by UYF, AUYC, civil society institutions, youth centres / spaces, organisations and professionals engaged in work with young people).	Young women and men (different categories) use youth participation tools adapted to the EU standards given the recommendations of the Council of Europe and the UN, and participate in European programs for their integration into the European youth community.
Timeframe under the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	Indefinite continuation of Russia's war against Ukraine, significant reduction of funding for youth assistance and support, loss (outflow) of	Possible indefinite continuation of Russia's war against Ukraine, significant reduction of funding for youth assistance and support, as issues related to	Insufficient funding for youth support, dire economic situation in Ukraine which affects youth employment and a favourable environment for

	human resources and low capacity of youth centres / spaces, youth councils, civil society institutions and specialists providing services to civilians, including youth. Increased desire of young people to move abroad	meeting the basic needs of communities and the population will be addressed first, including the loss (outflow) of human resources and decreased quality of activities of youth centres / spaces, youth councils, civil society institutions that provide services to youth, as a result - lost opportunities for young people to realise their potential through non-formal education. Unwillingness of those who left in the first wave of migration (after February 24, 2022) to return to Ukraine. Increased desire of young people to move abroad. Delayed proceedings of granting the EU candidate status to Ukraine.	addressing pressing youth issues, including through the activities of youth centres / spaces, youth councils, professionals and civil society institutions engaged in work with young people. Delayed proceedings of granting EU membership to Ukraine.
Goal achievement indicator	30% of young women and men (different categories) participate in hastening the victory day, including through volunteering and activities of youth centres and spaces	40% of young women and men (different categories) participate in the rebuilding of the country and have opportunities for their reintegration, adaptation, socialisation and development given the current conditions (through access to relevant programs and services provided by UYF, AUYC, civil society institutions, youth centres / spaces, organisations and professionals engaged in work with young people	50 % of young women and men (different categories) use youth participation tools adapted to the EU standards given the recommendations of the Council of Europe and the UN, and participate in European programs for their integration into the European youth community.
The total need of funds for the goal achievement	Estimated expenditures – 100 million (UAH)	Estimated expenditures – 1 000, 0 million (UAH)	Estimated expenditures – 2433, 5 million (UAH)

		modernization of cities and regions. 1. infrastructure rebuilding. 4. economic recovery and development. 15. return of citizens from abroad	

The current state of implementation of programme documents within the defined analysis area on the defined problem

	Title of programme document	Current state
1.	State Targeted Social Program "Youth of Ukraine" for 2021-2025 (Resolution of the Cabinet of Ministers of Ukraine dated June 1, 2021 # 579), referred as the Program	Due to the war between Russia and Ukraine, 90% of the program is not being implemented, as projects and activities carried out within the framework of youth policy are to be of international or national level (involving young people in projects and activities from 14 regions of Ukraine), which is currently impossible. Simultaneously, the National Volunteering Platform (online portal) is operating within the Program. Under the war it is operating to help both the military and the civilian population (more than 800 organisations are brought together, including more than 65 organisations that are providing assistance throughout Ukraine during the war). 150 volunteers are volunteering within the Program via chatbot and have processed more than 130,000 inquiries of Ukrainian citizens; a platform "Palyanytsya" (www.palyanytsya.info) for prompt assistance in Ukraine has been developed. 93 youth centres have refocused their activities on assisting the civilian population (namely, they are functioning as humanitarian hubs, shelters, providing assistance to children and internally displaced persons, etc.). There are 23 youth centres / spaces / youth councils, including the All-Ukrainian Youth Centre, that are operating as humanitarian SpivDiia hubs and providing assistance to the civilian population, and have attracted more than 100 volunteers to help the population *(information remark: the SpivDiia platform is providing assistance through: the online registration of public inquiries (more than 260,000 inquiries have been received); psychological consultations (about 1,200 people have been consulted), legal support via the legal service (more than 80 people have received), activities of 59 shelters, career counselling, operations of children's spaces, preparation for a multi-test (more than 1,900 participants have registered), support for young entrepreneurs).*

		A number of meetings have been held with youth workers to provide them with assistance and useful information on existing support programs. An electronic system for holding competitions within the framework of international youth exchanges is being developed. The Ukrainian Youth Fund is being established.

Determination of tasks to achieve the stated goals

#	Description of the task to achieve the goal	Deadline for the task fulfilment	Dependence of the task on the tasks of other directions, areas, problems
Young women and men (different categories) participate in hastening the victory day, including through volunteering and activities of civil society institutions, youth centres and spaces.			
Stage 1: June 2022 – end of 2022			
1.	Analyse the needs, interests, values and socio-economic conditions of young people, including the relevant statistics (Stage I - basic data, Stages I-III - annually).	December 2022	
2.	Develop a system of informing young people about opportunities for the realisation of their potential in Ukraine and opportunities of European integration (Stages I-III - annually).	December 2022	
3.	Set conditions for the participation of young people in hastening the victory day, including through their engagement in the activities of youth centres / spaces, youth councils, civil society institutions, involvement in volunteering and encouragement of the Ukrainian diaspora youth.	December 2022	
4.	Update and implement non-formal education programs to improve youth civic competences.	December 2022	
5.	Carry out a national analysis of relevant youth services provided by youth centres and spaces.	December 2022	
6.	Ensure youth access to both current programs and services provided under the war by youth centres and spaces (including AUYC), organisations and professionals engaged in work with young people	December 2022	

7.	Improve the qualifications of professionals engaged in work with young people, including those in youth centres and spaces, to ensure the efficiency of their work with youth under the war	December 2022	
8.	Provide suitable conditions for the establishment of the National Youth Fund	December 2022	
9.	Ensure simplification of the procedure of youth participation in international youth exchange programs (in partnership with Poland and Lithuania)	December 2022	
10.	Provide comprehensive support to civil society institutions engaged in work with young people under the war, including through analysis of their organisational development, provision of grants and staff advanced trainings	December 2022	
Stage 2: January 2023 – December 2025			
Young women and men (different categories) participate in the rebuilding of the country and have opportunities for their reintegration, adaptation, socialisation and development given the current conditions (through access to relevant programs and services provided by UYF, AUYC, civil society institutions, youth centres / spaces, organisations and professionals engaged in work with young people).			
11.	Analyse the needs, interests, values and socio-economic conditions of young people, including the relevant statistics (Stage I - basic data, Stages I-III - annually).	December 2023- December 2025	
12.	Develop a system of informing young people about opportunities for the realisation of their potential in Ukraine and opportunities of European integration (Stages I-III - annually).	December 2023- December 2025	
13.	Update and implement non-formal education programs to improve youth civic competences.	December 2023- December 2025	
14.	Ensure the availability of human resources for the provision of youth services, namely for the development of key competencies, including civic ones, through the Program 'Youth Worker'	December 2023- December 2025	
15.	Modernise the education system and start professional training of youth workers	December 2023- December 2025	
16.	Set conditions for the participation of young people in hastening the victory day, including through their engagement in the activities of youth centres / spaces, youth councils, civil society institutions and encouragement of the Ukrainian diaspora youth.	December 2023- December 2025	
17.	Promote the further development of youth volunteering and the state recognition of its achievements	December 2023- December 2025	

18.	Implement the EU YouthPass instrument and ensure Ukraine`s joining to the EU Program «European Solidarity Corps»	December 2023-December 2025	
19.	Analyse losses of the destroyed or damaged youth centres and spaces	December 2023-December 2025	
20.	Restore damaged youth centres and spaces and build new ones given the analysis, the needs of corresponding administrative territorial units, the EU requirements, namely on the creation of barrier-free space	December 2023-December 2025	
21.	Modernise the network of youth centres and spaces given the EU requirements, namely on the creation of barrier-free space	December 2023-December 2025	
22.	Carry out a national analysis of the activities of youth centres and spaces, including the need of their establishment in cities where they are absent, and the analysis of relevant youth services provided by them	December 2023-December 2025	
23.	Provide youth with the access to relevant programs and services provided by youth centres / spaces (including AUYC), organisations and professionals engaged in work with young people in the post-war period	December 2023-December 2025	
24.	Introduce UYF grants for project and institutional support of youth work entities, in particular young people	December 2023-December 2025	
25.	Ensure international youth exchanges and intensify the implementation of youth exchange programs in partnership with different countries	December 2023-December 2025	
26.	Забезпечити стале інформування молоді про можливості для реалізації їхнього потенціалу в України (щодо діяльності УМФ та обмінів)	December 2023-December 2025	
27.	Develop a support system for youth entrepreneurial initiatives and young entrepreneurs	December 2023-December 2025	
28.	Promote the introduction of a quality system of professional orientation and retraining of young people for their further employment	December 2023-December 2025	
29.	Advocate for the support of youth work entities from local budgets for socio-economic development of young people in communities	December 2023-December 2025	

30.	Provide conditions for the full membership of Ukraine in the EU Erasmus+. Programme	December 2023- December 2025	
31.	Provide support to civil society institutions engaged in work with young people in the post-war period, including through analysis of their organisational development, provision of grants	December 2023- December 2025	
32.	Promote the advanced trainings of the management of youth and children's public organisations, civil society institutions engaged in work with young people, and young people willing to establish a civil society institution	December 2023- December 2025	
33.	Conduct trainings of representatives of local authorities on the importance of youth policy implementation and youth work in communities, the role of civil society institutions in this process	December 2023- December 2025	
Stage 3: January 2026 – December 2032			
Young women and men (different categories) use youth participation tools adapted to the EU standards given the recommendations of the Council of Europe and the UN, and participate in European programs for their integration into the European youth community.			
34.	Analyse the needs, interests, values and socio-economic conditions of young people, including the relevant statistics (Stage I - basic data, Stages I-III - annually).	December 2026 – December 2032	
35.	Develop a system of informing young people about opportunities for the realisation of their potential in Ukraine and opportunities of European integration (Stages I-III - annually).	December 2026 – December 2032	
36.	Provide youth with the access to relevant programs and quality services provided on the basis of analysis, including by youth centres and spaces, given the recommendations of the Council of Europe and the European Union	December 2026 – December 2032	
37.	Develop a system of professional and advanced trainings of youth workers	December 2026 – December 2032	
38.	Ensure the provision of UYF grants to youth work entities for the development of youth potential in Ukraine, including through international youth exchange programs	December 2026 – December 2032	
39.	Facilitate the participation of young people in decision-making processes through the development of youth councils, improvement of their members` competences, development of other forms of direct participation based on the best EU practices	December 2026 – December 2032	

40.	Ensure the recognition of non-formal education achievements of young people and the further development of volunteering in Ukraine	December 2026 – December 2032	
41.	Ensure the full membership of Ukraine in the EU Erasmus+. Programme +	December 2026 – December 2032	
42.	Provide further support to civil society institutions engaged in work with young and advocate for the cooperation between local authorities and civil society institutions for the efficient implementation of youth policies and effective youth work, including through the support of civil society institutions engaged in work with young people from local budgets	December 2026 – December 2032	
43.	Promote the support of youth work entities from local budgets for socio-economic development of young people in communities	December 2026 – December 2032	

Goal 2: Formation of a physically active and healthy nation

Operational goals aimed at solving a certain problem

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Problem. Termination of all organised physical education classes, physical culture and sports rehabilitation activities for people with disabilities, mental health problems of citizens under the martial law. Suspension of the implementation of the all-Ukrainian social project "Active parks - locations of healthy Ukraine".			
Subgoal: Setting conditions for physical activities and sports accessible to each citizen as an instrument of a healthy lifestyle			
Goal to be achieved to solve the problem at each stage	Conducting 20% of the planned physical culture activities and 23% of the planned sports rehabilitation activities; disseminating at least 100 publications on the benefits of physical activities and sports; 1000 people use the online platform "Active Parks" and official Facebook and Instagram pages for physical activities daily	Conducting 80% of the physical culture activities and mass events, sports rehabilitation activities; disseminating at least 100 publications on physical culture and sports activities annually; recovery of 90% of undamaged sports facilities of the social project "Active parks - locations of healthy Ukraine"	Annual 1% increase in the number of citizens engaged in physical activities, sports and physical rehabilitation activities; disseminating at least 200 publications on the benefits of physical activities and sports annually; operations of 10,000 accessible and convenient sports locations for physical activities of the country population
Timeframe under the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	Insufficient funding. Lack of network, internet access, lighting, devices for watching video content; shifts of life priorities of citizens, increased area of locations with intense hostilities, impossibility of assessing losses of the occupied territories	Insufficient funding. Inaccessibility and mining of territories, impossibility of assessing losses of the occupied territories	Insufficient funding

Goal achievement indicator	Percentage of activities held, number of disseminated publications and number of people using the online platform daily	Percentage of activities held and percentage of operating sports facilities, number of disseminated publications	Percentage of citizens engaged in physical activities, sports and physical rehabilitation activities, number of disseminated publications and number of operating sports locations
The total need of funds for the goal achievement			
Goal connections with other areas	1. infrastructure rebuilding 15. return of citizens from abroad. 16. social protection. 20. education and science. 22. culture and information policy. 2. construction / urban planning / modernization of cities and regions	1. infrastructure rebuilding 15. return of citizens from abroad. 16. social protection. 20. education and science. 22. culture and information policy. 2. construction / urban planning / modernization of cities and regions	1. infrastructure rebuilding 15. return of citizens from abroad. 16. social protection. 20. education and science. 22. culture and information policy. 2. construction / urban planning / modernization of cities and regions

The current state of implementation of programme documents within the defined analysis area on the defined problem

#	**Title of programme document**	**Current state**
1.	Regulations on the social project "Active parks - locations of healthy Ukraine" approved by the Resolution of the Cabinet of Ministers of Ukraine # 326 dated April 7, 2021	Since April 25, 2022, the operation of the web resource "Active Parks" for independent physical culture activities of the population of locations without intense hostilities has resumed. Within the program " Active Parks ", the online All-Ukrainian workshop "Motivation strategies for distance physical education classes" on the functioning of the online platform "Active Parks - locations of healthy Ukraine " has been conducted. In locations without intense hostilities coordinators have resumed their activities and activities within the social project are being held. Information of the regional state administrations on the conditions of sports locations of the social project is being collected.

2.	The Strategy of Development of Physical Culture and Sports of Ukraine until 2028 approved by the Resolution of the Cabinet of Ministers of Ukraine # 1089 dated November 4, 2020	In locations without intense hostilities and in the non-occupied territories the centres for physical health "Sports for everyone" and sports clubs are resuming their activities, namely: the online meetings on the current state of physical culture and sports development in the regions are being held, physical culture activities are being conducted online and offline.
3.	The Action Plan for 2021-2022 on the implementation of the first stage of the Strategy of Development of Physical Culture and Sports of Ukraine until 2028 approved by the Resolution of the Cabinet of Ministers of Ukraine # 163-p dated March 3, 2021	The regional centres for physical health "Sports for everyone" are conducting physical culture activities in Lviv, Ivano-Frankivsk, Chernivtsi, Khmelnytsky, Ternopil, Odessa, Rivne, Poltava, Vinnytsia, Cherkasy, Zhytomyr, Zaporizhia and Zakarpattia regions. The all-Ukrainian physical activities and sports Association "Kolos" and its territorial branches are conducting physical culture activities in Vinnytsia, Volyn, Zakarpattia, Poltava, Lviv, Rivne, Ternopil, Cherkasy, Ivano-Frankivsk, Odessa regions. The physical activities and sports Association "Ukraine" and its territorial branches have held physical culture activities in Kharkiv, Khmelnytsky regions. The physical activities and sports Association "Spartak" and its territorial branches in Lviv, Kirovohrad and Rivne regions are engaged in planning and conducting joint trainings with athletes from the temporarily occupied territories
4.	The State Targeted Social Program for the Development of Physical Culture and Sports until 2024 approved by the Resolution of the Cabinet of Ministers of Ukraine # 115 dated March 1, 2017 (with amendments)	The funding for tasks and activities of the strategic documents is provided given the State Targeted Social Program for the Development of Physical Culture and Sports until 2024
5.	Task 1459 of the Action Plan on Implementation of the Association Agreement between Ukraine, on the one hand, and the European Union, European Atomic Energy Community and their state members, on the other hand approved by the Resolution of the Cabinet of Ministers of Ukraine # 1106 dated October 25, 2017 (with amendments)	The President of Ukraine has initiated the Program «Healthy Ukraine», one of the components of which is the physical activities development. Within this program, the social project “Active Parks - locations of healthy Ukraine” has been launched and the corresponding Regulation has been approved by the Resolution of the Cabinet of Ministers of Ukraine # 326 dated April 7, 2021. According to the Regulation, the setting of conditions for arranging and conducting activities under the social

		project, development of new forms of involvement of various groups, including people with disabilities, in physical culture activities in areas of public recreation (parks, squares, etc.), barrier-free access of citizens to sports facilities and locations for various physical activities, as well as to free rental stations of sport equipment and utilities in areas of public recreation are expected. The activities within the social project are being coordinated by the Ministry of Youth and Sports together with the All-Ukrainian centre for physical health "Sports for everyone", and the organisers of the social project activities are regional and Kyiv city state administrations with the participation of local authorities and centres for physical health "Sports for everyone". As of December 2021, 606 locations of the project “Active parks - locations of healthy Ukraine” have been opened and operated, 459 coordinators have conducted events.

Determination of tasks to achieve the stated goals

#	Description of the task to achieve the goal	Deadline for the task fulfilment	Dependence of the task on the tasks of other directions, areas, problems
Subgoal: Setting conditions for physical activities and sports accessible to each citizen			
Stage 1: June 2022 – end of 2022			
Conducting 20% of the planned physical culture activities and 23% of the planned sports rehabilitation activities; disseminating at least 100 publications on the benefits of physical activities and sports; 1000 people use the online platform "Active Parks" and official Facebook and Instagram pages for physical activities daily			
1.	Resume in locations of Ukraine without intense hostilities physical culture activities and mass events, including those conducted in educational institutions, held both online and offline and accessible to citizens of Ukraine, including those abroad	regularly	MoES

2.	Engage athletes, including those with disabilities, prominent people, including world-famous ones, in holding online physical education classes.	December	
3.	Conduct sports rehabilitation activities for people with disabilities in locations without intense hostilities	regularly	
4.	Make exercise videos for online physical education classes with the participation of prominent athletes, including those with disabilities, famous people, etc. and post them on various online platforms for use by everyone interested.	regularly	
5.	Produce and disseminate on social networks and other web resources text, graphic, multimedia information, photo and video materials on the benefits of physical activities and, sports, including sports for people with disabilities, as an effective instrument of boosting mental health	December	
6.	Organise and hold online physical culture activities, including those within the social project "Active parks - locations of healthy Ukraine", challenges, flash mobs, etc. in educational institutions situated in the locations of active parks (with the involvement of all-Ukrainian sports federations).	December	MoES
7.	Extend the functionality of the online platform "Active Parks" to enable the introduction of new forms of population involvement in physical activities, namely: the functionality of administering activities on navigating through localities, the functionality of personal planning, user rating, online trainings, the functionality of displaying an additional video section for people preparing to join the Territorial Defence Forces.	December 2022	
Stage 2: January 2023 – December 2025			
Conducting 80% of the physical culture activities and mass events, sports rehabilitation activities; disseminating at least 100 publications on physical culture and sports activities annually; recovery of 90% of undamaged sports facilities of the social project "Active parks - locations of healthy Ukraine"			
8.	Ensure coordination of actions of all stakeholders, executive authorities, local authorities and local communities on the promotion and development of physical culture	regularly	
9.	Hold physical culture activities and mass events in areas of public recreation and residence, parks, squares, education institutions, etc.	annually	MoES
10.	Arrange safe walking and cycling routes	December 2025	
11.	Update and fill the Internet resources of physical culture and sports institutions, civil society institutions of physical culture	regularly	

	and sports orientation with the information on the benefits of physical activities and sports, including sports for people with disabilities, conducting of mass events, etc.		
12.	Use the online platform "Active Parks" to conduct online classes for secondary education students and higher education students with the participation of all-Ukrainian sports federations.	annually	MoES
13.	Monitor the conditions of regional sports locations of the social project «Active parks - locations of healthy Ukraine» for physical activities	June 2023	
14.	Resume physical activities and organise the coordinators` activities at sports locations within the social project, assistance through co-financing mechanisms for the arrangement of new locations available for all segments of the population for physical activity and sports (including indoors)	annually	
15.	Arrange QR-codes with a link at sports locations of the social project, ensure the operations of free rental stations of sport equipment and utilities.	annually	
16.	Extend the functionality of the online platform "Active Parks" to ensure the efficiency and convenience of the activities of the event coordinators, namely the functionality of reporting and accounting event funds allocation	December 2023	
Stage 3: January 2026– December 2032			
Annual 1% increase in the number of citizens engaged in physical activities, sports and physical rehabilitation activities; disseminating at least 200 publications on the benefits of physical activities and sports annually; operations of 10 000 accessible to all segments of the population and convenient sports locations for physical activity (including indoors)			
1.	Ensure coordination of actions of all stakeholders, executive authorities, local authorities and local communities on the promotion and development of physical culture	regularly	
2.	Set favourable conditions for investment activities in the field of physical culture and sports to engage all population categories in the physical activities and sports	December 2032	
3.	Set suitable conditions for students to engage in physical activities and sports	December 2032	
4.	Use the opportunities of the sports component of the EU "Erasmus + Programme as the programme country-member	December 2032	
5.	Ensure the cooperation with regional state administrations on the popularisation of physical activities and sports, informing	regularly	

	on the regional physical culture activities, namely on those held online		
6.	Monitor the filling of various Internet resources with the information on the importance of physical activities and sports	regularly	
7.	Establish sports locations in park and surrounding areas, in areas of public recreation and residence throughout Ukraine	annually	
8.	Conduct activities within the social project "Active parks - locations of healthy Ukraine	annually	
9.	Ensure the operations and filling of the online platform "Active Parks" to ensure collaboration, meetings, exchange of ideas and technologies between government, business and academics to coordinate efforts to increase public involvement in physical activities.	annually	

Goal 3: Recovery and development of reserve sports and high-achievement sports

Operational goals aimed at solving a certain problem

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Problem 1) Unbalanced or suspended activities of physical culture and sports institutions, including children's and youth sports institutions and institutions for reserve sports, caused by hostilities and forced migration of the population, namely migration of children and youth, destroyed infrastructure of these institutions. Lack of a system for providing financial and logistical support to relevant institutions (regardless of ownership) depending on quantitative and qualitative indicators in the priority areas for the state.			
Subgoal 1. Restoring the activities of existing and promoting the opening of new institutions of physical culture and sports, including children's and youth and reserve sports, primarily among the priority Olympic sports.			
Goal to be achieved to solve the problem at each stage	organisational and regulatory capacity to restore existing activities and promote the opening of new institutions of physical culture and sports, including children's and youth and reserve sports, primarily in priority Olympic sports. Providing financial and logistical support to relevant institutions depending on the quantitative and quality indicators in priority areas	Resuming of existing activities and assistance in opening new institutions of physical culture and sports, including children's and youth and reserve sports under the existing conditions, if necessary to restore their material and technical condition, primarily in priority Olympic sports, providing financial and logistical support institutions depending on quantitative and qualitative indicators in priority areas	Creation of organisational and, if necessary, normative and legal conditions for further development of physical culture and sports institutions, including children's and youth and reserve sports, development of material and technical base, primarily of priority Olympic sports, provision of financial and logistical support of relevant institutions depending from quantitative and qualitative indicators in priority areas
Timeframe under the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	Continuation of martial law and hostilities	Continuation of martial law and hostilities, insufficient funding, restrictions on the activities of institutions	Insufficient funding, restrictions on the activities of institutions

Goal achievement indicator	Number of regulatory acts	Number of physical culture and sports institutions which resumed their activities, opening of new institutions	Number of physical culture and sports institutions with the suitable infrastructure for providing quality services (one institution per 5000 citizens) accessible for all segments of population; 12 % of children and young people aged between 6 and 18 are engaged in physical activities in the children's and youth sports institutions
The total need of funds for the goal achievement	Expenditures related to loss assessment	To be defined after the calculation of exact costs of material losses and necessary recovery resources	To be defined after Stage 2
Goal connections with other areas	3. assessment of losses as a result of the war. 20. education and science. 13. justice. 12. digitalization 11. public administration regional administration (state and local authorities).	20. education and science. 16. social protection. 1. infrastructure rebuilding. 2. construction / urban planning / modernization of cities and regions. 15. return of citizens from abroad. 12. digitalization. 16. social protection. 11. public administration. regional administration (state and local authorities).	20. education and science. 16. social protection 2. construction / urban planning / modernization of cities and regions. 13. justice. 12. digitalization 11. public administration regional administration (state and local authorities).
Problem 2. unbalanced system of organisation of educational and training processes, lack of all-Ukrainian competitions as the main component of the selection procedure for the participation in international competitions and forced migration of athletes and coaches have led to reduced level of training and competitiveness of Ukrainian athletes, damaged reputation of Ukraine at the international sports level as a country capable of holding competitions of the world and European levels that affects the country's image			
Subgoal 2. Training and participation of national teams of Ukraine in international competitions, conducting international competitions in Ukraine to develop a positive image of Ukraine at the international sports level with the engagement of civil society institutions of physical culture and sports orientation in this process, taking into account the priority of Olympic and Paralympic sports			
Goal to be achieved to solve the problem at each stage	Partly resumed organisation and conducting of: competitions and training camps in Ukraine (given the available conditions)	organisation and conducting of: competitions and training camps in Ukraine (given the available conditions);	Full organisation and conducting of: sports events in Ukraine (given the available conditions);

		at least 10 international competitions held in Ukraine	more than 10 international competitions held in Ukraine
Timeframe under the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032

The current state of implementation of programme documents within the defined analysis area on the defined problem

	Title of programme document	Current state
1.	The Strategy of Development of Physical Culture and Sports of Ukraine until 2028 approved by the Resolution of the Cabinet of Ministers of Ukraine # 1089 dated November 4, 2020	There are risks of not achieving the expected outcomes in: finishing the Olympic Games in the appropriate team place; involving the appropriate number of children and young people in selected physical activities and sports; the number of organised and conducted international competitions in Ukraine
2.	The State Targeted Social Program for the Development of Physical Culture and Sports until 2024 approved by the Resolution of the Cabinet of Ministers of Ukraine # 115 dated March 1, 2017 (with amendments made according to the Resolution of the Cabinet of Ministers of Ukraine # 1371 dated 23.12.2020)	There are risks of not achieving the expected outcomes in: involving up to 13 % of children and young people aged between 6 and 18 in physical activities in the children's and youth sports institutions; setting conditions for the reserve sports development and the efficient recruitment to national teams; ensuring leading positions of Ukrainian athletes in international competitions of various levels to enhance the country prestige in the international sports community.
3.	The Law of Ukraine “On Anti-Doping Activities in Sports”	To implement the Strategy, draft regulations on anti-doping activities have been developed in accordance with the international standards. On January 26, 2022, the Verkhovna Rada of Ukraine adopted Laws # 5099 “On Anti-Doping Activities in Sports” and # 5640 “On Amendments to Article 52 of the Law of Ukraine "On Physical Culture and Sports" on the activities of the National Anti-Doping Laboratory. The document aligns the anti-doping system with WADA international standards. Currently, inconsistency of two bills is being eliminated in accordance with Article 122 of the Rules of Procedure of the Verkhovna Rada of Ukraine.

Determination of tasks to achieve the stated goals

#	Description of the task to achieve the goal	Deadline for the task fulfilment	Dependence of the task on the tasks of other directions, areas, problems
Subgoal 1.Resuming of existing activities and promotion of the opening of new institutions of physical culture and sports, including children's and youth and reserve sports, primarily among the priority Olympic sports.			
Stage 1: June 2022 – end of 2022			
Organisational and regulatory opportunity to restore the activities of existing and promote the opening of new institutions of physical culture and sports, including children's and youth and reserve sports, primarily among the priority Olympic sports.			
1.	Monitoring and assessment of conditions of physical culture and sports institutions, including children's and youth sports institutions and institutions for reserve sports	July 2022	
2.	Development of normative and legal documents that will promote the resumption of existing and the opening of new institutions of physical culture and sports, taking into account the priority of Olympic sports	December 2022	
3.	Designing an electronic database of sports organisations and institutions	August 2022	
Stage 2. January 2023– December 2025			
Resuming of existing activities and assistance in opening new institutions of physical culture and sports, including children's and youth and reserve sports under the existing conditions, if necessary to restore their material and technical condition			
4.	Setting conditions to resume existing activities and assistance in opening new institutions of physical culture and sports institutions	December 2025	
5.	Restoration of material and technical base of physical culture and sports institutions, purchase of necessary equipment and inventory for restored existing and opened new institutions. primarily one of the priority Olympic sports. Providing financial and logistical support for physical culture and sports facilities (regardless of ownership) depending on quantitative and qualitative indicators in certain priority areas	December 2025	
6.	Designing and launching for the use of high-achievement sports entities an electronic database of sports organisations and institutions	December 2024	
Stage 3: January 2026 – December 2032			

Setting organisational and, if needed, regulatory conditions for the further development of physical culture and sports institutions, including children's and youth sports institutions and institutions for reserve sports, and their infrastructure development, taking into account the priority of physical culture and health activities, Olympic and Paralympic sports			
7.	Development of the necessary network of physical culture and sports institutions for the provision of quality and accessible to all segments of population physical culture and sports services and training of athletes of sports reserve for their joining the national teams of Ukraine		
8.	Development of a legislative and regulatory framework to ensure the effective operation of institutions of physical culture and sports, focused on achieving a comprehensive positive result, taking into account the priority of physical culture and health activities, Olympic and Paralympic sports.		
Subgoal 2. Training and participation of national teams of Ukraine in international competitions, conducting international competitions in Ukraine to develop a positive image of Ukraine at the international sports level with the engagement of civil society institutions of physical culture and sports orientation in this process, taking into account the priority of physical culture and health activities, Olympic and Paralympic sports			
Stage 1: June 2022 – end of 2022			
Partly resumed organisation and conducting of competitions and training camps in Ukraine (given the available conditions), taking into account the priority of physical culture and health activities, Olympic and Paralympic sports			
1.	Assessment of the existing conditions for the resumption of the training process of athletes of the national teams of Ukraine in sports from the program of the Olympic, Paralympic Games and World Games in non-Olympic sports in full.	July 2022	
2.	Alignment of the Unified calendar plan of physical culture and sports activities in Ukraine with the available conditions	December 2022	
3.	Ensured participation of national teams of Ukraine in international competitions, particularly to obtain licences for participation in the Olympic, Paralympic, World and European Games.	December 2022	
4.	Partly resumed conducting of all-Ukrainian sports competitions and training camps, conducting of separate international sports competitions in Ukraine	December 2022	
5.	Ensuring the activities of the regular team of reserve sports in priority Olympic sports.	December 2022	
Stage 2. January 2023– December 2025			
Organisation and conducting of competitions and training camps in Ukraine (given the available conditions); at least 10 international competitions held in Ukraine			

6.	Ensured training and participation of national teams in the European Games (2023) and Olympic (2024) Games, the Winter Deaflympics (2023), the Summer Paralympic Games (2024), the Summer Deaflympics (2025), the World Chess Olympiad (2024), the World Games in non-Olympic sports (2025), international sports competitions to obtain licences for participation in mentioned competitions, the Youth Olympic Games, the Youth Olympic Festivals.	December 2025	
7.	organisation and full conducting of all-Ukrainian competitions and international sports competitions in Ukraine		
8.	Designing and launching for the use of high-achievement sports entities an electronic calendar plan of physical culture and sports activities in Ukraine	December 2024	
Stage 3: January 2026 – December 2032			
Full organisation and conducting of sports events in Ukraine (given the available conditions); more than 10 international competitions held in Ukraine			
9.	Ensured training and participation of national teams in the Winter Olympic Games (2026 and 2032), the Winter Paralympic Games (2026 and 2030), the Summer Paralympic Games (2028 and 2032), the Winter Deaflympics (2027 and 2031), the Summer Deaflympics (2029), the World Chess Olympiad (2026, 2028, 2030 and 2032), the European Games (2027), the Summer Olympic Games (2028), the World Games in Non-Olympic Sports (2029), the Youth Olympic Games, the Youth Olympic Festivals .	December 2032	
10.	Increase in the number of international sports competitions held in Ukraine	December 2032	
Subgoal 3. Build international sports community awareness of the sports role in the fighting against russia's aggression with the participation of the Republic of Belarus through the active involvement of the civil society institutions of physical culture and sports orientation in this process			
Stage 1: June 2022 – end of 2022			
Ban the athletes and representatives of the russian federation and the Republic of Belarus from the participation in international competitions and other sports forums; ensure the accession of Ukrainian representatives to the governing bodies and judge collegiums of international sports organisations			
1.	Involvement of the sports community and public authorities of other countries in the processes of strengthening Ukraine's position in the world sports community and influencing the weakening of the positions of the Russian Federation and the Republic of Belarus	December 2022	
2.	Organised cooperation with public authorities of other countries on influencing sports communities of those countries to weaken the positions of the Russian Federation and the Republic of Belarus in the world sports community	December 2022	

Stage 2. January 2023– December 2025			
Ban the athletes and representatives of the russian federation and the Republic of Belarus from the participation in international competitions and other sports forums; ensure the accession of Ukrainian representatives to the governing bodies and judge collegiums of international sports organisations			
3.	Involvement of the sports community and public authorities of other countries in the processes of strengthening Ukraine's position in the world sports community and influencing the weakening of the positions of the russian federation and the Republic of Belarus	December 2025	
4.	Organised cooperation with public authorities of other countries on influencing sports communities of those countries to weaken the positions of the Russian Federation and the Republic of Belarus in the world sports community	December 2025	
Stage 3: January 2026 – December 2032			
Ban the athletes and representatives of the Russian Federation and the Republic of Belarus from the participation in international competitions and other sports forums; ensure the accession of Ukrainian representatives to the governing bodies and judge collegiums of international sports organisations			
5.	Involvement of the sports community and public authorities of other countries in the processes of strengthening Ukraine's position in the world sports community and influencing the weakening of the positions of the Russian Federation and the Republic of Belarus	December 2032	
6.	Organised cooperation with public authorities of other countries on influencing sports communities of those countries to weaken the positions of the Russian Federation and the Republic of Belarus in the world sports community	December 2032	
Subgoal 4. Rebuild human resource capacity in the field of physical culture and sports			
Stage 1: June 2022 – end of 2022			
Physical culture and sports institutions are provided with sufficient human resources for resuming their activities given the available conditions, taking into account the priority of physical culture and health activities, Olympic and Paralympic sports			
1.	Assessment of the current human resource capacity of physical culture and sports institutions given the available conditions	December 2022	
2.	Development of the regulatory framework to ensure return and resumed activities of teachers and trainers of physical culture and sports institutions		
3.	Designing an electronic database of human resources in the field of physical culture and sports	October 2022	

4.	Designing an information system for sports medicine administration	December 2022	
Stage 2. January 2023– December 2025			
Physical culture and sports institutions are provided with sufficient human resources for ensuring education and training processes, taking into account the priority of physical culture and health activities, Olympic and Paralympic sports			
5.	Organised activities on the engagement of young professionals in the field of physical culture and sports and on advanced training through formal and non-formal education to provide human resources in the first place priority Olympic sports.		
6.	Return and increase in the number of international trainers involved in the activities of the national teams		
7.	Designing and launching for the use of athletes and professionals of the field an electronic database of database of human resources in the field of physical culture and sports	December 2024	
8.	Designing and launching an information system for sports medicine administration	December 2024	
Stage 3: January 2026 – December 2032			
Efficient system of provision of the field of physical culture and sports with the qualified specialists motivated to the efficient performance, taking into account the priority of physical culture and health activities, Olympic and Paralympic sports			
9.	organisation of work to attract young professionals in the field of physical culture and sports (including athletes of a certain level without specialised education) and to improve skills by introducing formal and non-formal education.		
10.	Increase in the number of international trainers involved in the activities of the national teams		
Subgoal 5. Resumed proper functioning of the national anti-doping system suspended due to the impossibility of testing athletes in Ukraine for doping and due to the termination of all-Ukrainian and international sports competitions in Ukraine under the war			
Stage 1: June 2022 – end of 2022			
Resumed testing of athletes in Ukraine for doping, including through the WADA coordination and involvement of national anti-doping organisations of other countries and at their expense			
1.	Involvement of national anti-doping organisations of other countries, including through WADA coordination, in covering expenses related to ensuring testing of Ukrainian athletes for doping, namely those who are abroad due to the martial law.	December 2022	

2.	Norms of the program of testing of athletes in Ukraine for doping are adhered to by the National Anti-Doping Centre.		
Stage 2. January 2023– December 2025			
Restored practice of collecting and analysing at least 2400 doping samples annually			
3.	Funding of collecting and analysing at least 2400 doping samples annually.	December 2023	
4.	Collecting and analysing at least 2400 doping samples of the athletes from the national testing registration database and athletes from testing database annually.	December 2025	
5.	Ensuring transportation of doping samples to WADA-accredited laboratories in accordance with the international standards on transportation timeframe	December 2025	
Stage 3: January 2026 – December 2032			
Collecting and analysing at least 3200 doping samples annually			
6.	Funding of collecting and analysing at least 3200 doping samples annually.	December 2032	
7.	Collecting and analysing at least 3200 doping samples of the athletes from the national testing registration database and athletes from testing database annually.	December 2032	
8.	Ensuring transportation of doping samples to WADA-accredited laboratories in accordance with the international standards on transportation timeframe	December 2032	
Subgoal 6. Institutional capacity building and sufficient human resources for the national anti-doping system to ensure its further functioning under the war.			
Stage 1: June 2022 – end of 2022			
Ensured uninterrupted activities of the National Anti-Doping Centre staffed with the necessary specialists. *Establishment of a separate budget institution - the National Anti-Doping Laboratory.* *The national legislation on anti-doping activities in sports is aligned with the international standards.*			
1.	Elimination of inconsistency in Laws of Ukraine # 5099 “On Anti-Doping Activities in Sports” (dated 18.02.2021) and # 5640 “On Amendments to Article 52 of the Law of Ukraine "On Physical Culture and Sports" on the activities of the National Anti-Doping Laboratory (dated 08.06.2021)	August 2022	
2.	Recruitment of the qualified specialists for the National Anti-Doping Centre and development of the corresponding KPIs.	December 2022	

3.	Activities of the National Anti-Doping Centre are organised in accordance with WADA standards and carried out remotely.	September 2022	
4.	Ensured activities of Disciplinary and Appeals Committees	December 2022	
5.	Withdrawal of the Laboratory from the National Anti-Doping Centre and establishment of a separate budget institution, the National Anti-Doping Laboratory, with sufficient infrastructure facilities	December 2022	
Stage 2. January 2023– December 2025			
Ensured uninterrupted activities of the National Anti-Doping Centre. *Development and approval of the regulatory acts in accordance with the new regulatory framework on anti-doping activities in sports.* *The institutional capacity of the National Anti-Doping Laboratory is ensured, and the Laboratory is provided with infrastructure facilities and human resources.*			
6.	Development of the regulatory acts on the activities of the National Anti-Doping Centre, the National Anti-Doping Laboratory, and their supervisory boards	July 2023	
7.	Development of the development and the procurement plans for the National Anti-Doping Laboratory.	December 2023	
8.	Development and approval of the remuneration standards for the National Anti-Doping Laboratory management and employees	December 2023	
9.	Ensured funding of the National Anti-Doping Centre and the National Anti-Doping Laboratory	December 2025	
Stage 3: January 2026 – December 2032			
Ensured sustainable implementation of anti-doping norms and standards in sports in accordance with updated legislation and international standards. *The National Anti-Doping Laboratory is provided with highly qualified specialists and necessary equipment required for ISO 17025 and WADA accreditations.* *Preparation and submission of documents for obtaining ISO 17025 and WADA accreditations.*			
10.	Involvement of the Council of Europe and WADA experts in the audit of the activities of the National Anti-Doping Centre and the National Anti-Doping Laboratory.	December 2026	
11.	Purchase of the modern equipment for the National Anti-Doping Laboratory required for ISO 17025 and WADA accreditations.	December 2031	

12.	Application submission for obtaining ISO 17025 and WADA accreditations	December 2032	
13.	Cooperation with WADA on implementation of recommendations on activities of the National Anti-Doping Laboratory to obtain a status of a WADA-accredited laboratory.	December 2032	

Goal 4. Restoration and development of sports infrastructure

Operational goals aimed at solving a certain problem

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Subgoal 1. Comprehensive rebuilding and development of sports infrastructure, including bases for Olympic, Paralympic and Deaflympic training given the requirements of accessibility for people with disabilities and other low-mobility groups			
Goal to be achieved to solve the problem at each stage	At least 80% of all sports infrastructure facilities available at the end of 2021 are preserved. At least 50% of the bases for Olympic, Paralympic and Deaflympic training subordinate to the Ministry of Youth and Sports are preserved. Information on the destroyed infrastructure facilities is collected.	The losses of the sports infrastructure are assessed, and the infrastructure facilities are examined to calculate the costs of building and rebuilding activities; the priorities of the infrastructure rebuilding are set.	At least 50% of damaged and destroyed sports infrastructure facilities are comprehensively rebuilt and equipped; at least four bases for Olympic, Paralympic and Deaflympic training are built and rebuilt, restored, equipped and modernised.
Timeframe under the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	Continuation of martial law and hostilities	Lack of funding or reduced funding	Lack of funding or reduced funding
Goal achievement indicator	Percentage of the preserved infrastructure facilities	Funding (thousand, UAH)	Percentage and number of the rebuilt infrastructure facilities
The total need of funds for the goal achievement	Additional funding is not required.	Approximately 10 million 800 thousand (UAH)	Approximately 35 billion (UAH) (currency rate - 30,0)

Goal connections with other areas	1. infrastructure rebuilding.	1. infrastructure rebuilding. 2. construction / urban planning / modernization of cities and regions. 3. war losses audit 12. digitalization	1. infrastructure rebuilding. 2. construction / urban planning / modernization of cities and regions. 3. war losses audit 12. digitalization
Subgoal 2. The programs of the President of Ukraine "25 Sports Magnets" and "Reconstruction of 18 sports boarding schools and 100 children's and youth sports schools" are implemented given the requirements of accessibility of each facility for people with disabilities and other low-mobility groups			
Goal to be achieved to solve the problem at each stage	The information on damaged «sports Magnets" is collected and summarised. At least 60% of infrastructure facilities included in the program of the President of Ukraine "Reconstruction of 18 sports boarding schools and 100 children's and youth sports schools" are preserved.	The losses of the sports magnets, sports boarding schools and children's and youth sports schools are assessed, and the infrastructure facilities are examined to calculate the costs of building and rebuilding activities; the priorities of the infrastructure rebuilding are set.	At least 50% of damaged and destroyed sports magnets, sports boarding schools and children's and youth sports schools are comprehensively rebuilt and equipped; the programs of the President of Ukraine "25 Sports Magnets" and "Reconstruction of 18 sports boarding schools and 100 children's and youth sports schools" are resumed; At least 5 new sports magnets are built
Timeframe under the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	Continuation of martial law and hostilities	Lack of funding or reduced funding	Lack of funding or reduced funding
Goal achievement indicator	Percentage of the damaged sports magnets, sports boarding schools and children's and youth sports schools	The losses of the sports infrastructure are assessed, and the infrastructure facilities are examined to calculate the costs of building and rebuilding activities; the priorities of the infrastructure rebuilding are set.	Percentage and number of reconstructed and equipped sports magnets, sports boarding schools and children's and youth sports schools
The total need of funds for the goal achievement	Additional funding is not required.	Approximately 5 million 700 thousand (UAH)	Approximately 18 billion (UAH) (currency rate - 30,0)

Goal connections with other areas	1. infrastructure rebuilding.	1. infrastructure rebuilding. 2. construction / urban planning / modernization of cities and regions. 3. war losses audit 12. digitalization	1. infrastructure rebuilding. 2. construction / urban planning / modernization of cities and regions. 3. war losses audit 12. digitalization

The current state of implementation of programme documents within the defined analysis area on the defined problem

	Title of the programme document	Current state
1.	The Strategy of Development of Physical Culture and Sports of Ukraine until 2028 approved by the Resolution of the Cabinet of Ministers of Ukraine # 1089 dated November 4, 2020	The program is suspended to achieve the strategic goal: accessibility of an extensive network of world-class sports infrastructure facilities for each person, namely people with disabilities
2.	The State Targeted Social Program for the Development of Physical Culture and Sports until 2024 approved by the Resolution of the Cabinet of Ministers of Ukraine # 115 dated March 1, 2017 (with amendments made according to the Resolution of the Cabinet of Ministers of Ukraine # 1371 dated 23.12.2020)	There are risks of not achieving the expected outcomes: on ensuring the preserving and development of an extensive network of modern sports facilities (sports halls, swimming pools, sports stadiums, etc..) which meet national and international standards, namely on attracting investments

Determination of tasks to achieve the stated goals

#	Description of the task to achieve the goal	Deadline for the task fulfilment	Dependence of the task on the tasks of other directions, areas, problems
Subgoal 1. Comprehensive rebuilding and development of sports infrastructure, including bases for Olympic, Paralympic and Deaflympic training given the requirements of accessibility for people with disabilities and other low-mobility groups			
Stage 1: June 2022 – end of 2022			
At least 80% of all sports infrastructure facilities available at the end of 2021 are preserved. *At least 50% of the bases for Olympic, Paralympic and Deaflympic training subordinate to the Ministry of Youth and Sports are preserved.* *Information on the destroyed infrastructure facilities is collected.*			

1.	Preservation of sports infrastructure, facilities of state / communal ownership and prevention of the suspension of their activities as components of the economics and sports development. .	December 2022	
2.	Test launch of the Unified electronic database of sports facilities for accounting of sports infrastructure in the country	December 2022	
3.	Preservation of bases for Olympic, Paralympic and Deaflympic training subordinate to the Ministry of Youth and Sports or funded by the Ministry of Youth and Sports, and prevention of the suspension of their activities as components of the economics and sports development.	December 2022	
4.	Task 5. Collecting and summarising information on destroyed and damaged regional sports infrastructure facilities because of russia's aggression.	Regularly till the end of martial law and hostilities	
Stage 2: January 2023 – December 2025			
The losses of the sports infrastructure are assessed, and the infrastructure facilities are examined to calculate the costs of building and rebuilding activities; the priorities of the infrastructure rebuilding are set.			
5.	The losses of all sports infrastructure facilities are assessed (in accordance with the provided methods of assessment of losses or accounting documents), the costs of losses of infrastructure facilities and resources required for their reconstruction are calculated.	June 2023 (Timeframe to be regulated by the duration of martial law and hostilities)	
6.	All damaged infrastructure facilities of the country are examined to calculate the exact costs of their losses and financial resources required for their rebuilding, reconstruction, repairing with the use of modern technologies and modernization of all sports infrastructure	December 2024 (Timeframe to be regulated by the duration of martial law and hostilities)	
7.	All assessments and examination results of destroyed and damaged sports infrastructure facilities are analysed, the priorities of the infrastructure rebuilding are set given the available financial resources and reconstruction deadlines	December 2025 (Timeframe to be regulated by the duration of martial law and hostilities)	
8.	The Unified electronic database of sports facilities is modernised in accordance with the needs identified during the test launch.	December 2024	
9.	The losses of all bases for Olympic, Paralympic and Deaflympic training subordinate to the Ministry of Youth and Sports or funded by the Ministry of Youth and Sports	June 2023 (Timeframe to be regulated by the	

	are assessed (in accordance with the provided methods of assessment of losses or accounting documents) to calculate the costs of losses and resources required for their reconstruction.	duration of martial law and hostilities)	
10.	All damaged bases for Olympic, Paralympic and Deaflympic training subordinate to the Ministry of Youth and Sports or funded by the Ministry of Youth and Sports are examined to calculate the exact costs of their losses and financial resources required for their rebuilding, reconstruction, repairing with the use of modern technologies and modernization	December 2024 (Timeframe to be regulated by the duration of martial law and hostilities)	
11.	All assessments and examination results of destroyed and damaged bases for Olympic, Paralympic and Deaflympic training subordinate to the Ministry of Youth and Sports or funded by the Ministry of Youth and Sports are analysed, the priorities of the infrastructure rebuilding are set given the available financial resources and reconstruction deadlines	December 2025 (Timeframe to be regulated by the duration of martial law and hostilities)	
Stage 3: January 2026 – December 2032			
At least 50% of damaged and destroyed sports infrastructure facilities are comprehensively rebuilt and equipped; at least four bases for Olympic, Paralympic and Deaflympic training are built and rebuilt, restored equipped and modernised			
12.	Project proposals on building, rebuilding, repairing of all damaged and destroyed infrastructure facilities identified for the reconstruction are received.	December 2026 (Timeframe to be regulated by the duration of martial law and hostilities)	
13.	A schedule for restoration and possible funding of damaged and destroyed sports infrastructure facilities of the country is developed in accordance with the priorities and norms identified by the State Social Standard in the field of physical culture and sports registered with the Ministry of Justice of Ukraine on April 5, 2013 with # 559/ 23091 (with amendments dated 23.11.2021 given the Order of the Ministry of Youth and Sports # 4029 dated 22.10.2021).	March 2027 (Timeframe to be regulated by the duration of martial law and hostilities)	
14.	At least 50% of damaged and destroyed sports infrastructure facilities are rebuilt. .	December 2032 (Timeframe to be regulated by the duration of martial law and hostilities)	
15.	Project proposals on building, rebuilding, repairing of all damaged and destroyed bases for Olympic, Paralympic and Deaflympic training subordinate to the Ministry of Youth and Sports or funded by the Ministry of Youth and Sports are received.	December 2026 (Timeframe to be regulated by the duration of martial law and hostilities)	

16.	Task 5. A schedule for restoration and possible funding of damaged and destroyed bases for Olympic, Paralympic and Deaflympic training subordinate to the Ministry of Youth and Sports or funded by the Ministry of Youth and Sports is developed in accordance with the identified priorities.	February 2027 (Timeframe to be regulated by the duration of martial law and hostilities)	
17.	Task 6. At least 50% of damaged and destroyed bases for Olympic, Paralympic and Deaflympic training subordinate to the Ministry of Youth and Sports or funded by the Ministry of Youth and Sports are rebuilt.	December 2032 (Timeframe to be regulated by the duration of martial law and hostilities)	
Subgoal 2. The programs of the President of Ukraine "25 Sports Magnets" and "Reconstruction of 18 sports boarding schools and 100 children's and youth sports schools" are implemented given the requirements of accessibility of each facility for people with disabilities and other low-mobility groups			
Stage 1: June 2022 – end of 2022			
The information on damaged «sports magnets" is collected and summarised. At least 60% of infrastructure facilities included in the program of the President of Ukraine "Reconstruction of 18 sports boarding schools and 100 children's and youth sports schools" are preserved.			
1.	The information on damaged or destroyed «sports magnets" and infrastructure facilities included in the program of the President of Ukraine "Reconstruction of 18 sports boarding schools and 100 children's and youth sports schools" is collected and summarised.	December 2022 (Timeframe to be regulated by the duration of martial law and hostilities)	
2.	The action plan for reconstruction of damaged or destroyed «sports magnets" is developed.	December 2022 (Timeframe to be regulated by the duration of martial law and hostilities)	
Stage 2: January 2023 – December 2025			
The losses of the sports magnets, sports boarding schools and children's and youth sports schools are assessed, and the infrastructure facilities are examined to calculate the costs of building and rebuilding activities; the priorities of the infrastructure rebuilding are set.			
3.	The losses of all 'sports magnets' and infrastructure facilities included to the program of the President of Ukraine "Reconstruction of 18 sports boarding schools and 100 children's and youth sports schools"are assessed (in accordance with the provided methods of assessment of losses or accounting documents) to calculate the costs of losses and resources required for their reconstruction.	June 2023 (Timeframe to be regulated by the duration of martial law and hostilities)	
4.	All damaged 'sports magnets' and infrastructure facilities included to the program of the President of Ukraine "Reconstruction of 18 sports boarding schools and 100 children's and youth sports schools" are examined to calculate the exact costs of their losses and financial	December 2024 (Timeframe to be regulated by the	

	resources required for their rebuilding, reconstruction, repairing with the use of modern technologies and modernization.	duration of martial law and hostilities)	
5.	All assessments and examination results of destroyed and damaged ‘sports magnets’ and infrastructure facilities included to the program of the President of Ukraine "Reconstruction of 18 sports boarding schools and 100 children's and youth sports schools" are analysed, the priorities of the infrastructure rebuilding are set given the available financial resources and reconstruction deadlines	December 2025 (Timeframe to be regulated by the duration of martial law and hostilities)	
6.	All the infrastructure facilities included to the program of the President of Ukraine "Reconstruction of 18 sports boarding schools and 100 children's and youth sports schools" are examined, the feasibility of their further inclusion to the program is determined, a new list of infrastructure facilities is developed (if needed).	December 2025 (Timeframe to be regulated by the duration of martial law and hostilities)	
Stage 3: January 2026 – December 2032			
At least 50% of damaged and destroyed sports magnets, sports boarding schools and children's and youth sports schools are comprehensively rebuilt and equipped; the programs of the President of Ukraine "25 Sports Magnets" and "Reconstruction of 18 sports boarding schools and 100 children's and youth sports schools" are resumed; *At least 5 new ‘sports magnets’ are built.*			
7.	Project proposals on building, rebuilding, repairing of all damaged and destroyed ‘sports magnets’ and infrastructure facilities included to the program of the President of Ukraine "Reconstruction of 18 sports boarding schools and 100 children's and youth sports schools" are received.	December 2026 (Timeframe to be regulated by the duration of martial law and hostilities)	
8.	A schedule for restoration and possible funding of damaged and destroyed ‘sports magnets’ and infrastructure facilities included to the program of the President of Ukraine "Reconstruction of 18 sports boarding schools and 100 children's and youth sports schools" is developed in accordance with the identified priorities.	February 2027 (Timeframe to be regulated by the duration of martial law and hostilities)	
9.	Task 6. At least 50% of damaged and destroyed ‘sports magnets’ and 25% of infrastructure facilities included to the program of the President of Ukraine "Reconstruction of 18 sports boarding schools and 100 children's and youth sports schools" are rebuilt.	December 2032 (Timeframe to be regulated by the duration of martial law and hostilities)	
10.	At least 5 new ‘sports magnets’ are built.	December 2032 (Timeframe to be regulated by the duration of martial law and hostilities)	

11.	At least 70 infrastructure facilities included in the program of the President of Ukraine "Reconstruction of 18 sports boarding schools and 100 children's and youth sports schools" are reconstructed.	December 2032 (Timeframe to be regulated by the duration of martial law and hostilities)	

Goal 5. Increase in the level of Ukrainian national and civic identity up to 85%

Operational goals aimed at solving a certain problem

	Stage 1: June 2022 – end of 2022	Stage 2: January 2023 – December 2025	Stage 3: January 2026 – December 2032
Problem. The insufficiently formed Ukrainian national and civic identity, defence consciousness and the integration of the population of the temporarily occupied territories in the post-war period.			
Goal to be achieved to solve the problem at each stage	A unified narrative on the formation of Ukrainian national and civic identity is created. A social study on the development of national and patriotic education is conducted. 8 meetings (events) on the main terms of national and patriotic education are held in regions of Ukraine.	The level of Ukrainian national and civic identity has increased up to 85%. Annually: at least 20 all-Ukrainian events are held with the participation of up to 400,000 people; around 360 specialists are trained; about 1000 people travel across the country within the project "Investigate Ukraine"	The field of national and patriotic education is aligned with the EU standards. A study on European perceptions of Ukrainian national and civic identity is conducted. Around 2500 people participated in the project «Ukraine through the eyes of Europeans»
Timeframe under the stage	June 2022 – end of 2022	January 2023 – December 2025	January 2026 – December 2032
Risks related to the goal achievement	Prolonged hostilities and the impossibility to fully resume activities in the field of national and patriotic education. Considerable loss of human resources in the field of national and patriotic education.	–	–
Goal achievement indicator	Number of social studies conducted; number of events or meetings held	Number of events held and number of event participants; number of trained specialists; number of project participants	Number of social studies conducted; number of project participants
The total need of funds for the goal achievement	1,9 million (UAH)	84,25 million (UAH)	13,5 million (UAH)

Goal connections with other areas	20. education and science. 22. culture and information policy. 12. digitalization 10. modernization, security and defence	20. education and science. 22. culture and information policy. 12. digitalization 10. modernization, security and defence	20. education and science. 22. culture and information policy. 12. digitalization 10. modernization, security and defence

The current state of implementation of programme documents within the defined analysis area on the defined problem

#	Title of programme document	Current state
1.	The State Targeted Social Program of National and Patriotic Education until 2025 (dated 30.06. 2021, # 673)	Within the State Targeted Social Program of National and Patriotic Education until 2025 (referred as Program), 26 all-Ukrainian events on national and patriotic education with the participation of over 300,000 people were held in 2021 in partnership with structural units for youth and sports of regional and Kyiv city state administrations and NGOs. The financial support was provided to civil society institutions for the implementation of 34 national and patriotic education projects with the participation of more than 360,000 people.

Determination of tasks to achieve the stated goals

#	Description of the task to achieve the goal	Deadline for the task fulfilment	Dependence of the task on the tasks of other directions, areas, problems
Stage 1: June 2022 – end of 2022			
A unified narrative on the formation of Ukrainian national and civic identity is created. *A social study on the development of national and patriotic education is conducted.* *8 meetings (events) on the main terms of national and patriotic education are held in regions of Ukraine.*			
1	An analysis of the development of national and patriotic education is conducted (the main narratives are specified, mechanisms and means of formation of Ukrainian national and civic identity are identified).	December 2022	
2.	The law of Ukraine " On the Basic Principles of Ukrainian national and civic identity formation" is adopted.	December 2022	

3.	The standards of conducting events on national and patriotic education and military and patriotic education are developed.	December 2022	
Stage 2: January 2023 – December 2025			
The level of Ukrainian national and civic identity has increased up to 85%. Annually: at least 20 all-Ukrainian events are held with the participation of up to 400,000 people; around 360 specialists are trained; about 1000 people travel across the country within the project "Investigate Ukraine"			
4.	Through the national and patriotic education projects Ukrainian national and civic identity of the population, including people of the temporarily occupied and de-ocuppied territories, is formed.	December 2025	
5.	The population mobility is increased and the stereotype on the regional division of Ukraine is addressed.	December 2025	
6.	The field of national and patriotic education is digitalized.	September 2024	The Ministry of Digital Transformation
7.	The specialised study programs for training of national and patriotic education specialists are developed.	December 2024	MoES
8.	The position of a national and patriotic education specialist is introduced.	December 2024	
9.	The development of civil society institutions in the field of national and patriotic education and military and patriotic education is supported.	December 2025	
Stage 3: January 2026 – December 2032			
The field of national and patriotic education is aligned with the EU standards. A study on European perceptions of Ukrainian national and civic identity is conducted. Around 2500 people participated in the project «Ukraine through the eyes of Europeans»			
10.	The activities in the field of national and patriotic education are systemized and aligned with the tasks of integration into the EU.	December 2032	
11.	The joint study programs and events on military and patriotic education are developed given the UN standards.	December 2032	Ministry of Defence

ANNEX 1

Required regulatory framework

Field of youth policy

#	Title of the regulatory act	Point of the regulatory framework development/ amendment	Public authority responsible for the regulatory framework development/amendment	Development timeframe	Approval deadline
1.	Amendments to the Decree of the President of Ukraine # 94 "On the National Youth Strategy until 2030" dated March 12, 2021	A part of the content is to be amended given Russia's war against Ukraine, corresponding tasks are to be revised	Ministry of Youth and Sports	2023	2023
2.	Resolution of the Cabinet of Ministers of Ukraine "Some issues of the Implementation of the National Project on Youth Involvement in the Reconstruction of Ukraine"	The draft regulatory act will define the mechanisms of the implementation and funding of the national program on youth involvement in the reconstruction of Ukraine	Ministry of Youth and Sports	2023	2023
3.	Resolution of the Cabinet of Ministers of	Alignment of the Standard Regulation on the	Ministry of Youth and Sports	2022	2023

	Ukraine "On Amendments to the Resolution of the Cabinet of Ministers of Ukraine # 1198 dated 18. 12. 2018"	Youth Advisory Board at the Regional Level and the Standard Regulation on the Youth Advisory Board at the Local Level approved by the Resolution of the Cabinet of Ministers of Ukraine # 1198 dated 18. 12. 2018 with the requirements of the Law of Ukraine "On the Basic Principles of Youth Policy"			
4.	Resolution of the Cabinet of Ministers of Ukraine "On Approval of the Establishment Procedure and Activities of the National Youth Council and Amendments to Certain Acts of the Cabinet of Ministers of Ukraine"	Creation of a unified vision on the development and implementation of youth policy, cooperation of central and local executive bodies, local authorities with youth work entities on the development and implementation of youth policy given the requirements of Article 7 of the Law of Ukraine "On the Basic Principles of Youth Policy"	Ministry of Youth and Sports	2022	2023
5.	Order of the Ministry of Youth and Sports "On Approval of the Procedure of organisation and Implementation	Defining the mechanisms of the implementation of the National Program on Youth Personal and Professional Development,	Ministry of Youth and Sports	2023	2024

	of the National Program on Youth Personal and Professional Development "	namely the procedures of involving young people in internships at public and local authorities			
6.	Acts of the Cabinet of Ministers of Ukraine on Ukraine`s joining to the EU Program «European Solidarity Corps»	Ukraine`s joining to the EU Program «European Solidarity Corps»	Ministry of Youth and Sports	2023	2025
7.	Amendments to the Law of Ukraine "On the State Budget of Ukraine»	Amendments to the amount of subvention to fund the rebuilding, reconstruction, modernization and construction of youth centres and spaces.	Ministry of Regional Development (with the participation of the Ministry of Youth and Sports)	2023	2024
8.	Amendments to the Law of Ukraine "On the Basic Principles of Youth Policy"	Amendments to the introduction of the term "youth worker", amendments to the activities and funding procedures of the Ukrainian Youth Fund, providing for the possibility of funding youth centres through subventions; revision of the terms "youth infrastructure", "youth centre";	Ministry of Youth and Sports	2023	2024

		added article on launching the database of youth centres and spaces; added section on standards for the provision of youth services by youth centres (regulation of the Law of Ukraine "On State Social Standards and State Social Guarantees")			
9.	Resolution of the Cabinet of Ministers of Ukraine "On Approval of the Procedure and Conditions for Granting a Subvention from the State Budget to local Budgets for the Implementation of Projects under the Recovery Program of Ukraine" (or amendments to the Resolution of the Cabinet of Ministers of Ukraine # 1324 dated 15.12.2021 "On Approval of the Procedure and Conditions for Granting a Subvention from the State Budget to local Budgets for the	Determining the procedure and conditions for granting a subvention for the reconstruction of youth centres and spaces destroyed because of the war in Ukraine	Ministry of Regional Development (with the participation of the Ministry of Youth and Sports)	2023	2024

	Implementation of Projects under the Recovery Program of Ukraine"				
10.	Resolution of the Cabinet of Ministers of Ukraine "Some issues of operations of the electronic database of youth centres and spaces"	Determining the procedure and conditions for operations of the electronic database of youth centres and spaces, the list of data contained	Ministry of Youth and Sports	2023	2024
11.	Regulatory acts on funding modernization, rebuilding, reconstruction and construction	Given the general state approach to the regulation of funding modernization, rebuilding, reconstruction and construction, there is a need in analyzing and, if needed, developing other regulatory acts to ensure the funding process	Ministry of Regional Development (with the participation of the Ministry of Youth and Sports)	2023	2024
12.	Amendments to the Law of Ukraine "On State Social Standards and State Social Guarantees"	Regulation of the procedure of developing state standards for youth services, determining the number of necessary youth infrastructure facilities in each administrative territorial unit for the provision of youth services (given the number of young people in each administrative	Ministry of Youth and Sports Ministry of Social Policy	2023	2024

		territorial unit), development of norms and standards for the provision of services in this field. Implementation of the bill will enable the development and approval of a number of state standards for services provided by youth centres			
13.	Resolution of the Cabinet of Ministers of Ukraine "On Approval of Standards for Free Youth Services Provided by Youth Centres Regardless of their Ownership"	Defining standards for youth services provided by youth centres	Ministry of Youth and Sports	2023	2024
14.	Resolution of the Cabinet of Ministers of Ukraine "On Approval of the Procedure and Conditions for Granting a Subvention from the State Budget to Local Budgets for the Development of Network of Youth Centres"	Determining the procedure of granting a subvention from the state budget to local budgets for the development of network of youth centres	Ministry of Youth and Sports	2026-2032	2027
15.	Resolution of the Cabinet of	Alignment of the draft regulatory act with the Law of	Ministry of Youth and Sports	2023	2023

	Ministers of Ukraine "On Amendments to the Resolution of the Cabinet of Ministers of Ukraine # 1014 dated 20.12.2017	Ukraine "On the Basic Principles of Youth Policy"			
16.	Order of the Ministry of Youth and Sports "On Approval of the Procedure for Awarding Youth Centres a National Quality Mark, Monitoring and Evaluating the Effectiveness of their Activities»	Setting the organisational requirements for the issue and use of the certificate confirming the award of a national quality mark to a youth centre in accordance with Paragraph 3 of Article 6 of the Law of Ukraine "On the Basic Principles of Youth Policy"	Ministry of Youth and Sports	2023	2024

ANNEX 2

Proposed National projects

Project description	Rationale	Criteria Key Performance Indicators (qualitative/quantitative)	Economic effect (impact on GDP, budget, employment, etc.)	The main responsible body	Estimated budget (mln UAH)	Suggested sources of funding	Regulatory acts	Related area of regulation of EU law (general comment)
Social project "Active parks - locations of healthy Ukraine"	Promotion and organisation of health physical activity of all categories of citizens, including people with disabilities, creating conditions to reduce morbidity, improve the quality and duration of active life, disease prevention and overcoming their consequences, the formation of a society united by the idea of healthy and active life.	Involvement of the population in physical activity and sports Every day at least 1,000 people use the online platform "Active Parks" and official pages on social networks Facebook and Instagram to engage in physical activity for all segments of the population in the regions of Ukraine, including those where hostilities took place and are under occupation, to attract leading athletes including with		Ministry of Youth and Sports		National budget Local budgets		

		disabilities and celebrities. - 2022 Restoration of 90% of undamaged sports locations of the social project "Active parks - locations of healthy Ukraine" - 2025 Operation of 10,000 sports locations for physical activity available to all segments of the population in parks, adjacent territories, in places of mass recreation, and living throughout Ukraine - 2032.						
Olympic sports development strategy	Improving the results of athletes in Olympic sports in the international sports arena	Team place in the team standings at the Olympic and European Games		Ministry of Youth and Sports		The state budget and other sources are not prohibited by law	adoption of the relevant legal act	
Implementation of the programme of the President of Ukraine "25 sports magnets" taking into account the	The programme has been implemented since 2020, the goal of which is to create a magnet sports facility in each region of the country, which will provide an opportunity not only in each region to host high-ranking sports competitions, NTCs of national teams of Ukraine, but also to	25 magnet sports facilities have been built in all regions of Ukraine	Increase of receipts to budgets due to carrying out sports competitions of various level	Ministry of Youth and Sports	6 bln UAH	National budget Local budgets	Procedure and conditions for granting a subvention	

requirements for accessibility and accessibility of persons with disabilities and other low mobility groups to each individual object	involve the population in mass sports.		(including international), NTZ of national teams, educational sports process, mass sports. Also cultural events. The creation of such a facility increases the jobs of about 100-150 employees					
Implementation of the programme of the President of Ukraine "Reconstruction of 18 sports boarding schools and 100 SYSS" taking into account the reduction of facilities to the requirements for accessibility and accessibility of	Most of the existing sports infrastructure is built according to old standards, and is not equipped with modern sports technologies, which leads to poor training of athletes in Ukraine, but as a result of poor results in the international arena.	18 sports boarding schools and 100 SYSS were reconstructed	The implementation of the programme will increase the capacity of sports facilities. The number of coaches will increase. After the reconstruction, the	Ministry of Youth and Sports	12 bln UAH	National budget Local budgets	Procedure and conditions for granting a subvention	

persons with disabilities and other low-mobility groups			sports facilities will be energy efficient and use modern technologies, which will lead to savings in maintenance costs and the ability to provide sports services at better prices in greater quantities. The nation will be healthier, which will reduce the cost of health, especially for children. Increasing victories in the international arena will have a positive effect on					

			the overall image of the country.					
All-Ukrainian project "United Ukraine"	Due to different interpretations and perceptions of the sphere of national-patriotic education in society, there are situations of manipulating the term "patriot", "patriotism", and the sphere is often associated with radical sentiments. which is not true. Therefore, there is a need to identify the main narratives that affect the formation of Ukrainian national, civic identity, defence consciousness and standardisation of basic concepts. In order to relieve social tensions and clarify the main provisions of the Law. Awareness of communities about the key tasks of national and patriotic education Since the sphere of national-patriotic education is designed to form Ukrainian national and civic identity, the defence of consciousness is unacceptable during the activities of this direction and is unacceptable to use the Soviet heritage and scenarios that still occur in	Conducted one sociological study		Ministry of Youth and Sports	0,5 funds for sociological research are needed only at the first stage	National budget Local budgets	Order of the Ministry of Youth and Sportsy	

	certain regions and communities. During the war, there was a great demand and readiness to defend Ukraine's independence, but there was a problem with the lack of such skills (home care, handling weapons, handling explosives, survival in dangerous and extreme conditions). Also in the future, special attention should be paid to the promotion of military service among young people and the formation of defence consciousness. In addition, there is a part of the population that has been under occupation for 8 years, their integration into Ukrainian society requires first of all overcoming Soviet myths in their minds. An important step in the development of national-patriotic education is the training of qualified human resources in public authorities, local governments, educational institutions, youth centres for the organisation and implementation of programmes , projects and activities on national-patriotic education, and the development of grassroots coordination. educational processes in this

national and patriotic education.								
National project "Study Ukraine". Accent (informational and educational exchanges aimed at learning about the traditions and culture of the regions of Ukraine).	According to the results of a sociological study, about 50% of the population did not travel to Ukraine for the last three years, it has had a negative impact on the unity of the nation and the formation of a stereotype regarding regional differences.	Every year, about 1,000 people travel to Ukraine as part of the project		Ministry of Youth and Sports, Ministry for Communities and Territories Development of Ukraine Agency of Tourism, Regional state administrations	26,25			
The project to create a single platform of NPE and digital training. Emphasis (on the resource, place all information about events, projects, initiatives, opportunities and competitions for financial support, public	The project to create a single platform of NPE and digital training. Emphasis (on the resource, place all information about events, projects, initiatives, opportunities and competitions for financial support, public organisations, specialists and institutions in the field of national and patriotic education, as well as informational and educational materials about the formation of Ukrainian national and civic identity). In order to quickly adapt the	Operation of a single online platform		Ministry of Youth and Sports, Ministry for Digital Transformation, Regional state administrations	2		Order of the Ministry of Youth and Sports	

organisations, specialists and institutions in the field of national and patriotic education, as well as informational and educational materials about the formation of Ukrainian national and civic identity).	field to all modern challenges and threats, it is necessary to transfer the field to a digital format (placement of informational materials, training, literature). The creation of a digital platform will give the population at any point the opportunity to receive interesting materials in the field for the formation of Ukrainian national and civil identity, defence consciousness.							
The project of competitive support of institutions of civil society. Emphasis: (training of civil society institutions on participation in competitions, receiving grant support).	A developed civil society is an indicator of the country's development. For example, civil society institutions were the first to defend the humanitarian front during the war through volunteering. A large part of the representatives of public organisations of the NPE direction joined the ranks of the Armed Forces of Ukraine and territorial defence. These people will have practical experience in the future, which they will use as instructors during the implementation of NEP events and projects. Training on grant and competitive support of	About 400,000 people are annually covered by projects (by regional state administrations) of national and patriotic education, developed by civil society institutions, for the implementation of which financial support is provided		Ministry of Youth and Sports, Regional state administrations	18		Order of the Ministry of Youth and Sportsy	

	representatives of civil society institutions will allow establishing partnership relations with the state.							
The project "Ukraine through the eyes of Europeans". Emphasis: presentation of Ukrainian identity to Europeans, research and search for common narratives and historical unity.	During integration into the EU, it is important to preserve the linguistic, cultural and historical uniqueness of Ukraine and to convey the image of a Ukrainian to the European community.	One study was conducted on the perception of Ukrainian national and civil identity by Europeans. About 2 500 people will take part in the project		Ministry of Youth and Sports, Ministry of foreign affairs	7,5			
International project "Descendants of the Free" Emphasis (exchange of experience regarding the protection of territorial integrity and overcoming the post-totalitarian regime).	Ukraine is one of the countries that in the 21st century has combat experience, military heroes, a history of survival and the formation of a nation that can be told to other countries. Events of this format will help overcome post-war traumatism and contribute to the socialisation of Ukrainians. It will also facilitate the exchange of experience between countries with cases of readaptation.	About 1,000 people will be involved in the project		Ministry of Youth and Sports, Ministry of defence, Ministry of foreign affairs	6			

Conducting a nationally representative sociological survey on the social situation of young women and men and the level of their participation in public life.	Conducting regular studies of the socio-economic situation of youth is necessary for understanding the current problems, needs and challenges of youth and effective use of resources of state authorities and local self-government bodies, international organisations. This is a proven youth policy. On the basis of such data (evidence based youth policy), youth policy will be improved, which will make it possible to solve youth issues as best as possible and meet the needs of young women and men. It will also ensure the implementation of an effective youth policy at all levels (taking into account the administrative-territorial distribution, distribution and gender, will include monitoring of various studies and analytical data on youth, displaying data by region, developing a youth participation index system, monitoring and evaluation of the implementation of youth policy and universal research methodology (the methodology of the youth participation index, the UNFPA youth well-being index can be considered:	the availability of statistical data on the situation of youth in Ukraine and the level of their participation in public life, which will help to feel the mood of the youth and improve the priority areas of youth policy to solve the current problems of the youth at all levels.		Ministry of Youth and Sports, other central bodies executive power, Regional state administration s, science institutions	55	funds from state/local budgets/other sources not prohibited by law Regional state administrations, including international partners	-	Youth and science

	https://www.youthwellbeing.in.ua/, the Eurostat methodology: https://ec.europa.eu /eurostat/web/youth), digital tools Action, U-report). At the 1st stage, it is assumed that a study will be conducted to obtain zero data. At the II and III stages, an annual study is planned to obtain analytical data on the situation and participation of young people in public life, on the basis of which the youth policy will be improved. Partners: UNDP, IOM, UNFPA (through the IBM platform)							
A system of informing young people about opportunities to realise their potential in Ukraine and European integration has become established. Implementation of a modern system of unification of volunteer and	Informing the youth about existing capabilities are no less important than creating such capabilities. In order to inform, a communication strategy is essential, as it is necessary to have a clear vision on how exactly to inform different categories of young people. It is also equally important to inform representatives of state authorities and specialists who work with youth about analytical data on the situation of young people and their participation in public life, so that they can take	the level of awareness among young people has increased, including vulnerable categories and the Ukrainian youth of the diaspora, about the available opportunities for involvement in the restoration of the country, the tools of participation, its rights and obligations for self-realisation, development and integration into public life. Training of youth (online and/or offline) to increase the level of civic competences of youth for their participation in public life and the restoration of the country (at stages I-III of the restoration plan).	Active, responsible and conscious citizens do not give birth. Throughout their lives, they acquire relevant competences, gain relevant experience, communicate with the environment, which shapes their worldview. That is why it is important to educate young people for their development and acquisition of civic competences, which include issues of values, leadership, media literacy, etc. At the same time, it is necessary to develop social competences. All this also corresponds to European integration aspirations, since the competence-based approach to education is a significant direction of work in the educational (formal and informal) sphere of the European Union. Possible topics: civic and political education, peacebuilding, development of digital and digital security skills, mediation, negotiation,	1) the number of available courses for young people has been increased; 2) the level of civic competences of young people (knowledge, abilities, skills, attitudes, etc.) has been increased for the participation of young people in public life and the restoration of the country. Development of volunteering in Ukraine. (through the support of volunteer initiatives, popularisation of the culture of volunteering among young people, recognition of volunteer activities through the inclusion of youth competencies obtained during the implementation of volunteer activities in the process of obtaining education, employment, etc. (through the EU YouthPass tool), advocacy for	The project is necessary, on the one hand, to motivate young people to social activism, and on the other hand, to recognize the contribution of young people to the improvement of community life. In addition, during volunteer activities, performing a certain type of work, young people learn, acquire competence and gain experience in their application. Such training is no less important than that received in educational institutions, and sometimes even more important. At the same time, through volunteering, young people participate in the reconstruction of premises for IDPs to live in. The process of recognition of competences acquired during, among other things, volunteering in the European Union has been ongoing since 2007. In Ukraine today, it is necessary to advocate the issue of the enrollment of competencies acquired during volunteering before educational institutions, students, regional state administrations, and others.	1) the level of youth involvement in volunteer initiatives for the restoration of Ukraine and assistance to the population and communities has increased; 2) the promotion of the National Volunteer Platform covers more than 50 percent of young people, including vulnerable categories and those who are temporarily abroad; 3) the number of organisations registered on the Platform to promote their volunteer initiatives; 4) the number of volunteers who work within the framework of the Platform's activities; 5) the number of young people who participated in volunteer initiatives posted on the Platform; 6) the competences acquired during		Ministry of Youth and Sports, Ministry of Social Policy, Ministry of Education and Science	100	funds from state/local budgets/other sources not prohibited by law Regional state administrations, including international partners	Acts of the Cabinet of Ministers on joining the EU programme "European Solidarity Corps"	Youth and Sports

Ukraine to acquire the status of a programme country of EU programmes "European Solidarity Corps")	In the process of European integration, Ukraine can use good practices of recognition of volunteer activities. At the 1st stage: 1) The National Volunteer Platform (https://platforma.volunteer.country) provides: humanitarian aid to the population in the following areas: car volunteering; needs of defenders in things; assistance to defenders; blood donation; financial assistance to defenders; the need for medication; cyber attacks and IT assistance; assistance to refugees; help in the kitchen; international advocacy; provision of housing for IDPs; helping animals; there is an operational headquarters, which identifies the need for assistance throughout the country and mobilises volunteers to help the military and the population through the use of a chatbot; "Palyanytsya" (www.palyanytsya.info) is a portal for quick help finding in Ukraine. 2) volunteer initiatives are supported, in particular to attract young people to volunteer activities for the restoration of Ukraine, primarily in	volunteer work were defined activities in the process of obtaining education, employment, etc. at the state level; 7) the competences of young people acquired during the implementation of volunteer activities are recognized and taken into account in the process of obtaining education, employment, etc. at the state level through the EU YouthPass tool implemented in Ukraine; 8) the percentage of young women and men of various categories participating in international volunteer projects has increased; 9) Normative regulatory acts meet EU requirements for Ukraine to acquire the status of a programme Country of EU programmes "European Solidarity Corps"; 10) increased the						

	communities (together with the programme Building Ukraine Together by rebuilding premises suitable for IDPs to live in). At the II stage, it is envisaged: 1) support of volunteer initiatives, in particular to attract young people to volunteer activities for the restoration of Ukraine (primarily in communities together with the programme Building Ukraine Together); 2) continuation of the work of the National Volunteer Platform to popularise the culture of volunteering among young people with the aim of involving them in the restoration of Ukraine (primarily in communities); 3) analysis of regional state administrations' laws, amendments to the NPA, advocacy for the use of the EU YouthPass tool (Youth Passport); 4) analysis of regional state administrations laws, amendments to the normative regulatory acts, acquisition of full programme Country status of EU programmes "European Corps of Solidarity". At the III stage, it is envisaged: 1) support of volunteer initiatives for the	number of Ukrainian CSIs, LGUs and other legal entities that work with young people and use the opportunities of the EU programmes "European Solidarity Corps" for the implementation of their volunteer projects. 11) rebuilt or renovated premises for IDPs; 12) the number of young people involved in the reconstruction of premises for the residence of IDPs through volunteering.						

	implementation of regional state administrations of greater volunteerism; 2) continuation of the work of the National Volunteer Platform for the Popularisation of Culture of volunteering among young people, dialogue between volunteer organisations and young people who have a desire to volunteer and help the population; 3) implementation of the EU YouthPass tool in Ukraine; 4) youth participation in EU programmes "European Solidarity Corps". Implementation of the "Community for Youth" initiative for comprehensive support of local youth policy.	Youth policy and youth work are most effective at the level of local communities - precisely where young people live. To date, sufficiently favorable conditions have been created for the implementation of youth policy and youth work, which meets the recommendations of the Council of Europe and the European Union. Awareness of the importance of youth in local communities is also mostly present among local government representatives, but there is not always appropriate knowledge about working with youth and a lack of desire and/or resources to invest in youth policy and youth work. Implementation of the project will help create such an environment in communities where young people will be able to develop, and most importantly, will have the desire to live there and participate in the development of communities. (exchange of experiences of local self-government regarding successes in the field of youth policy, presentation of best practices in financing youth programmes and support of youth participation budgets, rating of cities supporting youth policies, annual forum held jointly with city associations, others, well-being index, participation index, child and youth-friendly	1) raising the standard of living of youth in the community; 2) increasing the level of application of tools for involving youth in public life; 3) increasing the level of support for CSI , institutions and professionals working in the community; 4) increasing the level of awareness among young people about opportunities to realise their own potential in the community; 5) increasing the level of competences of young people for their self-realisation and development in the community; 6) increasing the number of youth development programmes and services provided by institutions working with youth, youth centres and spaces; 7) promotion of the number of specialists who work with young people; 8) the number of youth centres or spaces created for youth in the community		Ministry of Youth and Sports, Ministry for Communities and Territories Development of Ukraine	10	funds from state/local budgets/other sources not prohibited by law Regional state administrations, including international partners	Approval of recommendations for local state authorities regarding the implementation of the "Community for Youth" initiative. Full membership of Ukraine in the EU Erasmus+ program.	The EU Erasmus+ programme provides opportunities for international youth cooperation. In the field of youth cooperation, CSI are the main actors in the implementation of international youth projects. However, participation in projects and project "bureaucracy" require appropriate knowledge and efforts from the CGI. In Ukraine, the number of CGIs implementing Erasmus projects is very small. In order to increase the number of international youth projects that are implemented with EU money, it is necessary to increase the capacity of Ukrainian CSIs to develop and implement such projects. Ukraine's acquisition of the status of a programme Country of the Erasmus + programme will significantly simplify access to funding for Ukrainian CSI . At the II stage, it is envisaged to strengthen the capacity of the CSI to participate and involve young people in the projects of the Erasmus + program, to hold negotiations with the European Commission regarding the expansion of Ukraine's	1) the percentage of CSI s that have the capacity to participate in the EU Erasmus+ programme has been increased; 2) the percentage of young women and men of various categories who use the opportunities of the EU Erasmus+ programme has increased; 3) NPAs meet the EU requirements necessary for Ukraine to acquire the status of a programme country of the program Erasmus+		Ministry of Youth and Sports, Ministry of Education and Science, Ministry of Foreign Affairs	needs regional state administration study	funds from state/local budgets/other sources not prohibited by law Regional state administrations, including international partners	acts of the Cabinet of Ministers of Ukraine regarding the full membership of Ukraine in the EU Erasmus+ program	Youth and Sports

	opportunities in the EU programmes "Erasmus +", conduct a joint study (survey) with the EU regarding the advantages and opportunities of Ukraine's membership in the Erasmus+ programme as a programme country; make analysis of regional state administrations laws, to develop together with the European Commission a step-by-step Roadmap with a list of specific steps on the way to join the Program, including with the aim of synchronising national policy in the fields of youth, sports and improving the existing infrastructure. At the III stage, it is envisaged: to ensure full membership of Ukraine in the EU Erasmus+ programme by creating a Ukrainian national agency, a national and regional support structure and involving young people in participating in the EU Erasmus+ programme. Implementation of training and consulting of Civil Society Instituties. (creating a public organisation, project management, partnership, attracting and managing resources, understanding the budget	In order for the civil society to be a partner for the state authorities in solving the urgent issues of youth, implementation of the youth policy and development of communities as a whole, CSIs must have the appropriate capabilities. From the second half of 2022, the process of institutionalisation of public initiatives and volunteer groups, which appeared as a response to russia's wars against Ukraine, will take place. A similar process already took place in 2014-2015. Currently,	1) the qualification of CSI employees has been improved; 2) increased the capacity of CSI for their effective work with young people; 3) the level of involvement of young people in the activities of CSI has increased; 4) the level of organisational capacity of the CSI has been increased; 5) the level of		Ministry of Youth and Sportsy	25	Funds from state/local budgets/other sources not prohibited by law Regional state administrations, including international partners	Amendments to the resolution of the CMU of June 2, 2021 No. 579. process in the community, points of influence, mastering advocacy tools, managing public organisations)	CSIs need basic support for organisational development, staff training, and activists. It is extremely profitable for the state to provide support to newly created organisations to help them realise their potential for the benefit of the country and society. At the 1st stage, training and consulting of CSIs, including organisations that have moved to other regions, is provided for their survival and functioning in the conditions of war; At the II stage, it is envisaged: 1) improvement and implementation of training programmes for CSI (offline and online) adaptation in the post-war period; 2) development and implementation of programmes for young people who have a desire to create an CSI, 3) networking of CSIs through experience exchange programmes for CSI representatives (national and international), as well as providing support for the integration of youth CGIs into international youth structures. At the 3rd stage, it is envisaged	partnership between representatives of the CSI in Ukraine and abroad has been increased in order to solve the current problems of the youth; 6) the level of cooperation between representatives of the CSI, local self-government bodies and state authorities has increased. 7) The index of organisational capacity of CSIs working with youth has been increased

Support of Civil Society Institutes at the national and local level.	The CSI have demonstrated tremendous willingness and ability to mobilise people and resources to assist the Armed Forces and civilians affected by military aggression. Many of them were forced to move, the vast majority rearranged their work, many lost staff. In the first period of implementation of the plan, they will need support to restore/continue full functioning. In the future, such support will help them strengthen their capacity, expand partnerships, and involve as many young people as possible in the reconstruction of the country. At the 1st stage, it is envisaged to provide support to CSIs in wartime by providing grants to ensure their livelihoods (together	1) the number of CSI that received grants for institutional support from the UYF; 2) the percentage of young people who joined UYF projects for their participation in public life and the restoration of Ukraine; 3) the index of organisational capacity of the CSI has been increased. 	with international partners). At the II stage, it is envisaged: 1) development of mechanisms to support MDGOs for the provision of their institutional grants (beginning of 2023); 2) conducting a competition and providing institutional grants for MDGOs, taking into account the review and identified priorities for their provision, as well as an analysis of the needs and capabilities of MDGOs; At the II-III stage, it is planned to provide annual institutional grants for MDGO. Partners: UNDP, FSU, ISAR "Yednannia"							
"Strengthening of cooperation between local administrations, local governments and CSI in the implementation of youth policy and youth work. (consultation of local authorities and local self-government bodies with CSI, including	Support of CSI at the local level from the funds of the local budget is a sign of democracy, involving local residents in solving local problems. The competition of projects developed and proposed by the CSI is an effective mechanism for implementing the best ideas/best ways to solve local problems for less money. In Ukraine, there are practices of organising project contests, where local self-government bodies make a political decision to support CSI for their effective	"1) the level of awareness of local self-government bodies about the importance of youth policy and youth work in communities has increased; 2) the level of awareness of local self-government bodies regarding the possibilities of organising project tenders at the level of territorial communities has increased; 3) the level of awareness		Ministry of Youth and Sportsy	10	funds from state/local budgets/other sources not prohibited by law Regional state administrations, including international partners		Youth and Sports

MDGO, on issues of youth policy, competitions and granting of grants for them at the local level)	work with young people and their involvement in solving community issues. After all, young people have less trust in state bodies and more in public organisations (including volunteer ones) and will be more willing to get involved in solving community issues in cooperation with CSI. However, such cases are not unique. The project will help to advocate for support of CSIs working with youth from local budgets. At the II stage, training of MVO in terms of youth policy. At the III stage, the stage envisages the advocacy of opportunities to support CSIs working with youth from local budgets and the implementation of the project in most communities of Ukraine. Partners: Peace Corps (in terms of providing small grants for the project activities of youth NGOs), Council of Europe project "Youth for Democracy in Ukraine: Phase II", ISAR "Union"	of the CSI about the possibilities of support from local self-government bodies for the implementation of effective activities in the community has increased; 4) increased the number of IGSs that received grants for the implementation of youth initiatives/projects in the community. 5) the number of communities where local governments allocate funds for the holding of project competitions among CSIs has increased.
